## The Interview Assignment

One of the classes I teach is Introduction to Small Business. This is the beginning class of the certificate and deals with the basic topics of starting and running a business. Twice during the semester I give the students the assignment of interviewing an entrepreneur or business owner to get a "real world" perspective on what it is like to start, run and grow a business. Over the years this assignment, more than any other, has been the most help to students in the initial stages of starting a business. What they learn by doing this assignment gives them the best possible education on the businesses they want to start. They always learn things that I could not teach them, and many times make connections and opportunities that truly help them succeed. In all cases, they are getting the best research possible on starting their dream business. Whenever I speak to groups on starting a business and mention that I give this assignment and how much the students get out of it, I get asked for the list of questions the students are required to answer. I also get asked such things as: -How do I approach a business owner? -Why would they want to help me? -Should I tell them I'm starting a business just like theirs? Finally one day it dawned on me that this process of interviewing another business owner in the industry that your new business is in, is another one of these great tools that help new entrepreneurs get the best education and the best research to help their new business succeed. But in order for this tool to be truly effective, it needs more explanation than just a list of questions to ask. The whole process needs to be drawn out and explained in detail. This is exactly what this book does!~ Bob Voss

## Taboo Business Questions

Taboo Business Questions is a business book unlike any other you've ever read. It will challenge you. It will help you process business ideas. It will allow you access to a community of great minds with a wide variety of viewpoints. Simply put; it will help you answer questions you didn't even know you had so your business can thrive. I specifically wrote this book for entrepreneurs, small business owners, and business leaders, probably just like you. It started out with this crazy idea. An idea that small business owners had these certain questions they needed answered. But, didn't know how to (or didn't want to) ask. I believe that when a question can be phrased just right, the answer becomes obvious. So, I've set out to help you and many others get your answers. Throughout my time consulting, I've noticed that business owners are of a different breed. Maybe you've noticed this, too! They work these crazy hours, take on stress like it's no big deal, and never want to let it be known that they don't know something in their business. This is exactly why I wrote Taboo Business Questions. I recognized that business owners' egos get in the way from allowing them to ask the tough questions necessary to grow their business. Avoiding these questions tends to hurt a business's growth. So, I took seven taboo business topics and reformatted them into Taboo Business Questions. The whole goal with this book is to create a safe place where business owners can find a process to answering challenging questions about their business and keep their egos intact. I formatted each answer in the form of a process. I didn't want the book to be a "formulas and spreadsheets" type of business book. Everyone has a unique business. I didn't want the book to be filled with case studies on businesses from the 60s and 70s by an armchair quarterback. What good is that going to do? Business owners today need tools they can use and a process they can follow. Part of this process is accessing and participating in the forum I created on my website. It goes hand-in-hand with the whole premise of the book. With this forum, collaboration can happen organically among business owners, entrepreneurs, and other business savvy individuals with anonymity. I hope you enjoy the process!

## 101 Entrepreneur Questions and Answers

Part of the Nantchev's Nuggets of Knowledge series Pure actionable knowledge. NO fluff. NO theory. Just Results and Success. To be or not to be an entrepreneur, that is the questions that this book solves. I collected together 101 question to help clear our some misconceptions that people may have when it comes to being an entrepreneur. These questions and answers are based on my experiences and in the attempt to persuade more people to become an entrepreneur. To build a better life for themselves and to do what they love- not living a life begrudgingly and with regret, but to live your life to the fullest. One of the regrets of the people on their deathbeds is that they did not take more challenged, expanded their comfort zones and nor did they travel as much. So, I want to help you and enlighten you with what it takes to be an entrepreneur. Often people want to become an entrepreneur, but they don't always know how to become one, so I decided to write this book about how people can become entrepreneurs. Because there is an entrepreneurial revolution happening and the world is changing. Questions and topics that are covered in this book helps you achieve the entrepreneurial mindset.

### Young Entrepreneur World

At the age of 14, Sabirul Islam became an entrepreneur by founding a web design company, whilst growing up in an underprivileged area of East London. When he was 16, he was lecturing teenagers at schools, colleges and universities about what it takes to become a young entrepreneur. In this book, Sabirul Islam presents 25 individuals, who all started out as entrepreneurs in their teenage years, and who have recently gone on to become successful and inspiring role models. Each young entrepreneur is profiled and answers questions about their journey and successes, providing rare insights into and lessons from the world of young entrepreneurs. Those profiled come from all over the world – Europe, the US, Asia and Australia. Branded the “lost generation”, this book will challenge and inspire young people of today to create a successful and fulfilling future for themselves.

