Doing Business in Emerging Europe

The transformation, which is unfolding in emerging European countries is a unique historic event. In several countries, the transition has been quite positive; most analysts anticipate continued real growth in the coming years. While opportunities in that region are numerous, doing business may prove, as in any other foreign country, quite complex. Doing Business in Emerging Europe is a user-friendly guide to doing business in Belarus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovak Republic, Slovenia, and Ukraine constitute a chapter. Brief overviews of Bosnia-Herzegovina, Croatia, Cyprus, Macedonia, and Serbia/Yugoslavia are also included.

Doing Business in Eastern Europe

Published to coincide with a BBC2 TV series, this book is part of a series which looks at the information that business managers need to operate successfully abroad, in this case in Eastern Europe. Among the topics covered in the book are privatization and the pluses and minuses of investment.

For students, educators, entrepreneurs, and business people everywhere, Successfully Doing

Business/Marketing in Eastern Europe is an essential resource and guidebook to understanding and profiting in this unique and often unpredictable region.

Handbook of Doing Business in South East Europe

A comprehensive insight into a region which is characterized by rapid economic and social changes with a significant rise in foreign direct investments and privatization. Analysis covers political, legal, economic and social trends, and topics such as the influence of informal networks and corruption, as well as cultural diversity.

The Other Europe

As political walls tumble and economic barriers disappear, the number of new opportunities for doing business with Eastern Europe's emerging capitalists are soaring. Overseas business specialist Engholm profiles Eastern Europe's markets and includes negotiating strategies and more. Illustrations.

Resource Guide to Doing Business in Central and Eastern Europe

The Central and Eastern European Markets covers a variety of business topics dealing with Central and Eastern Europe and offers a unique picture of these new markets. Chapters contain accurate information on joint ventures, market entry strategies for Central and Eastern Europe, financing for activities in Eastern Europe, and assessing the Ukraine as a market. With direct experience of these business issues, the contributing authors explore these specific topics: how the Czechoslovak telecommunications system was upgraded through a joint venture entry and expansion decisions made by Western firms in the Ukraine and ways in which firms use relationships in the home and host market to reduce the risks of strategic investment decisions investment patterns, strategic market characteristics, and resulting entry strategies of Western firms active in Eastern Europe since the fall of the Iron Curtain macro changes taking place in Hungary, Poland, and Bulgaria and changing market environments specific to each country development trends in the marketing environment in Eastern Europe, options for market entry, and favored market penetration strategies The Central and Eastern European Markets is an ideal source for detailed information needed by students researching business issues in these emerging markets. Professionals planning to enter or seeking to improve their market position in these regions can find specific business-related information and experience in this stimulating volume.

The Central and Eastern European Markets

This guide is an introduction to English language sources, in electronic and conventional print forms, dealing with Central and Eastern European business issues. It gives evaluative descriptions and costs of all listed sources, and concentrates on recent sources. Sources in respect of some of these countries can be difficult to locate, and the author provides guidance on how to go about finding them.

Doing Business in Poland

Experts from formerly planned economies and, for reasons of comparison, from Ireland analyse and assess the state of selected business services and formulate policy recommendations for the acceleration of the restructuring process.

Guide to Business Information on Central and Eastern Europe

In Central and Eastern Europe, the 'Old Europe' of cobblestones co-exists with mobile phones, horse carts fight for road space with cars, and farmers' markets compete with mega-stores. Western business professionals hoping to expand or start up new ventures in this complex environment must possess knowledge that is both comprehensive and subtle. What is it like to live and work in Central and Eastern Europe? How is business conducted there? What happened in Central and Eastern Europe to make integration into the rest of Europe so difficult? What important social and cultural issues must be mastered by Westerners hoping to flourish in this region? 'Succeeding in Business in Central and Eastern Europe', the fourteenth title in the 'Managing Cultural Differences Series' answers these and many other questions. This book identifies a variety of factors, including an anti-business attitude and a resistance to Western-style change, that hinder some attempts at development within Central and Eastern Europe. It provides a frame of reference for understanding the "post-Soviet syndrome" - with its remnants of corruption and mistrust of managers and customers alike - that continues to haunt

the countries of CEE. Dr. Sears and Ms. Tamulionyte-Lentz give readers solutions for overcoming the problems inherent in this region. They explain how Western executives can build relationships and find point of cultural "synthesis" with their Central and Eastern European counterparts and ultimately create a new and mutually beneficial work culture with their ventures. With understanding and insights on the cultural nuances of the region, 'Succeeding in Business in Central and Eastern Europe' can help all Western visitors, even tourists, who arrive at this increasingly popular destination.

