### Europe Between the Wars

It had seemed 'the war to end wars', yet within twenty-one years the unthinkable had become the inevitable and Europe was burning again. How did it happen? In this sober yet compelling account of Europe between the wars, Martin Kitchen traces the course of the deepening crisis in Europe by looking first at the peace settlement itself, and then at the economic and social problems of the interwar years.

It had seemed 'the war to end wars', yet within twenty-one years the unthinkable had become the inevitable and Europe was burning again. How did it happen? In this sober yet compelling account of Europe between the wars, Martin Kitchen traces the course of the deepening crisis in Europe by looking first at the peace settlement itself, and then at the economic and social problems of the interwar years.

### Europe Between the Wars

Martin Kitchen's compelling account of Europe between the wars sets the twenty-year crisis within the context of the profound sense of cultural malaise shared by many philosophers and artists, the economic crises that plagued a Europe ruined by war and the social upheavals caused by widespread unemployment and grinding poverty amid a noticeable improvement of living standards. This thoroughly revised edition, with completely new sections on intellectual, cultural and social history is richly illustrated with contemporary photographs. It is an up-to-date and lively account of a critical period of European history when the old world collapsed, the dictators offered seemingly exciting alternatives, and democracies were put to the supreme test. Written for undergraduate students studying 20th century European history, this new edition of a classic will challenge and provoke a deeper understanding of the interwar years.

### Women in Europe between the Wars

The central aim of this interdisciplinary book is to make visible the intentionality behind the 'forgetting' of European women's contributions during the period between the two world wars in the context of politics, culture and society. It also seeks to record and analyse women's agency in the construction and reconstruction of Europe and its nation states after the First World War, and thus to articulate ways in which the writing of women's history necessarily entails the rewriting of everyone's history. By showing that the erasure of women's texts from literary and cultural history was not accidental but was

ideologically motivated, the essays explicitly and implicitly contribute to debates surrounding canon formation. Other important topics are women's political activism during the period, antifascism, the contributions made by female journalists, the politics of literary production, genre, women's relationship with and contributions to the avant-garde, women's professional lives, and women's involvement in voluntary associations. In bringing together the work of scholars whose fields of expertise are diverse but whose interests converge on the inter-war period, the volume invites readers to make connections and comparisons across the whole spectrum of women's political, social, and cultural activities throughout Europe.

### The European Economy Between the Wars

The European Economy Between the Wars provides a full and up-to-date economic history of Europe in the inter-war period. The authors place the Great Depression of 1929-33 and the associated financial crisis at the centre of the narrative, and present these as both the culmination of the economic consequences of the First World War, the post-war peace treaties, and the policies and practices of the 1920s, and as a powerful influence on the subsequent economic history of the 1930s. Indescribing and explaining these developments, the authors show that errors in international economic policy, especially the commitment to the gold standard, were a principal cause of both the deep crisis and the partial recovery. The overall theme is illustrated at every point by a discussion of similarities and contrasts in the economic history and policies of individual countries, large and small. The basic approach is chronological, the style is clear and straightforward, and the book is accessible to students in a range of disciplines. The work takes full account of recent research, and there is an annotated guide to further reading with a substantial bibliography.

### Eastern Europe Between the Wars, 1918-1941

The region between the Baltic and the Black Sea was marked by a set of crises and conflicts in the 1920s and 1930s, demonstrating the diplomatic, military, economic or cultural engagement of France, Germany, Russia, Britain, Italy and Japan in this highly volatile region, and critically damaging the fragile post-Versailles political arrangement. The editors, in naming this region as "Middle Europe" seek to revive the symbolic geography of the time and accentuate its position, situated between Big Powers and two World Wars. The ten case studies in this book combine traditional diplomatic history with a broader emphasis on the geopolitical aspects of Big-Power rivalry to understand the interwar period. The essays claim that the European Big Powers played a key role in regional affairs by keeping the local conflicts and national movements under control and by exploiting the region's natural resources and military dependencies, while at the same time strengthening their prestige through cultural penetration and the cultivation of client networks. The authors, however, want to avoid the simplistic view that the Big Powers fully dominated the lesser players on the European stage. The relationship was indeed hierarchical, but the essays also reveal how the "small states" manipulated Big-Power disagreements, highlighting the limits of the latter's leverage throughout the 1920s and the 1930s.

### Wars and Betweenness

East Central Europe Between The Two World Wars is a sophisticated political history of East Central Europe in the interwar years. Written by an eminent scholar in the field, it is an original contribution to the literature on the political cultures of Poland, Czechoslovakia, Hungary, Yugoslavia, Romania, Bulgaria, Albania, and the Baltic states.

## Knives, Fools and Heroes in Europe Between the Wars

The US invasion of Iraq in 2003 was done mainly, if one is to believe US policy at the time, to liberate the people of Iraq from an oppressive dictator. However, the many protests in London, New York, and other cities imply that the policy of "making the world safe for democracy" was not shared by millions of people in many Western countries. Thinking about this controversy inspired the present volume, which takes a closer look at how society responded to the outbreaks and conclusions of the First and Second World Wars. In order to examine this relationship between the conduct of wars and public opinion, leading scholars trace the moods and attitudes of the people of four Western countries (Great Britain, France, Germany and Italy) before, during and after the crucial moments of the two major conflicts of the twentieth century. Focusing less on politics and more on how people experienced the wars, this volume shows how the distinction between enthusiasm for war and concern about its consequences is rarely clear-cut.

## East Central Europe between the Two World Wars

First published over thirty years ago, *War in European History* is a brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

## The Legacies of Two World Wars

Europe.

## War in European History

The hotel that I love like a fatherland is situated in one of the great port cities of Europe, and the heavy gold Antiqua letters in which its banal name is spelled out shining across the roofs of the gently banked houses are in my eye metal flags, metal bannerets that instead of fluttering shine out their greeting. In the 1920s and 30s, Joseph Roth travelled extensively in Europe, leading a peripatetic life living in hotels and writing about the towns through which he passed. Incisive, nostalgic, curious and sharply observed - and collected together here for the first time - his pieces paint a picture of a continent racked by change yet clinging to tradition. From the 'compulsive' exercise regime of the Albanian army, the rickety industry of the new oil capital of Galicia, and 'split and scalped' houses of Tirana forced into modernity, to the individual and idiosyncratic characters that Roth encounters in his hotel stays, these tender and quietly dazzling vignettes form a series of literary postcards written from a bygone world, creeping towards world war.

