Historic Site Spotlight: Reed Gold Mine

The Reed Gold Mine in Midland, NC is one of the oldest gold mines in US History.

John Reed, a Hessian soldier in the Revolutionary War, founded a farm here.

But in 1799, Reed's son found a 17 pound rock in a creek on the land.

Today, portions of the tunnels have been restored.

But the real attraction is sifting for gold yourself!

Between the trails, tunnels, and history, there's something to explore for everyone!

North Carolina

There is a significant French heritage in North Carolina. The first European explorers to the North Carolina region were, in fact, French (1524). French Huguenots migrated to the state as early as 1690, and many North Carolinians have family names of French origin. Towns such as Bath, Beaufort, New Bern, and La Grange are a testimony to French settlers in the seventeenth and eighteenth centuries, and the city of Fayetteville is named after the Marquis de Lafayette, a French ally during the American Revolution. Beyond names, North Carolina has many other remnants of the French presence. With materials gathered from archives, libraries, interviews, and photographs, this book traces the French heritage in North Carolina from its origins to the present, an important part of North Carolina's cultural history.

To have health is to have a balance and harmony between the physical, emotional, mental, spiritual and relational aspects of the self. In healing, we endeavor to restore this balance when it has become off kilter. In Christian scripture and liturgy there is a rich history of healing. Healing from the Heart traces the tradition of Christian healing, and explores the mystery of prayer. Church groups interested in beginning a healing ministry will find this an invaluable resource, offering meditation resources, healing services, and well-tested and practical hands-on healing methods.

North Carolina : Its Resources and Progress, Its Beauty, Healthfulness and Fertility, and Its Attractions and Advantages as a Home for Immigrants

This biographical sketch introduces a significant Southern portrait photographer of the 19th century. In 1817, Esley Hunt was born in the rural mountainous area that would later become Johnson City, TN. (His childhood home, the Henson Hunt House, is listed on the Carter County Historical Register.) In the late 1840's, Esley moved his family 220 miles to Chapel Hill, NC, where he would eventually become that town's first studio photographer. He owned a house in Chapel Hill and 100 acres in Mebanesville (now Mebane). In 1859, Esley purchased a second portrait studio in Raleigh and acquired a 60 acre estate just west of the capitol city. In early advertisements, Esley stated his commitment to create art – notable in an era when many considered photography to be more of a technician's itinerant occupation than an artist's profession. By the late 1850's, he and his artistic partner, painter Joshua P. Andrews of New York, were receiving numerous photography awards at the North Carolina State Fairs. After North Carolina joined the Confederacy in 1861, Raleigh became a gateway for soldiers and Esley continued to operate its primary portrait studio. Civil War portraits by Mr. Hunt and Mr. Andrews remain highly valued by collectors, and are invaluable to historians, genealogists, and descendants. The State Archives of North Carolina have referred to Esley Hunt as "one of the Civil War's most prolific and talented photographers in North Carolina," and some photography historians consider him to have been among the best in the South. (Originally published in 2018, this biographical sketch was the first to describe Esley Hunt's personal life and family.)

The Unicoi Mountains straddle the Tennessee-North Carolina state line just south of the Great Smoky Mountains, separated from the latter mountains only by the Little Tennessee River. Extending from the Little Tennessee River southward to the Hiwassee River, the Unicois are a southern segment of the high Unaka ridge that forms the western escarpment of the southern Appalachians. The Snowbird Mountains are included with the Unicois because they are connected like a spur ridge to the Unicois. The Unicois have been isolated and difficult to access until the completion in 1996 of the forty-two-mile-long, superbly scenic Cherohala Skyway that courses along the highest ridges of the Unicois at elevations up to 5,390 feet and provides outstanding views of forested mountains. The Unicoi Mountains have been relatively undisturbed by human development since most of the land is publicly owned and managed by the U.S. Forest Service. The Unicois harbor many diverse natural treasures that are hidden from the casual observer. Along with his personal observations, the author describes and synthesizes the results of scientific research on the natural assets of the Unicois, including intensive surveys of plants and animals in certain areas, the results of which have often been reported only in places where the general public cannot easily access them. The authors purpose in writing the book is to share with others what he has learned about the special natural features (landscape, geology, climate, flora, fungi, and fauna) of the Unicois and their historical roots with the hope of inspiring others to enjoy, cherish, and conserve them. Unicoi Unity also reviews the history of the effects of humans on the Unicoi ecosystem and anticipates future challenges.

