Induced After Death Communication

Induced After Death Communication (IADC) is a therapy for grief and trauma that has helped thousands of people come to terms with their loss by allowing them the experience of private communication with their departed loved ones. This is the definitive book on the subject. Botkin, a clinical psychologist, created the therapy while counseling Vietnam veterans in his work at a Chicago area VA hospital. Botkin recounts his initial—accidental—discovery of IADC during therapy sessions with Sam, a Vietnam vet haunted by the memory of a Vietnamese girl he couldn't save. During the session, quite unexpectedly, Sam saw a vision of the girl's spirit, who told him everything was okay; she was at peace now. This single moment surpassed months—years—of therapy, and allowed Sam to reconnect with his family. Since that 1995 discovery, Botkin has used IADC to successfully treat countless patients—the book includes dozens of case examples—and has taught the procedure to therapists around the country.

Talking Through Death

Talking Through Death examines communication at the end-of-life from several different communication perspectives: interpersonal (patient, provider, family), mediated, and cultural. By studying interpersonal and family communication, cultural media, funeral related rituals, religious and cultural practices, medical settings, and legal issues surrounding advance directives, readers gain insight into the ways symbolic communication constructs the experience of death and dying, and the way meaning is infused into the process of death and dying. The book looks at the communication-related health and social issues facing people and their loved ones as they transition through the end of life experience. It reports on research recently conducted by the authors and others to create a conversational, narrative text that helps students, patients, and medical providers understand the symbolism and construction of meaning inherent in end-of-life communication.

After Death Communication

Containing testimonies from people from all walks of life, including such celebrities as Paul McCartney and Robbie Williams, this is both a glimpse into a wider spiritual reality and a practical guide to communicating with the deceased. Describing the direct contact between the living and the deceased, this collection was undertaken without the intervention of an intermediary such as a psychic or medium. A product of years of painstaking work researching the phenomenon of after-death communication (ADC), this extraordinary work collects hundreds of deeply poignant, firsthand accounts from those who have been directly contacted by deceased loved ones. The reader is left to decide whether these are mere hallucinations or manifestations of something more significant. Response to Heathcote-James' new research has been genuinely startling, revealing that an amazing proportion of the population believe that they have had after-death experiences. The weight of evidence may well change the way readers consider the supernatural.

Hello from Heaven

Is there life after death? Will we be reunited with our deceased loved ones when we die? Can they communicate with us now? *Hello From Heaven!* is the first complete study of an exciting new field of research called After-Death Communication, or ADC. This enlightening volume provides first-hand perspectives and ethnographic research on communication at the end of life, a topic that has gone largely understudied in communication literature. Author Elissa Foster's own experiences as a volunteer hospice caregiver form the basis of the book. *Communicating at the End of Life* recounts the stories of Foster and six other volunteers and their communicative experiences with dying patients, using communication theory and research findings to identify insights on the relationships they form throughout the process. What unfolds is a scholarly examination of a subject that is significant to every individual at some point in the life process. Organized chronologically

to follow the course of Foster's involvement with hospice and the phases of the study, the book opens with Part 1, providing background and contextual information to help readers understand subsequent stories about communication between volunteers and patients. Part 2 of the volume emphasizes the adjustments required by the volunteers as they entered the world of hospice and the worlds of the patients. Part 3 underscores the importance of improvisation and finding balance within the role of volunteer—in particular how to be fully present for patients as well as their family members. The volume concludes with Part 4, which addresses how volunteers coped with the death of their patients and what they learned from the experience of volunteering. *Communicating at the End of Life* is appropriate for scholars and advanced students studying personal relationships, health communication, gerontology, interpersonal communication, lifespan communication, and communication & aging. Its unique content offers precious and meaningful insights on the communication processes at a critical point in the life process.

After Death Communication

Scholars, educators, health professionals, and activists from a variety of fields have struggled with one of the most significant questions of contemporary life: How do we rescue the experience of death and dying from the mire of fear, denial, and secrecy that it has been associated with for the better part of a century? In *When Death Goes Pop*, Charlton D. McIlwain describes a striking emerging shift in the way that death is represented in such omnipresent forms of media as television - a shift that seems to be moving the American discourse on death and dying from the private sphere to the public. The book surveys the past thirty years of death-related television programming, from daytime soaps to prime-time dramas, focusing primarily on Home Box Office's *Six Feet Under* and its innovative approach to the subject, and from the Sci-Fi Channel's *Crossing Over* to the genre of paranormal programming as a whole. This book also discusses the increasing use of multimedia and the Internet in the funeral industry and how the new technologies change the way that we remember the dead as they create and sustain what we might call a «virtual community of death».

