Convert Theory into Solutions: A Corporate Finance Reality Check This hands-on guide to corporate finance focuses on converting the theory and models in corporate finance into tools that can be used to analyze, understand and help any business. Applied Corporate Finance provides a user's perspective to corporate finance, by posing the three major questions that every business has to answer, and then providing the tools and the analytical techniques needed to answer them. The three questions are- * Where do we invest our resources? (The Investment Decision) The first part of the book looks at how to assess risk and develop a risk profile for a firm, convert this risk profile into a hurdle rate, and develops the basic rules that need to be followed in estimating the returns on any investment. * How should we fund these investments? (The Financing Decision) Firms generally can use debt, equity or some combination of the two to fund projects. This part of the book examines the relationship between this choice and the hurdle rate to be used in analyzing projects, and presents ways in which the financing decision can be used to maximize firm value. It also sets up a framework for picking the right kind of security for any firm. * How much cash can and should we return to the owners? (The Dividend Decision) The third part of the book establishes a process that can be used to decide how much cash should be taken out of the business, and in what form - dividends or stock buybacks. The final chapter in the book ties in the value of the firm to these three decisions, and provides insight into how firms can enhance value. In summary, this is a book about coming up with real solutions to real problems, using real-time data on real companies.

Entrepreneurship Programs and the Modern University

At IUs Kelley School of Business, we believe in the power of entrepreneurial thinking, with a relentless pursuit of excellence in the research and teaching of entrepreneurship and innovation across our entire campus. This book on academic entrepreneurship offers one of the most comprehensive approaches to understanding the framework and strategies for building effective entrepreneurship programs within universities today. I truly believe all universities, regardless of their current stage of development of their entrepreneurship programs, will materially benefit from the ideas in this book. Daniel C. Smith, former Dean, Kelley School of Business, Indiana University and current CEO, Indiana University Foundation, US I am a believer in the concept of the entrepreneurial university, and think our institutions of higher learning must learn to think and act in more entrepreneurial ways. The kind of entrepreneurial culture which this book champions can transform student lives, invigorate university campuses, and make a fundamental difference in our communities. Burns Hargis, President, Oklahoma State University, US After more than 30 years of impressive growth, what have we learned about building world-class entrepreneurship programs within universities? After tracing the evolution of entrepreneurship within institutions of higher learning, the authors explore the key elements that constitute a comprehensive entrepreneurship program. Best practices at leading universities and differing kinds of academic environments are highlighted. They examine multiple aspects of program management and infrastructure, including curriculum and degree program development, where entrepreneurship is administratively housed, how it is organized, and approaches to staffing and resource acquisition. The perspectives shared in the book enable university presidents, entrepreneurship students, provosts, deans, entrepreneurship program directors, faculty members, and others to better capitalize upon the empowering and transformative potential of entrepreneurship.

UNSCRIPTED

What if Life Wasn't About 50 Years of Wage-Slavery, Paying Bills and then Dying? Tired of sleepwalking through a mediocre life bribed by mindless video-gaming, redemptive weekends, and a scant paycheck from a soul-suffocating job? Welcome to the SCRIPTED club— where membership is neither perceived or consented. The fact is, ever since you've been old enough to sit obediently in a classroom, you have been culturally engineered for servitude, unwittingly enslaved into a Machiavellian system where illusionary rules go unchallenged, sanctified traditions go unquestioned, and lifelong dreams go unfulfilled. As a result, your life is hijacked and marginalised into debt, despair, and dependence. Life's death sentence becomes the daily curse of the trivial and mundane. Fun fades. Dreams die. Don't let life's consolation prize become a car and a weekend. Recapture what is yours and make a revolutionary repossession of life-and-liberty through the pursuit of entrepreneurship. A paradigm shift isn't needed—the damn paradigm needs to be thrown-out altogether. The truth is, if you blindly follow conventional wisdom pushed by conventional people living conventional lives, can you expect to be anything but conventional? Rewrite life's script: ditch the job, give Wall Street the bird, and escape the

insanity of trading your life away for a paycheck and an elderly promise called retirement. UNSCRIPT today and start leading life— instead of life leading you.

Handbook of Geriatric Care Management

A comprehensive guide for Geriatric Care Managers (GCMs) to help define duties and procedures while providing guidelines for setting up a geriatric care practice. --from publisher description.

