In this book, which was the outgrowth of a conference sponsored by the Upjohn Institute in Washington, D.C., in June 2007, leading policy analysts frame the major challenges facing U.S. labor policy: Improving the skills of American workers so that they can better compete in a global economy; Addressing the crisis in our system of employer-sponsored health insurance; Minimizing the effects of dislocation due to immigration and trade; Removing barriers to employment for older workers; Improving the quality of jobs for low-wage workers without harming the competitiveness of American companies; Addressing the serious employment barriers of the disadvantaged. Each chapter in this volume tackles one of these policy challenges, identifying the key problems, evaluating the effectiveness of current policy approaches, and offering innovative, forward-thinking, but pragmatic alternative policies. Collectively, the chapters in this volume offer a clear road map for future labor market policy.

Improving Safety-related Rules Compliance in the Public Transportation Industry

'I'm a HUGE fan of Alison Green's "Ask a Manager" column. This book is even better' Robert Sutton, author of The No Asshole Rule and The Asshole Survival Guide 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of The Life-Changing Magic of Not Giving a F*ck A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough discussions you may need to have during your career. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, Ask a Manager will help you successfully navigate the stormy seas of office life.

Power Wagon, Heavy Truck Transportation

Experts discuss improving job quality in low-wage industries including retail, residential construction, hospitals and long-term healthcare, restaurants, manufacturing, and long-haul trucking. Americans work harder and longer than our counterparts in other industrialized nations. Yet prosperity remains elusive to many. Workers in such low-wage industries as retail, restaurants, and home construction live from paycheck to paycheck, juggling multiple jobs with variable schedules, few benefits, and limited prospects for advancement. These bad outcomes are produced by a range of industry-specific factors, including intense competition, outsourcing and subcontracting, failure to enforce employment standards, overt discrimination, outmoded production and management systems, and inadequate worker voice. In this volume, experts look for ways to improve job quality in the low-wage sector. They offer in-depth examinations of specific industries—long-term healthcare, hospitals and outpatient care, retail, residential construction, restaurants, manufacturing, and long-haul trucking—that together account for more than half of all low-wage jobs. The book's sector view allows the contributors to address industry-specific variations that shape operational choices about work. Drawing on deep industry knowledge, they consider important distinctions within and between these industries; the financial, institutional, and structural incentives that shape the choices employers make; and what it would take to make more jobs better jobs. Contributors Eileen Appelbaum, Rosemary Batt, Dale Belman, Julie Brockman, Françoise Carré, Susan Helper, Matt Hinkel, Tashlin Lakhani, JaeEun Lee, Raphael Martins, Russell Ormiston, Paul Osterman, Can Ouyang, Chris Tilly, Steve Viscelli

Contemporary Business

Work first. That is the core idea behind the 1996 welfare reform legislation. It sounds appealing, but according to Making the Work-Based Safety Net Work Better, it collides with an exceptionally difficult reality. The degree to which work provides a way out of poverty depends greatly on the ability of

low-skilled people to maintain stable employment and make progress toward an income that provides an adequate standard of living. This forward-looking volume examines eight areas of the safety net where families are falling through and describes how current policies and institutions could evolve to enhance the self-sufficiency of low-income families. David Neumark analyzes a range of labor market policies and finds overwhelming evidence that the minimum wage is ineffective in promoting self-sufficiency. Neumark suggests the Earned Income Tax Credit is a much more promising policy to boost employment among single mothers and family incomes. Greg Duncan, Lisa Gennetian, and Pamela Morris find no evidence that encouraging parents to work leads to better parenting, improved psychological health, or more positive role models for children. Instead, the connection between parental work and child achievement is linked to parents' improved access to quality child care. Rebecca Blank and Brian Kovak document an alarming increase in the number of single mothers who receive neither wages nor public assistance and who are significantly more likely to suffer from medical problems of their own or of a child. Time caps and work hour requirements embedded in benefits policies leave some mothers unable to work and ineligible for cash benefits. Marcia Meyers and Janet Gornick identify another gap: low-income families tend to lose financial support and health coverage long before they earn enough to access employer-based benefits and tax provisions. They propose building "institutional bridges" that minimize discontinuities associated with changes in employment, earnings, or family structure. Steven Raphael addresses a particularly troubling weakness of the work-based safety net—its inadequate provision for the large number of individuals who are or were incarcerated in the United States. He offers tractable suggestions for policy changes that could ease their transition back into non-institutionalized society and the labor market. Making the Work-Based Safety Net Work Better shows that the "work first" approach alone isn't working and suggests specific ways the social welfare system might be modified to produce greater gains for vulnerable families.
