Entrepreneurs exist in every country but the nature and level of entrepreneurial activity differs remarkably. Why is this? What shapes the level of entrepreneurial activity in each country? What defines entrepreneurial activity? As more and more teaching and research into entrepreneurship reflects its often international nature, the need for literature reflecting this grows. This concise new textbook provides an introduction to topics in entrepreneurship in a global context; focusing on how enterprise works across the world. Important topics such as financing, innovation and (anti) social enterprise are discussed in detail throughout the text and examples and case studies are used to illustrate the application of different theoretical and conceptual approaches to entrepreneurship and the role it plays in developed, emerging and transitional economies. Entrepreneurship: A Global Perspective is suitable for both final year undergraduate and postgraduate courses in enterprise and is likely to appeal particularly to student groups with a strong international element.

### Growing and Managing a Small Business

The growth of global corporations has led to the development of new business strategies whose complexity and configuration rest on corporate networks; corporate cross-culture and intangible corporate and product assets. In global markets, corporations compete in a competitive marketplace dimension, in other words, competitive boundaries in which space is not a stable element of the decision-making process, but a competitive factor whose complexity depends on markets increasingly characterized by time-based competition and over-supply. In view of today's fierce competition from US and Southeast Asian corporations, this book highlights global business development policies based on innovation, sustainability and intangible assets. The book assesses competitive business management from a global perspective, examining business development policies linked to the profitability of global firms. It forces readers to actively think through the most fundamental policies developed by global firms in the current competitive landscape and provides answers to questions such as: What are the new drivers of global capitalism?; How do global businesses deal with new local nationalism?; Which governance systems and behavioural norms qualify global businesses?; What are the main business policies that characterize competitive business management in a global competition perspective? Competitive Business Management neatly explains the global business management domain and helps readers to gain an understanding of global development business policies.

### The Wellbeing of Women in Entrepreneurship

Aimed at key decision makers and those responsible for global strategy, this book is about changing markets and the complexity of undertaking business in a fast paced technological and knowledge based age in a dynamic and strategic context. Trends show a renaissance in entrepreneurial activity that is fuelling innovation particularly in the so called BRIC nations of Brazil, Russia, China and India. For example, both China and India have benefited immensely from Foreign Direct Investment (FDI) and as a direct consequence both nation states are reshaping the way global business is conducted and the way investment decisions are made. Evidence would suggest that Europe and the United States are more dependent on the BRIC trading nations for earnings and profits. Geographical distance is no longer a barrier between nations; however, the challenges of ethnic diversity in domestic markets are multiplied by the difficulties of delivering goods and services into global markets with different cultures and languages. This book examines the issues associated with undertaking global business in complex and knowledge related markets. Written by highly knowledgeable and well-respected practitioners and academics in their field Provides practical insight and realistic answers to global and strategic problems Progressive constructs of trends and thoughts to take the reader from the current paradigm to the broader yet application-specific view of global business

### Entrepreneurship

Globalisation has instigated huge changes in the competitive environment for business entrepreneurs, and both large and small firms now frequently operate in similar conditions. Most research studies in international business have tended to focus on the market growth and internationalisation of large-scale

and multinational companies as opposed to the experiences of more small-scale enterprises. The research outlined in this volume is radical and different in this regard. Employing cases studies from a range of Norwegian-based SMEs (Small-to-Medium-based enterprises), this volume explores the diverse factors which influence the speed of entrepreneurial internationalisation and the significance of this development for both the entrepreneur and the government bodies which provide support to such businesses. Market advantage frequently accrues to those who enterprises who internationalise quickly and who are quicker than others to embrace both foreign markets and a more internationally-focussed signature brand or identity. This research outlined here is an important addition to the growing body of literature which analyses the forces influencing modern-day market internationalisation.