The North-Carolina Journal of Education

In this novel exploration of Reformed spirituality, Belden C. Lane uncovers a "green theology" that celebrates a community of jubilant creatures of all languages and species. Lane reveals an ecologically sensitive Calvin who spoke of himself as "ravished" by the earth's beauty. He speaks of Puritans who fostered a "lusty" spirituality in which Christ figured as a lover who encouraged meditation on the wonders of creation. He presents a Jonathan Edwards who urged a sensuous "enjoyment" of God's beauty as the only real way of knowing God. Lane argues for the "double irony" of Reformed spirituality, showing that Calvinists who often seem prudish and proper are in fact a people of passionate desire. Similarly, Reformed Christians who appear totally focused on divine transcendence turn out at times to be closet nature mystics, exulting in God's glory everywhere. Lane also demonstrates, however, that a spirituality of desire can be derailed, ending in sexual excess and pantheism. Ecologically, holy longing can be redirected from a contemplation of God's splendor in the earth's beauty to a craving for land itself, resulting in disastrous misuse of its resources. Between the major chapters of the book are engaging personal essays drawn from the author's own love of nature as a Reformed Christian, and

providing a thoughtful discussion of contemporary issues of species diversity and the honoring of an earth community.

The North-Carolina Reader. Number III

If there has ever been a time in your life when things got very confusing and maybe even more than a little overwhelming, or you were just looking for some guidance and advice on how to navigate the pitfalls of everyday living, then having this book to refer to would have been a literal Godsend. Even if you are just in need of something to lift your spirits while helping you to get back on your feet again, this is a book that you just have to read. Whenever life presents you with situations that seem to have no easy answers, or you simply feel indecisive while in need of some comforting words of wisdom, let the wonderful insights and heartfelt prayers of Mary Pompeo guide you. Within an atmosphere of trust and compassion, you will come across many subjects that she has helped very many of her clients deal with over the span of her lifetime counselling career. This is because Mary has such a wonderful gift for understanding people and how to give them meaningful guidance, which then allows them to empower their lives with the confidence and clarity of foresight; much of which comes through prayer. Prayers, as you will see from reading this book, are not limited to the province of organised religion. There is much more to it than that, and you don't have to be at all religious to make good use of them. As you will discover, your words are always heard by an intelligence which is way beyond the capacity of the human mind to understand. Answers are always received, but they can often be difficult to appreciate; in respect to the gifts which they bring with them. In Mary's own words – 'The main reason that I set out to write something of this nature was because I believe wholeheartedly in the power of prayer. In this respect I can confidently assure you of something. It's this. There is nothing whatsoever that is going on in your life right now which is seemingly so terrible that prayer cannot make it better. Life can oftentimes seem harsh and grossly unfair where the challenges which come from being this way can, on occasions, feel completely overwhelming. The act of praying takes on those challenges and infuses them with Divine Creative Energy; the very same energy that made our Universe and which continues to power our sun, so as to bring the vibrancy of life and brightness to everything. Although we have never actually met, I can confidently tell you that you are stronger, more resourceful and much more powerful than you give yourself credit for. There is a light within you which burns brightly, even though you have done such a great job of hiding it so well. You just need someone to help you find it, so that you are able to reconnect with the Universal Force; which constantly seeks to guide you back onto the path of enduring happiness and inner peace. Prayer is a truly wonderful way to achieve this, and so, along with my advice, I have chosen to share with you my own special way of reaching out to a higher power. One that will strive to lift your spirits, if only you have the will to manifest this. My aim, if you allow me to, is to show you how to regain control of your life, as well as fixing the seemingly unfixable. There is nothing that you cannot achieve if you just set your mind to it. Find that Force. Be that Light. Use this book to rise above your challenges, dramas and your apparent limitations. Be happy and feel loved. You absolutely do deserve it. The Divine Creative Force wants nothing else other than for you, its precious and cherished creation, to be this way.'