## The Hotel Years

At the end of 1918 one prescient American historian began to write a history of the Great War. "What will you call it?" he was asked. "The First World War," was his bleak response. In *Between the Wars* Philip Ziegler examines the major international turning points - cultural and social as well as political and military - that led the world from one war to another. His approach is panoramic, touching on all parts of the world where history was being made, examining Gandhi's March to the Sea and the Chaco War in South America alongside Hitler's rise to power. It is the tragic story of a world determined that the horrors of the First World War would never be repeated, yet committed to a path which in hindsight

was inevitably destined to end in a second, even more devastating conflict. Each chapter bears the unmistakable stamp of Ziegler's scholarship: a keen eye for the telling anecdote, elegant and fluid prose, and calm and fair judgments. In a world that grows ever more uncertain, its perspective on how hopes of peace can dissolve into the promise of war becomes more relevant with each passing day.

The *European Economy between the Wars*, (OUP, 1997) has become the definitive economic history of Europe in the inter-war period. Placing the Great Depression of 1929-33 and the associated financial crisis at the center of the narrative, the authors comprehensively examined the lead-up to and consequences of the depression and recovery. The authors now expand their scope to include the entire world economy, and have created a new edition: *The World Economy between the Wars*. New material focuses on the structure of the world economy in the 1920s, including a special focus on the United States, Japan, and Latin America.

#### The World Economy between the Wars

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. Indeed in the early 1940s both Charles de Gaulle and Winston Churchill referred to a 'thirty years war'. Why did so many crises rage across the continent from 1914 until the end of the Second World War? Why did the winds of destruction affect some regions more than others? The *Oxford Handbook of European History, 1914-1945* reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations, and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

#### A.B. Jordan - A Southern Editor's View of Europe Between the Wars

The Second World War left Europe in chaos. Landscapes had been ravaged, entire cities razed and more than 35 million people killed. Across most of the continent, the institutions that we now take for granted - such as the police, the media, transport, local and national government - were either entirely absent or hopelessly compromised. Crime rates soared, economies collapsed, and the European population hovered on the brink of starvation. In this groundbreaking study of the years that followed the war, Keith Lowe describes a continent still racked by violence, where large sections of the population had yet to accept that the war was over. He outlines the warped morality and the insatiable urge for vengeance that were the legacy of the conflict. He describes the ethnic cleansing and civil wars that tore apart the lives of ordinary people from the Baltic Sea to the Mediterranean, and the establishment of a new world order that finally brought stability to a shattered continent. These were themes, he shows, that existed across the whole of Europe - east and west. Based on original documents, interviews and scholarly literature in eight different languages, *Savage Continent* is a window on the brief, chaotic period between the end of World War II and the beginning of the Cold War. It is the first major history of the period in any language.

#### The Oxford Handbook of European History, 1914-1945

By the time the First World War ended in 1918, eight million people had died in what had been perhaps the most apocalyptic episode the world had known. This Very Short Introduction provides a concise

and insightful history of the 'Great War', focusing on why it happened, how it was fought, and why it had the consequences it did. It examines the state of Europe in 1914 and the outbreak of war; the onset of attrition and crisis; the role of the US; the collapse of Russia; and the weakening and eventual surrender of the Central Powers. Looking at the historical controversies surrounding the causes and conduct of war, Michael Howard also describes how peace was ultimately made, and the potent legacy of resentment left to Germany. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

### European Democracy Between the Wars

This volume examines conflicts over food and their implications for European societies in the first half of the Twentieth century. Food shortages and famines, fears of deprivation, and food regulations and controls were a shared European experience in this period. Conflicts over food, however, developed differently in different regions, under different regimes, and within different social groups. These developments had stark consequences for social solidarity and physical survival. Ranging across Europe, from Scandinavia and Britain to Germany, Italy and the Soviet Union, this volume explores the political, economic and cultural dynamics that shaped conflicts over food and their legacies.

### Savage Continent

'This war is not the end but the beginning of violence. It is the forge in which the world will be hammered into new borders and new communities. New molds want to be filled with blood, and power will be wielded with a hard fist.' Ernst Jünger (1918) For the Western allies 11 November 1918 has always been a solemn date - the end of fighting which had destroyed a generation, and also a vindication of a terrible sacrifice with the total collapse of their principal enemies: the German Empire, Austria-Hungary and the Ottoman Empire. But for much of the rest of Europe this was a day with no meaning, as a continuing, nightmarish series of conflicts engulfed country after country. In this highly original, gripping book Robert Gerwarth asks us to think again about the true legacy of the First World War. In large part it was not the fighting on the Western front which proved so ruinous to Europe's future, but the devastating aftermath, as countries on both sides of the original conflict were wrecked by revolution, pogroms, mass expulsions and further major military clashes. If the War itself had in most places been a struggle purely between state-backed soldiers, these new conflicts were mainly about civilians and paramilitaries, and millions of people died across central, eastern, and south-eastern Europe before the USSR and a series of rickety and exhausted small new states came into being. Everywhere there were vengeful people, their lives racked by a murderous sense of injustice, and looking for the opportunity to take retribution against enemies real and imaginary. Only a decade later, the rise of the Third Reich and other totalitarian states provided them with the opportunity they had been looking for.

### The First World War: A Very Short Introduction

This book examines how rural Europe as a hybrid social and natural environment emerged as a key site of local, national and international governance in the interwar years. The post-war need to secure and intensify food production, to protect contested border areas, to improve rural infrastructure and the economic viability of rural regions and to politically integrate rural populations, gave rise to a variety of schemes aimed at modernizing agriculture and remaking rural society. The volume examines discourses, institutions and practices of rural governance from a transnational perspective, revealing striking commonalities across national and political boundaries. From the village town hall to the headquarters of international organizations, local authorities, government officials and politicians, scientific experts and farmers engaged in debates about the social, political and economic future of rural communities. They sought to respond to both real and imagined concerns over poverty and decline, backwardness and insufficient control, by conceptualizing planning and engineering models that would help foster an ideal rural community and develop an efficient agricultural sector. By examining some of these local, national and international schemes and policies, this volume highlights the hitherto under-researched interaction between policymakers, experts and rural inhabitants in the European countryside of the 1920s and '30s.

