How to Blow Up a Pipeline

Property will cost us the earth The science on climate change has been clear for a very long time now. Yet despite decades of appeals, mass street protests, petition campaigns, and peaceful demonstrations, we are still facing a booming fossil fuel industry, rising seas, rising emission levels, and a rising temperature. With the stakes so high, why haven't we moved beyond peaceful protest? In this lyrical manifesto, noted climate scholar (and saboteur of SUV tires and coal mines) Andreas Malm makes an impassioned call for the climate movement to escalate its tactics in the face of ecological collapse. We need, he argues, to force fossil fuel extraction to stop--with our actions, with our bodies, and by defusing and destroying its tools. We need, in short, to start blowing up some oil pipelines. Offering a counter-history of how mass popular change has occurred, from the democratic revolutions overthrowing dictators to the movement against apartheid and for women's suffrage, Malm argues that the strategic acceptance of property destruction and violence has been the only route for revolutionary change. In a braided narrative that moves from the forests of Germany and the streets of London to the deserts of Iraq, Malm offers us an incisive discussion of the politics and ethics of pacifism and violence, democracy and social change, strategy and tactics, and a movement compelled by both the heart and the mind. Here is how we fight in a world on fire.

Fighting in a World on Fire

Young people are inheriting a world of climate catastrophe. Young people are also one of the strongest forces leading movements for climate justice, and to halt the fossil fuel emissions that are making our Earth unlivable. As Greta Thunberg and the Fridays for the Future movement have made clear, solutions offered by adults are far too little, far too late: the measures in unenforceable international agreements won't halt our reliance on fossil fuels, or take the drastic steps humans need to take in order to keep our planet livable. What kinds of drastic steps are needed? What kind of bold actions can the climate justice begin using to bring a stop to climate destruction, and that can be employed alongside existing strategies of mass protest, awareness, and legal appeals? Why does our society consider profit for oil companies more important than the future of young people and the health of our shared environment? In this adaptation of Andreas Malm's best-selling book on the need for a bolder, more confrontational climate justice movement, *How to Blow Up a Pipeline* these urgent questions are brought to the most important audience of all: those who are growing up in a world on fire.

A Study Guide for Isaac Bashevis Singer's Henne Fire

One's own fireside is, to all well-regulated minds, a pleasant subject of contemplation when one is absent, and a source of deep gratification when present. Especially may this be said to be the case in a cold, raw night in November, when mankind has a tendency to become chronically cross out of doors, and nature, generally, looks lugubrious; for, just in proportion as the exterior world grows miserably chill, the world "at home," with its blazing gas, its drawn curtains, its crackling fires, and its beaming smiles, becomes doubly comfortable and cosy. Even James Auberly, pompous, stern, and ungenial though he was, appeared to entertain some such thoughts, as he sat by his own fireside, one such night, in his elegant mansion in Beverly Square, Euston Road, London; and smiled grimly over the top of the Times newspaper at the fire. Mr Auberly always smiled—when he condescended to smile—grimly. He

seldom laughed; when he did so he did it grimly too. In fact, he was a grim man altogether; a gaunt, cadaverous, tall, careworn, middle-aged man—also a great one. There could be no question as to that; for, besides being possessed of wealth, which, in the opinion of some minds, constitutes greatness, he was chairman of a railway company, and might have changed situations with the charwoman who attended the head office of the same without much difference being felt. He was also a director of several other companies, which, fortunately for them, did not appear to require much direction in the conduct of their affairs.

Mr. Braidwood, the able Superintendent, had for many years been training his men on a system, the original of which he had begun and proved in Edinburgh. Modifying his system to suit the peculiarities of the larger field to which he had been translated, he had brought the "Fire Engine Establishment," (which belonged at that time to several insurance companies) to a state of efficiency which rendered it a model and a training-school for the rest of the world; and although he had not the advantage of the telegraph or the powerful aid of the land steam fire-engine of the present day, he had men of the same metal as those which compose the force now.

Norse Mythology explores the magical myths and legends of Norway, Sweden, Denmark, Iceland and Viking-Age Greenland and outlines the way the prehistoric tales and beliefs from these regions that have remained embedded in the imagination of the world. The book begins with an Introduction that helps put Scandinavian mythology in place in history, followed by a chapter that explains the meaning of mythic time, and a third section that presents in-depth explanations of each mythological term. These fascinating entries identify particular deities and giants, as well as the places where they dwell and the varied and wily means by which they forge their existence and battle one another. We meet Thor, one of the most powerful gods, who specializes in killing giants using a hammer made for him by dwarfs, not to mention myriad trolls, ogres, humans and strange animals. We learn of the ongoing struggle between the gods, who create the cosmos, and the jötnar, or giants, who aim to destroy it. In the enchanted world where this mythology takes place, we encounter turbulent rivers, majestic mountains, dense forests, storms, fierce winters, eagles, ravens, salmon and snakes in a landscape closely resembling Scandinavia. Beings travel on ships and on horseback; they eat slaughtered meat and drink mead.

