Confessions of an American Doctor

In 2005, I was arrested by agents from both the US Postal Service and the Food and Drug Administration for the importation of illegal human growth hormone and botulinum toxin (Botox) from China. At the time of my arrest, I was a thirty-seven year old Harvard graduate with medical and post-doctoral degrees. I attended one of the finest residency and fellowship training programs in the world at the University of California, San Francisco. I played two sports in college, earned awards at every level of education and training, had wonderful friends and a beautiful three-year-old daughter. Having grown up the son of a restaurant manager and a housewife, I had transcended the humble beginnings of a small Midwestern town to become the quintessential American Dream. Or so I thought. But with my arrest on felony importation charges, everything I had worked so hard for was swept away and the entire trajectory of my life was indelibly altered. I would embark on a three year battle not only for my medical license, but also for my freedom. This journey would lead to intense personal introspection, and in that process, I would discover with ugliness, there was also beauty, and with punishment, mercy. There are many reasons I have written this manuscript, with one of the most important being that I hoped my story would resonate with others who have gone through difficult circumstances as a consequence of a dark side of their personality. With this book, I hope to inspire others to accept and embrace the good and bad, while continually striving for improved self-understanding and acceptance. I have changed names primarily for legal purposes, but the facts are unchanged. Although the events described in the book occurred more than ten years ago, I think about them nearly every day. The shame and humiliation are ever-present. Any simple Google search of my name reveals the truth, and that truth has affected

me over and over, despite the years, as it probably should. As the judge told me that day in a federal courtroom, "You have betrayed the public's trust." This is my confessional.

The Origin of Consciousness in the Breakdown of the Bicameral Mind

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

In Cold Blood

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

LSD, My Problem Child

Psychic Self-Defense Dion Fortune - "Psychic Self-Defense" is one of the best guides to detection and defence against psychic attack from one of the leading occult writers of the 20th century. After finding herself the subject of a powerful psychic attack in the 1930's, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defence guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defence. Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognise them.

Psychic Self-Defense

'Brilliant...wild and exhilarating' New Yorker Sgt Raymond Shaw is a hero of the first order. He's an ex-prisoner of war who saved the life of his entire outfit, a winner of the Congressional Medal of Honor, the stepson of an influential senator...and the perfect assassin. Brainwashed during his time as a POW he is a 'sleeper', a living weapon to be triggered by a secret signal. He will act without question, no matter what order he is made to carry out. To stop Shaw, his former commanding officer must uncover the truth behind a twisted conspiracy of torture, betrayal and power that will lead both to the highest levels of the government. - and to Shaw's own past...

The Manchurian Candidate

Why is surgery so expensive? Surgeon Paul A. Ruggieri reveals little-known truths about his profession—and the hidden flaws of our healthcare system—in this compelling and troubling account of real patients, real doctors, and how money influences medical decisions behind the scenes. Even many well-informed patients have no idea what may be contributing to the cost of their surgery. With up-to-date research and stories from his practice, Ruggieri shows how business arrangements among hospitals, insurance companies, and surgeons affect who gets treatment—and whether they get the

right treatment. Pulling back the curtain from the hospital bed, he explains how to safeguard one's own health (and finances), and how America can make surgery more affordable for all without sacrificing quality care.

The Cost of Cutting

As this bestseller predicted, Trump has only grown more erratic and dangerous as the pressures on him mount. This new edition includes new essays bringing the book up to date—because this is still not normal. Originally released in fall 2017, *The Dangerous Case of Donald Trump* was a runaway bestseller. Alarmed Americans and international onlookers wanted to know: What is wrong with him? That question still plagues us. The Trump administration has proven as chaotic and destructive as its opponents feared, and the man at the center of it all remains a cipher. Constrained by the APA's "Goldwater rule," which inhibits mental health professionals from diagnosing public figures they have not personally examined, many of those qualified to weigh in on the issue have shied away from discussing it at all. The public has thus been left to wonder whether he is mad, bad, or both. The prestigious mental health experts who have contributed to the revised and updated version of *The Dangerous Case of Donald Trump* argue that their moral and civic "duty to warn" supersedes professional neutrality. Whatever affects him, affects the nation: From the trauma people have experienced under the Trump administration to the cult-like characteristics of his followers, he has created unprecedented mental health consequences across our nation and beyond. With eight new essays (about one hundred pages of new material), this edition will cover the dangerous ramifications of Trump's unnatural state. It's not all in our heads. It's in his.

