Discover the Mental Math Secrets to Become a Human Calculator! Schools taught you a way to do math that works when you have a pen & paper. But the same methods, takes a lot of effort when you have to do math in your head. This is because it uses a lot of your working memory (the short term

memory used to complete a mental task). For example, try to mentally multiply $73,201 \times 3$. It might take only a few seconds to multiply the individual digits. But if you multiply right to left the way you learnt in school, you will rely on your working memory. You will use it to recall every single digit you calculate to put it back together and get your final answer. You may even find yourself calculating some digits again because you forgot one of the numbers. The difficulty increases further when you have to multiply larger numbers like 732×323 . You will have to remember numbers across many steps. Mental arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers. In school, you learnt to write the down numbers as you calculate to free up your working memory. In mental math, there are many other ways to do the same thing. One of the tricks to free up your working memory is to calculate from left to right instead of right to left. Try multiplying $73,201 \times 3$ from left to right, starting from 7×3 and ending with 1×3 . You will find yourself calling out the answer before you even finish the whole problem. You can use this trick to solve any math problem in the future. But we have just scratched the surface. There are many more tricks inside the book that make doing mental math as easy as reading a comic. Here is a glimpse of what you will be able to master:

- Mentally add large numbers (Example: Add $8739 + 5492$ in your head in seconds)
- Subtract numbers fast. (Example: Mentally subtract $7520 - 4998$ without writing anything down)
- Multiplication tricks to multiply three-digit numbers. (Example: Multiply 323×123 in your head)
- Square large numbers in seconds (Example: Calculate 64×64 faster than a calculator)
- Mentally divide large numbers (Example: Divide 601324 by 73 entirely in your head)
- Quickly check a calculation with 90% accuracy without re-calculating
- Overcome math anxiety
- Cement your mental math skills with bonus weekly training.

This book only has the best techniques used by over 27 mental and Vedic math experts across the world. The techniques in this book are so simple you will wonder why nobody taught you this before. You will be able to master it, even if you have failed math in school. Imagine waking up tomorrow being able to do lightning fast math in your head. Your family & friends will look at you like you are some kind of a genius. Since you do the calculations in your head, you will acquire better mental habits in the process. So you will not just look like a genius. You will actually be one. Buy Now To Become A Human Calculator Every minute you wait to buy this book, is another minute you don't see the benefit of being good with math & numbers. Put the power of mental math to work in your life so you can quickly & easily:

- make math and numbers more useful
- develop better memory habits
- increase concentration
- develop new ways to think
- and do speed math entirely in your head faster than a calculator!

Credit Analysis and Lending Management is a new Australasian text that focuses on the core lending functions of financial institutions, covering asset management, credit risk assessment and analysis, lending policy formulation and management, and the rise of new product development and marketing in the financial services sector. The value of any financial institution is measured by its ability to effectively manage and reduce its credit risk. This text details the structure of the credit organisation, including loan markets. Relevant financial statements are presented to develop students' interpretative and analytical understanding of financial statements. Features:

- * Developments in loan marketing and new loan products are profiled and assessed (see chapter 17.)
- * Problem loan management is discussed as a growing professional issue (see chapter 16).
- * Detailed case studies at the end of the text present a diverse set of professional scenarios that can be used for assignment, assessment and group work activities.
- * 'Industry insight' boxes profile current professional issues and identify industry developments.
- * 'A day in the life of...' boxes highlight the diversity of professional roles in the banking industry.

The wisdom of Kabbalah teaches us how to perceive and live in the reality that spreads before us. It is a systematic method that has evolved over thousands of years, nurtured by individuals whose task was to ensure that the true wisdom would be given to those ready to receive it. The Book of Zohar (The Book of Radiance) is an ageless source of wisdom and the basis for all Kabbalistic literature. Since its appearance nearly 2,000 years ago, it has been the primary, and often only, source used by Kabbalists. Written in a unique and metaphorical language. The Book of Zohar enriches our understanding of reality and expands our worldview. However, this text should not be read in an ordinary fashion. We should patiently and repeatedly read and think about each sentence as we try to penetrate the author's feelings. We should read it slowly and try to extract the nuances of the text. Although the text deals with one subject only-how to relate to the Creator-it approaches it from different angles. This allows each of us to find the particular phrase or word that will carry us into the depths of this profound and timeless wisdom.

Illusions and Disillusions of Psychoanalytic Work recounts and explores the disappointing and sometimes tragic evolutions of the treatments of certain patients who are resistant to the effects of analytic work. In this book the author reports cases taken from his own experience and that of his collaborators. The author points out moreover, that such cases have never been absent from the series of analysands that he has treated, from the early days of his practice up until today, without minimizing his counter-transference reactions or their possible impact on these disappointing evolutions.

Illusions and Disillusions of Psychoanalytic Work

In recent years, social workers have raised a new concern about the appearance of a new category among the working poor. Even employed, there are people so overburdened by the cost of living and so under compensated that they cannot afford a place to sleep. Contrary to popular opinion, according to the website for the Coalition for the Homeless, forty-four percent of the homeless in first world countries actually have jobs. In No Fixed Abode, Marc Augé's pathbreaking ethnofiction--a fictional ethnography--a man named Henri narrates his strange existence in the margins of Paris. By day he walks the streets, lingers in conversation with the local shopkeepers, and sits writing in cafés, but at night he takes shelter in an abandoned house. From here, we see a progressive erosion of Henri's identity, a loss of bearings, and a slow degeneration of his ability to relate to others. But then he meets the artist Dominique, whose willingness to share her life with him raises questions about who he has become and about what a person needs in order to be a part of society. This is a book about how we live in geographical space and how work and patterns of domicile affect our status and our inner being. Despite the apparent simplicity of the fictional premise, Augé's book asks serious questions about the nature of our culture.

