New Leadership for Today's Health Care Professionals

New Leadership for Today's Health Care Professionals: Cases and Concepts, Second Edition explores various components of the health care system and how leaders should respond in these arenas. The Second Edition is a thorough revision that offers a comprehensive view of the leadership competencies necessary to be successful in today's healthcare industry. Each chapter is written by a leader in the healthcare industry under the guidance of the editors who have many years' experience in academia.

Leadership in Health Care

This much-loved textbook responds to the ever-growing importance of leadership to a healthcare professional's role. It summarises all of the key theories, information and research and applies to the healthcare context.

EBOOK: Leadership and Change for the Health Professional

Leadership and Change for the Health Professional will provide health professionals with the latest thinking on leadership theory and research. It highlights the issues that can block successful healthcare leadership initiatives, and explores ways of constructively engaging with the opportunities provided by change. Each chapter draws out practical lessons for effective and efficient leadership of care that is compassionate and safe. Leaders and students at all levels will be able to use this book to expand their leadership repertoire in a text that engages with many themes, including: • The basics of leadership and the idea of leadership as a "calling" • Motivating employees • Implicit leadership theory • Developing trust • Building learning organisations • Gender and equality • Planning and organising change in healthcare • Leading change The links between the theory and practice of healthcare leadership are skilfully explored with examples of research implemented in practice, and the textbook further equips your study with helpful summaries and suggestions for further reading. This is essential reading for

all healthcare professionals in clinical practice as well as students studying or engaged in research on health care management and leadership. With a foreword by Thomas Garavan, Edinburgh Napier Business School, UK. "Amongst the vast number of leadership texts published every year this book stands out. It has been edited with considerable care by two highly respected scholars in the field to make it accessible to all those interested in, and practising, leadership, whether healthcare professionals or students. It is well organised and moves seamlessly to address many important questions about the nature of leadership, including important questions of ethics, gender, trust, motivation, innovation, teams, and distributed leadership. The final section focuses on leading change in healthcare, a critical element of leadership practice in today's world. Too many leadership books ignore context. This book, however, is firmly rooted in the healthcare context, and aspires to help professionals in this sector to reflect deeply on the complexities of leading through uncertain times. Whilst each chapter stands alone, the book's merit is in offering multiple perspectives. Curtis and Cullen have encouraged the book's contributors to address the big debates and themes in healthcare leadership today, whilst keeping in sharp focus the practice of leadership." Sharon Turnbull, Visiting Professor, Lancaster University Management School, UK "In Leadership and Change for the Health Professional, Elizabeth Curtis and John Cullen have crafted an exceptionally timely collection of practically-based research insights. As global healthcare systems face disruptive and often uncomfortable forces for change, this book tackles complex topics that health leaders must understand. While oriented toward generative practice and creative leadership skills, Curtis and Cullen do not shy away from engaging with controversial aspects of leadership development, such as bias, gendered practice, or even clinical failure, making it a valuable resource for educators and practitioners alike. Accessible and lively, Leadership and Change for the Health Professional is a successful blend of current issues with a visionary future." Kathy Lund Dean, Board of Trustees Distinguished Professor of Leadership & Ethics, Gustavus Adolphus College, USA "Curtis and Cullen bring together a comprehensive overview of leadership, from its historical development up to its role within the current healthcare context, presented by a variety of scholars. The particular challenges and demands faced by leaders and those who aspire to lead are discussed within and it addresses the many facets of leadership approaches. Anyone interested in the development of leadership and change will find this particularly stimulating and a valuable text for academic and students alike." Alison H James, School of Healthcare Sciences, Cardiff University, UK "This book covers many aspects of leadership, which are timely in nature and directly relevant to health professionals. The contributors are highly respected and offer different perspectives on this complex issue. We need to encourage practitioners to see themselves as leaders – this evidence-based text will serve to guide them in this quest. De-emphasising the individual leadership qualities and including those of teams makes this book stand out from others. The NHS features prominently but despite this, readers from other countries should be able to easily transfer the content to their own health services. The useful websites at the end of each chapter provide further direction for readers. This is a text that is written with a very positive stance, even though the difficulties of being a leader are not ignored. It ends with a discussion on the vision for leadership – at individual, team and organisational levels. Lots to read, absorb and you can do this a chapter at a time which is great." Professor Bridie Kent, Head of School of Nursing and Midwifery, Plymouth University, UK "This book addresses an important topic, where there is huge scope to add value. This is partly due to the scale of the NHS. The language makes the text accessible to professionals as well as academics. It is also good to see that the issue of learning organisations is addressed, as well as impact of leadership on patients." Professor John G Burgoyne, Lancaster University Management School, UK "Leadership and Change for the Health Professional is a timely and authoritative academic and professional exposition of the challenges for clinicians and healthcare managers in carrying out their management roles in our modern medical and healthcare systems. Its focus on change is both apt and relevant in the context of the dynamic development of our healthcare structures." Niamh Brennan, Michael MacCormac Professor of Management, University College Dublin