The Dangerous Case of Donald Trump

'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

The Shock Doctrine

#1 Wall Street Journal Bestseller *The Obstacle is the Way* has become a cult classic, beloved by men and women around the world who apply its wisdom to become more successful at whatever they do. Its many fans include a former governor and movie star (Arnold Schwarzenegger), a hip hop icon (LL Cool J), an Irish tennis pro (James McGee), an NBC sportscaster (Michele Tafoya), and the coaches and players of winning teams like the New England Patriots, Seattle Seahawks, Chicago Cubs, and University of Texas men's basketball team. The book draws its inspiration from stoicism, the ancient Greek philosophy of enduring pain or adversity with perseverance and resilience. Stoics focus on the things they can control, let go of everything else, and turn every new obstacle into an opportunity to get better, stronger, tougher. As Marcus Aurelius put it nearly 2000 years ago: "The impediment to action advances action. What stands in the way becomes the way." Ryan Holiday shows us how some of the most successful people in history—from John D. Rockefeller to Amelia Earhart to Ulysses S. Grant to Steve Jobs—have applied stoicism to overcome difficult or even impossible situations. Their embrace of these principles ultimately mattered more than their natural intelligence, talents, or luck. If you're feeling frustrated, demoralized, or stuck in a rut, this book can help you turn your problems into your biggest advantages. And along the way it will inspire you with dozens of true stories of the greats from every age and era.

The Obstacle Is the Way

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence.

Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. *Epistemologies of the South* outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

The Protestant ethic and the spirit of capitalism

Volume 1 in the ESSENTIAL WORKS OF FOUCAULT series and originally published by Allen Lane in 1997, a collection of articles, interviews and lectures on the subject of ethics, written by the twentieth century French philosopher, Michel Foucault and translated into English.

Epistemologies of the South

Widely acknowledged as a contemporary classic that has introduced thousands of readers to American literature, *From Puritanism to Postmodernism: A History of American Literature* brilliantly charts the fascinating story of American literature from the Puritan legacy to the advent of postmodernism. From realism and romanticism to modernism and postmodernism it examines and reflects on the work of a rich panoply of writers, including Poe, Melville, Fitzgerald, Pound, Wallace Stevens, Gwendolyn Brooks and Thomas Pynchon. Characterised throughout by a vibrant and engaging style it is a superb introduction to American literature, placing it thoughtfully in its rich social, ideological and historical context. A tour de force of both literary and historical writing, this Routledge Classics edition includes a new preface by co-author Richard Ruland, a new foreword by Linda Wagner-Martin and a fascinating interview with Richard Ruland, in which he reflects on the nature of American fiction and his collaboration with Malcolm Bradbury. It is published here for the first time.

Ethics

Marková offers a dialogical perspective to problems in daily life and professional practices involving communication, care, and therapy.

From Puritanism to Postmodernism

Presents advice and coping strategies for dealing with crises in daily life, examining problems which can arise from such events as loss of a loved one, a physical or mental breakdown, or loss of a sense of purpose in life.