Hugh Morton, North Carolina Photographer

Hugh Morton was seldom seen in his adult life without a camera around his neck. Much to the benefit of his beloved home state, he crisscrossed North Carolina, from highlands to lowlands, recording nearly every step along the way. While many of his photographs of the state's people, places, and events were collected in Hugh Morton's North Carolina, this new book showcases a generous collection of his signature wildlife and nature photography and includes a few of the photographer's favorite pictures of people and events that were not included in the first volume. The scenic and nature photographs are organized geographically, from the mountains to the coast. Revealing Morton's curiosity about and love of the natural world, photographs feature woodland creatures, waterfalls, beaches, and more. Some images will be familiar to those who live or travel in North Carolina. Many of the photographs here have been recovered from deep within Morton's personal archive, bringing to print some long-hidden treasures. Consisting of 162 photographs, this collection is a rich and rewarding display of North Carolina's natural bounty as it evolved before the eyes of one of the state's most popular photographers.

Hugh Morton's North Carolina

Shares six decades of photographs of North Carolina, focusing on nature, athletics, politics, government, business, and the media.

The University of North Carolina at Chapel Hill

With its prominent profile recognizable for miles around and featuring vistas among the most beloved in the Appalachians, North Carolina's Grandfather Mountain is many things to many people: an easily recognized landmark along the Blue Ridge Parkway, a popular tourist destination, a site of annual Highland Games, and an internationally recognized nature preserve. In this definitive book on Grandfather, Randy Johnson guides readers on a journey through the mountain's history, from its geological beginnings millennia ago and the early days of exploration to its role in regional development and eventual establishment as a North Carolina state park. Along the way, he shows how Grandfather has changed, and has been changed by, the people of western North Carolina and beyond. To tell the full natural and human story, Johnson draws not only on historical sources but on his rich personal experience working closely on the mountain alongside Hugh Morton and others. The result is a unique and personal telling of Grandfather's lasting significance. The book includes more than 200 historical and contemporary photographs, maps, and a practical guide to hiking the extensive trails, appreciating key plant and animal species and photographing the natural wonder that is Grandfather.

Grandfather Mountain

In 1972, the U.S. Supreme Court handed down a 5Ð4 verdict in Milliken v. Bradley, thereby blocking the state of Michigan from merging the Detroit public school system with those of the surrounding suburbs. This decision effectively walled off underprivileged students in many American cities, condemning them to a system of racial and class segregation and destroying their chances of obtaining a decent education. In Hope and Despair in the American City, Gerald Grant compares two citiesÑhis hometown

of Syracuse, New York, and Raleigh, North Carolina. In order to examine the consequences of the nation's ongoing educational inequities. The school system in Syracuse is a slough of despair, the one in Raleigh a beacon of hope. Grant argues that the chief reason for Raleigh's educational success is the integration by social class that occurred when the city voluntarily merged with the surrounding suburbs in 1976 to create the Wake County Public School System. By contrast, the primary cause of Syracuse's decline has been the growing class and racial segregation of its metropolitan schools, which has left the city mired in poverty. *Hope and Despair in the American City* is a compelling study of urban social policy that combines field research and historical narrative in lucid and engaging prose. The result is an ambitious portrait—sometimes disturbing, often inspiring—of two cities that exemplify our nation's greatest educational challenges, as well as a passionate exploration of the potential for school reform that exists for our urban schools today.

Hope and Despair in the American City

The most visited site in the National Park system, the 469-mile Blue Ridge Parkway winds along the ridges of the Appalachian mountains in Virginia and North Carolina. According to most accounts, the Parkway was a New Deal "Godsend for the needy," built without conflict or opposition by landscape architects and planners who traced their vision along a scenic, isolated southern landscape. The historical archives relating to this massive public project, however, tell a different and much more complicated story, which Anne Mitchell Whisnant relates in this revealing history of the beloved roadway.

Super-Scenic Motorway

Meyer addresses himself principally to two questions. Why did many thousands of Scottish Highlanders emigrate to America in the eighteenth century, and why did the majority of them rally to the defense of the Crown. . . . Offers the most complete and intelligent analysis of them that has so far appeared.--William and Mary Quarterly Using a variety of original sources -- official papers, travel documents, diaries, and newspapers -- Duane Meyer presents an impressively complete reconstruction of the settlement of the Highlanders in North Carolina. He examines their motives for migration, their life in America, and their curious political allegiance to George III.