Practical Leadership in Nursing and Health Care

This multidisciplinary text is an essential introduction to leadership in health care, combining the underpinning theory with a practical approach to help you come to decisions and solutions in everyday practice.* Written in an accessible and easy to understand style by an international team of practitioners who will engage, inspire and empower you

Bringing Leadership to Life in Health: LEADS in a Caring Environment

This edited volume, featuring five new chapters from invited authors, provides an updated and evidence-based explanation of leadership within a healthcare environment. The book discusses new insights garnered from recent research into the importance of leadership in health system redesign and highlights the practice of shared or distributed health care leadership. New chapters covering LEADS in a national, regional, Indigenous, health profession, and people-centred care context provide new insights into how LEADS is being put to work to transform health systems. The LEADS framework has been refreshed in relation to each of its different elements and tools, with an emphasis on providing real-life examples of how LEADS has been put to work. LEADS is also explained as a change leadership model and in relation to how it helps to level the playing field in terms of gender and diversity in health leadership. The book aims to inform the leadership needs of health reform and its emergent system wide challenges. The content is relevant to health care administrators and professionals working within the public service, academic institutions, and health care delivery organisations.

Leadership in Healthcare

Leadership in Healthcare opens up the world of leadership studies to all healthcare professionals. Physicians, nurses, and other healthcare professionals spend thousands of hours studying the science and technology of healthcare, and years or even decades putting into practice recent findings in molecular biology, clinical diagnostics, and therapeutics. By contrast, the topic of leadership and the traits of effective leaders tend to receive remarkably little attention. Yet no less vital than an understanding of how to interpret diagnostic tests and design care plans is a grasp of healthcare's organizational side, including the operation of multidisciplinary care teams, academic departments, and hospitals. If patient care, education, research, and professional service are to thrive in years to come, we must do a better job of preparing healthcare professionals to lead effectively. Composed of insightful and thought-provoking essays on the key facets of leadership, this book is designed to meet the needs of several important constituencies, including educators of health professionals who wish to incorporate leadership into their educational programs; health professional organizations seeking to enhance their members' leadership effectiveness, and individual health professionals who wish to embrace leadership in their personal and professional lives. This book represents a vital resource for health professionals who wish to enhance the quality of leadership in health professions education, practice, and professional development. In addition to regularly caring for patients, Richard Gunderman, MD PhD MPH brings to this discussion a wealth of personal experience in professional and organizational leadership.

Leadership and Management in Healthcare

Now in its Third Edition, this best-selling textbook continues to support you on your journey from being an emerging registered healthcare professional through to becoming a competent care manager. Action points, case studies and strong practice guidelines enable you to understand how leadership and management theory applies to the care you deliver in a wide range of care settings. Fully updated throughout, the new edition includes: More case studies and examples from a wide range of care settings and countries. New key topics such as dimensions of leadership, NHS Change Model, transition to registered practitioner and revalidation requirements, emotional intelligence and resilience. A companion website with access to further case studies, journal articles and web links. This book is essential for nursing, health and social care students taking modules on leadership, management and transition to practice in their final year, as well as for newly qualified professionals or those seeking to refresh their skills.

Values-Based Leadership in Healthcare

David Stanley introduces the bold, new leadership theory of Congruent Leadership, presenting it through a series of corporate and clinical case studies and examples, which guide the reader through the possibilities for using their own values to inform best practice.

Leadership in Health Services Management

Leadership development among healthcare professionals is the focus of this managerial handbook. This groundbreaking manual for medical students and practitioners provides the information necessary to assess skills and identify situations within the healthcare field where leadership is most valued. Vision, strategic thinking, confidence, negotiation, and knowledge are emphasized to help healthcare professionals build leadership skills. Through relevant cases studies and examples, as well as

self-assessment questions, outcome- and problem-based situations, and chapter summaries, this valuable resource shows all healthcare practitioners how to plan, implement, and succeed as a leader.

