Easy and Cheap way to Compress a Brake Caliper Piston Without Any Special Tools - Easy and Cheap way to Compress a Brake Caliper Piston Without Any Special Tools by ScrewsNutsAndBolts 544,024 views 2 years ago 3 minutes, 58 seconds - This is a cheap and simple way to compress a **brake**, caliper piston without the need for any special tools. All you need is a couple ...

Remove the front brake caliper

For the first method you will need two pieces of wood, ideally 10 to 12 inches long

Place the pieces of wood side by side between the two old brake pads

Slowly lever one forward and one back at the same time and with equal force

Slowly push the piston back into the caliper

Here's a side view of the process

The second method uses two screwdrivers to do the same job

Place a piece of wood between the brake pads to take up the extra space

Place the two screwdrivers side by side between the wood and the brake pad

Slowly lever one forward and the other one back and with equal force

The caliper now has plenty of space for the new brake pads !
