Autonomy and Independence in Language Learning

The topics of autonomy and independence play an increasingly important role in language education. They raise issues such as learners' responsibility for their own learning, and their right to determine the direction of their own learning, the skills which can be learned and applied in self-directed learning and capacity for independent learning and the extents to which this can be suppressed by institutional education. This volume offers new insights into the principles of autonomy and independence and the practices associated with them focusing on the area of EFL teaching. The editors' introduction provides the context and outlines the main issues involved in autonomy and independence. Later chapters discuss the social and political implications of autonomy and independence and their effects on educational structures. The consequences for the design of learner-centred materials and methods is discussed, together with an exploration of the practical ways of implementing autonomy and independence in language teaching and learning. Each section of the book opens with an introduction to give structure to the development of ideas and themes, with synopses to highlight salient features in the text and help build upon the material of previous chapters.

This book examines the role textbooks play in the teaching of dominant and non-dominant (first and foreign) languages in a range of cultural contexts worldwide. Each chapter addresses important issues related to what constitutes "legitimate knowledge"

Language, Ideology and Education

Providing a much-needed critical synthesis of research on teaching vocabulary and grammar to students of a second or foreign language, this book puts the research into perspective in order to distil recommendations for language teaching. Boers evaluates a comprehensive range of both well-established and lesser-known research strands and classroom practices to draw out the most effective instructional approaches to teaching words, multiword expressions and grammar patterns. Chapters discuss learning as a by-product of communicative activities, language-focused instruction, diverse types of exercises, mnemonic techniques and more, with a view to building bridges between the available research on such instructional approaches and how they are commonly implemented in actual language courses and textbooks. This book helps teachers make research-informed decisions regarding their instructional approaches to words, phrases and patterns, and direct researchers to specific areas in need of further inquiry. Boers not only demonstrates how research findings can inform effective teaching, but also calls for a deeper appreciation on the part of researchers of the realities of the teaching profession, making this a worthwhile text for preservice teachers, teacher educators, graduate students and scholars.

Grammar is integral to teaching English as a second language, and yet there is often a disconnect between theory and practice. This book bridges that gap by introducing key theories of English grammar and showing how they can be applied in teaching. By drawing on an eclectic range of sources, and using a multidisciplinary approach, Berry links advances in our knowledge of grammar, from theoretical and descriptive viewpoints, with developments in pedagogical practices, to provide a comprehensive overview of the whole process of grammar. The second part of the book contains four case studies of key areas of English grammar in which the insights of the earlier chapters are applied, illustrating how grammar theory is used in practice. Offering new insights into the way English grammar works, this book is invaluable for all professionals who 'do' English grammar: teachers, grammarians, textbook writers and syllabus designers, testers and researchers.

This important and accessible book identifies the key elements in the quest for best practice in online language teaching. The authors, all of them international experts who have made significant contributions to the debate about how to exploit the new technologies, consider online language teaching from three crucial perspectives: design, tools and pedagogy. Their recommendations are such that they can actually be realised in spite of the limitations of today's educational environments. The book demonstrates that the new technologies offer far greater potential for authentic encounters and constructivist learning than even the best classroom simulations; that automated exercise and feedback structures can be individualised and meaningful; and that if we have to teach fully by distance, these ventures no longer need to represent impoverished versions of live classes but can engender a strong sense of community. To achieve this we need to understand what elements constitute good design both in technical and pedagogical terms, to think seriously about providing the best feedback possible, and to have the courage to take the risks associated with letting go of traditional learner/teacher relationships.

Compact Preliminary for Schools Teacher's Book

This book presents a story of school improvement activity in East Africa from 1985 to 2000, which focused on sustained teacher development. The core of the book consists of six evaluations of school- and district-wide school improvement projects (SIPs) supported by the Aga Khan Foundation in Tanzania, Kenya, and Uganda. The case studies present an evolving body of knowledge about the successes and challenges of a comprehensive approach to school improvement grounded in a common set of strategic principles. The strategic principles embody the belief that the chances for quality improvement in teaching and learning are greater when change efforts *are school-based, *involve whole schools as the unit of change, *emphasize the ongoing professional development of teachers, *attend to school management and organizational conditions affecting the capacity of teachers to implement change, *prepare for the institutionalization of organizational structures and processes that enable continuous school development, and *evolve through partnerships among relevant education stakeholders. The book concludes with commentaries by international experts in school improvement and teacher development on the SIP project designs, implementation and outcomes, and on lessons that can be drawn from the projects and their evaluations for school improvement policy, practice and theory in developing and developed countries around the world.