Business Related Services in Central and Eastern Europe

Staying at the pinnacle of the advancing business development of transition economies and the impact of changing business conditions is a challenging task for all firms wanting to do business in them. This book provides insight into the way in which businesses function with a comprehensive overview of the major aspects involved.

Doing Business in Eastern Europe and Russia

Fully updated to include coverage on the recent COVID-19 pandemic as well as other recent macro drivers, this third edition provides a comprehensive and authoritative examination of emerging markets across the globe.

Succeeding in Business in Central and Eastern Europe

First published in 1999. Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region. This book argues that the small and medium sized enterprise (SME) sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector. In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state-owned enterprises. Since then a process of liberalization has been unleashed to promote free market policies. This has involved programs of privatization and restructuring of public enterprises, as well as the promotion of policies to enable a private sector to develop. Small businesses are creating thousands of new jobs while large companies are "retrenching and downsizing" their work force. In some countries of the region this process is much further along than in others. However, the SME sector has developed at a more rapid pace than has the privatization of the large public companies. There has been a flurry of new enterprises springing up throughout the region which are "trickling up" in a frequently hostile environment against tremendous odds, and yet managing to have a pronounced impact on their respective economies. Small businesses have taken over in sectors that used to be dominated by big enterprises, primarily in services and consumer products. They have provided a crucial outlet for pent-up entrepreneurial talent that had remained dormant during the long period of state domination. This work urges legislators, policy-makers, and development agencies alike to take account of the importance of the SME's in their legislation and planning. Given a more favorable environment, these small businesses will provide even greater impetus for economic growth. Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit-seekers as unscrupulous and selfish. If the CEE region is to achieve its full potential of economic growth, policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment.

The Changing Nature of Doing Business in Transition Economies

Following on from Jeffries' 2001 *Economies in Transition: A Guide to China, Cuba, Mongolia, North Korea and Vietnam at the Turn of the Twenty-First Century*, this comprehensive survey of economic and political change focuses on the countries of Eastern Europe. Jeffries also discusses the general issues involved in economic transition, including `big

Doing Business in Emerging Markets

Fundamental theories and concepts for understanding how business is done in Europe, linked to the current European business environment through a range of up-to-date case studies and examples.

Small Businesses Trickling Up in Central and Eastern Europe

A combination of rigorous analysis and case material; this book is an essential guide to trade and industry developments in Central and Eastern Europe. Its scope encompasses globalization, the

business strategies of MNCs, agriculture, services and the dynamics of innovation. It also considers the trading relationships of these countries with Russia as well as the influence of trade on the democratization of states formerly belonging to the USSR.

Eastern Europe at the Turn of the Twenty-First Century

This special 100th edition of Contemporary Issues in Economic and Financial Analysis dedicates 14 chapters to contemporary issues in business and financial management in Eastern Europe by authors invited mainly from the Rostov State University of Economics.

Eastern Europe Business Bulletin

Much of the research on transformation/transition in Central and Eastern European Countries (CEECs) focuses on macroeconomic issues (inflation, economic growth, employment ...). Little research has been devoted so far to microeconomic analysis. Recently the issue of new enterprises and firm founders has moved to the centre of economic and policy considerations. Readers of this book will learn about the role played by these firms in the transformation of central and eastern European countries. The book also includes contributions from Central and Eastern Europe on which little or no investigation has been performed until now (Yugoslavia, Romania, Slovakia).

Doing Business with Eastern Europe

Since the sudden opening of the markets in Central and Eastern Europe (CEE) in 1989, there has been a growing need to investigate the fundamental changes occurring in the countries' marketing environment, the lucrative market opportunities created by the changes, and the inscrutable marketing practice followed by local and international companies. Marketing in Central and Eastern Europe helps you understand the changes taking place in these valuable and challenging markets and introduces you to the emerging opportunities and effective marketing strategies to be employed in the region. Researchers specializing in CEE business; managers of international companies operating in or contemplating entering CEE markets; and students studying CEE business, East-West business, or marketing in transitional economies will better understand the region by examining issues of cross-cultural inquiry, commonality, and market segmentation. Marketing in Central and Eastern Europe also provides you with: a region-relevant market analysis to determine environmental dimensions of emerging markets a preliminary report on market-entry strategies in Poland an assessment of foreign direct investment opportunities in Hungary a study of Western-style marketing applied in transitional economies an analysis of marketization and Westernization used as classifying dimensions information on increasing the validity of post-command economy research and application Although the book's chapters cover a variety of topics and use different research approaches and methodologies, they have a common theme--there is a great interest in, and an equally great need to scientifically investigate, rapidly emerging market opportunities, marketing-environment issues, and marketing-strategy problems with respect to transitional economies of Central and Eastern Europe.

