He has revised his discussions of early humankind to account for the most recent findings; he presents a new view of the Jewish revolt against Rome led by Bar Kochba. In addition, his account of the end of the Roman Empire has been rewritten in light of the most recent thinking by classical historians. Numerous maps and illustrations, carefully composed and selected, highlight the text.

Tourism and Identity in Scotland, 1770–1914

In the late eighteenth and nineteenth centuries, legions of English citizens headed north. Why and how did Scotland, once avoided by travelers, become a popular site for English tourists? In *Tourism and Identity in Scotland, 1770-1914*, Katherine Haldane Grenier uses published and unpublished travel accounts, guidebooks, and the popular press to examine the evolution of the idea of Scotland. Though her primary subject is the cultural significance of Scotland for English tourists, in demonstrating how this region came to occupy a central role in the Victorian imagination, Grenier also sheds light on middle-class popular culture, including anxieties over industrialization, urbanization, and political change; attitudes towards nature; nostalgia for the past; and racial and gender constructions of the "other." Late eighteenth-century visitors to Scotland may have lauded the momentum of modernization in Scotland, but as the pace of economic, social, and political transformations intensified in England during the nineteenth century, English tourists came to imagine their northern neighbor as a place immune to change. Grenier analyzes the rhetoric of tourism that allowed visitors to adopt a false view of Scotland as untouched by the several transformations of the nineteenth century, making journeys there antidotes to the uneasiness of modern life. While this view was pervasive in Victorian society and culture, and deeply marked the modern Scottish national identity, Grenier demonstrates that it was not hegemonic. Rather, the variety of ways that Scotland and the Scots spoke for themselves often challenged tourists' expectations.

Colonizer or Colonized

Colonizer or Colonized introduces two colonial stories into the heart of France's literary and cultural history. The first describes elite France's conflicted relationship to the Ancient World. As much as French intellectuals aligned themselves with the Greco-Romans as an "us," they also resented the Ancients as an imperial "them," haunted by the memory that both the Greeks and Romans had colonized their ancestors, the Gauls. This memory put the elite on the defensive—defending against the legacy of this colonized past and the fear that they were the barbarian other. The second story mirrored the first. Just as the Romans had colonized the Gauls, France would colonize the New World, becoming the "New Rome" by creating a "New France." Borrowing the Roman strategy, the French Church and State developed an assimilationist stance towards the Amerindian "barbarian." This policy provided a foundation for what would become the nation's most basic stance towards the other. However, this version of assimilation, unlike its subsequent ones, encouraged the colonized and the colonizer to engage in close forms of contact, such as mixed marriages and communities. This book weaves these two different stories together in a triangulated dynamic. It asks the Ancients to step aside to include the New World other into a larger narrative in which elite France carved out their nation's emerging cultural identity in relation to both the New World and the Ancient World.

Tradition in Creative Writing

Tradition in Creative Writing: Finding Inspiration Through Your Roots encourages writers to rediscover sources of creativity in the everyday, showing students how to see your writing as connected to your life. Adrian May addresses a key question for many beginning writers: Where do you get your ideas from? May argues that tradition does not mean anti-progress—but is instead a kind of hidden wealth that stems from literary and historical traditions, folk and songs, self and nature, and community. By drawing on these personal and traditional wellsprings of inspiration, writers will learn to see their writing as part of a greater continuum of influences and view their work as having innate value as part of that cultural and artistic ecology. Each chapter includes accessible discussion, literary and critical readings,

creative examples, and writing exercises. While the creative examples are drawn from song lyrics and poetry, the writing exercises are appropriate for all genres. Undergraduates and practitioners will benefit from this guide to finding originality in writing through exploring sources of creative inspiration.

Moral Codes and Social Structure in Ancient Greece

An exercise in cultural sociology, Moral Codes and Social Structure in Ancient Greece seeks to explicate the dynamic currents of classical Hellenic ethics and social philosophy by situating those idea-complexes in their socio-historical and intellectual contexts. Central to this enterprise is a comprehensive historical-sociological analysis of the Polis form of social organization, which charts the evolution of its basic institutions, roles, statuses, and class relations. From the Dark Age period of "genesis" on to the Hellenistic era of "eclipse" by the emergent forces of imperial patrimonialism, Polis society promoted and sustained corresponding normative codes which mobilized and channeled the requisite emotive commitments and cognitive judgments for functional proficiency under existing conditions of life. The aristocratic warrior-ethos canonized in the Homeric epics; the civic ideology of equality and justice espoused by reformist lawgivers and poets; the democratization of status honor and martial virtue that attended the shift to hoplite warfare; the philosophical exaltation of the Polis-citizen bond as found in the architectonic visions of Plato and Aristotle; and the subsequent retreat from civic virtues and the interiorization of value articulated by the Skeptics, Epicureans, and Stoics, new age philosophies in a world remade by Alexander's conquests--these are the key phases in the evolving currents of Hellenic moral discourse, as structurally framed by transformations within the institutional matrix of Polis society.

