Case Files Internal Medicine, Fourth Edition

100 Cases in Clinical Pharmacology, Therapeutics and Prescribing explores scenarios commonly seen by medical students and junior doctors in the ward, emergency department, outpatient clinic or in general practice in which an understanding of pharmacology and sound prescribing practice is central to successful clinical management and safe patient care. A succinct summary of the patient's history, examination and any initial investigations is followed by questions on the diagnosis and management

of the case. The answer includes a detailed discussion on each topic, providing practical advice on how to deal with the challenges that occur when prescribing, including planning, drug calculations, prescription review and adverse drug reactions. The book will be invaluable during clinical placements and is an ideal companion during preparation for the Prescribing Safety Assessment examination. Making speedy and appropriate clinical decisions, and choosing the best course of action to take as a result, is one of the most important and challenging parts of training to become a doctor. These true-to-life cases will teach students and junior doctors to prescribe appropriately, and to hone their diagnostic and management skills.

Case Files Pathology, Second Edition

Real-Life Cases for the Internal Medicine Clerkship and the USMLE Step 3 "...an excellent internal medicine review book written especially for medical students in their clinical years. It is perfect for clerkships, sub-internships, shelf, and USMLE exams. Each case includes a complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions. With this system, you'll learn in the context of real patients, rather than merely memorize facts. 60 clinical cases, each with USMLE-style questions Clinical pearls highlight key concepts Primer on how to approach clinical problems and think like a doctor Proven learning system improves your shelf-exam scores

Case Files Internal Medicine, Fifth Edition

Written by a distinguished nursing professional with over 25 years of experience, Pharmacology Case Study Workbook provides nursing students with an opportunity to apply pharmacology concepts to real-world situations. The text features 50 case studies based on real-life clinical situations that challenge students to think critically and develop effective problem-solving skills. Case studies present patients' medication history, enabling students to learn about the disease process from the point of medication use – an approach used in actual clinical practice. Other features include a review of key terms, home and intensive care scenarios, and a list of variables that must be considered in order to conduct an appropriate case analysis. Also present are a series of questions that will help guide students in developing effective ways to handle the scenario. Perfect for individual or group use, Pharmacology Case Studies is a valuable tool to help prepare nursing students for clinical practice!

100 Cases in Clinical Pharmacology, Therapeutics and Prescribing

This casebook is designed to help students develop the skills required to identify and resolve drug therapy problems through the use of patient case studies.

Case Files® Surgery, Fifth Edition

The closest a student can get to the wards without seeing patients! Designed to teach through clinical cases, this text offers 60 of the most common clinical problems in emergency medicine along with case discussion questions, clinical pearls, key terms and concepts, and USMLE-style questions and answers to reinforce learning. This is an excellent study guide for the emergency medicine shelf exam and the USMLE Step 2.

Case Files Internal Medicine, Sixth Edition

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. **A STEP-BY-STEP APPROACH TO DESIGNING ACCURATE DOSING REGIMENS** Casebook in Pharmacokinetics and Drug Dosing uses real-life cases to teach pharmacy students, pharmacists, and clinical pharmacists how to apply pharmacokinetics to formulate proper dosing regimens. In order to be as clinically relevant as possible, the book not only discusses drugs with readily available therapeutic serum levels, but places equal emphasis on high-alert agents with narrow therapeutic indexes. Each drug chapter is written by clinical pharmacists who have hands-on experience in drug dosing and includes an overview of the drug's pharmacology, including: Indications Mechanisms of action Toxicities Pharmacokinetics There is comprehensive review and discussion of each drug's bioavailability, volume of distribution, clearance, half-life, therapeutic drug level monitoring, drug interactions, dosing, and availability. Each chapter is enhanced by numerous patient cases with clear step-by-step answers and explanations. Calculations, equations, and dosing recommendations are provided for each case.

Case Files Microbiology, Third Edition

A time-saving, stress-reducing approach to learning the essential concepts of pharmacology Great for USMLE review! "This could be a very useful tool for students who struggle with understanding the most basic concepts in pharmacology for course and licensure examinations. 3 Stars."--Doody's Review Service Basic Concepts in Pharmacology provides you with a complete framework for studying -- and understanding -- the fundamental principles of drug actions. With this unique learning system, you'll be able to identify must-know material, recognize your strengths and weaknesses, minimize memorization, streamline your study, and build your confidence. Basic Concepts in Pharmacology presents drugs by class, details exactly what you need to know about each class, and reinforces key concepts and definitions. With this innovative text you'll be able to: Recognize the concepts you truly must know before moving on to other material Understand the fundamental principles of drug actions Organize and condense the drug information you must remember Review key information, which is presented in boxes, illustrations, and tables Identify the most important drugs in each drug class Seven sections specifically designed to simplify the learning process and help you gain an understanding of the most important concepts: General Principles Drugs That Affect the Autonomic Nervous System Drugs That Affect the Cardiovascular System Drugs That Act on the Central Nervous System Chemotherapeutic Agents Drugs That Affect the Endocrine System Miscellaneous Drugs (Includes Toxicology and Poisoning)

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Realistic patient cases to help sharpen clinical decision-making skills The 60 cases in Case Files: Family Medicine feature realistic clinical scenarios designed to help you enhance and hone your clinical decision-making skills. Each case includes an easy-to-understand discussion correlated to key concepts, definitions of key terms, clinical pearls, and Board-style review questions to reinforce learning. The format allows you to review a patient vignette and then explore/examine the case in a contextual, application-based manner. The book is ideal for both quick-access and slow and careful study.