## Working with Rural Communities

'a host of eminently sensible practical suggestions...the strength of this book is both that it explores with some rigour the meaning of 'rural', of 'community' and of 'development' and that it has clearly in view the practical needs of the lone, inexperienced field worker...' Community Development Journal Vol. 28 No. 2, 1993P '...deserves to become an essential reference book for all those with an interest in rural community work' Adage Pural communities are facing increasing and contrasting problems, with high levels of unemployment or conflict arising from suburbanisation and the arrival of newcomers. This book provides a strategic framework for dealing with these issues, with an innovatory model for planning and practising rural community work. It is relevant to work in all types of areas and for a wide range of agencies, identifying key management and evaluating tasks. Important connections are made between existing knowledge and worker's own experiences. Concluding with a review of policies this is an invaluable guide for rural community work students and professionals.

## Effective Working with Rural Communities

Governments around the globe are promoting co-production and community social enterprise as policy strategies to address the need for local, 21st century service provision but can small communities engage spontaneously in social enterprise and what is the true potential for citizens to produce services? This book addresses a clutch of contemporary societal challenges including: aging demography and the consequent need for extended care in communities; public service provision in an era of retrenching welfare and global financial crises; service provision to rural communities that are increasingly 'hollowed out' through lack of working age people; and, how best to engender the development of community social enterprise organizations capable of providing high quality, accessible services. It is packed with information and evidence garnered from research into the environment for developing community social enterprise and co-producing services; how communities react to being asked to co-produce; what to expect in terms of the social enterprises they can produce; and, how to make them happen. This book is an antidote to the rhetoric of optimistic governments that pronounce co-production as a panacea to the challenges of providing local services and by drawing on the

evidence from a 'real-life' international study will make policymakers more savvy about their aspirations for co-production, give service professionals practical strategies for working with communities, fill a gap in the academic evidence about community, as opposed to individual, social enterprise and reassure community members that they can deliver services through community social enterprise if the right partnerships and strategies are in place. Community CoProduction will appeal to students and scholars over a broad range of disciplines including development, entrepreneurship, public and social policy, economics and regional studies.

### Effective Working with Rural Communities

This book addresses itself to mobilisation and involvement of rural people in development projects. It describes an imperfect but, nonetheless, exciting and thought-provoking exercise that drew social science researchers and students from four public universities in Kenya into an experiment in participatory research, community education and development in two locations. The experiment was grounded on the assumptions that the people of Kenya are a primary resource and that given proper roles and contribution of planners, researchers and programme implementers, self-sustainable development can become a reality. The contributors of this book have focused on the potential of the university to facilitate participation of the people in development. They have given specific suggestions on how this might be accomplished.

### Social Work in Rural Communities

A thoughtful text integrating strengths, assets, and capacity-building themes with contemporary issues in rural social work practice Now in its second edition, Rural Social Work is a collection of contributed readings from social work scholars, students, and practitioners presenting a framework for resource building based on the strengths, assets, and capacities of people, a tool essential for working with rural communities. This guide considers methods for social workers to participate in the work of sustaining rural communities. Each chapter features a reading integrating the themes of capacity-building and rural social work; discussion questions that facilitate critical thinking around the chapter; and suggested activities and assignments. Rural Social Work, Second Edition explores: Important practice issues in rural communities, including the challenges of working with stigmatized populations such as gay, lesbian, bisexual, and transgendered people, the homeless, and people living with HIV/AIDS Practice models that hold special promise for rural social workers, including evidence-based practice and community partnership models Newer research tools such as asset mapping, social network analysis, concept mapping, and Geographic Information Systems (GIS) Exploring how social workers can integrate the tremendous resources that exist in rural communities into their practice, Rural Social Work, Second Edition provides a solid introduction to the complex, challenging, and rewarding work of building and sustaining rural communities.