A Body of Praise

Do our physical bodies really matter in corporate worship? Isn't our soul the most important part of us? Aren't our bodies, at best, negligible to worship and, at worst, a hindrance? The answer to this last question is categorically no, as Christians have attested throughout history and across the global church. The purpose of the body instead is to offer to God in worship what only it can offer--and what must be offered to God. By drawing on the wisdom of the Bible, church history, and theology, and by taking advantage of the unique insights of the arts and sciences, ethics, and spiritual formation, a respected theologian and pastor argues in this book that there is something for our physical bodies to do that decisively forms Christlikeness in us within the context of corporate worship. What we do with our postures, gestures, and movements in worship matters. How our senses of sight, scent, sound, taste, and touch are involved in worship matters. How our spontaneous and prescriptive activities form us in worship matters. All of it matters to faithful and fulsome worship for the sake of a body that is fully alive in the praise of God.

Ephesian Women in Greco-Roman and Early Christian Perspective

In this volume, Elif Hilal Karaman examines the lives of Ephesian women in their historical and social contexts, considering in particular their roles as mothers, wives, teachers, and individuals in the private and public spheres. She presents Greco-Roman and early Christian sources relevant to Ephesus and relating to women, including more than 300 Ephesian inscriptions, and analyses them comparatively. By doing this she illuminates the impact of early Christianity upon the roles of women. The evidence presented demonstrates the extent to which early Christian authors utilized Greco-Roman cultural elements to construct a social background for the nascent Christian communities for whom they wrote. Elif Hilal Karaman's work thus advocates for the interpretation of early Christian texts in conversation with local archaeological and literary evidence in order to develop more nuanced understandings of the social and historical contexts of these important works.

Adam: First and the Last

Are you prepared to defend the biblical account of Adam as a living man formed by God? Many theologians, pastors, and philosophers now teach that the Adam we find in Genesis was a myth, story, or parable. In Adam: First and the Last, Simon Turpin – Ex. Director of Answers in Genesis, UK/Europe, reveals why understanding Adam to have been the first man created is critical for a consistent theological understanding of the biblical message of creation, the fall, and redemption. “If you deny the ‘First Adam,’ not only do you deny the sufficiency of Scripture and undermine its authority, but you ultimately attack the life, teaching, and person of the ‘Last Adam,’ our Lord Jesus Christ.” Ken Ham, CEO of The Ark Encounter, Creation Museum, & Answers in Genesis The very teachings of Jesus regarding creation and the flood are being attacked on the basis that, because of His human nature, there was error in some of His teaching. The theory of biological evolution, though lacking evidence, is why many

reject Adam as a historical individual or see him as anything other than the originating head of the human race. The church is facing a crisis because too few of her people and leaders understand the consequences of combining the Bible and evolution. Sadly today, more and more evangelical Christian scholars are having to redefine passages of Scripture because they have adopted the idea of evolution and millions of years into their thinking. These questions may be the biggest doctrinal issues facing our generation, and the church's attitude toward them could be a defining moment in Christianity. Adam: First and the Last will prepare you, your family, and your church to stand against today's false teachers and strengthen your faith in the infallible Word of God. Turpin offers a true biblical apologetic that will be used for decades and even centuries to help the Body of Christ hold fast to their confession of faith without wavering (Hebrews 10:23).

Thinking Medieval

This book is aimed at students coming to the study of western European medieval history for the first time, and also graduate students on interdisciplinary medieval studies programmes. It examines the place of the Middle Ages in modern popular culture, exploring the roots of the stereotypes that appear in films, on television and in the press, and asking why they remain so persistent. The book also asks whether 'medieval' is indeed a useful category in terms of historical periodization. It investigates some of the particular challenges posed by medieval sources and the ways in which they have survived. And it concludes with an exploration of the relevance of medieval history in today's world.
