The Malleability of Intellectual Styles

Intellectual styles are individuals' preferred ways of using the abilities that they possess. The extent to which one can change his or her intellectual style is a question of interest to both researchers and the general public. This book presents the first comprehensive and systematic review of existing research on the malleability of intellectual styles. By critically analyzing research findings derived from both cross-sectional and longitudinal investigations performed over the past seven decades, Li-fang Zhang demonstrates that intellectual styles can be modified through both socialization and purposeful training. Professor Zhang elucidates the heuristic value of these findings for the development of adaptive intellectual styles in both academic and non-academic settings. She proposes further avenues of research that might advance scholarly understanding of the nature of and the potential for modifying intellectual styles.

Strong and MBTI Career Development Guide

The primary purpose of this revision remains identical to that of the first edition--to show how key personality, cognitive/behavioral, and vocational tests/assessment procedures can be used by counselors in their work with clients. Too often, assessment books only provide the reader with information about tests and assessment procedures. They do not, however, take the next step--showing readers how these tests/assessment procedures can be used and integrated into the actual work of counseling. This revision is designed to fill that void. Chapter authors, all of whom are experts in their respective topic areas, share the theoretical and research backgrounds about a particular test/assessment procedure and then provide a case example or examples to show how assessment data can be meaningfully incorporated into the counseling process.

Testing and Assessment in Counseling Practice

Trustworthy information about career assessment instruments and their value for career counseling is difficult to obtain. This text contains information and reviews of a wide range of assessment instruments. The decisions as to what instruments to include for review were based on input from an advisory committee, a review of the literature and of publisher catalogues, and the results of a survey of users. The principles underlying the decisions to select instruments for review included selecting previously reviewed instrument that have undergone extensive revisions or update, new instruments that appear to have promise of extensive use, instruments that could be used by employers to make hiring or advancement decisions, and instruments with proven utility for persons with disabilities of disadvantages. Fifty-two instruments in forty-nine test reviews comprise the heart of this volume. These are divided into six categories: Comprehensive Aptitude/Achievement and Companion Measures; Interest; Values and Satisfaction; Career Development/Maturity; Personality; and Instruments for Disabled and Disadvantaged Populations. Reviews begin with publisher-provided information, followed by a brief critical review of the instrument's strengths and limitations. Also provided is practical information which potential users can refer to in order to gauge the usefulness of an instrument. (RJM)

A Counselor's Guide to Career Assessment Instruments

Yoga and Parapsychology are two areas in which a significant amount of professional research is awaited. Parapsychology, considered as the discipline to study psi(psychic abilities), is essentially the science of siddhis (extraordinary human abilities). Yoga is considered to be an effective psycho-spiritual pursuit that results in the manifestation of a variety of supernormal phenomena. In fact, Patanjali's Yoga-Sutras is the foundational text of psychic science. One of its four parts, Vibhuti Pada, is filled with the description and discussion of a variety of paranormal phenomena. There is thus an intrinsic commonality between yoga and parapsychology, which remains essentially unexplored in any systematic way. A serious and scientific study of the two and the resultant synergy of their confluence could result in resolving many of the riddles that puzzle parapsychology today and be a harbinger of a vibrant science opening up new frontiers. Further, it could be seen as a productive East-West meet in a profound sense. Keeping this in view, a national conference and a workshop were organized during January 3-23, 2006 at Andhra University by the Institute for Human Science and Service with international participation. The present volume is a compilation of the major presentations at the conference and workshop, which are appropriately revised and edited in light of the discussions. The contents of the

volume contain theoretical articles and reviews as well as experimental reports. Contributors come from different countries besides India, including the United States of America, Sri Lanka, the United Kingdom, Germany and the Netherlands. Thus, the volume is international in scope and coverage.

Yoga & Parapsychology

A Multivariate Analysis of Myers' and Briggs' Personality Types in Terms of Vocational Interests

This book is an introductory text to the field of psychological testing primarily suitable for undergraduate students in psychology, education, business, and related fields. This book will also be of interest to graduate students who have not had a prior exposure to psychological testing and to professionals such as lawyers who need to consult a useful source. Psychological Testing is clearly written, well-organized, comprehensive, and replete with illustrative materials. In addition to the basic topics, the text covers in detail topics that are often neglected by other texts such as cross-cultural testing, the issue of faking tests, the impact of computers and the use of tests to assess positive behaviors such as creativity.