Business Basics

Business Basics provides would-be entrepreneurs who are planning to start up a first business, experienced entrepreneurs who are preparing to start another business, and leaders of existing businesses with wisdom and directions to accomplish 8,000 times more. The book's 52 lessons are based on the most extensive investigations ever conducted into making business breakthroughs with existing resources, and the lessons show how to:

- prepare for leading an extraordinarily successful enterprise
- expand a market's size by twenty times and profitably gain market share while doing so
- cut a company's costs (and those of its stakeholders) for providing and using an offering by 96 percent
- decrease the investments needed to provide and use an offering by 96 percent

As a result, revenues grow by much more than twenty times. Profits expand by more than 400 times as revenues soar, while unit costs plunge. Free cash flow is much more than 8,000 times larger because growth requires little or no new investment. The value of a business also expands by more than 8,000 times. Other stakeholders receive exponential benefit gains as well. In contrast to its title, Business Basics is also an advanced book that assumes knowledge of and facility in several of the books developed by the 400 Year Project (founded in 1995 to demonstrate how to accomplish improvements in less than one year that normally take at least twenty years to achieve: see at www.fastforward400.com) including The 2,000 Percent Solution, The 2,000 Percent Solution Workbook, The Irresistible Growth Enterprise, The Ultimate Competitive Advantage, The 2,000 Percent Squared Solution, and 2,000 Percent Living. Your time and attention in reading and applying those books will be well repaid by upgrading your knowledge, skills, and resources for breakthroughs you want to accomplish. Business Basics is designed to be read and applied over at least a year. The book's messages are captured in fifty-two lessons presented in the four parts that correspond to the four breakthrough questions listed earlier. Each lesson contains assignments for you. Some of the assignments can be done in a few hours. Completing other assignments may well extend over several months. Think of Business Basics as a book that combines theory, advanced practices, and directions for applied work. Each lesson has been tested by members of The Billionaire Entrepreneurs' Master Mind, a group of entrepreneurs around the world that was founded in 2006. I serve as the research coordinator for the group, and I authored all of the lessons developed so far (exceeding 290 and growing). The fifty-two lessons you find in the book are the ones that were most valuable to the study group's members in recent years for answering the four breakthrough questions. Many people incorrectly doubt that businesses can make such exponential gains. I invite such skeptics to read and apply the book with a critical eye to see if what is shared makes sense. Business Basics is also intended to help business leaders who either copy or just slightly improve on the new business models that are created by the book's readers. As a result of such efforts, my goal is to encourage and to assist a million entrepreneurs to succeed in establishing 2,000 percent cubed businesses for the first time. From the resulting business models, I estimate that over a hundred million vastly improved businesses will eventually emerge. The offerings and benefits for stakeholders from such new business models will improve global prosperity in an unprecedented way, one of the goals of the 400 Year Project (to help everyone on Earth improve twenty times faster than normal from 2015 through 2035). I thank you for helping humanity by reading the book and applying its lessons. You will probably never know all of the good that you are doing.

Never Get a Real Job

Young serial entrepreneur Scott Gerber is not the product of a wealthy family or storied entrepreneurial heritage. Nor is he the outcome of a traditional business school education or a corporate executive turned entrepreneur. Rather, he is a hard-working, self-taught 26-year-old hustler, rainmaker, and bootstrapper who has survived and thrived despite never having held the proverbial "real" job. In *Never Get a "Real" Job: How to Dump Your Boss, Build a Business, and Not Go Broke*, Gerber challenges the social conventions behind the "real" job and empowers young people to take control of their lives and dump their nine-to-fives—or their quest to attain them. Drawing upon case studies, experiences, and observations, Scott dissects failures, shares hard-learned lessons, and presents practical, affordable, and systematic action steps to building, managing, and marketing a successful business on a shoestring budget. The proven, no-b.s. methodology presented in *Never Get a "Real" Job* teaches unemployed and underemployed Gen-Yers, aspiring small business owners, students, and recent college graduates how to quit 9-to-5s, become their own bosses, and achieve financial independence.

The Art And Science Of Entrepreneurship

The Art and Science of Entrepreneurship benefits from the author's many years of experience as a serial entrepreneur. By mapping his entrepreneurial journey and relating practice to theory, the author draws useful lessons for aspiring entrepreneurs, especially in making sense of how traits and thinking preferences of entrepreneurs make them successful. Everyone can think like an entrepreneur, no matter what you do in life. The author hopes that his experience will inspire, guide and give confidence to aspiring entrepreneurs who wish to embark on their own entrepreneurship journey to develop a successful start-up.