### Living Working Countryside

Does a program work? What is the value? How do we know? These are questions that keep evaluators up at night. Continued rural community funding, employment, health, and justice depend on our answers to these questions. For evaluators working in rural communities, the task is great, but the return is even greater. Now more than ever before, evaluators have an opportunity to impact social change in rural America. Beginning with an introduction of rural community evaluation, Evaluation in Rural Communities highlights the differences in approaches to evaluation in rural areas, supported by case studies that illustrate key themes and objectives. It explores a number of issues, including • sustainability • policy • cost–benefit analysis • rural community evaluation as a platform to support social change. In particular, readers will also learn how to overcome rural community challenges, such as limited resources, the digital divide, limited funding, lower employment and educational attainment, limited opportunities for social interactions, and the distrust of outsiders. Blending aspects of community-based participatory research, empowerment evaluation, and program evaluation methods, this book is an accessible yet nuanced guide that integrates critical thinking, problem solving, social and political contexts, and outcomes related to evidence-based evaluation.

### Community Co-production

Following an introduction by the co-editors, this collection of 27 contributed readings from academics, students and practitioners is presented in 5 parts, introduced by 'Lead Teachers.' This book presents

a framework for asset building based on the strengths, assets, and capacities of people, all of which are critical for working with rural communities.

### Working with Rural Communities Participatory Action Research in Kenya

In much of the West the concerns of rural people are marginalised and rural issues neglected. This stimulating book draws upon a rich variety of material to show why rural social work is such a challenging field of practice. It incorporates research from different disciplines and places to provide an accessible and comprehensive introduction to rural practice. The first part of the book focuses upon the experience of rurality. The second part of the book turns to the development of rural practice, reviewing different ways of working from casework through to community development. This book is relevant to planners, managers and practitioners not only in social work but also in other welfare services such as health and youth work, who are likely to face similar challenges.

### Rural Social Work

Revised edition of the author's Rural social work in the 21st century, [2015]

### Evaluation in Rural Communities

Rural counties make up about 80 percent of the land area of the United States, but they contain less than 20 percent of the U.S. population. The relative sparseness of the population in rural areas is one of many factors that influence the health and well-being of rural Americans. Rural areas have histories, economies, and cultures that differ from those of cities and from one rural area to another. Understanding these differences is critical to taking steps to improve health and well-being in rural areas and to reduce health disparities among rural populations. To explore the impacts of economic, demographic, and social issues in rural communities and to learn about asset-based approaches to addressing the associated challenges, the National Academies of Sciences, Engineering, and Medicine held a workshop on June 13, 2017. This publication summarizes the presentations and discussions from the workshop.

### Working with Rural Communities

This book provides an overview of interdisciplinary approaches that have applied social science to research focused on issues around food, agriculture and natural resource management. The book demonstrates that those who work in rural sociology either as researchers or practitioners apply community development and participatory techniques to socio-environmental interaction. The book discusses how the evolving concept of interconnected social and ecological systems (SES) emerged, recognizing the inherent complexity, adaptive nature, and resilience of such systems. This book engages with contemporary theory, as well as new cutting-edge transdisciplinary research evidenced in case studies from three continents.

### Rural Social Work

"Partnerships in Communities" provides a fresh perspective on sustainable rural community development, offering community-based and community-driven responses to the challenges facing rural America. Author Jean Richardson draws on her many years of experience working in rural areas both at home and abroad to offer an integrated and practical approach to rural community development. Some of the findings presented are derived from a comprehensive project known as Environmental Partnerships in Communities (EPIC), which Richardson has directed for the past seven years in Vermont. From this experience and those of others from across America, Richardson provides a wealth of insight regarding what works, what doesn't, and how financial and human resources can be most effectively focused in rural communities. Following an introductory chapter that describes what is happening in rural America today and examines the institutions and natural resource base upon which rural communities depend, the book: addresses the need for self-directed community development sets forth a comprehensive approach based on the EPIC experience describes efforts to revitalize working rural landscapes, including organization building, pasture management, historic preservation, and more uses case studies and personal stories of rural people to portray the critical role of leadership in community stewardship and conservation. At the end of each chapter, the author synthesizes the transferable lessons learned, and the book concludes with a chapter that draws together those lessons to suggest a dynamic new approach to rural development. Numerous photographs enliven

the text, and an extensive bibliography and a rich set of appendices provide resources for additional information. "Partnerships in Communities" will serve as an invaluable source of inspiration and ideas for rural community leaders, citizen groups, public officials, planners, students of rural planning and community development, and nonprofit organizations involved with rural development.