### The Art of the Interview

Free Bonus Giveaway at the End of the Book! Here's a quick question: What would you do if your boss ordered you to do something that is against your values? No, that's not a trick question because it is actually asked by most interviewers! If you are not sure what the best answer is, then what you can do is find the right guidance. The good news is that you can find the help you need from this book! In this book, you will discover the steps on how to prepare for any interview. But most importantly, you will be able to answer the most commonly asked interview questions. Each chapter will take you deeper into the sea of commonly asked interview questions and provide you with the right strategies as well as concrete sample responses on how to respond to every one of them. The questions range from the most basic, such as "How well do you manage your time?" to the most - shall we say - unusual, such as "How many cows does the state of Georgia have?" This guide is for anyone who is planning on going to any interview, regardless of whether you are applying for your much desired position at your dream company or a top MBA program. The purpose of this guide is to help you think for yourself and, at the same time, provide you with insider tips that usually only interviewers know. So update your resume, polish those black shoes, iron that dress shirt, and start practicing answering all the interview questions you could think of.

### Lean B2B

Get from Idea to Product/Market Fit in B2B. The world has changed. Nowadays, there are more companies building B2B products than there's ever been. Products are entering organizations top-down, middle-out, and bottom-up. Teams and managers control their budgets. Buyers have become savvier and more impatient. The case for the value of new innovations no longer needs to be made. Technology products get hired, and fired faster than ever before. The challenges have moved from building and validating products to gaining adoption in increasingly crowded and fragmented markets. This, requires a new playbook. The second edition of Lean B2B is the result of years of research into B2B entrepreneurship. It builds off the unique Lean B2B Methodology, which has already helped thousands of entrepreneurs and innovators around the world build successful businesses. In this new edition, you'll learn: - Why companies seek out new products, and why they agree to buy from unproven vendors like startups - How to find early adopters, establish your credibility, and convince business stakeholders to work with you - What type of opportunities can increase the likelihood of building a product that finds adoption in businesses - How to learn from stakeholders, identify a great opportunity, and create

a compelling value proposition - How to get initial validation, create a minimum viable product, and iterate until you're able to find product/market fit This second edition of Lean B2B will show you how to build the products that businesses need, want, buy, and adopt.

### Entrepreneurship and Social Innovation for Sustainability

This book aims to assess the roles of entrepreneurship and social innovation for socio-cultural changes. It also evaluates farmers' performance in disaster risk management at a community level toward sustainable regional development in a rural haor region of Bangladesh. To achieve the purpose of the research, both a qualitative method (Trajectory Equifinality Modeling, TEM) and a quantitative method (Structural Equation Modeling, SEM) are introduced, based on the results of case studies on local entrepreneurs, interview and focus group discussions with stakeholders, and questionnaire surveys of farm households. First, the results clarify that social capital is critically important both for male and female entrepreneurs in the haor region, and that education is more important to women for empowerment and technology adoption in the entrepreneurial ecosystem in the haor region of Bangladesh. In addition, it makes clear that the Common Interest Group approach plays a role for women's empowerment in the target region. Furthermore, it identifies the multi-causal relationships among the factors affecting farm households' performance in disaster risk management at the community level. This book helps readers to understand regional development through social and cultural transformation in a rural community where poverty and gender discrimination are path-dependent problems.

### Marketing for Entrepreneurs

Poor marketing is often cited as a reason behind the failure of entrepreneurial ventures, even when the idea in the first place may have been sound. This title moves beyond the classic theory and demonstrates the application of marketing in an entrepreneurial context.

#### Productive, Unproductive and Destructive Entrepreneurship

Drawing on Baumol's concepts of productive, unproductive and destructive entrepreneurship and relevant amendments, this book develops a conceptual framework which allows operationalising the concepts for empirical assessment. Using data from a longitudinal survey, the author further makes one of the first attempts to address these concepts empirically. The results show the importance of shifting the focus from firms' activities to output on both, venture and societal levels, short and long term. Overall, the findings suggest that productive entrepreneurs are less involved in behaviour such as tax avoidance or illegal business and show a higher level of entrepreneurial orientation.

#### Handbook of Research Methods on Social Entrepreneurship

Defining 'social entrepreneurship' has in the past proved problematic, and debate continues concerning what it does and does not entail and encompass. This unique book frames the debates surrounding the phenomenon and argues that many of the difficulties relating to the study of social entrepreneurship are rooted in methodological issues. Highlighting these issues, the book sets out ideas and implications for researchers using alternative methodologies. Contributors expertly present practical guides for researchers, setting out appropriate strategies and methods that can be adopted to explore and understand social entrepreneurship. Chapters deal with research strategies such as storytelling, action research and the case study, as well as the methods appropriate for understanding discourse, large data sets, and networks. The book also explores some challenges for researchers, and will be of particular interest to early career researchers or researchers first approaching the field.