The Millionaire Fastlane

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market.

This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Community-based Entrepreneurship and Rural Development

How can municipalities in Central Europe create favourable conditions for local business? What and how can municipalities learn from each other? How can each individuals in the local area contribute? And what requirements have to be met before know how can successfully be transferred on a communal level? To answer all these questions, the authors of this book comprehensively discuss the manifold opportunities, restrictions and prerequisites of establishing favourable conditions for small and medium enterprises in rural.

Entrepreneurial Decision-making

This fascinating book aims to provide a deeper understanding of the decision-making processes of entrepreneurs. This is achieved via a comparison of entrepreneurial individuals with different levels of expertise in contexts with varying degrees of potential for entrepreneurial success. This multidisciplinary study is based on entrepreneurship theory and empirical research as well as cognitive psychology. The cognitive perspective provides a link between the entrepreneur and new business creation by focusing on an individual's cognitive behaviour rather than on their personality traits. The essential issues of gathering and application of knowledge and expertise are also addressed: one of the most important implications of the study is that successful entrepreneurial decision-making behaviour can actually be taught and learned. The book concludes, however, that the provision of optimal teaching methods of this decision-making behaviour is a stiff challenge faced by entrepreneurship education. Presenting a novel combination of cognitive psychology and entrepreneurship theory with important practical implications, this book will strongly appeal to those involved in the study of entrepreneurship and cognitive psychology, and business and management. Entrepreneurs themselves will also find much to interest them in this book.

This book presents the seven entrepreneurial activities (SEA) model of new organizational constitution, a prescriptive extension of the four flows model tradition of communicative constitution of organizations (CCO) theory. *Organizational Constitution in Entrepreneurship* explains the SEA model in detail, illustrating it with autobiographical accounts from Deanna Bisel's years of experience as an entrepreneur. The volume explores how entrepreneurial efforts to create and maintain organizations involve interrelated activities. In doing so, it offers a vision of new organizational creation and maintenance as (a) communicative and material, (b) initiated by value propositions, (c) difficult to achieve, (d) having periods of partiality, (e) being the result of constitutive leadership distributed among members, and (f) dependent upon constitutive momentum generated in organizational learning. This unique volume will be a key reference for students and scholars of organizational communication, management, business studies, entrepreneurship, and communication studies.

The tradition of European scholars on entrepreneurship has been consolidated during the last three decades and an increasingly distinct European school of thought has emerged as a consequence. This development provides as solid base for the future development of the field where Europe and its entrepreneurship scholars will play an increasingly prominent role in the development of the field. The distinct focus of the book is key European features – 'contexts matter' – to promote and stimulate what 'European' might mean in any given context. The book valorizes different contexts and key strengths of the European perspective.

But Are You Making Any Money

The challenge faced by family businesses and their stakeholders, is to recognise the issues that they face, understand how to develop strategies to address them and more importantly, to create narratives, or family stories that explain the emotional dimension of the issues to the family. The most intractable family business issues are not the business problems the organisation faces, but the emotional issues that compound them. Applying psychodynamic concepts will help to explain behaviour and will enable the family to prepare for life cycle transitions and other issues that may arise. Here is a new understanding and a broader perspective on the human dynamics of family firms with two complementary frameworks, psychodynamic and family systematic, to help make sense of family-run organisations. Although this book includes a conceptual section, it is first and foremost a practical book about the real world issues faced by business families. The book begins by demonstrating that many years of achievement through generations can be destroyed by the next, if the family fails to address the psychological issues they face. By exploring cases from famous and less well known family businesses across the world, the authors discuss entrepreneurs, the entrepreneurial family and the lifecycles of the individual and the organisation. They go on to show how companies going through change and transition can avoid the pitfalls that endanger both family and company. The authors then apply tools that will help family businesses in transition and offer their analyses and conclusions. Readers should draw their own conclusions from careful examination of the cases, identifying the problems or dilemmas faced and the options for improved business performance and family relationships. They should ask

what they might have done in the given situation and what new insight into individual or family behaviour each case offers. The goal is to avoid a bitter ending.