### Rural social work

Learn the skills you need to work with geriatric populations in rural areas! *Gerontological Social Work in Rural Towns and Communities* provides a range of intervention and community skills aimed precisely at the needs of rural elders. This book fills a gap in the literature by focusing on the specific practice concerns for social workers assisting older adults in rural areas, including the aging experience, social worker skills, professional functions, working with special populations, and health and long-term care concerns. This valuable resource will benefit social workers, gerontologists, allied health professionals in rural areas, health and human services administrators and managers. *Gerontological Social Work in Rural Towns and Communities* explores the challenges social workers need to overcome when working with the elder community in rural areas. This book's significance to social workers will only increase as more adults choose to live and grow old away from the cities. Experts in the field suggest strategies to overcome barriers in planning and providing services such as: a longer distance for the elderly to travel to use social service centers a narrower range of available services in the local area increased poverty levels for the elderly a stronger dependency by elderly on family rather than public assistance This book is divided into five sections: *Rurality and Aging*—introduces the concept of rurality and examines the demographics of aging from a rural perspective *Practice Dimensions of Social Work with Rural Elders*—includes clinical practice models, intervention and advocacy techniques, program planning, and marketing approaches *Special Populations*—gives attention to four special population groups: indigenous elders, African-American older adults, elderly Latinos, and disabled elders *Special Issues Pertaining to Rural Elders*—covers five essential issues for rural gerontological social workers: health promotion, older workers and retirement preparation, aging in place, specialized housing, and ethical practice *Training and Policy Recommendations*—future training and education recommendations for social workers are explored, as well as service capacity building, the aging network, and the future of long-term care While a variety of theoretical perspectives are explored in *Gerontological Social Work in Rural Towns and Communities*, the book's empowerment orientation and strengths-based approach will enhance your abilities to improve quality of life for elderly individuals in rural communities. Each chapter contains a comprehensive review of the literature on the subject it addresses, and several chapters include tables and graphs to further establish their revealing empirical findings. An appendix provides additional sources to turn to for more information.

### Rural Social Work in the 21st Century

Building on the innovative Institute of Medicine reports *To Err Is Human* and *Crossing the Quality Chasm*, *Quality Through Collaboration: The Future of Rural Health* offers a strategy to address the quality challenges in rural communities. Rural America is a vital, diverse component of the American community, representing nearly 20% of the population of the United States. Rural communities are heterogeneous and differ in population density, remoteness from urban areas, and the cultural norms of the regions of which they are a part. As a result, rural communities range in their demographics and environmental, economic, and social characteristics. These differences influence the magnitude and types of health problems these communities face. *Quality Through Collaboration: The Future of Rural Health* assesses the quality of health care in rural areas and provides a framework for core set of services and essential infrastructure to deliver those services to rural communities. The book recommends: Adopting an integrated approach to addressing both personal and population health needs Establishing a stronger health care quality improvement support structure to assist rural health systems and professionals Enhancing the human resource capacity of health care professionals in rural communities and expanding the preparedness of rural residents to actively engage in improving their health and health care Assuring that rural health care systems are financially stable Investing in an information and communications technology infrastructure It is critical that existing and new resources

be deployed strategically, recognizing the need to improve both the quality of individual-level care and the health of rural communities and populations.

### Achieving Rural Health Equity and Well-Being

### The Rural Community and Social Case Work

Featuring contributions from practitioners, researchers, and academics, this volume synthesizes and analyzes current trends in rural social work practice and considers the most effective ways to serve rural communities. Contributors consider the history and development of rural social work from its beginnings to the present day, addressing the value of the Internet and other new information technologies in helping clients. They also examine the effects of nonprofit organizations and welfare reform on poor rural areas. Coverage of specific client populations and fields of practice includes services for rural mental healthcare; the chronically mentally ill; healthcare for minorities; and the challenges faced by the elderly in rural areas. The contributors also consider issues affecting gays and lesbians living in rural communities and the role of religiosity and social support in the well-being of HIV/AIDS clients. The book concludes with a consideration of the unique issues associated with educating social workers for rural practice.

