One of the largest amphibious landings in history took place on the 6th of June, 1944.

The initial landings were far from easy as the Allies stormed ashore on five invasion beaches.

The Allies gave them the codenames: Gold, Juno, Sword, Omaha, and Utah.

Taking Omaha Beach was an essential part of the Allies' strategy.

American troops were tasked with taking this beach, backed up by Allied naval and air bombardments.

These scattered landings added to the chaos.

Beach obstacles and barbed wire, mined stakes, and metal tripods slowed progress across the sand. the soldiers were under constant machine gun fire from heavily fortified positions.

The beach was also under constant mortar and artillery fire.

Eventually, small groups of US soldiers managed to get up the bluff overlooking the beach.

Tragically, roughly 2000 Americans died taking Omaha beach.

It covers 172 acres (70 ha), and contains the remains of 9,387 American military dead.