### Food and Conflict in Europe in the Age of the Two World Wars

Europe's second Thirty Years' War—an epoch of blood and ashes Fire and Blood looks at the European crisis of the two world wars as a single historical sequence: the age of the European Civil War (1914–1945). Its overture was played out in the trenches of the Great War; its coda on a ruined continent. It opened with conventional declarations of war and finished with “unconditional surrender.” Proclamations of national unity led to eventual devastation, with entire countries torn to pieces. During these three decades of deepening conflicts, a classical interstate conflict morphed into a global civil war, abandoning rules of engagement and fought by irreducible enemies rather than legitimate adversaries, each seeking the annihilation of its opponents. It was a time of both unchained passions and industrial, rationalized massacre. Utilizing multiple sources, Enzo Traverso depicts the dialectic of this era of wars, revolutions and genocides. Rejecting commonplace notions of “totalitarian evil,” he rediscovers the feelings and reinterprets the ideas of an age of intellectual and political commitment when Europe shaped world history with its own collapse.

### The Vanquished

This book provides an accessible study of the neglected but highly important series of wars fought for control of the Baltic and Northeastern Europe during the period 1558-1721. It is the first comprehensive history which considers the revolution in military strategy which took place in the battlefields of Eastern Europe. Robert Frost examines the impact of war on the very different social and political systems of Sweden, Denmark, Poland-Lithuania and Russia and he explains why it was Russia that emerged victorious from these wars. Based on extensive primary and secondary research (including much material that is unfamiliar in English) this book makes an important contribution to the debate on military change and political development in early modern Europe.

### Governing the Rural in Interwar Europe

### Eastern Europe Between the Wars 1918-1941. By Hugh Seton-Watson. (2. Ed.)

This collection shows the importance of a comparative European framework for understanding developments in the popular press and journalism between the wars. This was, it argues, a formative and vital period in the making of the modern press. A great deal of fine scholarship on the development of modern forms of journalism and newspapers in the nineteenth and twentieth centuries has emerged within discrete national histories. Yet in bringing together essays on Britain, France, Germany, Italy and Poland, this book discerns points of convergence and divergence, and the importance of the European context in shaping how news was defined, produced and consumed. Challenging the tendency of histories of the press to foreground processes of 'Americanisation' and the displacement of older notions of the 'fourth estate' by new forms of human interest journalism, the chapters draw attention

to the complex ways in which the popular press continued to be politicized throughout the interwar period. Building on this analysis, the book examines the forms, processes and networks through which newspapers were produced for public consumption. In a period of massive social, political and economic upheaval and conflict, the popular press provided a forum in which Europe's meanings and nature could be constructed and contested. The interpersonal, material and technological links between newspapers, news corporations and news agencies in different countries served to define the outlines of Europe. Europe was called into being through the circulation of news and the practices and networks of the modern mass press traced in this volume. This publication is highly relevant to scholars of the history of journalism and cultural historians of interwar Britain and Europe. This book was originally published as a special issue of *Journalism Studies*.

### The Northern Wars

Economic historians have perennially addressed the intriguing question of comparative development, asking why some countries develop much faster and further than others. Focusing primarily on Europe between 1914 and 1939, this present volume explores the development of thirteen countries that could be said to be categorised as economically backward during this period: Albania, Bulgaria, Estonia, Greece, Hungary, Latvia, Lithuania, Poland, Portugal, Romania, Spain, Turkey and Yugoslavia. These countries are linked, not only in being geographically on Europe's periphery, but all shared high agrarian components and income levels much lower than those enjoyed in western European countries. The study shows that by 1918 many of these countries had structural characteristics which either relegated them to a low level of development or reflected their economic backwardness, characteristics that were not helped by the hostile economic climate of the interwar period. It explores, region by region, how their progress was checked by war and depression, and how the effects of political and social factors could also be a major impediment to sustained progress and modernisation. For example, in many cases political corruption and instability, deficient administrations, ethnic and religious diversity, agrarian structures and backwardness, population pressures, as well as international friction, were retarding factors. In all this study offers a fascinating insight into many areas of Europe that are often ignored by economists and historians. It demonstrates that these countries were by no means a lost cause, and that their post-war performances show the latent economic potential that most harboured. By providing an insight into the development of Europe's 'periphery' a much more rounded and complete picture of the continent as a whole is achieved.

### Wars and Betweenness

This book studies "armchair" travel writers who journeyed to Europe during the interwar period of 1919-1939. It focuses on travel conversations writers experienced as they sought the real Europe stripped of press reports and government propaganda. They encountered a continent where a cherished past was colliding with an ominous future.

### The Jews of East Central Europe Between the World Wars

A fresh and suggestive interpretation of the relationship between veterans of the Great War and fascism in interwar Europe.

### The Press and Popular Culture in Interwar Europe

*Future War and the Defence of Europe* offers a major new analysis of how peace and security can be maintained in Europe: a continent that has suffered two cataclysmic conflicts since 1914. Taking as its starting point the COVID-19 pandemic and way it will inevitably accelerate some key global dynamics already in play, the book goes on to weave history, strategy, policy, and technology into a compelling analytical narrative. It lays out in forensic detail the scale of the challenge Europeans and their allies face if Europe's peace is to be upheld in a transformative century. The book upends foundational assumptions about how Europe's defence is organised, the role of a fast-changing transatlantic relationship, NATO, the EU, and their constituent nation-states. At the heart of the book is a radical vision of a technology-enabling future European defence, built around a new kind of Atlantic Alliance, an innovative strategic public-private partnership, and the future hyper-electronic European force, E-Force, it must spawn. Europeans should be under no illusion: unless they do far more for their own defence, and very differently, all that they now take for granted could be lost in the maze of hybrid war, cyber war, and hyper war they must face.

## Europe's Third World

This volume of essays examines one of the crucial periods in the evolution of the European rural economy and society, assessing the effects of the Second World War on the European countryside, and the impact of food and agricultural problems on the outcome of the war.

## Traveling Europe Between the World Wars

The city of Trieste stands as a symbol of the Italian-Yugoslav border dispute in the first decade after the Second World War. The problem included a much larger territory which covers the wider area of Trieste: ranging from the Julian Alps in the north to the base of the Istrian peninsula in the south; in the area where the Italians meet the South Slavs. Moreover, after the Second World War it was an area of confrontation for two ideologies: western democracy and communism. It was the place where the Iron Curtain lay between the two worlds for many decades of the Cold War. Often discussed from the socio-economic point of view, military aspects of the Trieste Crisis remain remarkably under-reported - and not only in the English language. One of the primary reasons is the relative unavailability of relevant Italian and Yugoslav documentation, but also the general focus on political and ethnic issues instead. The Trieste Crisis focusses on military-related affairs in this part of the world from the 'race to Trieste' of May 1945 until the creation of the Free Territory of Trieste and the culmination of tensions between Italy and former Yugoslavia, in October 1953. By the later date, the crisis had reached a point where it resulted in the largest deployment of military forces from both countries. Correspondingly, this work provides a detailed account of the Allied, Italian and Yugoslav military presence in the area before, and their build-up during this near-war. Paying special attention to the description of the troops involved, their armament and equipment, the heavy weaponry deployed, and aerial and naval forces, The Trieste Crisis is illustrated by more than 150 photographs - most of them never published before - colour profiles and maps, and thus closing a gap in the history of the early Cold War in Europe of the mid-20th Century.