What is innovation? The dictionary defines it as "renewal through the use of new processes and technologies." In advertising, everything is an innovation. But what is truly innovative? Since 1930, the Pininfarina design firm of Turin, Italy, has been answering that question. This is where the Cistalia 202 was developed, the first vehicle to be added to MoMA's permanent collection. The list goes on: the interior of the new stadium for Juventus Turin, the Nash Healey Spider seen in Billy Wilder's *Sabrina*, and the legendary Ferrari Dino 246 and Ferrari Testarossa. However, Pininfarina is not resting on its laurels, but blasting full speed ahead into the future with an expanded portfolio while honoring its heritage. Whether it's a solution for sustainable mobility, interior designs, or household gadgets, all Pininfarina projects bear an unmistakable signature. To visually celebrate the history and influence of Pininfarina, there is no one better suited than a man who has made his own unmistakable mark on automotive photography. Gunther Raupp has spent 30 years photographing cars for Ferrari's official calendars, which enjoy a cult following among the experts. He has two successful books with teNeues, the most recent being *The Ferrari Book*. As a star photographer and connoisseur of industrial design, Raupp showcases a company that embodies true Italianità.

Dubliners is a book of an Irish writer James Augustine Aloysius Joyce. This is a collection of stories, written in a slightly impressionistic way, in which a life of citizens of the Ireland's capital city, so-called "middle-level gentlemen", is described. It is the top of an Irish realistic literature of the beginning of the twentieth century. Joyce made it his aim to "write a chapter of a spiritual history of his nation."

The novel begins when the self-aware young Alice, who grows bored of sitting by the river with her sister, and spots a peculiar looking rabbit, dressed in a waistcoat. She hears the rabbit, which is seemingly in a hurry, mumbling whilst dangling its pocket watch. Impulsively, Alice inquisitively rushes after it making her way down a rabbit-hole which descends to the fantasy realm of Wonderland. Finding herself in an unknown corridor encircled by doors of all shapes and sizes, Alice is subject to her first of many bizarre encounters. In order to fit through a tiny door, which separates her from a beautiful garden, she drinks a shrinking potion. Unfortunately, she forgets the key to the door on the normal sized table and faces the beginning of her troubles. In her pursuit of the White Rabbit throughout Wonderland, Alice goes through immense individual changes and revelations as her perception of reality is altered. After a sequence of events, Alice discovers the unsettling features of the strange world as she encounters many characters including the White Rabbit, the Cheshire Cat, the Mad Hatter, the Hare and the intimidating Queen of Hearts.

Sound of Sundays, an Autobiography

Warm, vibrant illustrations combine with the steady reassurance "I'll take care of you" to introduce children to the cycles of nature and the gift of nurturing. A helpless, tiny seed finds itself lost in the world, but with care from the Sky, Earth, and Sun it grows up to be a beautiful apple tree. When the tree meets a bird in need of help, it offers its branches as shelter and shows little readers the magic of being cared for and taking care. This comforting tale celebrates the harmonious relationship between birds and trees, reveals the quiet wonder of our ecosystems, and helps little readers appreciate the care they receive from their family and friends every day. In return, children will learn that they can care for others too and cultivate empathy and kindness. With brightly beautiful illustrations and a timely message of love and community, *I'll Take Care of You* offers families a go-to soothing story for bedtime and tough days.

I'll Take Care of You

The setting for his collection of eighteen stories by Gabriele D'Annunzio (1863-1938) was the Adriatic seaport of Pescara and its hinterland in the Italian region of Abruzzo, the author depicting events and personalities from the time of his youth, but also drawing from bygone incidents that were yet memorable in the area's folk history. Pescara may not have had the cachet of celebrated cities such as Venice or Florence, but sympathetically and wryly revealed here by the pen of one of Italy's great writers it lives and breathes with a vitality probably best compared to that of James Joyce's 'dear dirty Dublin'. Indeed Joyce, who admired D'Annunzio, may well have been inspired by the Italian's cameos of small-town life, his parade of saints, voluptuaries and reprobates, their repressions, obsessions, individual dissolutions, collective explosions of anarchy, and their aptness for bizarre behavior that extended from the catatonic to the manic. D'Annunzio came to recognize just how exotic his native region was after he had left it for Rome, where he worked for some years as a journalist and essay writer in the employ of various literary magazines. His Abruzzo articles, and especially those in which he records examples of extraordinary devotional behavior (akin to what Mark Twain was witnessing at that time on the banks of the Ganges), became the basis of the stories in this collection. D'Annunzio was a published poet at the age of sixteen, and his verse has never been absent from the Western Canon since. Something of his painterly style, the layered brushwork of his descriptions, the gorgeous romantic renderings of rural scenes and the moods of the sea, his celebrations of sensuality, his aesthete's fascination with all the possible bodily conditions, from the virginal-voluptuous to the decayed and moribund (he has been hailed as 'the body's poet'), will amaze and delight the reader even in the blandest and most dictionary-dependent translation. The present one is no such, however. Vladislav Zhukov is an experienced translator who has rendered works from four languages into English, including a substantial book of poetry, three volumes of short stories, and a novel (all available on Amazon.com). His knowledge of Italian is that of someone who acquired the language while living in Italy during his youth.