The Six P's of Leadership for Healthcare Executives

Health Sciences & Professions

Leadership for Health Professionals

The rapid changes in health care including novel technologies as well as the changing economic, political, and social landscapes are all forcing physicians as well as most types of health care practitioners to re-think their role in leadership. This is particularly true in the US in recent years, but the same issues are widely prevalent affecting health care workers around the globe. Developing capable medical leaders who can navigate these challenges will be essential. Physicians and other health care practitioners usually receive little or no leadership training in the course of their education. At the next steps in their training: internship, residency and fellowship, gaining clinical acumen takes precedence over developing other skills that are at the core of leadership training. *Leadership Lessons for Health Care Providers* will allow all types of health professionals to gain a better understanding of what leadership is, how to develop their skills while still early in their careers, how to understand and handle common leadership conundrums and chart a path towards increasing their leadership capabilities as they reach mid-career and beyond. This book will provide a great start for those who are interested in learning more about leadership and includes recommendations for next steps at all stages in leadership work. Discusses and offers practical advice on a number of leadership development topics including levels of leadership, different styles and techniques, dealing with conflict, making hard decisions, and setting priorities. Includes valuable insight from leaders and specialists in the health care field. Directs readers to additional leadership resources as next steps.

Leadership Lessons for Health Care Providers

"Good leadership is more creative and satisfying than simply managing. But it takes a book as good as this to help us realise that. Wherever you are in your career - this book offers a great deal to inspire and to provoke thought. We could all learn from it." Nursing Standard "This book is timely. The increasing emphasis on the need for good leadership is signalled by the establishment across the world of new leadership development initiatives. In the United Kingdom, for example, this includes the new NHS National Leadership Council that will champion the transformation of leadership capacity and capability across the healthcare system. Effective leadership is crucial for improving the quality of care for patients and others and for developing staff. This highly readable and informative book, written by experts in the field, will be of interest to all nursing and allied health professionals, particularly those aspiring and emerging leaders." Professor David R Thompson, University of Leicester, UK "This is a book that all students studying leadership in health care have been waiting for. It provides an excellent broad perspective on aspects of leadership common to all disciplines. It aims to empower all health care providers to fully realise their potential as a leader and demonstrates how this can be achieved in reality. It is inspirational, exciting to read with its many different case studies, exercises to bring about reflection and should result in a more empowered and enlightened work force." Phil Halligan, University College Dublin, Ireland "With the increased focus on clinical leadership this book is a welcome addition to the vast array of leadership books currently available and will appeal to a wide range of practising clinicians looking for an introduction to the subject. The use of historical case studies allows comparison of leadership styles of a range of well known figures and sets the scene for an exploration of some of the multitude of leadership theories that are available in the literature ... Readers who are currently practising clinicians, regardless of profession, should use this opportunity to 'stand up and be counted' and to take forward the leadership agenda in their professions for the benefit of patients and inform future practice and knowledge." Mark Sewell, Postgraduate Student, University of Birmingham/University of Manchester, UK It is time to take stock, to promote and support our articulate and strategic thinkers, and to let them shine! This inspiring book is a wake-up call to nurses and allied health professionals to develop their leadership skills and to make a real difference to global health and social development. Veronica Bishop uses high profile historical case studies to illustrate the concept of leadership and put it into a context that is easily understood. The book demystifies the key elements of leadership, highlights the difference between leadership and management and identifies the essential components for successful leadership amongst health care professionals. The book incorporates: A new research based theory of leadership that embraces clinical excellence Educational and practice

based concepts to support key leadership skills Case examples of real experiences Exercises for developing your own leadership skills at the end of each chapter Contributions from experts from a wide range of countries and with diverse knowledge bases make a topic that is often presented as highly complex and 'out of reach' readily accessible. Leadership for Nursing and Allied Health Care Professions is key reading for all nurses and allied health care professionals aspiring to be leaders. Contributors: Sue Antrobus, Mary Lovegrove, Annie Macleod, Abigail Masterson, Dawn Freshwater, Iain Graham, Philip Esterhuizen, David Stanley, Mike Saks, Veronica Bishop, Tyrone Goh. With a foreword by Tony Butterworth.