## War Veterans and Fascism in Interwar Europe

WBodzimierz Borodziej and Maciej Górny set out to salvage the historical memory of the experience of war in the lands between Riga and Skopje, beginning with the two Balkan conflicts of 1912-1913 and ending with the death of Emperor Franz Joseph in 1916. The First World War in the East and South-East of Europe was fought by people from a multitude of different nationalities, most of them dressed in the uniforms of three imperial armies: Russian, German, and Austro-Hungarian. In this first volume of *Forgotten Wars*, the authors chart the origins and outbreak of the First World War, the early battles, and the war's impact on ordinary soldiers and civilians through to the end of the Romanian campaign in December 1916, by which point the Central Powers controlled all of the Balkans except for the Peloponnese. Combining military and social history, the authors make extensive use of eyewitness accounts to describe the traumatic experience that established a region stretching between the Baltic, Adriatic, and Black Seas.

## Future War and the Defence of Europe

This is a book about economics and racism: During World War I, the liberal global economic system, based on principles of free trade and most-favored nation treatment and negotiated in gold parities, collapsed for good. The disintegration and collapse of commerce eventually led to racist cleansing, expulsion and mass murder. Against this background, this book offers new perspectives on the racist fault-lines that appeared and deepened in European economies after the end of what was regarded as the Great War. At what point did people start to ostracize their neighbors economically because they thought they were of a different ethnic group? Who decided who was to be excluded? Where did the fault-lines open? Where did the boundaries lie? How were they defined - by law, or by common practice? How much extra time and money were people prepared to spend in order to do ostracize their neighbors? And what did that mean for the economy - and society - as such?

## War, Agriculture, and Food

A new interpretation of the Cold War from the perspective of the smaller and middle powers in Asia, the Middle East and Europe.

## Trieste Crisis 1953

Combining the history of ideas and the history of emotions, this work explores the convergence between political and cultural ideas of Europe and the idea of love in the period between the two world wars. It investigates European unity from a political viewpoint, but also from cultural and symbolic ones, taking a critical stand towards Euro-centrism.

For long dark centuries, legend spoke of a Prince born to save the world... and now that Prince is dead. Those stories, collected by my father in the last days of the old kings, tell the tale of that late prince: Alexi of the Vale. As he journeyed north in secret, pursued by forces unknown and unknowable, he put to paper the hopes and fears of another world in its own words... strange as they may be. This is no tale for the fainthearted. The stout and true... may they read, and understand.

### The Heir Of Night

A DARK ENEMY. AN ANCIENT WAR. A NEW CHAMPION. Young Malian is being trained to rule. Her people garrison the mountain range known as the Wall of Night against an ancient enemy, keeping a tide of shadow from the rest of their world. Malian is expected to uphold this tradition, yet she's known little of real danger until the enemy attacks her fortress home and the Keep of Winds becomes a bloodbath. Malian flees deep into the Old Keep - and when the danger is greatest her own hidden magic flares into life. But if she accepts its power, she must prepare to pay the price. 'The Heir of Night by Helen Lowe is a richly told tale of strange magic, dark treachery and conflicting loyalties, set in a well realized world' - Robin Hobb 'Dark and magical... The Heir of Night is a grand entrance' TheBookBag.co.uk The start of an incredibly addictive new fantasy series - perfect for readers of Trudi Canavan, Karen Miller and Brent Weeks.

### The Holy Bible

A Midsummer Night's Dream is a comedy play by William Shakespeare, believed to have been written between 1590 and 1596. It portrays the events surrounding the marriage of the Duke of Athens, Theseus, and Hippolyta. These include the adventures of four young Athenian lovers and a group of six amateur actors, who are controlled and manipulated by the fairies who inhabit the forest in which most of the play is set. Life of William Shakespeare is a biography of William Shakespeare by the eminent critic Sidney Lee. This book was one of the first major biographies of the Bard of Avon. It was published in 1898, based on the article contributed to the Dictionary of National Biography. William Shakespeare (1564 – 1616) was an English poet and playwright, widely regarded as the greatest writer in the English language and the world's pre-eminent dramatist. He is often called England's national poet and the "Bard of Avon". His extant works, including some collaborations, consist of about 38 plays, 154 sonnets, two long narrative poems, and a few other verses, the authorship of some of which is uncertain. Sir Sidney Lee (1859 – 1926) was an English biographer and critic. He was a lifelong scholar and enthusiast of Shakespeare. His article on Shakespeare in the fifty-first volume of the Dictionary of National Biography formed the basis of his Life of William Shakespeare. This full-length life is often credited as the first modern biography of the poet.

### King John. Midsummer night's dream. Merchant of Venice

There is a little land. In that little land, there is a little city. In that city there is a little street, and on that street there is a little wall. When you stand by that Holy Wall, you can hear the footsteps of our father Abraham, and you can hear the trumpet of the Great Day to come. You hear the past and you can hear the future. You can hear the singing of the Levites. Or, you can hear us crying, going into exile. You can hear the six million crying out of the gas chambers, and you can hear the trumpet of the Great Day to come. I was standing one early morning by the Holy Wall, and I was saying Kaddish for my father. But when you stand by that Holy Wall, you say Kaddish for the whole world. Sometimes you feel like saying Kaddish for your own soul, and sometimes you feel like saying Kaddish for tomorrow. Then you hear the words "Yisgadal V'yiskadash Shmei Raba — May G-d's Name become great and sanctified," and you remember there is one G-d, and you know that the Great Morning is coming. You know that day and night will get together. The living and the dead, we and the whole world. This is my song, the song of tears, because on that Great Day the tears will march through the world, and the whole world will join them. The tears will clear the world and prepare the world. Everything will come together. We will all come together. It will be a new morning – a new beginning. In this remarkable and life-changing work, the reader is transported to the Holy Temple in Jerusalem to be inspired by the teachings of Rabbi Shlomo Carlebach zt"l. Masterfully adapted by Rabbi Shlomo Katz (renowned musician and creator of the best-selling and acclaimed The Soul of Chanukah: Teachings of Rabbi Shlomo Carlebach), these teachings touch the soul.