#### Diploma in Entrepreneurship - City of London College of Economics - 6 months - 100% online / self-paced

Business in the beginning of the 21-st century faces very turbulent times as the developments on the debt-crises have threatened the European market. These turbulent times are characterized by doubts on financial markets, the rising of state taxes and inflation, which turns also in difficulties for small and medium sized enterprises. Especially the group of small and medium sized enterprises, which cannot benefit from economies of scale and scope and other advantages, are threatened the most. It requires special alertness in spotting ideas and to combine resources to overcome this entrepreneurial disaster crossing Europe. Especially for small export-oriented countries like Slovakia, which depends on foreign trade, must handle this situations very patient and carefully in order to protect their own small and medium sized enterprises and thus its employment rate. [...] Accordingly this thesis represents a complex view about portfolio entrepreneurs with special focus on a region of the Slovak Republic, which is the country of analysis. It delivers new insights about the personality and abilities, capabilities, skills and traits of portfolio entrepreneurs. Thus delivers a special significance for the development of portfolio entrepreneurship, which is derived from the entrepreneurship research. Furthermore this diploma thesis represents a kind of forerunner in this research area for the Slovak Republic as no comparable research done on this theme could be researched during the conducting of the analysis. The reader will have the chance to find out valuable information about the state of the art literature contributed by other authors in the theoretical part of this thesis. This literature research has been developed from English speaking literature and is notified at the end of the diploma thesis, what makes it affordable for subsequent studies. Subsequently, the results of this study, which has been built on the grounds of extensive literature review, will be presented

... the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field, and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs, but alignments of critical insight and utility. This is where qualitative work can make a difference to the field, and where this book makes its mark. Robin Holt, International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done, are doing and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future! Björn Bjerke, University of Kalmar, Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic, discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this Handbook, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan Ulijn, Eindhoven University of Technology, The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches. This book is not simply a handbook of qualitative research methods, though it well achieves this aim, it is also an important contribution towards the field of entrepreneurship research. From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory, and, just as importantly, illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how to advice. By clarifying what these research methods entail, how they are currently being used and how they can be evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching and teaching entrepreneurship.

### Handbook of Qualitative Research Methods in Entrepreneurship

M. Nicole van Dam has written a unique thinking and talking points guide for the entrepreneur, "SuperQuick(r) Savvy Business Thinking Points & Interviews," now available in paperback. "SuperQuick(r) Savvy Business Thinking Points & Interviews" provides enjoyable and fruitful conversation, interview and conference panel moderation guidance that will also enhance your own business planning process. This book is a great interview, Q&A and Conversational get-to-know guide for Entrepreneurs, Memoir Writers, Educators and Conference Facilitators, as well as an excellent way for any entrepreneur to prepare for meetings with investors, and for any business speaker to prep for an upcoming speaking engagement. As background, the best way to explore the steps you (or your audience) need to think about in developing your own business, is to learn from the trials and triumphs of others who ultimately have achieved success. The good news is, successful people generously willing to share their wisdom are all around us. In fact, everyone you meet has an interesting history - wonderful experience, lessons to share - and this book outlines some questions that will help you find the gift of wisdom that is within each individual. As a teacher of entrepreneurship and innovation, M. Nicole van Dam brought industry leaders, innovators, funders and investors, including successful entrepreneurs and CEOs - collectively representing more than a billion dollars in net worth each semester - to share their wisdom with her entrepreneurship and innovation classes. The fact that this was possible is a testimony to the generosity of these wonderful guest lecturers. Most of these guest lecturers participated in Nicole's classes semester after semester, which was a great gift to each student. In order to make the most of the guest

lecture experience for her students, Nicole, using her own MBA/JD expertise and experience in the field, developed these specialized interview questions for these generous and successful, innovative people to answer in the class room. Because of the many requests for Nicole's interview outlines, Nicole has published this "SuperQuick(r) Savvy Business Thinking Points and Interviews" book, to make it easier for others to ask the right questions to enjoy the most fruitful conversation. This Book will show you how to harness the power of the conversation to learn from successful entrepreneurs, innovators, creatives and leaders! An extra benefit from this book is that looking at these questions will help you create your own business and strategic plan. If you have been asked to be a guest lecturer or are about to pitch your business to investors, the thinking points will help you prepare and organize your thoughts.

### SuperQuick Savvy Business Thinking Points and Interviews

This book analyses policy making processes at the micro-level and offers a unique insight into the fascinating world of policy entrepreneurs, elucidating their strategic *modus operandi*. The author identifies change strategies and explores the role of individuals in policy change processes. Readers will see how these highly talented and exceptional bureaucrats are constantly on the alert for new opportunities and have the capacity to "sell" and "market" new ideas. Based on a uniquely comprehensive four-year study, entailing more than 60 in-depth interviews and an extensive survey of over 300 water policy entrepreneurs in the Netherlands, this book explores the different strategies that policy entrepreneurs employ. It identifies which conditions affect the policy entrepreneur's selection of strategies and more importantly, it assesses the (contextual) effectiveness of these strategies. Although the context of the study makes this work directly relevant to those in the fields of water resources and environmental management, it delivers universally relevant conclusions on affecting policy change. In addition to the theoretical material that will appeal to scholars and students, this book highlights a series of concrete recommendations for practitioners on how to affect policy change, making it of interest to academics and decision makers in the broad areas of policy change, sustainability and water management.