The Highland Scots of North Carolina, 1732-1776

This proceedings volume presents a diverse collection of high-quality, state-of-the-art research and survey articles written by top experts in low-dimensional topology and its applications. The focal topics include the wide range of historical and contemporary invariants of knots and links and related topics such as three- and four-dimensional manifolds, braids, virtual knot theory, quantum invariants, braids, skein modules and knot algebras, link homology, quandles and their homology; hyperbolic knots and geometric structures of three-dimensional manifolds; the mechanism of topological surgery in physical processes, knots in Nature in the sense of physical knots with applications to polymers, DNA enzyme mechanisms, and protein structure and function. The contents is based on contributions presented at the International Conference on Knots, Low-Dimensional Topology and Applications – Knots in Hellas 2016, which was held at the International Olympic Academy in Greece in July 2016. The goal of the international conference was to promote the exchange of methods and ideas across disciplines and generations, from graduate students to senior researchers, and to explore fundamental research problems in the broad fields of knot theory and low-dimensional topology. This book will benefit all researchers who wish to take their research in new directions, to learn about new tools and methods, and to discover relevant and recent literature for future study.

Air Force Combat Units of World War II

This volume looks at the natural and human history of North Carolina's Mount Mitchell, part of the Black Mountain range and the highest peak in the United States. It chronicles the geological forces that created this landscape, traces its environmental change and human intervention.

Knots, Low-Dimensional Topology and Applications

In this series of interlocking essays, which had their start as lectures inspired by the presidency of Barack Obama, Robert Burns Stepto sets canonical works of African American literature in conversation with Obama's *Dreams from My Father*. The elegant readings that result shed surprising light on

unexamined angles of works ranging from Frederick Douglass's *Narrative* to W.E.B. Du Bois's *Souls of Black Folk* to Toni Morrison's *Song of Solomon*.

Mount Mitchell and the Black Mountains

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Guilt and Defense

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

When Scotland Was Jewish

Among many legendary episodes from the life and career of men's basketball coach Dean Smith, few loom as large as his recruitment of Charlie Scott, the first African American scholarship athlete at the University of North Carolina at Chapel Hill. Drawn together by college basketball in a time of momentous change, Smith and Scott helped transform a university, a community, and the racial landscape of sports in the South. But there is much more to this story than is commonly told. In *Game Changers*, Art Chansky reveals an intense saga of race, college sport, and small-town politics. At the center were two young men, Scott and Smith, both destined for greatness but struggling through challenges on and off the court, among them the storms of civil rights protest and the painfully slow integration of a Chapel Hill far less progressive than its reputation today might suggest. Drawing on extensive personal interviews and a variety of other sources, Chansky takes readers beyond the basketball court to highlight the community that supported Smith and Scott during these demanding years, from assistant basketball coach John Lotz and influential pastor the Reverend Robert Seymour to pioneering African American mayor Howard Lee. Dispelling many myths that surround this period, Chansky nevertheless offers an ultimately triumphant portrait of a student-athlete and coach who ensured the University of North Carolina would never be the same.

The Life of General Hugh Mercer

Sufis created the most extensive Muslim revivalist network in Asia before the twentieth century, generating a vibrant Persianate literary, intellectual, and spiritual culture while tying together a politically fractured world. In a pathbreaking work combining social history, religious studies, and anthropology, Waleed Ziad examines the development across Asia of Muslim revivalist networks from the eighteenth to the twentieth centuries. At the center of the story are the Naqshbandi-Mujaddidi Sufis, who inspired major reformist movements and articulated effective social responses to the fracturing of Muslim political power amid European colonialism. In a time of political upheaval, the Mujaddidis fused Persian, Arabic, Turkic, and Indic literary traditions, mystical virtuosity, popular religious practices, and urban scholasticism in a unified yet flexible expression of Islam. The Mujaddidi *Ō*Hidden Caliphate,*Ō* as it was known, brought cohesion to diverse Muslim communities from Delhi through Peshawar to the steppes of Central Asia. And the legacy of Mujaddidi Sufis continues to shape the Muslim world, as their institutional structures, pedagogies, and critiques have worked their way into leading social movements from Turkey to Indonesia, and among the Muslims of China. By shifting attention away from court politics, colonial actors, and the standard narrative of the *Ō*Great Game,*Ō* Ziad offers a new vision of Islamic sovereignty. At the same time, he demonstrates the pivotal place of the Afghan Empire in sustaining this vast inter-Asian web of scholastic and economic exchange. Based on extensive fieldwork across Afghanistan, Uzbekistan, and Pakistan at madrasas, Sufi monasteries,

private libraries, and archives, *Hidden Caliphate* reveals the long-term influence of Mujaddidi reform and revival in the eastern Muslim world, bringing together seemingly disparate social, political, and intellectual currents from the Indian Ocean to Siberia.