#### Outing and the Wheelman

The result of a collaborative, multiyear project, this groundbreaking book explores the interpretive worlds that inform religious practice and derive from sensory phenomena. Under the rubric of "making sense," the studies assembled here ask, How have people used and valued sensory data? How have they shaped their material and immaterial worlds to encourage or discourage certain kinds or patterns of sensory experience? How have they framed the sensual capacities of images and objects to license a range of behaviors, including iconoclasm, censorship, and accusations of blasphemy or sacrilege? Exposing the dematerialization of religion embedded in secularization theory, editor Sally Promey proposes a fundamental reorientation in understanding the personal, social, political, and cultural work accomplished in religion's sensory and material practice. Sensational Religion refocuses scholarly attention on the robust material entanglements often discounted by modernity's metaphysic and on their inextricable connections to human bodies, behaviors, affects, and beliefs.

### The Heir of Night

It was half-past eleven on the night of Wednesday, April 14th, when the well-known red limousine of Mr. Maverick Narkom, superintendent of Scotland Yard, came abruptly to the head of Mulberry Lane, which, as you may possibly know, is a narrow road skirting one of the loneliest and wildest portions of Wimbledon Common. Lennard, the chauffeur, put on the brake with such suddenness that the car seemed actually to rise from the earth, performed a sort of buzzing and snorting semicircle, and all but collided with the rear wall of Wuthering Grange before coming to a halt in the narrow road space which lay between that wall and the tree-fringed edge of the great Common. Under ordinary circumstances one might as soon have expected to run foul of a specimen of the great auk rearing a family in St. Paul's churchyard, as to find Mr. Narkom's limousine in the neighborhood of Mulberry Lane at any hour of the day or the night throughout the whole cycle of the year.

### That Night Depository

On his sailing trip, Leo the little wanderer arrives at a rocky bay and disembarks on a deserted pier. It belongs to two towns that are feuding furiously with one another. The angry mayors won't allow the traveler inside their stone walls. But luckily for Leo, between the two towns lies a piece of land that nobody owns. It is just big enough for his neat little cabin and garden, where many flowers bloom and the beautiful sounds of his violin fill the air. On warm nights, people climb onto the walls together to admire the view and listen to the music and the sea. "Would it be better, after all, to tear down the walls that separate us?" the townsfolk begin to wonder.

I THE TRYST As he got out of the train at the little wayside station he remembered the conversation as if it had been yesterday, instead of fifteen years ago—and his heart went thumping against his ribs so violently that he almost heard it. The original thrill came over him again with all its infinite yearning. He felt it as he had felt it then—not with that tragic lessening the interval had brought to each repetition of its memory. Here, in the familiar scenery of its birth, he realised with mingled pain and wonder that the subsequent years had not destroyed, but only dimmed it. The forgotten rapture flamed back with all the fierce beauty of its genesis, desire at white heat. And the shock of the abrupt discovery shattered time. Fifteen years became a negligible moment; the crowded experiences that had intervened seemed but a dream. The farewell scene, the conversation on the steamer's deck, were clear as of the day before. He saw the hand holding her big hat that fluttered in the wind, saw the flowers on the dress where the long coat was blown open a moment, recalled the face of a hurrying steward who had jostled them; he even heard the voices—his own and hers... ## The Wars of Justinian I

This ancient Roman history examines the military campaigns of Justinian I, from army organization to tactics and strategy—with maps and battle diagrams. Justinian I was the last great Roman conqueror. Though he never led an army in person, his leadership dramatically increased the size of his realm. His long reign, from 527 to 565, was devoted to the *renovatio imperii*, or renovation of Empire. His will and vision drove the reconquest of Italy from the Ostrogoths, North Africa from the Vandals, and parts of Spain from the Visigoths. These grand schemes were largely accomplished through the services of two talented generals, Belisarius and Narses. They were successful in spite of concurrent wars against the Persians and the devastation caused by bubonic plague. In this comprehensive study, Michael Whitby draws on the full range of sources to examine all of Justinian's campaigns. Besides narrating the course and outcome of these wars, Whitby analyses the Roman army of the period, considering its equipment, organization, leadership, strategy and tactics, and considers the longer-term impact of Justinian's military ventures on the stability of the empire.

In the early third century AD the Roman Empire was a force to be reckoned with, controlling vast territories and wielding enormous political power from Scotland to the Sahara. 400 years later this mighty Empire was falling apart in the face of successive problems that the rulers failed to deal with. In this challenging new volume Michael Whitby tackles the fundamental issues (such as the rise of Christianity) that led to the 'decline and fall' of the Roman Empire, and offers a startling reassessment of the performance of the late Roman army.

## Rome at War AD 293–696

An accessible history of Darlington from prehistory to the present day highlighting the city's significant events and people.

## Darlington: a Potted History

The central aim of this interdisciplinary book is to make visible the intentionality behind the 'forgetting' of European women's contributions during the period between the two world wars in the context of politics, culture and society. It also seeks to record and analyse women's agency in the construction and reconstruction of Europe and its nation states after the First World War, and thus to articulate ways in which the writing of women's history necessarily entails the rewriting of everyone's history. By showing that the erasure of women's texts from literary and cultural history was not accidental but was ideologically motivated, the essays explicitly and implicitly contribute to debates surrounding canon formation. Other important topics are women's political activism during the period, antifascism, the contributions made by female journalists, the politics of literary production, genre, women's relationship with and contributions to the avant-garde, women's professional lives, and women's involvement in voluntary associations. In bringing together the work of scholars whose fields of expertise are diverse but whose interests converge on the inter-war period, the volume invites readers to make connections and comparisons across the whole spectrum of women's political, social, and cultural activities throughout Europe.