### Policy Entrepreneurs in Water Governance

One of the most challenging tasks in the research design process is choosing the most appropriate data collection and analysis technique. This Handbook provides a detailed introduction to five qualitative data collection and analysis techniques pertinent to exploring entrepreneurial phenomena. Techniques for collecting and analysing data are rarely addressed in detail in published articles. In addition, the constant development of new tools and refinement of existing ones has meant that researchers often face a confusing range from which to choose. The experienced and expert group of contributors to this book provide detailed, practical accounts of how to conduct research employing focus groups, critical incident technique, repertory grids, metaphors, the constant comparative method and grounded theory. This Handbook will become the starting point for any research project. Scholars new to entrepreneurship and doctoral students as well as established academics keen to extend their research scope will find this book an invaluable and timely resource.

### Handbook of Qualitative Research Techniques and Analysis in Entrepreneurship

As the global economy continues to evolve, the idea of sustainability has become a prevalent area of concentration. Businesses are searching for more environmentally and socially conscious practices as the market distances itself from the industrial age. Implementing sustainable initiatives starts with entrepreneurs, as these individuals are the foundation for creating and building profitable societies. Understanding the practice of sustainable entrepreneurship is pivotal in predicting future trends in business and the economy. Building an Entrepreneurial and Sustainable Society provides emerging research exploring the theoretical and practical aspects of sustainability within entrepreneurship and its applications in modern socioeconomics. Featuring coverage on a broad range of topics such as public

policies, internationalization, and social innovation, this book is ideally designed for entrepreneurs, business specialists, professionals, researchers, managers, economists, educators, scholars, and students seeking current research on the evolution of sustainable entrepreneurship and its contextual factors.

### Building an Entrepreneurial and Sustainable Society

### Developments in Information & Knowledge Management for Business Applications

If Owen Chase can't find a way to turn his company around in the next nine days, he'll be forced to shut it down and lay off all of his employees. He has incurred substantial debt and his marriage is on shaky ground. Through pure happenstance, Owen finds himself pondering this problem while advancing steadily as a contestant at the World Series of Poker. His Las Vegas path quickly introduces him to Samantha, a beautiful and mysterious mentor with a revolutionary approach to entrepreneurship. Sam is a fountain of knowledge that may save his company, but her sexual advances might prove too much for Owen's struggling marriage. *All In Startup* is more than just a novel about eschewing temptation and fighting to save a company. It is a lifeline for entrepreneurs who are thinking about launching a new idea or for those who have already started but can't seem to generate the traction they were expecting. Entrepreneurs who achieve success in the new economy do so using a new "scientific method" of innovation. *All In Startup* demonstrates why four counterintuitive principles separate successful entrepreneurs from the wanna-preneurs who bounce from idea to idea, unable to generate real revenue. You will likely get only one opportunity in your life to go "all in" in on an idea: to quit your job, talk your spouse into letting you drain the savings account, and follow your dream. *All In Startup* will prepare you for that "all in" moment and make sure that you push your chips into the middle only when the odds

are in your favor. This book holds the keys to significantly de-risking your idea so that your success appears almost lucky. Join Owen and Sam for this one-of-a-kind journey that will set you on the right path for when it's your turn to put everything on the line.

The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little. As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right. Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

### The Mom Test

Consumers have, to a large extent, become their own producers; they are more aware of marketing and are active in adding value to the products and experiences they want. By assessing customers as active agents rather than passive consumers, Björn Bjerke explores alternative ways of marketing for new businesses and social entrepreneurial ventures.

FROM ANDREW WARNER: I first interviewed Paul Graham after I heard something shocking from Alexis Ohanian, a founder whose company was funded by Graham's Y Combinator. Alexis came to Mixergy to tell the story of how he launched and sold Reddit. If you're a founder, you know the kind of problems that founders have, right? Figuring out what product to create, how to build it, how to get users to try it, etc. Well Alexis didn't seem to have those problems, or at least they weren't as challenging for him as they were for most of the other 600 entrepreneurs I interviewed on Mixergy. Why? Because Paul Graham helped him launch his business. How did Graham make Reddit's launch easier and more successful than other companies' founding? How did he do the same for hundreds of other startups? And, more importantly, what can you learn from his experiences to grow your business? The book you're holding has those answers. Use what you're about to learn to build your successful startup. After you do, I hope you'll let me interview you so other founders can learn from your experience, the way you're about to benefit from Graham's.

