How to Design a Garden

Beginning in the 1960s, John Brookes MBE (1933-2018) revolutionized garden design, with a new design philosophy and methodology that was rooted in the notion that gardens are about the people who live in them. Recognizing the demands of the contemporary lifestyle, he broke with previous labor-intensive garden design traditions and the emphasis on showcasing plants. Instead he promoted using gardens as extensions of the home. He introduced this notion in his 1969 book, *A Room Outside*, which also contained practical advice on materials, methodology, and planting. His approach was unprecedented and included the then-novel idea that people of all income levels could have designed, fashionable gardens tailored to their needs, low-maintenance, and beautiful. John taught and lectured around the world and, thanks to his energetic writing, teaching and media appearances, he became regarded as the 'king' and 'godfather' of garden and landscape design. *How to Design a Garden* is an informative and ultimately practical collection of his thoughts and advice selected from countless writings and lectures given to students, professionals and the public around the world. In addition to his teaching on how to design a garden, the book has two key themes - environmental sustainability and a focus on the local vernacular. They show how far ahead he was of his time and to what a great extent his teaching remains relevant to garden-makers today.

The Truth about Modern Slavery

In 2017, over 5,000 victims of slavery were found in the UK, and their numbers are rising each year. From men working in Sports Direct warehouses for no pay, to the teenage Vietnamese girls trafficked into small town nail bars, modern slavery is all around us, operating in plain sight. But is this really slavery, and is it even a new phenomenon? Why has the British Conservative Party called it 'one of the great human rights issues of our time', when they usually ignore the exploitation of those at the bottom of the economic pile? *The Truth About Modern Slavery* reveals how these workers are being used as pawns in a political game. In order to create the 'hostile environment' towards immigrants in Britain, the state has to appear to be moral; identifying 'slaves' amidst a sea of other vulnerable workers allows them to divide and conquer. Blaming the media's complicity, rich philanthropists' opportunism and even the Labour Party's silence on the subject, *The Truth About Modern Slavery* is the first book to challenge the conventional narratives on modern slavery.

Out of Office

The future isn't about where we will work, but how. For years we have struggled to balance work and life, with most of us feeling overwhelmed and burned out because our relationship to work is broken. This "isn't just a book about remote work. It's a book that helps us imagine a future where our lives — at the office and home — are happier, more productive, and genuinely meaningful" (Charles Duhigg, bestselling author of *The Power of Habit*). *Out of Office* is a book for every office worker — from employees to managers — currently facing the decision about whether, and how, to return to the office. The past two years have shown us that there may be another path forward, one that doesn't involve hellish daily commutes and the demands of jam-packed work schedules that no longer make sense. But how can we realise that future in a way that benefits workers and companies alike? Based on groundbreaking reporting and interviews with workers and managers around the world, *Out of Office* illuminates the key values and questions that should be driving this conversation: trust, fairness, flexibility, inclusive workplaces, equity, and work-life balance. Above all, they argue that companies need to listen to their employees — and that this will promote, rather than impede, productivity and profitability. As a society, we have talked for decades about flexible work arrangements; this book makes clear that we are at an inflection point where this is actually possible for many employees and their companies. *Out of Office* is about so much more than zoom meetings and hybrid schedules: it aims to reshape our entire relationship to the office.

The Gardens of Arne Maynard

Arne Maynard is known for his award-winning gardens at the Royal Horticultural Society's Chelsea Flower Show (2000, 2012) and for his beautiful and sympathetic gardens for private houses across the world. Central to his work as a designer is his ability to identify and draw out the essence of a place, something that gives his gardens a particular quality of harmony and belonging. Maynard is also a passionate gardener himself, and is in the process of transforming the garden around his house in Monmouthshire, Wales. This garden is one of those featured in the book, offering unique insights into the work in progress and his design methods. Also featured is Maynard's very first garden of his own, at Guanock House in Norfolk, where over ten years he created a formal layout - including a kitchen garden, herbaceous borders and a knot garden - from a field. Each of the twelve gardens is specially photographed and is described through the seasons in personal text by Maynard himself, including details of the brief and plant selection. The book also includes fully illustrated features on various topics close to Maynard's heart, such as growing and using roses, planting borders, creating productive kitchen gardens, incorporating sculpture in the garden, and training trees and shrubs. The Last Garden in England

From the author of the international bestseller The Light Over London and The Whispers of War comes a poignant and unforgettable tale of five women living across three different times whose lives are all connected by one very special place. Present day: Emma Lovett, who has dedicated her career to breathing new life into long-neglected gardens, has just been given the opportunity of a lifetime: to restore the gardens of the famed Highbury House estate, designed in 1907 by her hero Venetia Smith.