## Women in Europe between the Wars

Something big is going down, real hush-hush. All I've got so far is a code name...Anteater mentioned it last month in Khe Sanh-thought it had something to do with nukes in the hands of the NVA, but wasn't sure-and now he's dead...I'll keep you posted. Only seven weeks have passed since author and journalist Roger Burnett, on assignment in Vietnam, stumbled upon a backstreet rumor about a mysterious organization known as Black Rose. The trail is long and complex, but the time span is brief for Burnett and an international team of associates to expose the growing conspiracy of those whose goal is to establish a permanent wartime economy in America-via provocation, via bold aggression, via any means possible-especially if it might force a war with China. About the Author: In the mid-Sixties, P. L. Nelson worked in an industry that was financed by the U.S. government to investigate and research means and systems of delivery for various chemical warfare agents. By 1967, he had managed an accidental glimpse or two of classified Intelligence projects, which served to tweak his imagination and set him on a course of fiction writing. The Incessant Voice of War grew out of Nelson's interest in history and politics, and in examining how people respond to severe challenges that test their integrity. Nelson currently lives in Colorado City, Colorado, where he is working on a book of poetry and essays based on his explorations of the American West. ### The Promise

Sarah Annie Jackson was born in 1905 near Whitby, UK. She died in 1998 in very different times. Annie trained to be a nurse and rose through the ranks until she retired in 1965 as Matron of the Royal Infirmary in Liverpool. In World War II, she volunteered to serve with the Territorial Army Nursing Corps and served first in France, until that country was overrun by the German army; followed by two years in England attending London bombing casualties; and then from 1942 - 45, was attached to the British 8th Army in North Africa and Italy. This is her diary and speaking notes from a talk she gave later. I hope you find it as interesting. I do.

An historical account of some things relating to the nature of the English government, and the conceptions which our fore-fathers had of it. With some inferences thence made for the satisfaction of those who scruple the Oath of Allegiance to King William and Queen Mary. [By Daniel Whitby.]

### Between These Walls

May 1945 In the dying days of WW II on the American occupied side of Germany's Elbe River, US Army Medical Corps Colonel Samuel Singer comes upon the shot-up wreck of a smouldering SS Staff car, with a badly injured driver, nearby a dead German Army officer carrying the ID of a Nazi war criminal, and a young blonde woman, also dead in the back seat. July 1988 Art curator Daniel Singer, the adopted son of Colonel Singer receives a mysterious package—a large brown envelope, sealed with security tape—from West Berlin. He can't help but think that there's something important within the envelope. But what? Daniel's quest to learn about the package's contents leads him on a surprising voyage of discovery about his own roots, including an encounter with the Mossad, Israel's top secret spy agency. As he searches, he unlocks the history and secrets of three families—one American and two German—following them through tumultuous times, from the dying days of WWI to the rise of Adolf Hitler, WWII, the Holocaust, the birth of the State of Israel and three Middle East wars. As Daniel learns about duty, honour, sacrifice, and the familial ties that bind us all, he will be faced with a life-altering choice—and the opportunity to right the most heinous of wrongs.

## These Walls Between Us

From an author of the best-selling women's health classic *Our Bodies, Ourselves* comes a bracingly forthright memoir about a life-long friendship across racial and class divides. A white woman's necessary learning, and a Black woman's complex evolution, make *These Walls Between Us* a "tender, honest, cringeworthy and powerful read." (Debby Irving, author, *Waking Up White*.) In the mid-1950s, a fifteen-year-old African American teenager named Mary White (now Mary Norman) traveled north from Virginia to work for twelve-year-old Wendy Sanford's family as a live-in domestic for their summer vacation by a remote New England beach. Over the years, Wendy's family came to depend on Mary's skilled service—and each summer, Mary endured the extreme loneliness of their elite white beachside retreat in order to support her family. As the Black "help" and the privileged white daughter, Mary and Wendy were not slated for friendship. But years later—each divorced, each a single parent, Mary now a rising officer in corrections and Wendy a feminist health activist—they began to walk the beach together after dark, talking about their children and their work, and a friendship began to grow. Based on decades' worth of visits, phone calls, letters, and texts between Mary and Wendy, *These Walls Between Us* chronicles the two women's friendship, with a focus on what Wendy characterizes as her "oft-stumbling efforts, as a white woman, to see Mary more fully and to become a more dependable friend." The book examines obstacles created by Wendy's upbringing in a narrow, white, upper-class world; reveals realities of domestic service rarely acknowledged by white employers; and draws on classic works by the African American writers whose work informed and challenged Wendy along the way. Though Wendy is the work's primary author, Mary read and commented on every draft—and together, the two friends hope their story will incite and support white readers to become more informed and accountable friends across the racial divides created by white supremacy and to become active in the ongoing movement for racial justice.

With his marriage on the rocks and his life in shambles, washed up crime writer Lucas Graham is desperate for a comeback. So when he's promised exclusive access to notorious cult leader and death row inmate Jeffrey Halcomb, the opportunity is too good to pass up. Lucas leaves New York for the scene of the crime—a split-level farmhouse on the gray-sanded beach of Washington State—a house whose foundation is steeped in the blood of Halcomb's diviners; runaways who, thirty years prior, were drawn to his message of family, unity, and unconditional love. Lucas wants to tell the real story of Halcomb's faithful departed, but when Halcomb goes back on his promise of granting Lucas exclusive information on the case, he's left to put the story together on his own. Except he is not alone. For Jeffrey Halcomb promised his devout eternal life...and within these walls, they're far from dead.

### The Age of Walls

Tim Marshall, the New York Times bestselling author of *Prisoners of Geography*, offers "a readable primer to many of the biggest problems facing the world" (Daily Express, UK) by examining the borders, walls, and boundaries that divide countries and their populations. The globe has always been a world of walls, from the Great Wall of China to Hadrian's Wall to the Berlin Wall. But a new age of isolationism and economic nationalism is upon us, visible in Trump's obsession with building a wall on the Mexico border, in Britain's Brexit vote, and in many other places as well. China has the great Firewall, holding back Western culture. Europe's countries are walling themselves against immigrants, terrorism, and currency issues. South Africa has heavily gated communities, and massive walls or fences separate people in the Middle East, Korea, Sudan, India, and other places around the world. In fact, more than a third of the world's nation-states have barriers along their borders. Understanding what is behind these divisions is essential to understanding much of what's going on in the world today. Written in Tim Marshall's brisk, inimitable style, *The Age of Walls* is divided by geographic region. He provides an engaging context that is often missing from political discussion and draws on his real life experiences as a reporter from hotspots around the globe. He examines how walls, borders, and barriers have been shaping our political landscape for hundreds of years, and especially since 2001, and how they figure in the diplomatic relations and geo-political events of today. "Marshall is a skilled explainer of the world as it is, and geography buffs will be pleased by his latest" (Kirkus Reviews). "Accomplished, well researched, and pacey...*The Age of Walls* is for anyone who wants to look beyond the headlines and explore the context of some of the biggest challenges facing the world today, it is a fascinating and fast read" (City AM, UK).