Heart Failure

Buku yang Anda pegang saat ini ditulis dengan satu asumsi optimis: Ego Anda bukanlah kekuatan yang harus Anda puaskan pada setiap kesempatan. Ego dapat diatur. Ego dapat diarahkan. Dalam buku ini, kita akan melihat orang-orang, seperti William Tecumseh Sherman, Katharine Graham, Jackie Robinson, Eleanor Roosevelt, Bill Walsh, Benjamin Franklin, Belisarius, Angela Merkel, dan George C. Marshall. Bisakah mereka mendapatkan yang telah mereka dapatkan sekarang—menyelamatkan perusahaan yang hampir bangkrut, menguasai seni peperangan, menjaga kekompakan tim bisbol, merevolusi strategi rugby, melawan tirani, dan menghadapi ketidakberuntungan—jika ego menguasai mereka dan membuat mereka hanya memikirkan diri sendiri? Hal yang membuat mereka sukses adalah pemahaman terhadap realitas dan kesadaran—sesuatu yang pernah dikatakan oleh seorang penulis dan ahli strategi Robert Greene, “kita perlu menyerupai laba-laba dalam sarangnya”. Itulah inti dari kehebatan mereka, kehebatan penulisan, kehebatan desain, kehebatan bisnis, kehebatan dalam pemasaran, dan kehebatan kepemimpinan mereka. Yang kami temukan saat mempelajari orang-orang tersebut adalah mereka selalu memiliki dasar berpikir, berhati-hati, dan realistis. Tidak ada satu pun dari mereka yang tidak memiliki ego sama sekali. Akan tetapi, mereka tahu cara meredamnya. Tahu cara menyalurkannya dan melepaskannya, ketika ego muncul. Mereka hebat namun tetap rendah hati. Seberapa, tunggu dulu, tetapi ada juga beberapa orang yang memiliki ego tinggi dan sukses. Bagaimana dengan Steve Jobs? Kanye West? Beberapa dari mereka mempelajari kerendahan hati. Beberapa orang memilih ego. Beberapa mempersiapkan diri untuk perubahan nasib, positif ataupun negatif. Yang lainnya tidak siap. Yang mana yang akan Anda pilih? Akan menjadi siapakah Anda? Yang pasti, Anda telah memilih buku ini karena merasa bahwa Anda membutuhkan menjawab pertanyaan itu, cepat atau lambat, sadar atau tidak sadar.

The Dialogical Mind

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ... Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

The Search for the Manchurian Candidate

The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Real Life

The Civil War, the Restoration, and the Glorious Revolution in England laid the institutional and intellectual foundations of the modern understanding of liberty, of which we are heirs and beneficiaries. The Crisis of the Seventeenth Century uncovers new pathways to understanding this seminal time. Neither Catholic nor Protestant emerges unscathed from the examination to which Trevor-Roper subjects the era in which, from political and religious causes, the identification and extirpation of witches was a central event. Trevor-Roper points out that "In England the most active phase of witch-hunting coincided with times of Puritan pressure -- the reign of Queen Elizabeth and the period of the civil wars -- and some very fanciful theories have been built on this coincidence. But... the persecution of witches in England was trivial compared with the experience of the Continent and of Scotland. Therefore... [one must examine] the craze as a whole, throughout Europe, and [seek] to relate its rise, frequency, and decline to the general intellectual and social movements of the time...".

EGO IS THE ENEMY

Stock market multimillionaire at 26. Federal convict at 36. The iconic true story of greed, power and excess. THE INTERNATIONAL BESTSELLER AND MAJOR MOVIE SENSATION, DIRECTED BY MARTIN SCORSESE AND STARRING LEONARDO DICAPRIO 'What separates Jordan's story from others like it, is the brutal honesty.' - Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sunk a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids who waited for him for at home, and the fast-talking, hard-partying young stockbrokers who called him king and did his bidding, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called THE WOLF OF WALL STREET. In the 1990s Jordan Belfort became one of the most infamous names in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of the canyons of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power and excess no one could invent - and then it all came crashing down. 'The outrageous memoirs of the real Gordon Gekko' Daily Mail 'Reads like a cross between Tom Wolfe's Bonfire of the Vanities and Scorsese's Goodfellas' Sunday Times

Watching the English

This transhistorical, international and interdisciplinary work will be of interest to students, theater professionals and Shakespeare scholars.

Hacker, Hoaxer, Whistleblower, Spy

As an active surgeon and former department chairman, Dr. Paul A. Ruggieri has seen the good, the bad, and the ugly of his profession. In *Confessions of a Surgeon*, he pushes open the doors of the O.R. and reveals the inscrutable place where lives are improved, saved, and sometimes lost. He shares the successes, failures, remarkable advances, and camaraderie that make it exciting. He uncovers the truth about the abusive, exhaustive training and the arduous devotion of his old-school education. He explores the twenty-four-hour challenges that come from patients and their loved ones; the ethics of saving the lives of repugnant criminals; the hot-button issues of healthcare, lawsuits, and reimbursements; and the true cost of running a private practice. And he explains the influence of the "white coat code of silence" and why patients may never know what really transpires during surgery. Ultimately, Dr. Ruggieri lays bare an occupation that to most is as mysterious and unfamiliar as it is misunderstood. His account is passionate, illuminating, and often shocking—an eye-opening, never-before-seen look at real life, and death, in the O.R.