### Alternative Marketing Approaches for Entrepreneurs

Now available in paperback—with a new preface and interview with Jessica Livingston about Y Combinator! *Founders at Work: Stories of Startups' Early Days* is a collection of interviews with founders of famous technology companies about what happened in the very earliest days. These people are celebrities now. What was it like when they were just a couple friends with an idea? Founders like Steve Wozniak (Apple), Caterina Fake (Flickr), Mitch Kapor (Lotus), Max Levchin (PayPal), and Sabeer Bhatia (Hotmail) tell you in their own words about their surprising and often very funny discoveries as they learned how to build a company. Where did they get the ideas that made them rich? How did they convince investors to back them? What went wrong, and how did they recover? Nearly all technical people have thought of one day starting or working for a startup. For them, this book is the closest you can come to being a fly on the wall at a successful startup, to learn how it's done. But ultimately these interviews are required reading for anyone who wants to understand business, because startups are business reduced to its essence. The reason their founders become rich is that startups do what businesses do—create value—more intensively than almost any other part of the economy. How? What are the secrets that make successful startups so insanely productive? Read this book, and let the founders themselves tell you.

### Paul Graham: The Art of Funding a Startup (A Mixergy Interview)

Agricultural entrepreneurs in conflict and post-conflict regions face special challenges; not just everyday personal risks, but also the difficulties of building small businesses when real or threatened violence can disrupt business growth cycles and economic security. Alongside establishing secure institutions,

building a secure economy is rightly seen as the best way for conflict-torn regions to establish a peaceful future. But current agricultural entrepreneurship training and development starts from an assumption of peace, meaning that it is not always fit for purpose. The result is sub-optimal program design and inefficient use of resources. A product of a collaboration of experts in the fields of agri-business, agricultural marketing, and international development, this book gives officials and agencies developing entrepreneurship programs the practical real-life examples they need.

#### Hungry for Profit

Millions go hungry every year in both poor and rich nations, yet hundreds of thousands of peasants and farmers continue to be pushed off the land. Applied in increasing volumes, chemical pesticides and synthetic fertilizers deplete the soil, pollute our food and water, and leave crops more vulnerable to pest outbreaks. The new and expanding use of genetically engineered seeds threatens species diversity. This penetrating set of essays explains why corporate agribusiness is a rising threat to farmers, the environment, and consumers. Ranging in subject from the politics of hunger to the new agricultural biotechnologies, and in time and place from early modern Europe to contemporary Cuba, the contributions to *Hungry for Profit* examine the changes underway in world agriculture today and point the way toward organic, sustainable solutions to problems of food supply.

This food policy report presents a typology of the diverse livelihood strategies and development pathways for smallholder farmers in developing countries, and offers policy recommendations to help potentially profitable smallholders meet emerging risks and challenges. Main Findings Smallholder farmers in developing countries play a key role in meeting the future food demands of a growing and increasingly rich and urbanized population. However, smallholders are not a homogeneous group that should be supported at all costs. Whereas some smallholder farmers have the potential to undertake profitable commercial activities in the agricultural sector, others should be supported in exiting agriculture and seeking nonfarm employment opportunities. For smallholder farmers with profit potential, their ability to be successful is hampered by such challenges as climate change, price shocks, limited financing options, and inadequate access to healthy and nutritious food. By overcoming these challenges, smallholders can move from subsistence to commercially oriented agricultural systems, increase their profits, and operate at an efficient scale—thereby helping to do their part in feeding the world's hungry.

**Abstract:** The concepts of why hunger exists and how the causes are being attacked are presented in the light of a new attitude toward old ideas. The world is capable of producing enough food for every human being. Overpopulation is not the cause; underutilization of land is a far worse problem. Hunger is not caused by food scarcity but by unequal distribution and ownership. These inequalities can be overcome without jeopardizing freedom, justice or the quality of the environment, not through increased foreign aid or limiting agricultural exports, but by attacking the roots of the problems: social attitudes which view the world's hungry not as potential producers but as burdens; control of basic resources by a small minority; concepts which stereotype the poor as incapable; and ineffectual foreign aid.

Over the past thirty years, the ability of global finance to affect aspects of everyday life has been increasing at an unprecedented rate. The world of food bears vivid testimony to this tendency, through the scars opened by the 2008 world food price crisis, the iron fist of retailing giants that occupy the supply chain and the unsustainable ecological footprint left behind by global production networks. Hungry Capital offers a rigorous analysis of the influence that financial imperatives exert on the food economy at different levels: from the direct use of edible commodities as an object of speculation to the complex food chains set up by manufacturers and supermarkets. It argues that the circular compulsion to build profits upon profits that global finance injects into the world of food restructures the basic nurturing relationship between man and nature into a streamlined process from which value has to be mined. The end result is a monstrous Leviathan that holds together while – at every step – risks to crumble. ,