Pharmacology Case Studies

A new companion study guide to the most respected text in pharmacy education Goodman & Gilman's Workbook for Pharmacologic Therapeutics delivers concise, high-yield summaries of the world-renowned coverage of the actions and uses of therapeutic agents in relation to physiology and pathophysiology found in Goodman & Gilman's The Pharmacological Basis of Therapeutics. In order to maximize the learning and teaching experience, this unique review is packed with pedagogical aids such as learning objectives, summaries of key points, self-assessment Q&A, case vignettes, and a complete test bank in the final chapter. Perfect as a self-study guide or as a required classroom review, Goodman & Gilman's Workbook for Pharmacologic Therapeutics contains features and content that will appeal to both students and professors.

Casebook in Clinical Pharmacokinetics and Drug Dosing

Realistic patient cases help sharpen your clinical decision-making skills The 60 cases in Case Files: Psychiatry feature realistic clinical scenarios designed to help you enhance and hone your clinical decision-making skills. Each case includes an easy-to-understand discussion correlated to key concepts, definitions of key terms, clinical pearls, and Board-style review questions to reinforce learning. The format allows you to review a patient vignette and then explore/examine the case in a contextual, application-based manner. The book is ideal for both quick-access and slow and careful study.

Basic Concepts in Pharmacology: What You Need to Know for Each Drug Class, Fourth Edition

This one-of-a-kind medical text covers everything needed to launch a successful career in pharmacy Interprofessional Practice in Pharmacy: Featuring Illustrated Case Studies presents an accessible, in-depth exploration of pharmacists working to advance the safe and effective use of medications. This is an ideal resource for early learners in pharmacy, high school and undergraduate students considering careers in healthcare, and educators and students throughout the health professions. Engaging and robust descriptions demonstrate how pharmacists work within interprofessional teams and contribute to the interprofessional care of patients in multiple healthcare settings. This information will help students identify career opportunities early in their educational journeys. Illustrated case studies—a modern take on a time-tested teaching strategy—provide a unique window into the profession of pharmacy. Readers

will enjoy exploring healthcare through the lens of pharmacists, including contemporary issues such as infectious disease outbreaks and the opioid crisis. Over 200 illustrations provide a wide-ranging view of pharmacy practice in the following areas: Community Pharmacy Primary Care Prevention & Wellness Cardiology Pediatrics Geriatrics Infectious Diseases Oncology Emergency Medicine Critical Care Mental Health Technology Population Health Administration

Case Files Family Medicine 5th edition

Drugs in Use is a popular textbook that addresses one of the key issues for pharmacy students – putting their learning into practice. The text presents a series of clinical case studies to illustrate how pharmacists can optimize drug therapy in response to the needs of individual patients.

Workbook and Casebook for Goodman and Gilman's The Pharmacological Basis of Therapeutics

Sixty high-yield pediatrics cases helps students sharpen their diagnostic and problem-solving skills The Case Files series is an award-winning learning system proven to improve shelf-exam scores and clerkship performance. Unlike other books on the market, this series helps students learn in the context of real patients instead of simply memorizing. Case Files Pediatrics teaches students how to improve their diagnostic and problem-solving skills as they work through sixty high-yield clinical cases. Each case includes a complete discussion, clinical pearls, references, and USMLE-style review questions with answers. The fifth edition has been updated to include a new Case Correlations feature which highlights differential diagnosis and related cases in the book. Updated to reflect the most current high-yield clerkship topics and the latest in medical management and treatment

Pharmacology Case Studies for Nurse Prescribers

Dozens of realistic orthopedic cases help physical therapy students make the transition from classroom to clinic Physical Therapy Case Files: Orthopedics delivers approximately 35 orthopedics cases that help students sharpen their critical thinking skills and prepare them for real-world practice. Clinicians will find the book to be a valuable refresher. Each case includes clinical tips, evidence-based practice recommendations, analysis, and references. Features National Physical Therapy Examination-style review questions accompany each case to prepare students for the boards Provides students with practical experience before working with patients Spares instructors from having to create their own cases Analysis of case will include remediation content, so students don't have to go a textbook for answers

Case Files Psychiatry, Sixth Edition

SHARPEN YOUR CRITICAL THINKING SKILLS AND PREPARE FOR REAL-WORLD PRACTICE WITH CLINICAL CASES New in the authoritative Case Files series, Physical Therapy Case Files: Acute Care gives you case studies that illustrate critical concepts you need to build and enhance your skills in physical therapy. Each case includes a discussion of the health condition, examination, evaluation, diagnosis, plan of care and interventions, evidence-based practice recommendations, and references. NPTE-style review questions accompanying each case reinforce your learning. With Physical Therapy Case Files: Acute Care, everything you need to succeed in the clinic and on the NPTE is right here in your hands. 31 acute-care cases with National Physical Therapy Examination-style review questions help you learn best practices in the context of patient care Enhance your practice with evidence-based cases written by leading clinicians, researchers, and academics Includes evidence-based ratings for examination and treatment plans Perfect for coursework use and NPTE preparation

Interprofessional Practice in Pharmacy: Featuring Illustrated Case Studies