Game Changers

Progress is a contradictory term, one that inherently means an improvement of luxury and an advancement of technology, yet usually at the expense of a community's identity, traditions, and history. Though many buildings survived Civil War skirmishes and Northern occupation during Reconstruction, these same structures did not escape the plans of ambitious entrepreneurs and thus disappeared from Wilmington's landscape, only to be replaced, over time, by shopping plazas and nationally recognizable commercial facades. *Cape Fear Lost* celebrates places that have vanished from present-day Wilmington. In this volume of more than 200 photographs, you will be able to explore the Wilmington of a bygone era, one punctuated by unpaved tree-lined streets and architecturally diverse dwellings. As you thumb through these pages, you will experience firsthand the beauty of many former mansions scattered throughout the downtown area, familiar churches, civic buildings and schools that once dotted the cityscape, the many businesses that utilized the pedestrian, horse-and-wagon, and shipping traffic along Market Street, and the transformation of Wrightsville Beach and Carolina Beach from humble summer bungalows into major tourist retreats. These varied scenes allow you an extraordinary insight into this coastal community's changing character over the past century and a half.

Hidden Caliphate

In *Cape Fear Beaches*, with more than 200 rare, black-and-white photographs, you will step back into affectionate memory, when early residents slept in hammocks in precarious beach shacks, when grand buildings, such as Lumina and the Oceanic Hotel, dotted the beachscape, when road repair meant a shovelful of oyster shells to mend a pothole, and when bathing suits left almost everything to the imagination. This volume also recounts the black community's experiences along these beaches, primarily at Seabreeze and Shell Island, and shares their personal stories and triumphs in a changing social scene, in which Reconstruction values slowly gave way to Civil Rights-era equality. Throughout the book, scenes of proud fishermen, both amateur and professional, with their daily catches, snapshots of family picnics on the beach, and photographs of friends posed with the ocean as a backdrop remind us that at the beach, the pace of life is measured not by the hands of a clock, but by the steady, changing tides.

Cape Fear Lost

Traces how the Republican Party in the South after Reconstruction transformed from a biracial organization to a mostly all-white one.

Journal of the Constitutional Convention of the State of North-Carolina

On September 17, 1960, Sen. John F. Kennedy, the Democratic nominee for president, flew to Greenville for a campaign rally on the campus of East Carolina College. Kennedy's ECC rally was part of a marathon daylong blitz that continued statewide through Greensboro and Charlotte. The campaign intended to go as far west as Asheville but due to inclement weather concluded with dinner at the governor's mansion in Raleigh and a rally at Reynolds Coliseum. With photographs as key primary sources, John F. Kennedy's North Carolina Campaign explores what happened that day, why it happened, and its significance in North Carolina's political history. While the book focuses on the East Carolina College rally, which was the first of the day, Kennedy's subsequent rallies ultimately bore statewide and national significance, making it impossible to examine only one stop without contextualizing it in relation to the remainder.

Prominent Families of New York

"Coach taught me the game. . . . He's like a second father to me." —Michael Jordan "Dean Smith epitomizes what a coach can be—teacher, counselor, mentor, example, friend." —Bill Bradley "He's a better coach of basketball than anyone else." —John Wooden For forty years, Dean Smith coached the University of North Carolina basketball team with unsurpassed success. Now, in *The Carolina Way*, he explains his coaching philosophy and shows readers how to apply it to the leadership and team-building challenges they face in their own lives. In his wry, sensible, wise way, Coach Smith takes

us through every aspect of his program, illustrating his insights with vivid stories. Accompanying each of Coach Smith's major points is a "Player Perspective" from a former North Carolina basketball star and an in-depth "Business Perspective" from Gerald D. Bell, a world-renowned leadership consultant and a professor at UNC's Kenan-Flagler Business School. The keystones of Coach Smith's coaching philosophy are widely applicable and centrally relevant to building successful teams of any kind.

Along the Cape Fear

Subtitled "A Novel of the South During Reconstruction," this 1879 bestseller, by a participant in that great social experiment, is the barely fictionalized account of the career of a Northern lawyer in North Carolina after the Civil War. A champion of the poor and landless of any race, and a keen observer of the dilemmas facing uneducated Negroes in the postwar period, Tourge offers us an important eyewitness account of one of the most tumultuous eras of American history, one that continues to influence the course of the American experiences of race and class to this day.

