he's shedding his

How does a caterpillar

It all starts with a teeny tiny egg

The baby caterpillar breaks out of the egg

Caterpillars are also called larvae.

He turns around and does what caterpillars do best

A caterpillar's only job is to eat leaves

The caterpillar pushes his body

and splits his skin open

shedding his former self

The caterpillar actually digests himself

After a couple of days

to stretch his new wings

Now he's a beautiful butterfly

and can start the process all over again