### Partnerships in Communities

There is a lot of conversation happening in the United States today about the rural/urban divide, serious questions about how we experience prosperity and opportunity throughout our country's rural communities. I live in a small town, as do a number of people on our team, and we think about this a lot. The change in Rural areas is really important. How Could We Do? How are rural American communities working to build a better world? These are the stories of building a stronger rural America. These are the stories of a resurgence in diverse talents and work in progress to improve community services, relationships, and to further collective societal values and organizations. Active community involvement engages everyone, to address social conditions and improve our collective lives. In part, this book gives voice to diverse points of view and experiences and shows the strengths and talents of rural Oregon communities. And so many things more.

### Gerontological Social Work in Small Towns and Rural Communities

College Aspirations and Access in Working Class Rural Communities: The Mixed Signals, Challenges, and New Language First-Generation Students Encounter explores how a working class, rural environment influences rural students' opportunities to pursue higher education and engage in the college choice process. Based on a case study with accounts from rural high school students and counselors, this book examines how these communities perceive higher education and what challenges arise for both rural students and counselors. The book addresses how college knowledge and university jargon illustrate the gap between rural cultural capital and higher education cultural capital. Insights about approaches to reduce barriers created by college knowledge and university jargon are shared and strategies for offering rural students pathways to learn academic language and navigate higher education are presented for both secondary and higher education institutions.

### Work and Family Life in Rural Communities

This book gives voice to the direct practice experience of social workers working in rural and remote contexts using Australia as the primary case-study. The authors undertake a qualitative research project, conducting in-depth interviews to examine social work theory and practice against the reality of rural and remote contexts. Practice examples provide the reader with an insight into the diverse and complex nature of social work in rural and remote Australia and the role of contemporary social work. Through placing rural and remote social work in its historical, theoretical and geographical contexts, this work explores a range of considerations. These include isolation; ethical dilemmas when working with small and closely linked communities; climate, disaster relief and the environment; community identity

and culture; working with indigenous communities in remote contexts; and social work education. Based on direct practice research, this book challenges existing theories of practice and reframes those to reflect the reality of practice in rural and remote communities. As social work must continue to critically reflect on its role within an ever changing and individualistic society, lessons from rural and remote settings around engagement, sense of place and skillful, innovative practice have never been more relevant.

### Rural Action

This Handbook brings together experts from around the world to reflect critically on the relationship between tourism and rural community development. It first orients the reader in the important conceptual and epistemological foundations of the topic, before moving to consider key concepts and the most significant and salient theoretical and methodological developments in the field. Chapters written by a range of well-established, leading and emerging scholars in the field consider crucial issues facing tourism development in rural communities across different geographical settings. The Handbook represents a variety of traditional and emerging forms of scholarly writing, including theoretically driven chapters, empirical case studies and first person narratives, to offer a detailed study of the topic. With a forward-looking angle, it studies tourism development in rural areas, including working with rural communities, tourism governance and ethical considerations. Chapters also consider new directions in the field, examining food and tourism, degrowth, landscapes, animals, social impacts and women social entrepreneurs. This comprehensive and innovative Handbook offers a wealth of empirical and theoretical knowledge on tourism and rural community development, and as such will be a critical resource for tourism, development studies and human geography scholars and students.

### Who's Who in a Rural Community

Rural people and communities continue to play important social, economic and environmental roles at a time in which societies are rapidly urbanizing, and the identities of local places are increasingly subsumed by flows of people, information and economic activity across global spaces. However, while the organization of rural life has been fundamentally transformed by institutional and social changes that have occurred since the mid-twentieth century, rural people and communities have proved resilient in the face of these transformations. This book examines the causes and consequences of major social and economic changes affecting rural communities and populations during the first decades of the twenty-first century, and explores policies developed to ameliorate problems or enhance opportunities. Primarily focused on the U.S. context, while also providing international comparative discussion, the book is organized into five sections each of which explores both socio-demographic and political economic aspects of rural transformation. It features an accessible and up-to-date blend of theory and empirical analysis, with each chapter's discussion grounded in real-life situations through the use of empirical case-study materials. *Rural People and Communities in the 21st Century* is intended for advanced undergraduate and graduate courses in rural sociology, community sociology, rural and/or population geography, community development, and population studies.