Hunger is a daily reality for a billion people. More than six decades after the technological discoveries that led to the Green Revolution aimed at ending world hunger, regular food shortages, malnutrition, and poverty still plague vast swaths of the world. And with increasing food prices, climate change, resource inequality, and an ever-increasing global population, the future holds further challenges. In One Billion Hungry, Sir Gordon Conway, one of the world's foremost experts on global food needs, explains the many interrelated issues critical to our global food supply from the science of agricultural advances to the politics of food security. He expands the discussion begun in his influential The Doubly Green Revolution: Food for All in the Twenty-First Century, emphasizing the essential combination of

increased food production, environmental stability, and poverty reduction necessary to end endemic hunger on our planet. Conway addresses a series of urgent questions about global hunger: • How we will feed a growing global population in the face of a wide range of adverse factors, including climate change? • What contributions can the social and natural sciences make in finding solutions? • And how can we engage both government and the private sector to apply these solutions and achieve significant impact in the lives of the poor? Conway succeeds in sharing his informed optimism about our collective ability to address these fundamental challenges if we use technology paired with sustainable practices and strategic planning. Beginning with a definition of hunger and how it is calculated, and moving through issues topically both detailed and comprehensive, each chapter focuses on specific challenges and solutions, ranging in scope from the farmer's daily life to the global movement of food, money, and ideas. Drawing on the latest scientific research and the results of projects around the world, Conway addresses the concepts and realities of our global food needs: the legacy of the Green Revolution; the impact of market forces on food availability; the promise and perils of genetically modified foods; agricultural innovation in regard to crops, livestock, pest control, soil, and water; and the need to both adapt to and slow the rate of climate change. *One Billion Hungry* will be welcomed by all readers seeking a multifaceted understanding of our global food supply, food security, international agricultural development, and sustainability.

From reviews of the first edition (1994): "Extraordinarily well written . . ." --Contemporary Sociology "A readable chronicle aimed at a general audience . . . Graceful and accessible . . ." --Dollars and Sense "Has the potential to be a political bombshell in radical circles around the world." --Environmental Action The Vulnerable Planet has won respect as the best single-volume introduction to the global economic crisis. With impressive historical and economic detail, ranging from the Industrial Revolution to modern imperialism, The Vulnerable Planet explores the reasons why a global economic system geared toward private profit has spelled vulnerability for the earth's fragile natural environment. Rejecting both individualistic solutions and policies that tinker at the margins, John Bellamy Foster calls for a fundamental reorganization of production on a social basis so as to make possible a sustainable and ecological economy. This revised edition includes a new afterword by the author.

"O'Boyle has researched and written a monumental book that should be mandatory reading for all CEOs and anyone concerned with business ethics." --The Philadelphia Inquirer "Superb . . . a spirited study of General Electric, and of its sometimes brilliant, sometimes bungling, but always ruthless boss, Jack Welch." --Chicago Sun-Times With convincing passion and meticulous research, Thomas F. O'Boyle explores the forces behind General Electric's rise to the top of Wall Street, questioning if GE, with chief executive officer Jack Welch at the helm, is still "bringing good things to life." Welch--explosive, profit-hungry, and pragmatic--catapulted GE's stocks to the top, up 1,155 percent from 1982 to 1997. O'Boyle argues that these astounding results have come only with the heavy price of employees' lives, blighted under the tyranny of "Neutron Jack" Welch, so named for his bomb-like ability to eliminate staff without disturbing surrounding operations. During Welch's reign, hard-nosed success tactics--unblinking downsizing, ruthless acquisition negotiations, and the virtual abandonment of manufacturing in favor of the more glamorous entertainment and financial services industries--coexist with scandals like price-fixing, pollution, and defense contract fraud. Sure to spark controversy, this gripping, comprehensive account begs the greater question: Is Jack Welch's GE a model company for business in the next century, or is it time to change the way the world does business? "Smoothly written and thoroughly researched." --USA Today "This book makes a valuable contribution to our understanding of corporate America. . . . Thomas F. O'Boyle persuades you that GE--Jack Welch's GE--brings bad things to life. In abundance." --Washington Monthly

### At Any Cost

In *The Hungry Spirit*, one of the most visionary business thinkers of our age offers a powerful argument for reexamining the role of work in our lives and discovering what we are truly meant to do and to be. Calling on individuals and organizations to find purpose in the journey we take rather than focusing on money and profits, which are simply the means to keep us going, Handy shows how we can all better ourselves and our companies while also contributing to a decent society. As an oil executive, world-renowned economist, consultant, and professor at the London Business School, Handy himself

was once no stranger to the trappings and fortunes of capitalism. But several years ago, Handy realized that he, like many of us, had placed too much significance on job titles and career success to the exclusion of his family, friends, and, especially, the fulfillment of his need to become a complete person, not just a worker slaving away in corporate machinery. He set about looking for what he calls his "white stone" - a symbol of the higher self that represents our true destiny, what you can become when you don't let titles and money and societal pressures get in the way. Just as Handy urges all of us to seek our "white stone" and take greater responsibility for shaping our lives, he also entreats companies and organizations to push themselves to new heights by sticking to a clear-cut purpose. Companies, like individuals, can only grow if they embrace risk and break rules and attract people looking to turn dreams and new ideas into businesses that consumers and investors are excited about. Rather than trying to rally coworkers around a quarterly profit goal, companies must treat employees as citizens, as well as behaving as corporate citizens within the wider community. Handy calls for corporations to take a greater role in upholding the moral structure of society and to use their power to distribute knowledge and wealth to those who need the opportunity to develop - which will one day benefit us all.