Cape Fear Beaches

North Carolina's Hurricane History charts the more than fifty great storms that have battered the Tar Heel State from the colonial era through Irene in 2011 and Superstorm Sandy in 2012, two of the costliest hurricanes on record. Drawing on news reports, National Weather Service records, and eyewitness descriptions, hurricane historian Jay Barnes emphasizes the importance of learning from this extraordinary history as North Carolina prepares for the inevitable disastrous storms to come. Featuring more than 200 photographs, maps, and illustrations, this book offers amazing stories of destruction and survival. While some are humorous and some tragic, all offer a unique perspective on the state's unending vulnerability to these storms.

A city of rare beauty and fascinating history, Wilmington attracts armies of tourists and visitors year-round eager to view its picturesque waterfront, to learn of the old port city's remarkable heritage and traditions, and to enjoy its grand beaches and landscapes. This visual history explores the city's and the vicinity's unique story from the late 1890s to the 1960s through the medium of postcards, a popular way of documenting a town's famous buildings, dwellings, personalities, and scenery.

John F. Kennedy's North Carolina Campaign

Established in 1911, Avery County is the youngest North Carolina county. Despite its recent formation, Avery has an intriguing history and rich Appalachian culture. Over the years, photographers have been eager to capture Grandfather Mountain, majestic Linville Falls, church groups, families, mighty steam engines, and many other diverse aspects of mountain culture. James "Lenoir" Franklin from the Linville Falls community photographed the southern portions of the county in the early 1900s. Operating during the same time, Willie R. Trivett lived and photographed in the Beech Mountain area. Drs. Mary and Eustace Sloop, founders of the Crossnore School, also took numerous photographs of Appalachian life. In more recent times, Grandfather Mountain's Hugh Morton has captured endearing images of the people and places of Avery County.

The Carolina Way

John Muir is considered to be the supreme icon of western wilderness and preservation. His counterpart in the east is Harlan P. Kelsey, an often obscure and forgotten figure. In *Beautiful Land of the Sky*, author Loren M. Wood chronicles Kelsey's journey from the humblest of beginnings to national prominence in horticulture and the establishment of national parks in the eastern United States. In this biography, Wood tells how, a century ago, Kelsey was the first to pioneer native plants for the American landscape and a leader in that process; how he was a leading participant in bringing all of America to our native plants in their finest original setting; and how he helped make a reality of the Great Smoky Mountains National Park, a zenith of horticultural biomass and diversity in America. In addition, this biography explores the parallels in the odysseys of Muir and Kelsey. Though primarily a biography of Kelsey, Wood compares the similarities, differences, and accomplishments of the two men. Including details gathered from more than fifty thousand items in Kelsey's personal files, *Beautiful Land of the Sky* narrates the inspiring and entertaining story of how the idea of national parks was implemented east of the Mississippi.

A Fool's Errand

The Civil War, the Restoration, and the Glorious Revolution in England laid the institutional and intellectual foundations of the modern understanding of liberty, of which we are heirs and beneficiaries. The Crisis of the Seventeenth Century uncovers new pathways to understanding this seminal time. Neither Catholic nor Protestant emerges unscathed from the examination to which Trevor-Roper subjects the era in which, from political and religious causes, the identification and extirpation of witches was a central event. Trevor-Roper points out that "In England the most active phase of witch-hunting coincided with times of Puritan pressure -- the reign of Queen Elizabeth and the period of the civil wars -- and some very fanciful theories have been built on this coincidence. But... the persecution of witches in England was trivial compared with the experience of the Continent and of Scotland. Therefore... [one must examine] the craze as a whole, throughout Europe, and [seek] to relate its rise, frequency, and decline to the general intellectual and social movements of the time..."

Wilmington, North Carolina

Presents a thorough and compelling day-to-day account of General William T. Sherman's progress through North Carolina from early March 1865, when his troops entered the state from South Carolina, through 4 May 1865, when they crossed its northern border into Virginia. Research is based on eyewitness accounts, newspaper reports, and published sources. Includes 4 maps.