The Myers-Briggs Type Indicator

This document is a 1996 revision and update of several earlier publications. Its purpose is to help professionals identify tests which may be useful to them. It describes 71 tests which a sample of vocational evaluation professionals found to be useful in their work. Included are information about testing and test resources.

MBTI Step Two Manual

Provides descriptive information on some 3,200 tests for the benefit of test evaluators and others who need to determine if a test suits their purposes. Each entry includes test name and author, an indication of the population for which the test is intended, how the test is administered, major features of the test, how the test is timed and scored, pricing and availability information, and publisher and distributor. Cross-referenced and indexed eight ways. Distributed by Gale Research. Annotation copyrighted by Book News, Inc., Portland, OR

Tests in Print

Handbook of Multicultural Assessment offers the most comprehensive text on testing of racial and ethnic minorities in the United States. This thoroughly revised and updated edition includes the most current and state-of-the-art assessment information in a variety of psychological and educational domains. The book highlights new and innovative testing practices and expands the populations of interest to include recent immigrants and refugees. It also includes ways to overcome barriers in the assessment process as well as forensic assessment. This important resource offers an instructional text for conducting culturally competent psychological assessment for clinicians, educators, and researchers.

Psychological Testing

Because testing has long been regarded as an important role for counselors, they traditionally have provided a variety of testing services, including personality, vocational, intellectual, and aptitude testing. A major purpose of this book is to show how these kinds of tests can be used to augment and facilitate the counseling process. Testing in Counseling Practice provides current information about various tests and assessment methods such as historical foundations and conceptual background, measurement properties, administration and interpretation, implementation, and future research directions. The book is divided into three sections: personality assessment, vocational assessment, and contemporary issues and innovations. Each chapter is written either by the person who developed and originated the test/assessment method or by the person who is regarded as the major interpreter of it. Case examples showing how various test/assessment methods can be used in counseling practice are also included.

The Psychologist

"The popularity of the Myers-Briggs Type Indicator (MBTI) among counselors, psychotherapists, educators, businesses, organizational consultants, and government agencies has made it the most widely used tool for the assessment of healthy personality. In order to use it appropriately and effectively, professionals need an authoritative source of advice and guidance on how to administer, score, and interpret this test. Written by Naomi Quenk - who coauthored the 1998 revision of the MBTI Manual - Essentials of Myers-Briggs Type Indicator Assessment is that source."--Résumé de l'éditeur.

Tests and Test Use in Vocational Evaluation and Assessment

Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the MBTI In order to use the Myers-Briggs Type Indicator (MBTI) appropriately and effectively, professionals need an authoritative source of advice and guidance on how to administer, score, and interpret this test. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Completely revised and up to date with discussion of new versions of the MBTI, such as MBTI Step II and MBTI Complete, Essentials of Myers-Briggs Type Indicator Assessment, Second Edition provides expert assessment of the instrument's relative strengths and weaknesses, valuable advice on its clinical applications, and several illuminating case reports.

Tests in Print VI contains information on over four thousand testing instruments. Informative descriptions of each test include specific data on their purpose, population, scoring, and pricing. Indexes of test titles, publishers, acronyms, and subject classifications are provided, as well as notations on out-of-print tests. Testing in Counseling Practice

The collection of papers presented in this monograph provides an update on developments in assessment for counselors, practitioners, and researchers in all types of educational settings. The papers are grouped into five sections. Section 1, on emerging issues, includes topics on testing theories presently used, and some thoughts for the future. Section 2 concerns issues of counselor education in higher education. Section 3 discusses educational assessment in elementary and secondary schools, and the role of the counselor in school guidance. Section 4 considers testing modifications and accommodations that are in practice with the special needs population. Section 5 reviews special assessment topics. Examples of these topics include the rights of the test takers; communicating test results; writing multiple choice tests; and use of specific types of tests. Also included are reprints of 33 ERIC/CASS Digests on Assessment in Counseling and Therapy produced for the Assessment '95 ERIC/CASS and the Association for Assessment in Counseling national conference. With the publication of this monograph, it is hoped that a wide range of practitioners and researchers will have access to current information that is not readily available to them. (Contains over 300 references.) (JDM)

Testing Older Adults

One consequence of the popularity of the MBTI is that it has become increasingly detached from psychological type theory - often to the detriment of the individuals whom it is intended to benefit. Reconnecting the MBTI to type theory has critical practical implications and applications. In this regard, the overall goal of this edition is identical to that of the two editions that preceded it, and indeed to that of the Indicator itself: to make the theory of psychological types described by Jung understandable and useful in people's lives.
