Quellen zur Geschichte der Stadt Wien

The definitive history of Austria's multinational army and its immense role during three centuries of European military history Among the finest examples of deeply researched and colorfully written military history, Richard Bassett's *For God and Kaiser* is a major account of the Habsburg army told for the first time in English. Bassett shows how the Imperial Austrian Army, time and again, was a decisive factor in the story of Europe, the balance of international power, and the defense of Christendom. Moreover it was the first pan-European army made up of different nationalities and faiths, counting among its soldiers not only Christians but also Muslims and Jews. Bassett tours some of the most important campaigns and battles in modern European military history, from the seventeenth century through World War I. He details technical and social developments that coincided with the army's story and provides fascinating portraits of the great military leaders as well as noteworthy figures of lesser renown. Departing from conventional assessments of the Habsburg army as ineffective, outdated, and repeatedly inadequate, the author argues that it was a uniquely cohesive and formidable fighting force, in many respects one of the glories of the old Europe.

Quellen zur Geschichte der Stadt Wien: Abth., 1-3. Bd. Regesten aus dem Archive der Stadt Wien

Anniversary publication of the Belvedere The Belvedere in Vienna epitomizes the changes that have taken place over the course of three centuries in the concept of what constitutes a museum. Originally built by Prince Eugene of Savoy to enhance his prestige as a prince, under Maria Theresa, the Upper Belvedere became one of the world's first public museums. The idea of presenting Austrian art in an international context, which in 1903 motivated the establishment of the Modern Gallery in the Lower Belvedere, remains the key objective of this world-famous cultural institution. In this critical homage, renowned authors explore enduring questions that transcend the different epochs, such as : What ordering concepts are evident in art presentation ? How contemporary were these presentations in an international context ? What kind of public were they aimed at ? Anniversary publication of the Österreichische Galerie Belvedere: a critical homage to a place of art with a diverse history spanning centuries Exhibition until January 7, 2024 With contributions from Johanna Aufreiter, Björn Blauensteiner, Brigitte Borchhardt-Birbaumer, Thomas DaCosta Kaufmann, Christiane Erharter, Nora Fischer, Anna Frasca-Rath, Antoinette Friedenthal, Martin Fritz, Thomas W. Gaehtgens, Sabine Grabner, Katinka Gratzner-Baumgärtner, Cäcilia Henrichs, Alice Hoppe-Harnoncourt, Christian Huemer, Georg Lechner, Stefan Lehner, Gernot Mayer, Monika Mayer, Sabine Plakolm-Forsthuber, Georg Plattner, Matthew Rampley, Luise Reitstätter, Stella Rollig, Claudia Slanar, Franz Smola, Nora Sternfeld, Silvia Tammaro, Wolfgang Ullrich, Leonhard Weidinger, Christian Witt-Döring, Luisa Ziaja, and Christoph Zuschlag

Gothic and Renaissance Art in Nuremberg, 1300-1550

The Austrian School of Economics was founded by Carl Menger in Vienna during the last third of the nineteenth century. From that time until today, its vibrant teaching tradition has had a significant influence on the formation and further development of the modern social sciences and economics in Europe

and the United States. Its research agenda was characterized by an astonishing multitude of diverse, and in some cases even contradictory, conclusions. All branches of the school shared the conviction that the subjective feelings and actions of the individual are those which drive economic activity. Based on this conviction, explanations for economic phenomena such as value, exchange, price, interest, and entrepreneurial profit were derived, and step by step expanded into a comprehensive theory of money and business cycles. Because of their subjectivist-individualistic approach, economists of the Austrian School regarded any kind of collective as unscientific in rationale. This led to fierce arguments with the Marxists, the German Historical School, and later with the promoters of planned economy and state interventionism. In the modern Austrian School of Economics, questions regarding knowledge, monetary theory, entrepreneurship, the market process, and spontaneous order placed themselves in the foreground. This book endeavors to trace the development of this multifaceted tradition, with all of its ideas, personalities, and institutions.

For God and Kaiser

Spielman presents the role of the Habsburg court in the rise of Vienna the early modern period. His study clearly shows the extraordinarily complex web of interrelationships and interdependencies between the court, its servants, and the city as each strove to protect its privileges. The author's innovative approach consists in identifying the specific role that the court quartering system played in the expansion of the government's involvement in the development of the city. In so doing, Spielman ties in the two approaches traditionally used in histories of early modern Germany and Austria: the growth of the modern bureaucracy and the development of the Baroque.