## If These Walls Could Talk

Philadelphia's community muralism movement is transforming the City of Brotherly Love into the Mural Capital of the World. This remarkable groundswell of public art includes some 3,500 wall-sized canvases: On warehouses and on schools, on mosques and in jails, in courthouses and along overpasses. In *If These Walls Could Talk*, Maureen O'Connell explores the theological and social significance of the movement. She calls attention to some of the most startling and powerful works it has produced and describes the narratives behind them. In doing so, O'Connell illustrates the ways that the arts can help us think about and work through the seemingly inescapable problems of urban poverty and arrive at responses that are both creative and effective. This is a book on American religion. It incorporates ethnography to explore faith communities that have used larger-than-life religious imagery to proclaim in unprecedented public ways their self-understandings, memories of the past, and visions of the future. It also examines the way this art functions in larger public discourse about problems facing every city in America. But *If These Walls Could Talk* is also theological text. It considers the theological implications of this most democratic expression of public art, mindful of the three components of every mural: the pieces themselves, those who create them, and those who interpret them. It illuminates a kind of beauty that seeks after social change or, in other words, the largely unexplored relationship between theological aesthetics and ethics.

## Walls

"A lively popular history of an oft-overlooked element in the development of human society" (Library Journal)—walls—and a haunting and eye-opening saga that reveals a startling link between what we build and how we live. With esteemed historian David Frye as our raconteur-guide in *Walls*, which Publishers Weekly praises as "informative, relevant, and thought-provoking," we journey back to a time before barriers of brick and stone even existed—to an era in which nomadic tribes vied for scarce resources, and each man was bred to a life of struggle. Ultimately, those same men would create edifices of mud, brick, and stone, and with them effectively divide humanity: on one side were those the walls protected; on the other, those the walls kept out. The stars of this narrative are the walls themselves—rising up in places as ancient and exotic as Mesopotamia, Babylon, Greece, China, Rome, Mongolia, Afghanistan, the lower Mississippi, and even Central America. As we journey across time and place, we discover a hidden, thousand-mile-long wall in Asia's steppes; learn of

bizarre Spartan rituals; watch Mongol chieftains lead their miles-long hordes; witness the epic siege of Constantinople; chill at the fate of French explorers; marvel at the folly of the Maginot Line; tense at the gathering crisis in Cold War Berlin; gape at Hollywood's gated royalty; and contemplate the wall mania of our own era. Hailed by Kirkus Reviews as "provocative, well-written, and—with walls rising everywhere on the planet—timely," Walls gradually reveals the startling ways that barriers have affected our psyches. The questions this book summons are both intriguing and profound: Did walls make civilization possible? And can we live without them? Find out in this masterpiece of historical recovery and preeminent storytelling.

#### World of Walls

"We're going to build a wall." Borders have been drawn since the beginning of time, but in recent years artificial barriers have become increasingly significant to the political conversation across the world. Donald Trump was elected President of the United States while promising to build a wall on the Mexico border, and in Europe, the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers. Virtual walls are also built and crushed at increasing speed. In the post-9/11 era there is a greater danger from so-called "transnational non-state actors", and computer hacking and cyberterrorism threaten to overwhelm our technological barriers. In this timely and original book, Said Saddiki scrutinises the physical and virtual walls located in four continents, including Israel, India, the southern EU border, Morocco, and the proposed border wall between Mexico and the US. Saddiki's detailed analysis explores the tensions between the rise of globalisation, which some have argued will lead to a "borderless world" and "the end of the nation-state", and the rapid development in recent decades of border control systems. Saddiki examines both regular and irregular cross-border activities, including the flow of people, goods, ideas, drugs, weapons, capital, and information, and explores the disparities that are reflected by barriers to such activities. He considers the consequences of the construction of physical and virtual walls, including their impact on international relations and the rise of the multi-billion dollar security market. *World of Walls: The Structure, Roles and Effectiveness of*

Separation Barriers is important reading for all those interested in the topics of immigration, border security, international relations, and policy.

## Walls

DIV The world's walls are supposed to be coming down. We speak of globalization, international markets and global villages; barriers to trade keep falling, and it is now possible to communicate instantly from nearly anywhere in the world. But just as these virtual walls come down, real walls rise. In this evocative blend of travel writing, history and politics, Marcello Di Cintio visits the world's most disputed edges to meet those who live alongside the razor wire, concrete and steel. Along the way he shares tea with refugees on the wrong side of Morocco's desert wall; he encounters illegal immigrants circumventing high-tech fencing around the Spanish enclaves of Ceuta and Melilla; he walks Arizona's migrant trails, visits fenced-in villages in India, and stands with those who protest against Israel's security barrier to understand what these structures say about those who build them, and how they influence the cultures that they pen in. Venturing beyond politics, he encounters the infiltrators who circumvent the walls, the artists who transform them, and the fenced-in ignored and forgotten people who live in their shadow. The walls discussed are: 1. 'The Wall of Shame' in the Western Sahara, built by the Morrocans in 1987 following their defeat by the Spanish. 2. A high-tech 'fence' around the Spanish enclaves of Ceuta and Meilla. 3. The Indo Bangladesh 'fence', erected in 1947. 4. The West Bank Wall. 5. The 'green line' that separates the Greek from the Turkish-Cypriot quarters in Nicosia, the capital of Cypress, and Lefkosa, the capital of the Turkish Republic of Northern Cyprus. 6. The US-Mexico border. 7. The various barriers throughout Belfast. 8. The l'Acadie fence in Montreal, erected as a wall built of chains in 1960. /div

#### Tearing Down the Walls

He is one of the world's most accomplished figures of modern finance. As chairman and chief executive officer of Citigroup, Sanford "Sandy" Weill has become an American legend, a banking visionary whose innovativeness, opportunism, and even fear drove him from the lowliest jobs on Wall Street to its most commanding heights. In this unprecedented biography, acclaimed Wall Street Journal reporter Monica Langley provides a compelling account of Weill's rise to power. What emerges is a portrait of a man who is as vital and as volatile as the market itself. *Tearing Down the Walls* tells the riveting inside story of how a Jewish boy from Brooklyn's back alleys overcame incredible odds and deep-seated prejudices to transform the financial-services industry as we know it today. Using nearly five hundred firsthand interviews with key players in Weill's life and career -- including Weill himself -- Langley brilliantly chronicles not only his success and scandals but also the shadows of his hidden self: his father's abandonment and his loving marriage; his tyrannical rages as well as his tearful regrets; his fierce sense of loyalty and his ruthless elimination of potential rivals. By highlighting in new and startling detail one man's life in a narrative as richly textured and compelling as a novel, *Tearing Down the Walls* provides the historical context of the dramatic changes not only in business but also in American society in the last half century.