EBOOK: Leadership For Nursing And Allied Health Care Professions

Whatever your role, practice or educational environment, here are the tools and techniques you can use to realize your leadership potential, advance your career, and contribute to the future of nursing. Thoroughly revised and updated throughout, the 5th Edition features a new chapter, The Phenomenon of Leadership: Classic/Historical and Contemporary Leadership Theories, as well as expanded coverage of the Institute of Medicine initiatives and how they relate to leadership that ensures high-quality and safer care in our complex, chaotic health-care delivery systems. You'll also find more critical-thinking exercises in each chapter

The New Leadership Challenge

Effective Healthcare Leadership integrates theory and practice to distil the reality of healthcare leadership today. It addresses the context and explores strategies for leadership and examines the leadership skills required to implement and sustain developments in healthcare. Section one examines the contemporary context and challenges of healthcare leadership. Section two offers opportunities through the CLINLAP/LEADLAP model to see how modern management ideas, tools and techniques are used effectively in leadership development. Section three examines the role of leadership in implementing change and improving practice in different contexts of care. The final section explores future challenges in leadership.

Effective Healthcare Leadership

Welcome to Fundamentals of Leadership for Healthcare Professionals, Volume 2. The editors are proud to present our readers with a significantly expanded book, featuring 14 chapters by a distinguished group of 40 academic authors with decades of collective leadership experience. Based on the success of Volume 1, the current book in our series seeks to expand into important new areas. This includes diverse topics such as resilient leadership; electronic medical record implementations; interviewing for leadership positions; effective management in the low-resource setting; academic affiliations; crisis leadership; care quality and patient safety; the importance of diversity in health-care; complexity theory and ethics; change management; exploration of the executive function-dysfunction spectrum; and many other related concepts. The current tome begins with an introductory chapter that provides an in-depth overview of various theoretical aspects of leadership, including the most commonly encountered leadership styles. Throughout the book the authors focus on practical relevance of the topics being discussed, presenting 'lessons learned' and stressing the importance of flexible, authentic, servant leadership. The editors hope that Volume 2 of the Fundamentals of Leadership for Healthcare Professionals will be equally, or perhaps even more successful than Volume 1, and that it will provide an excellent springboard for Volume 3 in this important and unique book series!

Fundamentals of Leadership for Healthcare Professionals

It is increasingly necessary for health and social care professionals to take on a variety of leadership roles in interprofessional teams. In this book, the authors use detailed case studies to explore and analyze the skills needed to enable readers to develop into successful leaders in diverse settings.

Leading Interprofessional Teams in Health and Social Care

"Leadership for Health Professionals: Theory, Skills, and Applications applies classical knowledge of leadership theory and time-honored best practices of industry leaders to a health organization context. Themes of leadership principles, applications and constructs such as organizational culture, cultural competency, ethical frameworks and moral practice, scientific methodology, leader competencies, ex-

ternal and internal assessment and evaluation, communication, planning, decision-making, employee enhancement, and knowledge management are woven through the entire text"--

Practical Leadership and Management in Healthcare

Leaders in healthcare today face many challenges ranging from managing interprofessional teams and teamwork, to payment reform, to tackling issues such as homelessness and the opioid crisis. Leaders have access to depth of information and resources to help them solve these complex and real-world problems. However, it is our belief that given the complexities of healthcare, there is value in sharing and learning from those who have first-hand experience with interprofessional leadership in healthcare. *Challenges and Opportunities in Healthcare Leadership: Voices from the Crowd in Today's Complex and Interprofessional Healthcare Environment*, is a volume in a book series titled, *Contemporary Perspectives in Business Leadership*. In this book, authors share their true, authentic reflections and professional stories describing the lived experience(s) of the author/leaders and how the experience changed the author/leaders' approach as an interprofessional leader. Each chapter includes a (1) story about the topic and the lived experience, (2) perspectives, and (3) lessons of the author(s). Additionally, scholarly commentary and discussion questions included within each chapter create opportunity for application to leadership theories and strategies as well as allow for reflection and further dialogue on the topic. The intended audience is broad, including faculty and students in institutions of higher education, interprofessional healthcare team leaders and members, and other healthcare stakeholders who have experience in interprofessional healthcare leadership. The book is applicable for leadership growth and development at a personal, group, or organizational level.