Spanning from the inception of the universe and the birth of human beings to the universe's destruction and the mythic future, these sparkling tales of creation and destruction, death and rebirth, gods and heroes will entertain readers and offer insight into the relationship between Scandinavian myth, history, and culture.

David Sedaris's remarkable ability to uncover the hilarious absurdity teeming just below the surface of everyday life is elevated to wilder and more entertaining heights than ever in this new book of stories. Sedaris proceeds from bizarre conundrums of daily life - the etiquette of having a lozenge fall from your mouth into the lap of a fellow passenger or how to soundproof your windows with LP covers against neurotic songbirds - to the most deeply resonant human truths. Taking in the parasitic worm that once lived in his mother-in-law's leg, an encounter with a dingo and the purchase of a human skeleton, and culminating in a brilliant account of his attempt to quit smoking - in Tokyo - David Sedaris's sixth story collection is a fresh masterpiece of comic writing.

A World Made of Fire

A memoir of growing up with blind, African-American parents in a segregated cult preaching the imminent end of the world When *The World in Flames* begins, in 1970, Jerry Walker is six years old. His consciousness revolves around being a member of a church whose beliefs he finds not only confusing but terrifying. Composed of a hodgepodge of requirements and restrictions (including a prohibition against doctors and hospitals), the underpinning tenet of Herbert W. Armstrong's Worldwide Church of God was that its members were divinely chosen and all others would soon perish in rivers of flames. The substantial membership was ruled by fear, intimidation, and threats. Anyone who dared leave the church would endure hardship for the remainder of this life and eternal suffering in the next. The next life, according to Armstrong, would arrive in 1975, three years after the start of the Great Tribulation. Jerry would be eleven years old. Jerry's parents were particularly vulnerable to the promise of relief from the world's hardships. When they joined the church, in 1960, they were living in a two-room apartment in a dangerous Chicago housing project with the first four of their seven children, and, most significantly, they both were blind, having lost their sight to childhood accidents. They took comfort in the belief that they had been chosen for a special afterlife, even if it meant following a religion with a white supremacist ideology and dutifully sending tithes to Armstrong, whose church boasted more than 100,000 members and more than \$80 million in annual revenues at its height. When the prophecy of the 1972 Great Tribulation does not materialize, Jerry is considerably less disappointed than relieved. When the 1975 end-time prophecy also fails, he finally begins to question his faith and imagine the possibility of choosing a destiny of his own.

In this fascinating book John Keenan offers a classical commentary on the New Testament Letter of James, section by section, informed by a thorough study of contemporary Jamesian scholarship. His approach is unique in that it employs Mahayana Buddhist Philosophy as the interpretive lens to focus on this early Christian text. The author argues that the first chapter of James' letter presents wisdom as non-discriminative, in a manner very similar to Mahayana Buddhist teaching on wisdom. And James' insistence upon deeds of compassion and justice recommends a notion of Christian practice that is quite close to the Mahayana ideal of Bodhisattva engagement in the world. Because of these areas of

resonance, James is particularly amenable to a Mahayana reading—a reading that enables us to elicit fresh insights from the text.

Kindle Fire HD: The Missing Manual

A book of modern mysticism about rediscovering the true meaning of faith and how to reclaim our spiritual wisdom. Light on Fire is the soulful exploration of one woman's journey to awakening and becoming a modern-day Christian mystic. It's a compassionate guide that will support others on the path to awakening by offering new insights and practical guidance on how to reconnect with our innate spirituality. In her search to understand her own spontaneous awakening, Aedamar discovered that awakening is a natural life process from which we have become estranged. In beautifully poetic language, and through accessible philosophy, Aedamar shares how and why we are designed to wake up, and to experience Divine Union, in the ordinary course of life. Waking up is what is now needed to heal ourselves and the deeply rooted traumas of Western society. Light on Fire concludes with 'The Path of Gold', Aedamar's seven-stage guide to awakening that offers a model for rediscovering Divine Love in everyday life. It helps us to reconnect with our spiritual wisdom, which is critical as we enter a new era that uniquely calls us to mysticism and to love.