But as Emma dives deeper into the gardens' past, she begins to uncover secrets that have long lain hidden. 1907: A talented artist with a growing reputation for her ambitious work, Venetia Smith has carved out a niche for herself as a garden designer to industrialists, solicitors, and bankers looking to show off their wealth with sumptuous country houses. When she is hired to design the gardens of Highbury House, she is determined to make them a triumph, but the gardens—and the people she meets—promise to change her life forever. 1944: When land girl Beth Pedley arrives at a farm on the outskirts of the village of Highbury, all she wants is to find a place she can call home. Cook Stella Adderton, on the other hand, is desperate to leave Highbury House to pursue her own dreams. And widow Diana Symonds, the mistress of the grand house, is anxiously trying to cling to her pre-war life now that her home has been requisitioned and transformed into a convalescent hospital for wounded soldiers. But when war threatens Highbury House's treasured gardens, these three very different women are drawn together by a secret that will last for decades. In this sweeping novel reminiscent of Kate Morton's *The Lake House* and Kristin Harmel's *The Room on Rue Amélie*, Julia Kelly explores the unexpected connections that cross time and the special places that bring people together forever.

Each chapter shares real-life examples, is rooted in the Bible, and includes prayer exercises for individuals or groups. This is a sourcebook for prayer, not a simple to-do list. Amy is a storyteller that brings these proven practices to life so you can make them immediately actionable. This is a great resource for your retreat, prayer group, or book club. Prayer is a gift from God; praying is a practice. We are always a simple word or single step away from a conversation with God. And yet taking that step or saying that word can sometimes feel confounding. This book draws from the deep well of Christian history to make praying a habit to enjoy in our crazy, bustling, wearying times. With seven ways of approaching prayer and practical examples of those ways to pray, you will find yourself regularly and repeatedly turning to God and finding him happy to hear from you.

The Rise and Fall of Adam and Eve

Selected as a book of the year 2017 by The Times and Sunday Times What is it about Adam and Eve's story that fascinates us? What does it tell us about how our species lives, dies, works or has sex? The mythic tale of Adam and Eve has shaped conceptions of human origins and destiny for centuries. Stemming from a few verses in an ancient book, it became not just the foundation of three major world faiths, but has evolved through art, philosophy and science to serve as the mirror in which we seem to glimpse the whole, long history of our fears and desires. In a quest that begins at the dawn of time, Stephen Greenblatt takes us from ancient Babylonia to the forests of east Africa. We meet evolutionary biologists and fossilised ancestors; we grapple with morality and marriage in Milton's Paradise Lost; and we decide if the Fall is the unvarnished truth or fictional allegory.

The Kitchen Diaries

An account of a culinary year in the life of the food writer, includes insightful descriptions of his pantry, visits to local farmers' markets, and seasonally inspired meals with friends.

How to Do Nothing

**** A New York Times Bestseller ** NAMED ONE OF THE BEST BOOKS OF THE YEAR BY:** Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library "A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto."—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's "Favorite Books of 2019" Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, How to do Nothing is an action plan for thinking outside of capitalist narratives of

efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

Inspired by true events in Syria and war gardens around the world and throughout history, The Last Garden is a thoughtful, tender story of hope, touching on issues of conflict and migration, from a talented debut picture book pairing. Winner of the Crystal Kite Award, 2021 for Middle East, India and Asia and longlisted for the 2021 Klaus Flugge Prize

Twitter Your Business

Making an impact, 140 characters at a time Twitter is not 'a get rich quickly tool'. You will achieve very little by just having an account. It takes time, effort and commitment to stand a chance of success on Twitter. However, if you are prepared to spend some time on Twitter each day finding people and conversations where you can add value, then things may well happen for you. The real value of Twitter is in the ability to search for real people talking about real stuff, right now and in real time. This offers individuals, businesses, brands the real opportunity to stop talking at customers and start talking with customers. A subtle but huge difference.