The Belvedere: 300 Years a Venue for Art

A unique window on the world of nineteenth-century amateur music-making provided by the study of domestic musical arrangements of opera.

The Austrian School of Economics

The well-respected historian Manfred Rauchensteiner analyses the outbreak of World War I, Emperor Franz Joseph's role in the conflict, and how the various nationalities of the Habsburg Monarchy reacted to the disintegration of this 640-year-old empire in 1918. After Archduke Franz Ferdinand's assassination in Sarajevo in 1914, war was inevitable. Emperor Franz Joseph intended it, and everyone in Vienna expected it. How the war began and how Austria-Hungary managed to avoid capitulation only weeks later with the help of German troops reads like a thriller. Manfred Rauchensteiner's book is based on decades of research and is a fascinating read to the very end, even though the final outcome, the collapse of the Austro-Hungarian Dual Monarchy, is already known. Originally published in German in 2013 by Böhlau, this standard work is now available in English.

The City & the Crown

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Opera in the Viennese Home from Mozart to Rossini

This book offers a truly interdisciplinary discussion on the relationship between the vocal and the instrumental in music and other arts and in everyday communication alike. Presenting an in-depth systematical and historical analysis of the evolution of word and gesture art, it gives extensive information on the anthropological, biological, and physiological influences and interactions in music and beyond. The book gives a unique definition of the genuinely vocal and instrumental from their generative deep structure: They derive from and are determined in their production by the duality of voice and hands, and in terms of product as the tone or 'tonal' on the one hand, and the percussive, that is noise plus rhythm, on the other. This book succeeds in bringing together perspectives from art, and from natural and social sciences, merging them to offer new explanations about the relationship between the vocal and instrumental, and eventually about the origins of music, arts, and language. It offers new perspectives on the intertwining between the vocal and the instrumental, specifically in the context of the expressions of human languages. At the same time, this book aims at clarifying and explaining the role of words and gestures in different contexts, such as society and communication, education, and arts.

The First World War

Archaeologists and textile historians bring together 16 papers to investigate the production, trade and consumption of textiles in Scandinavia and across parts of northern and Mediterranean Europe throughout the medieval period. Archaeological evidence is used to demonstrate the existence or otherwise of international trade and to examine the physical characteristics of textiles and their distribution in order to understand who was producing, using and trading them and what they were being used for. Historical evidence, mainly textual, is employed to link textile names to places, numbers and prices and thus provide an appreciation of changing economics, patterns of distribution and the organisation of trade. Different types and qualities of cloths are discussed and the social implications of their production and import/export considered against a developing background of urbanism and increasing commercial wealth.

Publisher and Bookseller

Freed documents the network of marriage practices among ministerials in the archdiocese of Salzburg and in the process reconstructs an important and previously unexplored chapter in the rise of the German principalities.

Word Art + Gesture Art = Tone Art

Liechtenstein is one of the smallest European states, a principality situated between Austria and Switzerland in the Upper Rhine Valley. The nation is less than three hundred years old, but the ruling family, whose name it bears, traces its lineage back to the twelfth century. For successive generations, members of the Princely House of Liechtenstein have been devoted art collectors. With a high degree of appreciation of artistic achievement, they have pursued a centuries-long family tradition of acquiring not only great paintings and sculpture but also rare firearms, fine porcelain, and other works of art. The result of this tradition is a collection of masterpieces that in its depth and breadth reflects more than four hundred years of European history and ranks among the world's greatest private collections. This publication accompanies an exhibition at The Metropolitan Museum of Art that marked the first time the masterpieces from this private collection were put on public display. The rich and varied array of paintings, sculpture, and other works included in this exhibition not only represents the paradigm of a great European princely collection, but also has the added distinction of being the collection of the only surviving monarchy of the Holy Roman Empire. -- Metropolitan Museum of Art website.

Textiles and the Medieval Economy

Beyond the Gymnasium is the first systematic effort to examine the history of the body in modern Germany. By looking into medical dietetics, walking, dancing, gymnastics, cholera, and classrooms, Heikki Lempa reconstructs the ways the middle-class body became a source of political and social autonomy and a medium of social interaction. During the first two decades of the nineteenth century, German physicians defined the middle class body as qualitatively different from the lower class body. This belief was supported by a contemporary science known as dietetics. Lempa provides a comprehensive history and analysis of this science. Beyond the Gymnasium also analyzes the social implications of court dancing and gymnastics. In the eighteenth century, the French court dances set the standards of upper and middle class conduct. In the 1810s, the gymnastics movement challenged this tradition by propagating vigorous physical exercise and egalitarian social interaction. In 1819, the ban on gymnastics contributed to the rapid spread of dancing clubs, ballrooms, public promenades, and spas; the old forms of bodily interaction underwent a renaissance. These two trends--the quest for bodily autonomy and the continuity of traditional bodily conduct--played an important role in the status of the German middle class in the nineteenth century. In social interaction, it continued to cultivate those forms that had endowed the Old Regime with its specific character and flair. To explain this, the book explores the forms of social recognition in dancing, greeting, and walking and discovers that the German middle class displayed an aptitude for social recognition of asymmetrical relationships.