Doing Business in Europe

Gain a comprehensive understanding of the development of entrepreneurship across Eastern Europe Throughout Eastern Europe, post-Communist countries transitioning to market-based economies are obtaining a variety of results due to diverse policy approaches. When Economies Change Hands evaluates the nature of entrepreneurship in this region, the consequences of central planning, the reasons for internal subsistence activity, and the emergence of the sex trade in Eastern Europe. The wealth of information in this resource is clearly presented and includes thought-provoking policy prescriptions for the future. It is challenging to predict the direction emerging markets will take, particularly when dealing with the wide-ranging social and economic situations taking place in post-Communist Eastern Europe. When Economies Change Hands can help. This reference volume for policymakers, educators, investors, and researchers provides a much-needed and timely survey of the transitioning markets of post-Communist Europe. It examines the historical, sociocultural, and economic impacts of market transition. The text includes a discussion of the creation and distribution of wealth in the countries of Eastern Europe that will leave you better informed about the dynamics of transitioning economies and the growth of entrepreneurship across Eastern Europe. In addition, the book demonstrates the problems and advantages of both slow reform and rapid reform models in a thorough and easy-to-read manner. When Economies Change Hands includes vivid photos of notable entrepreneurs and a sophisticated trail of references for academics that complements the useful and meaningful information you will find

in the text. When Economies Change Hands examines how various policies affect the economies of transitioning countries by incorporating and discussing: detailed definitions and comparisons of formal and parallel economies an in-depth study of entrepreneurship in the Republic of Albania, the Eastern Bloc of Comecon, The Baltic States, and the Commonwealth of Independent States pluralism in the former Yugoslav Republics analyses of governmental programs and policy prescriptions for the future and much more! As the market economies of Eastern Europe develop and expand, the value of this meticulous yet accessible text will continue to increase. Whether you are a policymaker, an educator, an investor, or a researcher, When Economies Change Hands is a resource that you'll return to again and again as you work to understand and predict the future of post-Communist economies in Eastern Europe.

Industries and Markets in Central and Eastern Europe

Essay from the year 2006 in the subject Business economics - Economic Policy, grade: 64 % - B, University of Sunderland, language: English, abstract: Following questions will be answered: Analyse the merits of globalisation in terms of their benefits to countries? It is said that 'Trade Liberalisation is generally supported by governments', but many barriers still exist. Discuss why this is the case? In context of emerging economies (i.e. China) or transition economies (i.e. Eastern Europe), explain how they can benefit from foreign direct investment (FDI)? Critically evaluate the role of the WTO within world trade and international competition?

Contemporary Issues in Business and Financial Management in Eastern Europe

Innovation and technology absorption are now firmly recognized as one of the main sources of economic growth for emerging and advanced economies alike. International R&D collaboration and FDI are critical and require government support programs, specially financial ones.

Doing business in Eastern Europe

This book examines how foreign direct investment (FDI) inflows to Central and Eastern Europe have changed after the Great Recession. It argues that beyond their cyclical effects, the economic crisis and the changing competitiveness of Central and Eastern European countries have had structural impacts on FDI in the region. FDI has traditionally been viewed as the key driver of national development, but the apparent structural shift means that focusing on cheap labour as a competitive advantage is no longer a viable strategy for the countries in the region. The authors argue that these countries need to move beyond the narrative of upgrading (attracting FDI inflows with increasingly higher value added), and focus on ensuring greater value capture instead. A potential way for doing this is by developing the conditions in which innovative national companies can emerge, thrive and eventually develop into lead firms of global value chains. The book provides readers with a highly informative account of the reasons why this shift is necessary, as well as diverse perspectives and extensive discussions on the dynamics and structural impacts of FDI in post-crisis Central and Eastern Europe.

