Administrative Law - Introduction (Part 1) - Administrative Law - Introduction (Part 1) by iamsamdave 17,106 views 2 years ago 29 minutes - Introduction to Philippine **Administrative Law**, (Part 1)

Intro

ADMINISTRATIVE LAW It is the branch of public law which fixes the organization and determines the competence of administrative authorities, and indicates to the of his rights.

Administrative regulations and policies enacted by administrative which they are entrusted to enforce force of law are entitled to great respect. They Gonzales vs. Lond Bank of the Philippines, Example: Courts do not interfere with the

An administrative decision may properly be amended or set aside only upon clear showing acted with grave abuse of discretion amounting to lack or excess of jurisdiction. There is an abuse of discretion when the same was of judgment which is of discretion must be so

Factual findings of administrative bodies should be accorded not only respect but also finality if they are supported by substantial evidence even overwhelming or preponderant. (Casa Filipino Realty Corporation vs. Office of the President, 241 SCRA 165) 2. Although findings of facts of an administrative agency is persuasive in courts and carries with it a strong presumption of correctness, nonetheless, the interpretation and application

SOURCES OF ADMINISTRATIVE LAW: 1. The Constitution (1.e., Article IX, Section 1 of the 1987 Constitution which provides as follows: "The Constitutional Commissions, which shall be independent, are the Civil Service Commission, the Commission on Elections, and the Commission on Audit"). 2. Statutes creating administrative bodies Example: The Board of Energy was created by Presidential Decree No. 1208, dated October 6, 1977

TWO ASPECTS OF ADMINISTRATION 1. Internal administration - This includes the legal structure or organization of public administration and the legal aspects of each institutional activity i.e., personnel, material, physical and planning activities . 2. External administration - This is concerned with the problems of administrative regulations or the exercise of power for carrying out the ends for which such powers were delegated. (42 Am. Jur., 290)

Administrative Procedure Act - Administrative Procedure Act by GreggU 5,044 views 3 years ago 6 minutes, 29 seconds - The federal **Administrative Procedure**, Act (APA) of 1946 is representative of US **administrative law**, statutes in trying to promote ...

The federal Administrative Procedure Act (APA) of 1946 is representative of US administrative law statutes in trying to promote rationality and lawfulness in agency decision making without imposing overly encumbering procedural requirements.

It specifically seeks to prevent decisions that are arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law; contrary to constitutional right, power, privilege, or immunity; in excess of statutory jurisdiction, authority, or limitations, or short of statutory right.

These objectives are often augmented by other statutes and executive orders that require agencies to use the best science available, engage in cost-benefit analysis, prepare environmental and other impact statements, or promote substantive values such as vibrant federalism and environmental justice.

Except where constitutional law is involved (e.g., the Fourth Amendment's protection against unreasonable searches and seizures), informal decisions are overwhelmingly regulated by individual agency protocol rather than administrative law.

Administrative decisions can also be categorized as retrospective, prospective, or present tense.

Administrative law uses a variety of processes to structure formal decisions of each type and to constrain the administrators making them.

Retrospective decisions require assessing the past behavior of an individual, firm, group, governmental unit, or other entity. They involve questions such as whether a corporation has engaged in illegal false advertising or an unfair labor practice.

Retrospective decisions are often made in an adjudicatory framework. The agency and the regulated party make their cases before a hearing examiner, an administrative law judge, or a commission or board of some kind.

Prospective decisions apply to events in the future. Rulemaking is the clearest example.

Administrative law requirements are generally based on the assumption that prospective decision making on complex matters will be more rational when it is open to public scrutiny and participation. Present tense decisions often involve questions of eligibility or immediate compliance with a regulatory requirement.

Many licensing decisions are present tense and strongly regulated by administrative law statutes. It is often difficult to establish or maintain the balance that administrative law seeks to secure between constraining discretion and allowing administrators enough flexibility to carry out their legislative mandates cost-effectively.

The most important federal statute concerning the operations and function of federal administrative agencies is the Administrative Procedure Act

The provisions of the APA apply to all federal agencies

The extent of the required due process depends on a number of factors
When an agency acts to promote a broad policy based on generalized facts
Congress may require that agencies provide adjudicatory hearings for those impacted by agency policy
The agency process in question must meet the APA's definition of an "adjudication"
To terminate such benefits, the responsible governmental agency must provide notice of the planned termination
If an applicant has met the criteria specified by statute or agency rule to be entitled to a license
Liberty
The two means through which administrative agencies operate
Adjudication is faster than rulemaking
States may pass laws to authorize warrantless searches of businesses

What is a Computer? A computer is a machine made of devices that enable you to enter data (input), process it (CPU), store it (memory) and output the result

Hardware refers to the parts of computer that you can touch or feel. The CPU, monitor, keyboard, mouse, printer, scanner and microphone are examples of computer hardware.

Data or instructions are entered into the computer with the help of Input devices. Common examples of input devices are keyboard and mouse

Performing calculations or comparing data is called processing. Processing is the action that converts data into meaningful information

A large amount of data can be stored on computers. The data entered into a computer is stored on its hard disk. The hard disk, CD-ROM, DVD-ROM and pen drives are used to store information permanently