### By Water Beneath the Walls

A gripping history chronicling the fits and starts of American special operations and the ultimate rise of the Navy SEALs from unarmed frogmen to elite, go-anywhere commandos—as told by one of their own. “Deeply researched, well organized, and incredibly engaging . . . This is our legacy with all the warts, the challenges, and the heroics in one concise volume.”—Admiral William H. McRaven, #1 New York Times bestselling author and former commander, United States Special Operations Command

How did the US Navy—the branch of the US military tasked with patrolling the oceans—ever manage to produce a unit of raiders trained to operate on land? And how, against all odds, did that unit become one of the world's most elite commando forces, routinely striking thousands of miles from the water on the battlefields of Iraq, Afghanistan, Syria, even Central Africa? Behind the SEALs' improbable rise lies the most remarkable underdog story in American military history—and in these pages, former Navy SEAL Benjamin H. Milligan captures it as never before. Told through the eyes of remarkable leaders and racing from one longshot, hair-curling raid to the next, *By Water Beneath the Walls* is the tale of the unit's heroic naval predecessors, and the evolution of the SEALs themselves. But it's also the story of the forging of American special operations as a whole—and how the SEALs emerged from the fires as America's first permanent commando force when again and again some other unit seemed predestined to seize that role. Here Milligan thrillingly captures the outsize feats of the SEALs' frogmen forefathers in World War II, the Korean War, and elsewhere, even as he plunges us into the second front of interservice rivalries and personal ambition that shaped the SEALs' evolution. In equally vivid, masterful detail, he chronicles key early missions undertaken by units like the Marine Raiders, Army Rangers, and Green Berets, showing us how these fateful, bloody moments helped create the modern American commando—even as they opened up pivotal opportunities for the Navy. Finally, he takes us alongside as the SEALs at last seize the mantle of commando raiding, and discover the missions of capture/kill and counterterrorism that would define them for decades to come. Written with the insight that can only come from a combat veteran and a member of the book's tribe, *By Water Beneath the Walls* is an essential new history of the SEAL teams, a crackling account of desperate last stands and unforgettable characters accomplishing the impossible—and a riveting epic of the dawn of American special operations.

### Breaking Down the Walls of Heartache

Popular music's gay DNA is inarguable, from Elvis in eye shadow and Little Richard's 'Tutti Frutti' to The Velvet Underground's subversive rock'n'roll and Bowie's ambisexual alien Ziggy Stardust; from kd lang's female Elvis to Kurt Cobain in a dress; from Noughties lesbian icon Beth Ditto to Lady Gaga's 'Born This Way' manifesto. But if collected essays and/or features have addressed gay, lesbian, bisexual and transgender singers, songwriters, musicians and songs, no book has yet comprehensively and authoritatively drawn together all the threads to explore this as an unfolding, historical narrative: to tell the story of how music 'came out', from the days when homosexuals were deeply in the closet, but the love that once dared not speak its name sings it, and on daytime radio to boot. This story will reveal which songs have coded messages about sexuality, and which proudly declared the truth, including examples of heterosexual songwriters and singers who chose to address same-sex issues, from Rod Stewart's 'The Killing Of Georgie' - the first UK number one with a gay theme - to Suede's 'Animal Nitrates'. The narrative will unfold against a backdrop of historic social and political shifts, as LGBT rights pushed for visibility and equality, from the closet of the Fifties to the struggle and setbacks of the Sixties, the liberation of the Seventies, the mainstream invasion and AIDS crisis of the Eighties, the advances of the Nineties and the more immersed scene of the Noughties. These artists have indeed changed the world as we know it. *Breaking Down the Walls of Heartache* is a story for a wide audience, not just the LGBT community but a broad spectrum of music lovers who are fascinated by these characters, events, stories and songs. It is also a very timely tale, given the prominence of same-sex issues such as marriage equality, alongside the retrogressive steps in places such as Russia and parts of Africa,

where songs encapsulating the gay/lesbian experience mirror those of the Sixties, signifying how the journey from illegality and bigotry to freedom is still far from over.

#### Walls Come Tumbling Down

*Walls Come Tumbling Down* charts the pivotal period between 1976 and 1992 that saw politics and pop music come together for the first time in Britain's musical history; musicians and their fans suddenly became instigators of social change, and 'the political persuasion of musicians was as important as the songs they sang'. Through the voices of campaigners, musicians, artists and politicians, Daniel Rachel follows the rise and fall of three key movements of the time: Rock Against Racism, 2 Tone, and Red Wedge, revealing how they all shaped, and were shaped by, the music of a generation. Composed of interviews with over a hundred and fifty of the key players at the time, *Walls Come Tumbling Down* is a fascinating, polyphonic and authoritative account of those crucial sixteen years in Britain's history.

#### Between the Walls

The graffiti of the French student and worker uprising of May 1968, capturing participatory politics in action. Graffiti itself became a form of freedom. —Julien Besançon, *The Walls Have the Floor* Fifty years ago, in 1968, barricades were erected in the streets of Paris for the first time since the Paris Commune of nearly one hundred years before. The events of May 1968 began with student protests against the Vietnam War and American imperialism, expanded to rebellion over student living conditions and resistance to capitalist consumerism. An uprising at the Sorbonne was followed by wildcat strikes across France, uniting students and workers and bringing the country's economy to a halt. There have been many accounts of these events. This book tells the story in a different way, through the graffiti inscribed by protestors as they protested. The graffiti collected here is by turns poetic, punning, hopeful, sarcastic, and crude. It quotes poets as often as it does political thinkers. Many wrote "I have nothing to write," signaling not their naiveté but their desire to participate. Other anonymous declarations included "Prohibiting prohibited"; "The dream is reality"; "The walls have ears. Your ears have walls"; "Exaggeration is the beginning of invention"; "Comrades, you're nitpicking"; "You don't beg for the right to live, you take it"; and "I came/I saw/I believed." A meeting is called at the Grand Amphitheater of the Sorbonne: "Agenda: the worldwide revolution." This was interactive, participatory politics before Twitter and Facebook. Although the revolution of May 1968 didn't topple the government (Charles de Gaulle fled the country, only to return; in June, his party won a resounding electoral mandate), it made history. In *The Walls Have the Floor*, Julien Besançon collected traces of this history before the walls were painted over, and published this collection in July 1968 even as the paint was drying. Read today, the graffiti of 1968 captures, in a way no conventional history can, the defining spontaneity of the events.

#### The Walls Around Us

The discovery of the ancient city of Troy has long been attributed to the relentlessly self-promoting archaeologist Heinrich Schliemann.