Small Firms and Entrepreneurship in Central and Eastern Europe

Doing Business in Emerging Markets: Entry and Negotiation Strategies is an authoritative and timely guide for executives who are contemplating business in these markets. Including numerous exhibits and real-world examples, the authors explore analysis and evaluation of market potential, management of the negotiation process, and the recognition of important regional business styles and cultural issues. Students and professors in MBA or Ph.D. programs in international management, marketing, and strategy will also find this an invaluable aid to understanding emerging markets.

Marketing in Central and Eastern Europe

This guide has been specifically designed for corporations, economic agencies and business people in the emerging economies of Eastern Europe and the CIS. It provides an overview of Western business practice, highlighting opportunities and defining business strategies.

When Economies Change Hands

This sixth volume in the Academy of International Business Series presents leading-edge research on contemporary themes in international business. Part one explores several of the major issues that currently face multinational enterprises: government policy, the Asia crisis, knowledge and technology

management, corporate-subsidiary relations, strategies for small firms and the impact of the technological revolution. Part Two of the volume examines the impact of foreign direct investment, FDI. Written by a range of international contributors, a key focus of these papers is the particular issues relating to foreign investment in the emerging markets of Central and Eastern Europe and South-East Asia.

Focus on Central and Eastern Europe

This unique Handbook explores the role of government in the development of entrepreneurship in countries where twenty years ago private enterprise was illegal or barely tolerated. The expert contributors reveal that government policy is one of the key influences on the external environment in which businesses develop, particularly in countries where it has been necessary to redefine the role of the state in relation to business development. They outline how government policy can also act as an enabling and/or a constraining force with respect to entrepreneurship development, particularly in relation to institutional change and the development of a market-based economy. This Handbook includes up-to-date information and analysis as to how entrepreneurship policies have evolved in the wider Europe, focusing on the challenges that arise in designing and implementing entrepreneurship policy. The Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe excellently covers different facets of entrepreneurship policies in Central and Eastern Europe and will prove invaluable for academics, students and researchers of entrepreneurship and small business as well as policy studies. Policy makers will also find plenty of key insights and relevant information in this important resource.

Resource Guide to Doing Business in Central and Eastern Europe

The process of the transition to a market-oriented economy for countries from Central and Eastern Europe (CEE) and the Commonwealth of Independent States (CIS) started some 25 years ago. A new technology base triggered the fast growth of new investments into intangible assets by global economic leaders at the beginning of the 1990s, providing the basis for a move towards a knowledge economy. During the past 25 years, entrepreneurs in CEE and the CIS have reshaped traditional industries and created new industries, combining innovative ideas with traditional competencies. Yet we still do not know very much about how and why companies led by entrepreneurs develop, how they expand globally and what the role of new knowledge and innovation is in the internationalization process. Understanding the pathways of entrepreneurial development, especially growth through internationalization, is important for the overall development of countries in transition and beyond. Entrepreneurship in Central and Eastern Europe: Development through Internationalization provides an overview of entrepreneurship in a range of important emerging markets. This book aims to fill the gap in the literature by providing up-to-date data and case-based evidence. With coverage of a range of national firms from countries including Belarus, Estonia, Hungary, Poland, Latvia, Lithuania, Serbia, Slovakia, Slovenia and Ukraine, this book will be vital supplementary reading around international entrepreneurship and essential reading for those studying the business environment in this vital emerging market.

International Business Environment: About the merits of globalisation, the role of WTO in world trade, emerging and transition economies (China and Eastern Europe) and trade liberalisation

This title was first published in 2003. Covering a diverse range of countries such as Bulgaria, the Czech Republic, Hungary, Poland, Slovakia, Slovenia and Russia, as well as referring to the characteristics of the region as a whole, this book examines the inflow and outflow of foreign direct investment from both home and host company and country perspectives. By analyzing foreign direct investment in terms of process, content and context, the book provides a holist approach towards direct foreign investment in the transitional context of Central and Eastern Europe, embracing both macro- and micro-economic perspectives of the process.

Igniting Innovation

The aim of this publication is to present the universal model of building business success in our hectic times. Kozielski built the idea of “four-leaf clover” based on the experiences of companies competing on both the developed and emerging markets. It seems to be the first publication in which such comparison and confrontation were made.