The essays in this volume, by veteran economists as well as younger scholars, are part of a radical attempt to grapple with the problems of advanced capitalist development without discarding the real theoretical breakthroughs made by Keynes. The contributors argue that Keynes was correct in pointing to the economic contradictions stemming from unemployment, income inequality, and speculative finance, but failed to consider the class composition of social output, the macroeconomic effects of the modern firm, and the atrophy of investment under conditions of capitalist maturity. They thus seek to uncover the sources of stagnation under monopoly capitalism by building on the work of three of the great economists of modern times: Marx, Keynes, and Kalecki.

### Faltering Economy

The advertising industry has reached a critical, dangerous point in its development. Agencies are destroying themselves with growing workloads and declining fees--a recipe for disaster. Madison Avenue Manslaughter outlines the hows and whys of steadily declining fees, increased workloads, diminishing industry morale, kickback scandals and opacity characterizing relationships among advertisers, holding companies, media buying companies and creative ad agencies. Not only does Michael Farmer's exposé offer the world's first effective definition of the real agency problem, it's the first time an advertising expert has offered corrective solutions to avoid inevitable disaster. Michael Farmer's Madison Avenue Manslaughter has been called "required reading for everyone who works in advertising--marketers and agencies alike."

In the decades after 1945, as colonial possessions became independent states, it was widely-believed that imperialism as a historical phenomenon was coming to an end. The six essays collected in this volume demonstrate that a new form of imperialism was, in fact, taking shape—an imperialism defined not by colonial rule but by the global capitalist market. From the outset, the dominant power in this imperialism without colonies was the United States. Magdoff's essays explain how this imperialism works, why it generates ever greater inequality, repression, and militarism, and the essential role it plays in the development of U.S. capitalism. His concluding essay presciently points out the limits of any attempted reform of the global economy which does not directly challenge the framework of capitalism. Written in the 1960s and 70s, Magdoff's essays constituted a major contribution to Marxist theory and provided a model of rigorous argument in which theory is constantly checked against the economic reality. They provide an indispensable guide to the basic forces at work in the global politics of the twenty-first century.

Earth will have more than 9.6 billion people by 2050 according to U.N. predictions. With resources already scarce, how will we feed them all? Journalist Lisa Palmer has traveled the world for years documenting the cutting-edge innovations of people and organizations on the front lines of fighting the food gap. Here, she shares the story of the epic journey to solve the imperfect relationship between two of our planet's greatest challenges: climate change and global hunger. *Hot, Hungry Planet* focuses on three key concepts that support food security and resilience in a changing world: social, educational, and agricultural advances; land use and technical actions by farmers; and policy nudges that have the greatest potential for reducing adverse environmental impacts of agriculture while providing more food. Palmer breaks down this difficult subject through seven concise and easily-digestible case studies over the globe and presents the stories of individuals in six key regions—India, sub-Saharan Africa, the United States, Latin America, the Middle East, and Indonesia—painting a hopeful picture of both the world we want to live in and the great leaps it will take to get there.

## Hungry Bengal

Quickened souls are hungry souls, and hungry souls need food. Some can eat solid food - and some must be fed with milk. God's word provides for all, and gives a portion to each; and God commands his servants to do so likewise. All believers need to be fed, and this little book is intended to set food before them. If the reader is a hungry soul - he will find something in it to meet his case; though it is probable that for some it may be too simple, and they may turn from it to seek something more to their taste. Solomon, long ago said, "The full soul loathes the honeycomb, but to the hungry soul - every bitter thing is sweet." If the reader derives profit himself, he will do well to recommend the work to others, as also to give or lend copies to the poor. This is one very easy way of doing good, not to one, but to many; not for once, but in perpetuity. When we give a good book, we know not where it will be carried, or how many years it will be preserved. Let us circulate such books, to the utmost of our power, asking God's blessing on our efforts. May both writer and reader be found among the blessed of the Lord. Amen.

Bridges the gap between social and environmental critiques of capitalism In the nineteenth century, Karl Marx, inspired by the German chemist Justus von Liebig, argued that capitalism's relation to its natural environment was that of a robbery system, leading to an irreparable rift in the metabolism between humanity and nature. In the twenty-first century, these classical insights into capitalism's degradation of the earth have become the basis of extraordinary advances in critical theory and practice associated with contemporary ecosocialism. In *The Robbery of Nature*, John Bellamy Foster and Brett Clark, working within this historical tradition, examine capitalism's plundering of nature via commodity production, and how it has led to the current anthropogenic rift in the Earth System. Departing from much previous scholarship, Foster and Clark adopt a materialist and dialectical approach, bridging the gap between social and environmental critiques of capitalism. The ecological crisis, they explain, extends beyond questions of traditional class struggle to a corporeal rift in the physical organization of living beings themselves, raising critical issues of social reproduction, racial capitalism, alienated speciesism, and ecological imperialism. No one, they conclude, following Marx, owns the earth. Instead we must maintain it for future generations and the innumerable, diverse inhabitants of the planet as part of a process of sustainable human development.