Communicating at the End of Life

“Guaranteed to give immense hope,” this manual on reconnecting with loved ones who have passed on “provides stunning evidence of the continuity of love and life” (Suzanne Giesemann, author of *Messages of Hope*) Famed relationship therapist, author, and media personality Dr. Jamie Turn-dorf—known worldwide as Dr. Love—shares the amazing true story of her spiritual reconnection with her beloved, deceased husband, internationally renowned former Jesuit priest Emile Jean Pin. Discovering for herself that relationships don't end in death, Jamie recounts her remarkable experience where, through the depths of her grief after Jean's sudden passing, her husband made his continued presence—and undying love—known. Drawing on these personal encounters, Jamie has created a groundbreaking new form of grief therapy that combines her acclaimed conflict-resolution techniques with after-death communication. The result: an unprecedented method that enables the bereaved to reconnect, resolve unfinished business, and make peace with the deceased. Filled with dozens of examples of spirit contact and communication, this book eliminates any doubt about life after death and shows that contact is ongoing. Loved ones in spirit don't just linger briefly before going to “heaven” and disappearing from your life. Rather, heaven is a state, not a place, and your loved ones have eternity to support you and heal any issues left behind when they passed on. Come to recognize the numerous signs from spirit that you may have been missing. Learn to trust yourself and the process that's right for you—not a shortened, artificial grief period prescribed by conventional doctors. Practice techniques for heightening your senses, expanding your awareness, and entering an open state, culminating in Jamie's method for *Dialoguing with the Departed*. When connection and love live on, fear is banished and relationships can grow and heal as never before. Begin opening your mind and your heart today!

When Death Goes Pop

Modern technology has given us powerful new tools for an age-old dream: seeing and speaking with the dead. Using things you probably already own - such as a camcorder, computer, or tape recorder - you can contact departed loved ones or other spirits, record their images and voices, and establish two-way communications between the worlds. *Speak with the Dead* also details the more traditional methods of seance, trance, and scrying. You don't have to be a “techie” or an occultist to use any of these techniques. This book will guide you to one of the most awe-inspiring experiences you'll ever have - making contact with deceased loved ones and other souls. *Speak with the Dead* is the first book

in the modern marketplace to focus on practical, usable techniques for communicating with spirits. This book shows you seven methods for spirit contact: -catching Electronic Voice Phenomena on tape -using radio noise to provide spirits with a voice -capturing ghostly images on videotape -letting spirits use your computer or telephone -scrying, establishing telepathic contact with the dead, and holding a seance Speak with them. They're waiting.

Love Never Dies

It can be hard to know what to talk about with a bereaved person over a period of time once you have offered your condolences. This book shows how, by using good active listening skills, empathic exploration and a willingness to talk about the hard issues, you can embark on a process of sensitive conversation that helps the bereaved person to come to terms with their grief. Dodie Graves outlines a practical framework of six elements for conversing with bereaved people in a structured but flexible way that avoids prescriptive instructions. The elements include talking about the story of the deceased, their relationship with the person, celebrating their life, discussing their legacy, strategies for coping and thinking about the journey undertaken. She shows how to use the elements in conversations with individuals and groups, and for each element suggests creative activities and open questions that can be used, provides anecdotes and case vignettes, and gives a brief summary of the theory pertinent to each stage of the conversation. Talking with Bereaved People is an approachable tool for anyone working with bereaved people, including counsellors, voluntary bereavement agencies, church pastoral teams, hospice and hospital staff, trainers and social workers.

Communication with the Dead

Scientific evidence for the continual presence of consciousness with or without connection to a living organism • Examines findings on the survival of consciousness beyond life, including near-death experiences, after-death communication, and reincarnation • Explains how this correlates precisely with cutting-edge physics theories on superstrings, information fields, and energy matrices • Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain, such as when the brain is temporarily incapacitated, as well as to the survival of consciousness after death. Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality. Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal. As such, spirituality/religion and science continually find conflict in their views. But what if there truly is no conflict? Based on a new scientific paradigm in sync with experience-based spirituality, Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism. They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness, including near-death experiences, after-death communication, reincarnation, and neurosensory information received in altered states. They explain how the persistence of consciousness beyond the demise of the body means that, in essence, we are not mortal--we continue to exist even when our physical existence has come to an end. This correlates precisely with cutting-edge physics, which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings, information fields, and energy matrices. With proof that consciousness is basic to the cosmos and immortal in its deeper, nonmanifest realm, Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve.