The Crisis of the Seventeenth Century

Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the "emerging opportunities market" of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called "biologically inspired innovations," to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

The Wolf of Wall Street

A polemic against love that is "engagingly acerbic ... extremely funny.... A deft indictment of the marital ideal, as well as a celebration of the dissent that constitutes adultery, delivered in pointed daggers of prose" (The New Yorker). Who would dream of being against love? No one. Love is, as everyone knows, a mysterious and all-controlling force, with vast power over our thoughts and life decisions. But is there something a bit worrisome about all this uniformity of opinion? Is this the one subject about which no disagreement will be entertained, about which one truth alone is permissible? Consider that the most powerful organized religions produce the occasional heretic; every ideology has its apostates; even sacred cows find their butchers. Except for love. Hence the necessity for a polemic against it. A polemic is designed to be the prose equivalent of a small explosive device placed under your E-Z-Boy lounge. It won't injure you (well not severely); it's just supposed to shake things up and rattle a few convictions.

The Cambridge Guide to the Worlds of Shakespeare

By the spring of 1945, the Second World War was drawing to a close in Europe. Allied troops were sweeping through Nazi Germany and discovering the atrocities of SS concentration camps. The first to be reached intact was Buchenwald, in central Germany. American soldiers struggled to make sense of the shocking scenes they witnessed inside. They asked a small group of former inmates to draft a report on the camp. It was led by Eugen Kogon, a German political prisoner who had been an inmate since 1939. *The Theory and Practice of Hell* is his classic account of life inside. Unlike many other books by survivors who published immediately after the war, *The Theory and Practice of Hell* is more than a personal account. It is a horrific examination of life and death inside a Nazi concentration camp, a brutal world of a state within state, and a society without law. But Kogon maintains a dispassionate and critical perspective. He tries to understand how the camp works, to uncover its structure and social organization. He knew that the book would shock some readers and provide others with gruesome fascination. But he firmly believed that he had to show the camp in honest, unflinching detail. The result is a unique historical document—a complete picture of the society, morality, and politics that

fueled the systematic torture of six million human beings. For many years, *The Theory and Practice of Hell* remained the seminal work on the concentration camps, particularly in Germany. Reissued with an introduction by Nikolaus Waschmann, a leading Holocaust scholar and author of *Hilter's Prisons*, this important work now demands to be re-read.

The Perfectibility of Man

Publisher description

Confessions of a Surgeon

It's the age-old tale of a straying husband, a woman scorned, and two dead bodies-or is it? By morning, the headlines and stories had circled the globe full of half-truths, misinformation and a potential coverup. The cheating husband who had driven his wife to such madness became the official account, forever etched into the annals of history. Yet the whole story of this brutal murder-suicide would lie hidden for months, only to be uncovered by Mark Gerardot himself in his aching quest to know what had led Jennair, his wife of 24 years, to such a violent act. In the process, he uncovers mounds of shocking proof of a wife's madness that was building for decades-one that had culminated in an unprecedented level of tracking and surveillance as she prepared to carry out her final act of revenge. Full of factual dialogue from hours of audio files, *Irreparable* recounts the intimate details of three people's lives, now forever linked, and seeks to move beyond labels, to equally honor the truth of all three souls impacted by the tragedy. More than an enthralling true-crime story, *Irreparable* is a memoir of a tumultuous marriage, a love affair, and one man's desperate efforts to reexamine the past as he recounts precious memories and early signs of trouble from the woman he knew and loved, but whose spiraling loss of control amid the high-tech surveillance she pursued took hold of her mind and life. Taking accountability for the choices he made, the signs he missed, and the better man he wishes to become Mark Gerardot reveals the truth and finds his way to a new life.

Bio-Inspired Innovation and National Security

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

Against Love

The central thesis of this book is that a genre approach provides the most effective means for understanding, analyzing and appreciating the Hollywood cinema. Taking into account not only the formal and aesthetic aspects of feature filmmaking, but various other cultural aspects as well, the genre approach treats movie production as a dynamic process of exchange between the film industry and its audience. This process, embodied by the Hollywood studio system, has been sustained primarily through genres, those popular narrative formulas like the Western, musical and gangster film, which have dominated the screen arts throughout this century.