Foreign Direct Investment in Central and Eastern Europe

"This book concentrates on some leading questions in business ethics research in the last two decades and tries to find explanations concerning cultural issues. It focuses on the alignment or congruence between business ethics and cultural contexts with a special emphasis on Eastern European countries. The core of this book is doing business in Central and Eastern Europe (CEE) in order to throw light on the cultural issues related to business ethics. Its primary purpose is a finer view of the impact of national, organizational and professional cultures in business ethics. The general questions encountered in this book are related to the nexus between culture and ethics in (CEE), national, organizational and professional cultures' link to (CEE) countries' ethics. The aim of this book is a deeper understanding of the cultural differences in Central and Eastern Europe. This might help organizations provide better opportunities for doing business across a wide cultural spectrum. With the increase of global mobility, cultural and ethical issues become more and more important. Multi-national corporations might garner a competitive advantage when they understand the importance of local culture and ethics. International business professionals may benefit from a deeper understanding of cultural values that affect the perceptions of individuals during negotiation and decision-making across cultures. Multinational companies that do not take into consideration or minimize the importance of cultural and ethical issues expose themselves to a higher risk of failure. The expectation of the authors of this book is that the conclusions would help alert international business scholars and practitioners of the need to thoroughly understand the cultural issues influencing ethics"--

Self-Introduction Rituals.Gene explains the importance of self-introduction rituals in Chinese culture and how they can open more doors in China than just speaking Chinese.

Cultural Dichotomies.Gene discusses the importance of understanding Chinese cultural dichotomies with the West to walk further in China in your own shoes.

Paratrooper Manager.Gene explains the concept of a paratrooper manager in China, which metaphorically describes how Chinese people feel about China expats or foreigners assigned to live and work in China.

Self-Introduction Rituals.Gene discusses the importance of self-introduction rituals and a scorecard to maximize opportunities to deepen Guanxi.

Chinese Cultural Dichotomies.Gene explains the difference between how Westerners and Chinese people view the law and authority differently.

Negotiations in China.Gene contrasts how Americans and Chinese people typically approach negotiations differently.

Importance of ongoing relationship.Chinese people continue to deepen their relationship with you even after the contract is signed. Why is this important, and how should you adapt?

Cultural dichotomy of time.Westerners view time as linear, while Chinese people view it as relative. What other differences exist, and why is it important?

Deliberate ambiguity as a weapon.How can this tactic be employed to gain an advantage in negotiations?

Importance of cultural dichotomies.Gene discusses the importance of understanding cultural differences and not being judgmental towards Chinese behaviors. Why?

Deliberate silence in negotiations.Gene advises Westerners to be deliberately silent during negotiations in China, as it can create an advantage and reduce circular conversations.

The Chinese Development Model

Part Three the Implications for China's Foreign Trade

The Shanghai Cooperation Organization

Business of Education

I Don't Think We Should Rely on Chinese Good Principles and Good Will When They Are the Most Powerful Country in the World To Be Doing the Right Thing That Does Not Seem to Me To Be Learning the Lessons of History So I Think Right Now Instead of Trying To Fight the Chinese over Currency We Ought To Be Saying to the Chinese What Do You Want What Do We Want Can We Build with the Relationship of Trust That Enables You To Get What You Want and for Us To Get What We Want Can We Get More Access to China Can You Get Easier Access to Other Things and Can We Build this Step-by-Step and Learn To Work Together Now I'M Going Way off Being Here but Bear with Me My Family Has To

I Mean if You Look at a Map of the World It Makes More Sense To Be in the Center of Europe than on the Side of Europe When the Koreans and the Japanese Came to the UK in the 90s It Was because They Could Be They Could Export into Europe from from the UK Where They Would Have a Good Solid Base and Great Advantages for the Country but Is Extremely Good I'M Working with Forums so There Was a Lot of Attractions Here in Many Respects a Lot of Central European Countries Have Now Able To Offer those What Are the Chinese Want in Europe

So You Have To Find the Ways To Enable this Determined Sense of Independence Not To Get in the Way of Peaceful Development of the World I Say that Most Chinese To Be Horrified that I Would Think that Their Sense of Independence Might Threaten Peace but It Can Do because You Can You Can Leave Yourself in a Situation Where Others Feel Frustrated Angry or Don't Trust You and that Is the the Risk China Has every Day with the United States if It Frustrates the United States Too Much the United States Has the Power To Hurt and So You've Got To Deal with All these Situations in a Very Sensitive Way