Leadership for Health Professionals: Theory, Skills, and Applications

What is leadership? How do you develop your leadership abilities? How is leadership different from management? How does leadership contribute to professional and personal success...improve patient care...and affect the future of nursing? An easy-to-read, interactive approach helps you to identify the characteristics of leaders and followers and illustrates not only how, but also when to use the qualities associated with each to achieve professional and personal success. Excellent book for nurse leadership. "This should be mandatory reading for all nurses."—John P., Online Reviewer

The New Leadership Challenge

Awarded second place in the 2017 AJN Book of the Year Awards in Psychiatric and Mental Health Nursing. "I welcome, at long last, a book on global mental health targeted to nurses, the front-line health worker for billions of people around the world. The roles that nurses can, and should, play in mental health care are diverse and this book addresses both well-trod as well as emerging concerns across the continuum of care from promotion to prevention to treatment. Importantly, at the heart of this diversity is the foundation of compassion and care, the hallmark of the nursing profession." – Vikram Patel, Professor of International Mental Health and Wellcome Trust Principal Research Fellow in Clinical Science, Centre for Global Mental Health, London School of Hygiene and Tropical Medicine, UK Psychiatric disorders have consistently been identified as serious and significant global burdens of disease, yet meeting the needs of people in mental distress has not often been a priority in health care. This important reference work sets out the knowledge base for understanding the state of mental health care globally, and translating that into effective practice. The Handbook provides a historical and contemporary context of mental health care, identifies and discusses evidence-based standards of care and strategies for mental health promotion and explores the need to deliver care from interdisciplinary and community-based models, placing these imperatives within a human rights and empowerment framework. It is made up of four core sections which look at: Key and emerging issues that affect global mental health practice and research, including the social context of health; Evidence-based health promotion strategies for major areas of practice internationally; A range of country studies, reflecting different problems and approaches to mental health and mental health care internationally; and What constitutes empowering practice. The only comprehensive work looking at global perspectives on mental health nursing, this is an invaluable reference for all students, academics and professionals involved in mental health research with an interest in global or cross-cultural issues.

Key Tools and Techniques in Management and Leadership of the Allied Health Professions

'In these pages you will find a rich mixture of the best in leadership and organisation development practice and theory, based on a lifetime of studying and applying the principles of why some healthcare organisations succeed and why some fail.' This inspirational book analyses the attitudes and disciplines which make people and the organizations for which they work more effective, more productive and generally more successful. The author, who has experience of working in healthcare and manufacturing and with senior civil servants, and is also familiar with key academic literature, sets out a highly practical combination of practice, theory and policy applicable in a wide variety of healthcare situations. Now revised, including an entirely new chapter on being patient-focused, this remains an invaluable resource for health service leaders and future leaders including managers, clinicians, policy makers and academics.

Ballweg's Physician Assistant: A Guide to Clinical Practice - E-Book

From reviews: "I found this book to be an excellent read... My favourite part is at the end of each chapter where the authors very kindly give a chapter summary. I would say this, with learning outcomes for each chapter, is the reader's 'pot of gold' – and an excellent resource for students. The social and political stance of this text is sensitively weaved throughout, encouraging the wider thought processes of the reader. Images and illustrations provide a welcome and useful change to the traditional academic text, and I would recommend the book as an important reference resource for those starting on

their leadership journey, or for those wanting to update. A well-informed, easy read that I will be recommending to our students to support their studies." *The Biomedical Scientist*, 2013: 70 (4) "This is an excellent book for anyone who is starting to take an interest in Leadership within their health or social care role... Overall, the book is clearly aimed at practitioners and should be a 'must-read' for those who wish to understand more about practical leadership and who aspire to more senior positions within their field of practice." Lecturer, Staffordshire University Faculty of Health Sciences Leadership in Health and Social Care is an accessible text for students and practitioners seeking to develop their leadership skills. "I commend this book to you as a 'way in' to the leadership world for anyone working in health and social care. It treats you like an adult and expects you to take responsibility for your own leadership development. We now know that good leadership has a direct relationship with good services and we can certainly no longer afford mediocrity. We need leaders to enable the disruptive innovation that will be required to improve the quality of care with less resource to do so." From the Foreword by Karen Middleton, Chief Health Professions Officer for England. Key features: · Introduces the concept of leadership and its importance in health and social care. · Discusses the skills and qualities that make for effective leadership. · Analyses the role of the leader as a catalyst for change. · Helps readers to explore their own perceptions of leadership through activities and scenarios.

Routledge Handbook of Global Mental Health Nursing

The legacy of today's interprofessional health care leaders will be the successful transformation of the healthcare system at the point of care. Most healthcare leaders and providers are masters of problem solving. However, the major issues haunting healthcare today are combinations of problems and polarities. When healthcare professionals are not clear about how to differentiate between problems and polarities, they waste time, money and energy.