National Library of Medicine Current Catalog

In Giuseppe Arcimboldo's most famous paintings, grapes, fish, and even the beaks of birds form human hair. A pear stands in for a man's chin. Citrus fruits sprout from a tree trunk that doubles as a neck. All sorts of natural phenomena come together on canvas and panel to assemble the strange heads and faces that constitute one of Renaissance art's most striking oeuvres. The first major study in a generation of the artist behind these remarkable paintings, Arcimboldo tells the singular story of their creation. Drawing on his thirty-five-year engagement with the artist, Thomas DaCosta

Kaufmann begins with an overview of Arcimboldo's life and work, exploring the artist's early years in sixteenth-century Lombardy, his grounding in Leonardesque traditions, and his tenure as a Habsburg court portraitist in Vienna and Prague. Arcimboldo then trains its focus on the celebrated composite heads, approaching them as visual jokes with serious underpinnings—images that poetically display pictorial wit while conveying an allegorical message. In addition to probing the humanistic, literary, and philosophical dimensions of these pieces, Kaufmann explains that they embody their creator's continuous engagement with nature painting and natural history. He reveals, in fact, that Arcimboldo painted many more nature studies than scholars have realized—a finding that significantly deepens current interpretations of the composite heads. Demonstrating the previously overlooked importance of these works to natural history and still-life painting, Arcimboldo finally restores the artist's fantastic visual jokes to their rightful place in the history of both science and art.

Noble Bondsmen

"The first English-language study of book censorship in Nazi Germany, this book describes the way in which various state and party organizations in Germany exerted control over the creation, publication, and distribution of books. By presenting the fate of authors and publishers who came into conflict with the organs of censorship it sheds light on intellectual life under the Nazi dictatorship"--

Liechtenstein, the Princely Collections

This volume contains some 46 essays on various aspects of contemporary German-Jewish literature. The approaches are diverse, reflecting the international origins of the contributors, who are based in seventeen different countries. Holocaust literature is just one theme in this context; others are memory, identity, Christian-Jewish relations, anti-Zionism, *la belle juive*, and more. Prose, poetry and drama are all represented, and there is a major debate on the controversial attempt to stage Fassbinder's *Der Müll, die Stadt und der Tod* in 1985. The overall approach of the volume is an inclusive one. In his introduction, the editor calls for a reappraisal of the terms of German-Jewish discourse away from the notion of 'Germans' and 'Jews' and towards the idea that both Jews and non-Jews, all of them Germans, have contributed to the corpus of 'German-Jewish literature'.

Beyond the Gymnasium

In his landmark volume *Space, Time and Architecture*, Sigfried Giedion paired images of two iconic spirals: Tatlin's Monument to the Third International and Borromini's dome for Sant'Ivo alla Sapienza. The values shared between the baroque age and the modern were thus encapsulated on a single page spread. As Giedion put it, writing of Sant'Ivo, Borromini accomplished 'the movement of the whole pattern [...] from the ground to the lantern, without entirely ending even there.' And yet he merely 'groped' towards that which could 'be completely effected' in modern architecture—achieving 'the transition between inner and outer space.' The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged. This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography. It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque: a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism. Presenting research by an international community of scholars, this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century. The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history. In doing so, the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture.

The American Bibliopolist

A cutting edge media history on a perennially fascinating topic, which attempts to answer the crucial question: Who is in charge, the servant or the master? Though classic servants like the butler or the governess have largely vanished, the Internet is filled with servers: web, ftp, mail, and others perform their daily drudgery, going about their business noiselessly and unnoticed. Why then are current day digital drudges called servers? Markus Krajewski explores this question by going from the present back to the Baroque to study historical aspects of service through various perspectives, be it the servants'

relationship to architecture or their function in literary or scientific contexts. At the intersection of media studies, cultural history, and literature, this work recounts the gradual transition of agency from human to nonhuman actors to show how the concept of the digital server stems from the classic role of the servant.

