Literature Review with ATLAS.ti 8 Windows and Mac (Jan. 25th, 2018) - Literature Review with ATLAS.ti 8 Windows and Mac (Jan. 25th, 2018) by ATLAS.ti - Qualitative Data Analysis 22,621 views 6 years ago 1 hour, 9 minutes - Free webinar on conducting a literature review with **ATLAS**,.ti Windows and **Mac**,.

send us an email by writing to clients at atlas
synthesize all of the previous work
identifying a gap in the literature
analyze a great variety of sources of information
create a new project of a literature review
put in the title of each document
write out the full reference in the comment space
write out all their full references
add some codes
create a code out of that exact text
visualize your list of codes in the project explorer panel
selecting your quotation
highlighting the segments of text and dragging and dropping your codes
visualize your list of memos in the left hand side
identify a research gap in the literature
group together your codes
organize your list of codes from the code manager
export it to a table
see the full content of each of these quotations
save it as an external word
describe in the comment space the author year and page number
import your project into the newest version
showing the list of the different projects
undo and redo up to 100 steps of your work
adding your files from your computer
create a free quotation
drag and drop any of your already existing codes onto the quotation
creating a word list or a word cloud
identify these possibly relevant segments of information
make a new code of satisfaction
confirm each match
create a network under the home
dock any of these windows in the main working space
begin by adding my quotes
link these codes
take advantage of the different automatic layout options
create these hyperlinks between the different pieces of information
take a look at the different analysis tools
select these individual codes
invert the table
compare between reader comments and the research report
taking a look at the research report documents
conduct further quantitative analyses
analyze their co-occurrence
load one of my codes into the query space
focus on a specific on the specific set of documents
import a coded document into a new project
merge the bundles together without duplicating the number of documents

The interface: Multi-document view
Creating a new project
Importing documents to the project
Writing comments on documents
Document manager
Creating an output of the list of documents
Grouping documents according to shared attributes
Segmentation: creating quotations and commenting them; creating codes inductively and commenting them
Quotation manager
Creating outputs of quotations
Creating and commenting (i.e., defining) codes
Coding with codes previously created and codes created inductively
Organizing the code system: prefixes, code groups and colors
Networks
Interrogating the data: queries and their outputs
Memos
Word Cruncher: Counting word frequencies
Code Document Table: Code frequencies
Code co-occurrences
Grouping memos (although shown in relation to co-occurrences, this applies to all memos)
Memo outputs
Review of outputs for all objects of the project
Auto-coding
Hyperlinking (semantic linkages between quotations)
Final words of recommendation: balance fragmentation with integration