Benn's Media Directory

Drawing upon his lifelong study of politics and journalism, political historian Lee Edwards offers the first scholarly examination of a powerful new phenomenon in world politics--the mass media. Edwards argues in his far-ranging and innovative work that the media have become as important a factor in determining the course of international affairs and the future of nations as economic prosperity, military strength, natural resources, and national will. The author calls this vital new component of world politics mediapolitik. He uses case studies from around the world to show how the mass media have influenced and even determined the outcome of major political acts such as the collapse of communism in Eastern and Central Europe, the Tiananmen Square massacre in China, the ousting of Chilean dictator Augusto Pinochet, and the political resurrection of South Africa's Nelson Mandela. The author argues that these case studies show that the mass media can either enrich or enslave the human spirit, depending upon their moral foundation. If the media follow a liberal democratic model, as in the United States and Western Europe, they contribute to a free and just society. If they follow an authoritarian model, as in South Africa before Mandela, or a totalitarian model as in Saddam Hussein's Iraq or Fidel Castro's Cuba, they perpetuate the regime in power and deny the fruits of freedom and democracy to the people. Edwards addresses the question of how responsibly the American media, the most influential media in the world, handle their enormous power. Using the results obtained from his survey of 100 leading journalists as well as close analysis of major news stories of the last decade, the author confirms the rampant cynicism of the American media and its deleterious effect on American politics and government. The solution, he suggests, is that American journalists must practice moral responsibility and strengthen the liberal democratic model of mediapolitik around the world. ABOUT THE AUTHOR: Lee Edwards is senior fellow at the Heritage Foundation and adjunct associate professor of politics at The Catholic University of America. He is senior editor of The World & I magazine and author or editor of numerous books, including The Collapse of Communism, The Conservative Revolution, The Power of Ideas: The Heritage Foundation at 25 Years, and Goldwater: The Man Who Made a Revolution. PRAISE FOR THE BOOK: "Mediapolitik is a broad-gauged survey of what the mass media is, and how it works around the world. . . . There is scarcely an issue or debate within media and media watching circles that Mr. Edwards does not touch on and analyze with care and precision. Reading Mediapolitik is the equivalent of at least a semester's worth of J-School, and more fun."--Washington Times "Mediapolitik is superb--a much-needed, comprehensive study of a crucial topic. It is full of insight in its analysis and wisdom in its conclusions."--Peter W. Rodman, former Deputy Assistant to the President for National

Security Affairs "A revealing study of the mass media's impact on world politics. You may not agree with all of his conclusions, but Mediapolitik is well worth reading."--Hal Bruno, former political director, ABC News "Edwards is a sterling advocate for more responsibility in journalism. His cogent insights are always worthy of study and debate."--Stephen Hess, The Brookings Institution, author of The Little Book of Campaign Etiquette "The author's case studies are valuable. No one, to my knowledge, has presented such information and analysis in such a systematic fashion."--Prof. Marvin Olasky, Acton Institute "A very plausible and reliable overview of the impact of changes in news and entertainment media on the politics of our world. . . . The

After the Fire

A compelling study of the sea change brought about in politics, society, and gender roles during World Wars I and II by campaigns to recruit Women's Land Armies in Great Britain and the United States to cultivate victory gardens. Cecilia Gowdy-Wygant compares and contrasts the outcomes of war in both nations as seen through women's ties to labor, agriculture, the home, and the environment. She sheds new light on the cultural legacies left by the Women's Land Armies and their major role in shaping national and personal identities.

Social Media and the New Academic Environment: Pedagogical Challenges

From the co-writer of John Winston Howard, the definitive biography of the Prime Minister, comes Howard's End, which takes us behind the scenes of both parties on the announcement of the election campaign and traces the stunning collapse of the Coalition in its last year in government. Peter van Onselen and Philip Senior piece together the events in the year leading up to the 2007 federal election, following the protracted downfall of Australia's second longest-serving Prime Minister and the unraveling of the government as it lurched from crisis to crisis. In the tradition of Pamela Williams' The Victory, Howard's End analyses and makes sense of the result and its far-reaching implications for the people of Australia.