Arcimboldo

Through an interlocking series of texts and images, this work explores how extreme sensations such as wonder, misery, ecstasy and rage have been portrayed at different moments in Western culture. Moving across multiple fields of creative endeavour and intellectual inquiry - from classical artefacts to Chicano art, political protest to operatic performance, Rene Descartes's writings on the soul to the Internet's digitised flesh - it reveals how the passions have elicited, eluded and transformed the act of representation.

Harmful and Undesirable

This catalogue accompanies the Fall 2005 exhibition that celebrates the flowering of art in medieval Prague, when the city became not only an imperial but also an intellectual and artistic capital of Europe. Scholars trace the distinctly Bohemian art that developed during the reigns of Holy Roman Emperor Charles IV and his sons; the artistic achievements of master craftsmen; and the rebuilding of Prague Castle and of Saint Vitus' Cathedral. -- Metropolitan Museum of Art website.

Jews in German Literature since 1945

Astronomy and Astrophysics Abstracts, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union (according to a resolution adopted at the 14th General Assembly in 1970). Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 7 contains literature published in 1972 and received before August 15, 1972; some older literature which was received late and which is not recorded in earlier volumes is also included.

The Baroque in Architectural Culture, 1880-1980

Wolfram Siemann tells a new story of Clemens von Metternich, the Austrian at the center of nineteenth-century European diplomacy. Known as a conservative and an uncompromising practitioner of realpolitik, in fact Metternich accommodated new ideas of liberalism and nationalism insofar as they served the goal of peace. And he promoted reform at home.

Bulletin of Books in the Various Departments of Literature and Science Added to the Public Library of Cincinnati During the Year...

Eighteenth and nineteenth century European, British and American newspapers constitute a rich and largely untapped source of contemporary, often eyewitness accounts of historical events and opinions concerning Iran from the late Safavid (1712) through the Qajar (c. 1797-1920) period. This study collects and annotates thousands of articles published in the Colonial and early Republican American newspapers, from the first mention of events in Persia in the American press (1712) to the death of Mohammad Shah (1848), unlocking for the first time a wealth of information on Iran and its place in the world during the 18th and early 19th century.

Publishers' circular and booksellers' record

Brodbeck offers a nuanced look at the intersection of music, cultural identity, and political ideology in Liberal Vienna by examining music-critical writing about Carl Goldmark, Antonín Dvořák, and Bedřich Smetana, Austrian citizens but not ethnic Germans. The critical reception of the three reveals a continuum of exclusivity, from a conception of Germanness rooted in social class and cultural elitism to one based in blood. The book thus offers insight into how educated German Austrians conceived of Germanness in music and understood their relationship to the 'non-Germans' in their midst.

The Server

This book offers a new perspective on the concept of modernity. Since its invention as a contrast to Antiquity or the Middle Ages, modernity has been tied to ideas of superiority, progress, and efficiency. As a counterpart to the Marxist "history of class struggle", "modernization theories" have transformed modernity into an almost teleological concept of historical development. These strong connotations obstruct a clear look at other forms of modernity. The contributions of the volume will show in a comparative perspective how modernity can also be understood and analyzed as multiple responses of societies and polities to organize themselves in facing ever more complex and integrated interactions at ever larger scales.

Representing the Passions

Alicja Bielak's chapter in this book, 'On the Margins of Paduan Medical Lectures. Self-reflection and Critical Attitude in the Notes of Jan Brozek (1585-1652)', is published open access and free to read or download from Oxford Academic History of Universities XXXVI/1 contains the customary mix of learned articles and book reviews which makes this publication an indispensable tool for the historian of higher education.

Bulletin

The final bankruptcy of the great socialist experiment in Eastern Europe appeared to sound a death knell for utopian thought. In 'Thinking Utopia' an effort is made to rehabilitate the concept of political utopia, arguing that utopian ideas continue to be relevant in the modern world.

Prague

This volume of essays provides the first major comparative study of the role played by women's movements and individual female activists in enabling or thwarting the transition from war to peace in Europe in the crucial years 1918 to 1923.

Annual List of Books Added to the Public Library of Cincinnati

First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

Literature 1972, Part 1

Medievalists, historians, and women's studies specialists will welcome this translation of Herbert Grundmann's classic study of religious movements in the Middle Ages because it provides a much-needed history of medieval religious life--one that lies between the extremes of doctrinal classification and materialistic analysis--and because it represents the first major effort to underline the importance of women in the development of the language and practice of religion in the Middle Ages.