"[This book] is an excellent resource for the diverse practitioners and educators who are involved in this nascent area."--Cruse Bereavement Care "[This] book is innovative and timely, challenging the reader to think 'out of the box.' Sofka, Cupit, and Gilbert provide a framework to explore thanatology in an online universe while encouraging continuous research to adapt to this ever-changing digital world."--Death Studies "Historically we have always employed our foremost technology in the service of the dead. We have used whatever we had at our disposal to mourn, to support, to share memories and to tell stories. Carla J. Sofka, Illene Noppe Cupit, and Kathleen R. Gilbert reaffirm that principle reminding us that this new digital world both offers dramatic technologies and creates considerable opportunities to deal with dying, death, and grief. The editors are extraordinarily sensitive to the multiple ways that this new technology has impacted upon the death system or the ways that a society organizes behavior around dying and death. It also highlights blogging as a mechanism for storytelling and SKYPE as a communication tool during times of loss and grief. Secrets of Life After Death

The death of a child is a special sorrow. No matter the circumstances, a child's death is a life-altering experience. Except for the child who dies suddenly and without forewarning, physicians, nurses, and other medical personnel usually play a central role in the lives of children who die and their families. At best, these professionals will exemplify "medicine with a heart." At worst, families' encounters with the health care system will leave them with enduring painful memories, anger, and regrets. When Children Die examines what we know about the needs of these children and their families, the extent to which such needs are—and are not—being met, and what can be done to provide more competent, compassionate, and consistent care. The book offers recommendations for involving child patients in treatment decisions, communicating with parents, strengthening the organization and delivery of services, developing support programs for bereaved families, improving public and private insurance, training health professionals, and more. It argues that taking these steps will improve the care of children who survive as well as those who do not—and will likewise help all families who suffer with their seriously ill or injured child. Featuring illustrative case histories, the book discusses patterns of childhood death and explores the basic elements of physical, emotional, spiritual, and practical care for children and families experiencing a child's life-threatening illness or injury.

In Death We Do Not Part

This book examines the dialectic between fictional death as depicted in the media and real death as it is experienced in a hospital setting. Using a Terror Management theoretical lens, Davis and Crane explore the intersections of life and death, experience and fiction, to understand the relationship between them. The authors use complementary perspectives to examine what it means when we speak and think of death as it is conceived in cultural media and as it is constructed by and circulates between patients, health professionals, and supportive family members and friends. Layering analysis with evocative narrative and an intimate tone, with characters, plot, and action that reflect the voices and experiences of all project participants, including the authors' own, Davis and Crane reflect on what it means to pass away. Their medical humanities approach bridges health communication, cultural studies, and the arts to inform medical ethics and care.

Personality Survives Death

Is there life after death? What happens on the other side? Is it possible to contact those who have already passed away? These are usually the questions people have in mind about life after death. Sometimes, you think grief gets in the way of your judgement. You don't know if you're just hallucinating or letting your imagination run wild. You have this inner conflict where you end up keeping these experiences to yourself. Otherwise, your friends or family might just stare at you with wide eyes. Back in the days, civilizations have long believed in an afterlife. People in almost every culture think that it is indeed possible to communicate with the dead. Throughout the ages, many have reported that they have been able to speak with their dearly departed. Even in classic literature, communication with ghosts and spirits frequently shows up. In a 2014 news poll, it is said that three out of four people believe there's something after death. Many have sensed and received signs from their loved ones after passing. The idea that the living can make contact with the spirits of those who have passed over is popular today primarily because of the modern "channeling" trend, which is considered part of the "New Age" movement stemming from Hinduism, Buddhism and other traditions. However, it is also important to understand everything about after-death communication to deal with the departed souls in the right manner.

Effective Communication Skills

The crucial role of speech-language pathologists (SLPs) in hospice and palliative settings receives a long-overdue focus in End-of-Life Care Considerations for the Speech-Language Pathologist, the fifth volume in Plural's Medical Speech-Language Pathology book series. Seasoned clinicians provide a practical guide to the terminology, context, and knowledge needed to employ best practices and address the specific needs of patients nearing the end of life. As a profession, speech-language pathology focuses primarily on rehabilitation, with the expectation that patients' function will improve with intervention. For patients with life-limiting conditions, SLPs play an important role in supporting patients' communication, cognition, eating, drinking, and swallowing with an emphasis on quality of living. Clinical professionals require tailored resources to develop their knowledge and skills related to appropriate care and treatment in hospice and palliative care contexts, which have been hard to find until now. Nearly all patients experience difficulties with communication and eating as they near

the end of life. Patients, family members, and professionals benefit if the patient can communicate their symptoms, indicate the effectiveness of symptom management strategies, participate in setting care goals, and engage in social-emotional and spiritual conversations with family and members of the care team. This book provides SLP professionals guidance in how to offer meaningful assessments and interventions that meet patients' needs. The book contains case examples together with the latest research and contributing clinicians' years of experience. Supported by these effective and thoughtful strategies, SLPs can offer both comfort and care for patients in their final days. Key Features: *

