#### Essential Actions for Academic Writing

Essential Actions for Academic Writers is a writing textbook for all novice academic students, undergraduate or graduate, to help them understand how to write effectively throughout their academic and professional careers. While these novice writers may use English as a second or additional language, this book is also intended for students who have done little writing in their prior education or who are not yet confident in their academic writing. Essential Actions combines genre research, proven pedagogical practices, and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments, such as explaining, summarizing, synthesizing, and arguing. Part I introduces students to rhetorical situation, genre, register, source use, and a framework for understanding how to approach any new writing task. The genre approach recognizes that all writing responds to a context that includes the writer's identity, the reader's expectations, the purpose of the text, and the conventions that shape it. Part II explores each essential action and provides examples of the genres and language that support it. Part III leads students in combining the actions in different genres and contexts, culminating in the project of writing a personal statement for a university or scholarship application.

### The Art and Architecture of Academic Writing

This book is a bridge to confident academic writing for advanced non-native English users. It emphasizes depth over breadth through mastery of core writing competencies and strategies which apply to most academic disciplines and genres. Tailored to students in EMI programs, the content was piloted and revised during a longitudinal writing study. The innovative approach prepares students to write for the academic community through the dual lenses of Art (developing a writer's voice through choices in language, style, and topics) and Architecture (mastering norms of academic language, genre, and organization.) The user-friendly text maximizes time for writing practice and production by avoiding lengthy readings. Part 1 builds skills and confidence in writing by focusing on assignments that do not require research. Part 2 applies newly mastered principles, skills, and strategies to research-based writing. This book provides a research-based, theorised approach to the skill of writing whilst retaining a link to writing practices and giving immediate yet sustainable solutions to the writing problem. It supplies new theory and practice on: socializing writing-in-progress and writing with others exploring the alternation of conscious and unconscious, internal and external processes in academic writing whilst in a social grouping Applying social processes in the writing process Using case studies and vignettes of writing in social spaces to illustrate the theory in practice, This book is a valuable resource for academics, scholars, professionals and practitioners, as well as researchers at all stages of their career, and in all disciplines.

Getting it Across is a practical guide for researchers and graduate students who need to publish their findings. The focus of the book is on effective writing: using strong sentences, clear word choice, and effective structure to get the message across. The book includes over a hundred examples of actual written texts, mostly taken from the architecture and planning field. Using this "real text" approach and written in a light and accessible tone, the book addresses—in a very practical way—all the issues facing the academic writer: structure, grammar, word choice, and especially style. Apart from its many applied examples, the book includes complete explanations, exercises and a thorough answer key. This makes the book an ideal self-study and reference book, as well as a practical text book for academic writing courses in the social sciences.

### The Work of Writing

Professional and academic writing is often seen as dull, dry, and as boring to write as it is to read. In *The Work of Writing*, Rankin challenges these assumptions by encouraging the professional writer to develop a strong writing voice and become fully engaged with the writing process, thus producing written work that is lively and engaging. This book will give academic practitioners and other professionals critical help in determining what to write, how to write it, and how to position their written works successfully for the markets they wish to reach. Rather than a style manual, *The Work of Writing* focuses on the thinking, strategizing, and decision making that goes on in the heads of academic and professional writers. In doing so, it deals with the complex issues of purpose, audience, genre, and voice that all writers face. Drawing on collective experience of academic and professional readers as well as writers, Rankin offers a framework to help writers think about their writing in realistic, practical, and productive ways. The book offers specific examples and "real-life" scenarios that are familiar to all academic writers—and by extension, to practicing professionals as well.