The Theory and Practice of Hell

Ethics: Contemporary Readings is designed to lead any student into the subject, through carefully selected classic and contemporary articles. The book includes articles by the leading figures in the field and provides an excellent entry to the topic. The book complements Harry Gensler's *Ethics: A Contemporary Introduction* (Routledge, 1998).

Narrative Medicine

Marrying the sharp insights of Jenny Offill with the dark humor of Maria Semple, *Motherest* is an inventive and moving coming-of-age novel that captures the pain of fractured family life, the heat of new love, and the particular magic of the female friendship -- all through the lens of a fraying daughter-mother bond. It's the early 1990s, and Agnes is running out of people she can count on. A new college student, she is caught between the broken home she leaves behind and the wilderness of campus life. What she needs most is her mother, who has seemingly disappeared, and her brother, who left the family tragically a few years prior. As Agnes falls into new romance, mines female friendships for intimacy, and struggles to find her footing, she writes letters to her mother, both to conjure a closeness they never had and to try to translate her experiences to herself. When she finds out she is pregnant, Agnes begins to contend with what it means to be a mother and, in some ways, what it means to be your own mother.

Irreparable

Doctors work in life-and-death situations every day. But what happens when they encounter something even they can't explain scientifically? Dreams foretelling future events, apparitions, and other miraculous experiences fill this book, as practicing doctors recount the most unusual moments of their careers. Meant to awe, instruct, and inspire, these tales will convince even the harshest skeptic that there are things beyond this physical world and that sometimes, all we need to do is believe. *Physicians' Untold Stories* doesn't stop at chronicling these occurrences. Scott J. Kolbaba, MD, provides a glimpse into the lives of doctors that few get to experience. Learn their agonies and joys. In their own words, doctors reach out to you and show you how faith in the divine has shaped their lives. Even in the darkest of times, as they comfort terminally ill patients and make impossible choices, moments of light shine through. Like the popular *Chicken Soup for the Soul* series, Kolbaba has catalogued inspiration moments into small stories perfect for bite-size reading-or maybe for gobbling up all at once!

Liquid Modernity

It would come as no surprise that many readers may be shocked and intrigued by the title of our book. Some (especially our medical colleagues) may wonder why it is even worthwhile to raise the issue of killing by doctors. Killing is clearly antithetical to the Art and Science of Medicine, which is geared toward easing pain and suffering and to saving lives rather than smothering them. Doctors should be a source of comfort rather than a cause for alarm. Nevertheless, although they often don't want to admit it, doctors are people too. Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people. In most cases, fortunately, the positive traits are dominant and doctors do more good than harm. While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom, they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet. Concurrently, doctors and allied scientists have delved into the deep secrets of the body and mind, mastering the anatomy and physiology of the human body, even mapping the very molecules that make us who we are. But make no mistake, a person is not simply an elegant biological machine to be marveled at then dissected.

The History of Spiritualism

The true-crime story of a Massachusetts nurse with a dark secret, by the New York Times bestselling author of *The Girl Left Behind*. At the Veterans Affairs Medical Center in Northampton, Massachusetts, Kristen Gilbert was known as a hardworking, dedicated nurse. Yet so many emergencies and sudden deaths occurred under Kristen's watch that others jokingly called her the "Angel of Death." No one suspected the horrifying truth: that over the course of six months, Gilbert had caused the deaths of as many as forty patients. With new insight into the sociopathic mindset of nurses who kill, and the latest details on Gilbert's ongoing prison sentence, M. William Phelps exposes how one person's good intentions went so chillingly, killingly wrong . . . *Praise for Perfect Poison* "True crime at its best—compelling, gripping, an edge-of-the-seat thriller. Phelps packs wallops of delight with his skillful ability to narrate a suspenseful story." —Harvey Rachlin, award-winning author of *Song and System* "A compelling account of terror . . . the author dedicates himself to unmasking the psychopath with facts, insight, and the other proven methods of journalistic leg work." —Lowell Cauffiel, New York Times bestselling author of *House of Secrets* Includes sixteen pages of dramatic photos

Hollywood Genres: Formulas, Filmmaking, and The Studio System

Contains a collection of essays exploring human dignity and bioethics, a concept crucial to today's discourse in law and ethics in general and in bioethics in particular.

Ethics: Contemporary Readings