- An overview of and introduction to the key concepts and benefits of hospice and palliative care *
- Guidance on terminology and standard models of end-of-life care *
- Adult and pediatric case studies with frequently encountered scenarios *
- Chapters authored by a renowned team of contributors *
- Discussion of legal and ethical considerations *
- Practical techniques and strategies for assessment and intervention

Crossing Over

From the ritual object which functions as a substitute for the dead - thus acting as a medium for communicating with the 'other world' - to the representation of death, violence and suffering in media, or the use of online social networks as spaces of commemoration, media of various kinds are central to the communication and performance of death-related socio-cultural practices of individuals, groups and societies. This second volume of the Studies in Death, Materiality and Time series explores the ways in which such practices are subject to 're-mediation'; that is to say, processes by which well-known practices are re-presented in new ways through various media formats. Presenting rich, interdisciplinary new empirical case studies and fieldwork from the US and Europe, Asia, The Middle East, Australasia and Africa, *Mediating and Remediating Death* shows how different media forms contribute to the shaping and transformation of various forms of death and commemoration, whether in terms of their range and distribution, their relation to users or their roles in creating and maintaining communities. With its broad and multi-faceted focus on how uses of media can redraw the traditional boundaries of death-related practices and create new cultural realities, this book will appeal to scholars across the social sciences and humanities with interests in ritual and commemoration practices, the sociology and anthropology of death and dying, and cultural and media studies.

Talking with the Dead

There exists the false belief that such after-death communications are rare, and that they may be indicative of the existence of psychological problems. From our experience interviewing survivors, nothing is further from the truth. We feel strongly that survivors would greatly benefit from more awareness of how frequently these communications occur. Such knowledge might allow them to be comforted when they experience after death communication. It would help them share these experiences with others thus gaining support, as well as giving support to other bereaved family and friends. It is equally important for counselors, ministers, and therapists to understand the prevalence of such communications so that they can provide the validation and support their patients and clients need.

End-of-Life Care Considerations for the Speech-Language Pathologist

The saints are good company. They are the heroes of the faith who blazed new and creative paths to holiness; they are the witnesses whose testimonies echo throughout the ages in the memory of the Church. Most Christians, and particularly Catholics, are likely to have their own favorite saints, those who inspire and "speak" to believers as they pray and struggle through the challenges of their own lives. Leonard DeLorenzo's book addresses the idea of the communion of saints, rather than individual saints, with the conviction that what makes the saints holy and what forms them into a communion is one and the same. *Work of Love* investigates the issue of communication within the *communio sanctorum* and the fullness of Christian hope in the face of the meaning—or meaninglessness—of death. In an effort to revitalize a theological topic that for much of Catholic history has been an indelible part of the Catholic imaginary, DeLorenzo invokes the ideas of not only many theological figures (Rahner, Ratzinger, Balthasar, and de Lubac, among others) but also historians, philosophers (notably Heidegger and Nietzsche), and literary figures (Rilke and Dante) to create a rich tableau. By working across several disciplines, DeLorenzo argues for a vigorous renewal in the Christian imagination of the theological concept of the communion of saints. He concludes that the embodied witness of the saints themselves, as well as the liturgical and devotional movements of the Church at prayer, testifies

to the central importance of the communion of saints as the eschatological hope and fulfillment of the promises of Christ.

Mediating and Remediating Death

An inspiring and thought-provoking exploration of the fullness of human potential, *Moorings: Embracing the Grounds We Have Embarked Upon* challenges readers to become aware of our “omnipotential” to effect and create the changes we desire to see in our world. As a “mindfulness memoir,” this book will nurture deep reflection and thoughts about our existence as individuals as part of the greater whole. Author Alida Hilbrander has engaged in extensive research, citing various other authors, and opens her own life and experiences in order to present a thorough and personal examination of the oneness of humanity in which all races, cultures, and creeds are embraced. Together, we share a common spiritual foundation, and from that we have the power to pursue our planetary purpose to liberate light and love. As we journey past the various signposts that give direction to our lives, we seek greater awareness and consciousness and will find the joy of renewed purpose. *Moorings: Embracing the Grounds We Have Embarked Upon* will serve as an engaging, educating, and life-changing guide.
