Intro

While troubleshooting a notebook computer system, you find that the LCD screen suddenly became dark and difficult to read during a large file download via the wireless network. The system was plugged in at the user's desk. The backlight has stopped working. Which of the following are the most likely causes? (Choose two.)

A technician is comparing two laptops with different display types. Which laptop will have better color accuracy? a The laptop with an LCD display b The laptop with an LED display c The laptop with an OLED display d The laptop with a plasma display

The correct answer is c The laptop with an OLED display. OLED displays are known for their excellent color accuracy, making them a good choice for applications where color accuracy is important.

You have been tasked with troubleshooting a mobile device with a flickering display. Which component is most likely to be causing the issue? a The inverter b The digitizer c The backlight d The display cable

You are comparing two laptops with different display resolutions. Which laptop will have a larger display? a The laptop with a resolution of 1366x768 b The laptop with a resolution of 1920x1080 c The laptop with a resolution of 2560x1440 d The laptop with a resolution of 3840x2160

When comparing two mobile devices with different display types, which device will have better energy efficiency? a The device with an LCD display b The device with an LED display c The device with an OLED display d The device with a plasma display

In the process of troubleshooting a laptop, you notice a distorted display. Which component is most likely to be causing the issue? a The inverter b The digitizer c The backlight d The graphics card

What is the difference between a digitizer and a touchscreen? a A digitizer is a component of a touchscreen. b A digitizer is used to input data into a device. c A touchscreen is used to output data from a device. d A touchscreen is a type of digitizer.

Which component of a laptop display is responsible for converting analog data into digital data? a Inverter b Digitizer c Touchscreen d Webcam

What should be done if there is damage to an inverter in a laptop display? a Replace it with an identical inverter. b Replace it with any available inverter.

As a technician, you are presented with an LCD laptop with a dim, flickering screen. What malfunctioning part is the most likely cause of this? a Inverter b Liquid crystals c Touchscreen d Digitizer

While replacing the screen on a smartphone, a technician notices that the screen is flexible. What type of display type is he most likely replacing? a VA LCD b LCD c IPS d OLED

Which of the following features are typically associated with In-Plane Switching (IPS) technology? (Choose 3 options)

As the person responsible for the display design of a new conference center in a large auditorium with 500 or more seats, which of the following technologies is suitable for providing a large display with high resolutions? a OLED display panels b LCD display panels c LCD projectors