Effective People

This book is a primer focusing on systems thinking as it spans the domains of health administration, public health, and clinical practice. Currently, the accrediting commissions within public health, health administration, and nursing are including systems thinking as part of the core competencies in their respective fields and professions. Meanwhile, academic programs do not have the materials, other than journal articles, to give students the requisite understanding of systems thinking as is expected of the next generation of health professionals. This primer is designed to meet that void and serve as a supplemental reading for this important and timely topic. This is the only book of its kind that provides a broad introduction and demonstration of the application of health systems thinking.

Leadership in Health and Social Care

The Routledge Companion to the Professions and Professionalism is a state-of-the-art reference work which maps out the current developments and debates around the sociology of the professions, and how they relate to management and organizations. Supported by an international contributor team specializing in the disciplines of organizational studies and sociology, the collection provides extensive coverage of this field of research. It brings together the core concepts and issues, and has chapters on all the key aspects of professions in both the public and private sectors, including issues of governance and regulation. The volume closes with a set of international case studies which provide valuable practical insights into the subject. This Companion will be an indispensable reference source for students, scholars and educators within the social sciences, especially within management, organizational studies and sociology. It will also be highly relevant for those working and studying in the area of professional education.

Polarity Thinking in Healthcare: The Missing Logic to Achieve Transformation

"This book claims to be 'like no other' and that is so true. The editors and authors each add quality guidance around distributed leadership to readers, providing evidence-based examples, useful websites and key reading material to support and supplement the ideas being presented." Bridie Kent, Professor in Leadership in Nursing, University of Plymouth, UK "This book, thankfully, isn't about self-defined heroic organizational leaders or power-hungry political leaders – it tells the stories of the people doing leadership every day in their work to make healthcare happen." Scott Taylor, Business School Director of Admissions, University of Birmingham, UK This innovative book brings together experts from health sciences, nursing, business and management backgrounds to provide a broad analysis of the growing field of distributed leadership. The book offers health professionals practical guidance on applying

distributed leadership, resulting in more effective forms of collaborative clinical teamwork and lasting improvements in care. The text:

- Offers a comprehensive collection of perspectives, featuring chapters by expert clinical, nursing and management studies contributors
- Synthesizes and explores recent developments in the leadership and distributed leadership research literature
- Supports research and theory with examples of cases of effective distributed leadership in clinical practice, service quality, patient safety, leadership development, general nursing, midwifery education, oncology services, intellectual disability, evidence-based practice and organizational change and development
- Provides an international focus, to encourage reflection on learning from experiences across Europe and beyond

Distributed Leadership in Nursing and Healthcare is essential reading for health professionals, undergraduate and postgraduate students, and researchers working in the field of leadership. Practical, real-life examples show you how to: incorporate health literacy and needs of the learner; assess and adapt to the various learning styles of patients; use simulations in education; facilitate the development of clinical reasoning skills; and assess learning outcomes and the effectiveness of your teaching. Plus, four all-new chapters and major revisions of all content throughout the book keep you on top of the latest research and best practices. Coverage of the theory and application of educational principles across the continuum of PT practice provides the information you need to improve your skills in the educational process both in academic and clinical settings. Two section format divides content into two parts: designing academic and clinical education programs and teaching students in academic and clinical settings; and teaching patients and families in clinical and community settings. Variety of teaching and teaching assessment methods expands your teaching, learning, and assessment repertoires. Case stories at the beginning of each chapter allow you to see the relevance of the information in the chapter. Threshold concepts highlight key ideas that are important to know. Annotated bibliography at end of each chapter provides resources for further study. NEW! Chapter on Authentic Assessment: Simulation-Based Education reflects the new ways to facilitate student learning through the use of human simulation models. NEW! Chapter on Strategies for Planning and Implementing Interprofessional Education covers the fundamental concepts of team-based care and interprofessional learning. NEW! Chapter on What Makes a Good Clinical Teacher? translates current research on clinical teaching into clinical education and practice. NEW! Chapter on Facilitating the Teaching and Learning of Clinical Reasoning helps you apply current research on clinical reasoning in rehabilitation to clinical education and teaching. NEW! Two combined chapters on Patient Education and Health Literacy (previously chapters 8 and 12) and Applied Behavioral Theory and Adherence: Models for Practice (previously chapters 9 and 10) provide focused presentations on current thinking and practical strategies for addressing health literacy issues in the clinical environment. NEW! Expanded chapter on Post-Professional Clinical Residency and Fellowship Education offers more information on models and trends in residency education and mentoring.