Alumni History of the University of North Carolina

In a remarkable book based on prodigious research, Morton J. Horwitz offers a sweeping overview of the emergence of a national (and modern) legal system from English and colonial antecedents. He treats the evolution of the common law as intellectual history and also demonstrates how the shifting views of private law became a dynamic element in the economic growth of the United States. Horwitz's subtle and sophisticated explanation of societal change begins with the common law, which was intended to provide justice for all. The great breakpoint came after 1790 when the law was slowly transformed to favor economic growth and development. The courts spurred economic competition instead of circumscribing it. This new instrumental law flourished as the legal profession and the mercantile elite forged a mutually beneficial alliance to gain wealth and power. The evolving law of the early republic interacted with political philosophy, Horwitz shows. The doctrine of laissez-faire, long considered the cloak for competition, is here seen as a shield for the newly rich. By the 1840s the overarching reach of the doctrine prevented further distribution of wealth and protected entrenched classes by disallowing the courts very much power to intervene in economic life. This searching interpretation, which connects law and the courts to the real world, will engage historians in a new debate. For to view the law as an engine of vast economic transformation is to challenge in a stunning way previous interpretations of the eras of revolution and reform.

Avery County

Step into the past in this visual history of Carolina Beach in North Carolina through the lens of over 200 vintage images. Federal Point was once the name of a peninsula 15 miles south of Wilmington, bounded by the Cape Fear River, the Myrtle Grove Sound, and the Atlantic Ocean. Fort Fisher, Kure Beach, Carolina Beach, and Seabreeze now line its sandy shores. Fort Fisher played a pivotal role in the Civil War, and when it fell in 1865, the Confederacy lost its last supply line. A century later, the Fort Fisher Hermit became a local legend, teaching a litany of common sense and simplicity to legions of visitors. Carolina Beach and Kure Beach suffered a spate of fires and hurricanes that destroyed amusement park rides, arcades, and especially fishing piers. Seabreeze was an all-black resort during the Jim Crow era, and its greatest legacy is the R&B music and dance of the 1940s that gave rise to today's ever-popular beach music and shag dancing. The Army Corps of Engineers created Snow's Cut in 1930, connecting the river to the sound and turning the peninsula into an island that is now known as Pleasure Island.

Troopships of World War II

In this gripping narrative of the development of the Civil Rights movement in North Carolina, Dr. John L. Godwin brings to life the infamous case of the Wilmington Ten and the subsequent allegations of conspiracy. Through extensive research and interviews, he seeks to uncover some of the truth behind the actual events of the 1972 trial, while at the same time drawing readers in with the compelling details of the movement's origins in North Carolina and its ultimate outcome in one community. Dr. Godwin underscores his effort with a comprehensive exploration of the Civil Rights movement through the eyes of the locality, comparing it incisively to the earlier protests of the 1960s. His portrait joins that of scholars who have sought to describe the transformation brought about by black leadership on the local and state level, recounting both its victories and the frustrated hopes of local activists, in addition to how the new conservatism ultimately succeeded in co-opting the movement. For Wilmington, this is set against the background of North Carolina politics and civic culture, highlighting the role of Benjamin Chavis and his rise to national prominence. Filled with pictures that personalize this troubled era of American history, Dr. Godwin's book is an essential resource, not only to historians but also to students of public policy.

Sherman's March Through North Carolina

Few natural features possess as much personality as the peaks of Grandfather Mountain, which dominate the skyline between Boone and Linville. The mountain takes its name from its resemblance to the profile of a sleeping old man; it was known to Cherokee hunters as Tanawha, or "fabulous eagle." Later visitors came to see the magnificent views, brave the famous Mile-High Swinging Bridge, and observe the native flora. The mountain is billed as North Carolina's top scenic attraction. The advent of photography made Grandfather Mountain the High Country's most photographed celebrity, with images crafted by the mountain's longtime owner and champion, legendary photographer Hugh Morton, as well as mementos of family gatherings and individual visits. Grandfather Mountain showcases the rich natural and recreational history of this North Carolina landmark.

The Transformation of American Law, 1780-1860

"Both Terry Sanford and I. Beverly Lake were Democrats in the one-party South of that era. Yet they were different in almost every other way. Lake, a middle-aged law professor, was committed to segregation. Sanford, an ambitious young politician and lawyer, believed in expanding opportunities for all citizens. Their race was a heated struggle that would bind them together for the rest of their lives." "With unparalleled access to both sides and with an objective correspondent's hindsight view, John Drescher has written the story of a campaign that set the winning strategy for many who followed, and the biography of a winning candidate, a governor rated as one of the finest of the twentieth century."--BOOK JACKET.