## Hungry Corporations

In the fall of 2008, the United States was plunged into a financial crisis more severe than any since the Great Depression. As banks collapsed and the state scrambled to organize one of the largest transfers

of wealth in history, many—including economists and financial experts—were shocked by the speed at which events unfolded. In this new book, John Bellamy Foster and Fred Magdoff offer a bold analysis of the financial meltdown, how it developed, and the implications for the future. They examine the specifics of the housing bubble and the credit crunch as well as situate current events within a broader crisis of monopoly-finance capitalism—one that has been gestating for several decades. It is the "real" productive economy's tendency toward stagnation, they argue, that creates a need for capital to find ways to profitably invest its surplus. But rather than invest in socially useful projects that would benefit the vast majority, capital has constructed a financialized "casino" economy that neglects social needs and, as has become increasingly clear, is fatally unstable. Written over a two-year period immediately prior to the onset of the crisis, this timely and illuminating book is necessary reading for all those who wish to understand the current situation, how we got here, and where we are heading.

### Blue Horizon and Hungry As the Sea

This is the first book to analyse the food industry from a Marxist perspective. Respected economist Robert Albritton argues that the capitalist system, far from delivering on the promise of cheap, nutritious food for all, has created a world where 25% of the world population are over-fed and 25% are hungry. This malnourishment of 50% of the world's population is explained systematically, a refreshing change from accounts that focus on cultural factors and individual greed. Albritton details the economic relations and connections that have put us in a situation of simultaneous oversupply and undersupply of food. This explosive book provides yet more evidence that the human cost of capitalism is much bigger than those in power will admit.

### The Robbery of Nature

Winner, 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago, John Bellamy Foster's *Marx's Ecology: Materialism and Nature* introduced a new understanding of Karl Marx's revolutionary ecological materialism. More than simply a study of Marx, it commenced an intellectual and social history, encompassing thinkers from Epicurus to Darwin, who developed materialist and ecological ideas. Now, with *The Return of Nature: Socialism and Ecology*, Foster continues this narrative. In so doing, he uncovers a long history of efforts to unite issues of social justice and environmental sustainability that will help us comprehend and counter today's unprecedented planetary emergencies. *The Return of Nature* begins with the deaths of Darwin (1882) and Marx (1883) and moves on until the rise of the ecological age in the 1960s and 1970s. Foster explores how socialist analysts and materialist scientists of various stamps, first in Britain, then the United States, from William Morris and Frederick Engels to Joseph Needham, Rachel Carson, and Stephen J. Gould, sought to develop a dialectical naturalism, rooted in a critique of capitalism. In the process, he delivers a far-reaching and fascinating reinterpretation of the radical and socialist origins of ecology. Ultimately, what this book asks for is nothing short of revolution: a long, ecological revolution, aimed at making peace with the planet while meeting collective human needs.

## 202 Services You Can Sell For Big Profits

Who controls what we eat? This book reveals how dominant corporations, from the supermarket to the seed industry, exert control over contemporary food systems. It analyzes the strategies these firms are using to reshape society in order to further increase their power, particularly in terms of their bearing upon the more vulnerable sections of society, such as recent immigrants, ethnic minorities and those of lower socioeconomic status. Yet this study also shows that these trends are not inevitable. Opposed by numerous efforts, from microbreweries to seed saving networks, it explores how opposition to this has encouraged even the most powerful firms to make small but positive changes. This revised edition has been updated to reflect recent developments in the food system, as well as the broad political economic forces that shape them. It also examines the rapidly changing technologies, such as Big Data and automation, which have the potential to reinforce, as well as to challenge, the power of the largest firms.

## World Hunger

Today there are over a billion hungry people on the planet, more than ever before in history. While the global food crisis dropped out of the news in 2008, it returned in 2011 (and is threatening us again in 2012) and remains a painful reality for the world's poor and underserved. Why, in a time of record harvests, are a record number of people going hungry? And why are a handful of corporations making record profits? In *Food Rebellions! Crisis and the Hunger for Justice*, authors Eric Holt-Giménez and Raj Patel with Annie Shattuck offer us the real story behind the global food crisis and document the growing trend of grassroots solutions to hunger spreading around the world. *Food Rebellions!* contains up to date information about the current political and economic realities of our food systems. Anchored in political economy and an historical perspective, it is a valuable academic resource for understanding the root causes of hunger, growing inequality, the industrial agri-foods complex, and political unrest. Using a multidisciplinary approach, Holt-Giménez and Patel give a detailed historical analysis of the events that led to the global food crisis and document the grassroots initiatives of social movements working to forge food sovereignty around the world. These social movements and this inspiring book compel readers to confront the crucial question: Who is hungry, why, and what can we do about it?