### Putting Smart Growth to Work in Rural Communities

This book fills a gap between theory and practice in the field of the rural communities' research. The book consists of fourteen chapters which analyze specific aspects and suggest possible solutions regarding rural communities in the global economy, insisting on the recent transformations of the classical rural economy paradigms in contemporary economies. The main topics of the book are centered but not limited to the following aspects: -Recent transformations of the rural communities

-Rural paradigm agricultural and food models -Rural sustainable investments -Consumption models -Business investments strategies in rural areas -Transition economics and market reforms in rural economy -Market inequity and rural economy -Business models and start-ups in rural areas. This book tries to provide insights and support for policy makers, investors, researchers - all of this connecting to the rural communities in the global economy. In this context, the objective of the book is to provide relevant theoretical frameworks and the latest empirical research findings in the area of green rural communities in the global economy and their impact on sustainable development of competitive markets. The main objectives of the book are: -to create a reference for professionals, practitioners, academia and students in field of the rural economy paradigms; -to present and analyze the latest findings in the field of the recent transformations of the rural communities -the paradigms change of rural communities in the global economy; -to create a working paradigm regarding the rural economy The book, *Rural Communities in the Global Economy - Beyond The Classical Rural Economy Paradigms* will definitely impact editors' fields of research, since it is mainly related to the rural communities in the global economy and the sustainable development of the rural economy through a range of activities, including green entrepreneurship and the "working with people" model. Convinced of its utility, the editors are confident that *Rural Communities in the Global Economy - Beyond the Classical Rural Economy Paradigms* will become a milestone in the field and will stir debates regarding this research topic. This book is addressed to professionals and researchers working in the field of rural communities' economy research and management.

### Rural Social Work Practice

In November 2017, the The Forum on Promoting Children's Cognitive, Affective, and Behavioral Health, in collaboration with the Roundtable on the Promotion of Health Equity, convened a workshop on promoting children's behavioral health equity. The workshop used a socio-ecological developmental model to explore health equity of children and families, including those with complex needs and chronic conditions. Particular attention was paid to challenges experienced by children and families in both rural and urban contexts, to include but not limited to poverty, individual and institutional racism, low-resourced communities, and hindered access to educational and health care services. Workshop participants also engaged in solution-oriented discussions of initiatives, policies, and programs that aim to improve social determinants of health, opportunities for behavioral health promotion, and access to quality services that address the behavioral health of all children and families. This publication summarizes the presentations and discussion of the event.

### Working with Rural Communities in Nepal

This collection presents creative strategies and programs designed to address needs of families in the context of rural communities. Even before the most recent worldwide economic crisis, many rural families in the United States struggled to meet basic needs. As needs in rural communities have expanded, services have shrunk. This book identifies rural families' needs, including social supports during pregnancy, identification of adolescent risk behaviours, child safety, and basic services such as food and health care, using techniques such as Geographic Information Systems and needs and asset assessments. Strategies to address those needs include program development, the use of technology, and community partnerships. The book reminds readers of the sense of independence and self-reliance found in many rural communities and the theme of diversity within rural communities runs throughout the book. The chapters are organized by identification of the needs of rural families, addressing disparities in rural areas, practice in rural communities, and human service organizations and professionals. Through research, practice, and creative works, the book contributes to a greater understanding of ways that service providers can advance their work with rural families and broaden their perspectives about realities experienced by families living in rural communities. This book was originally published as a special issue of the *Journal of Family Social Work*.

### The Voice From Rural Communities

The image of rural America portrayed in this illuminating study is one that is vibrant, regionally varied, and sometimes heroic. *Communities of Work* focuses on the ways in which rural people and places are affected by political, social, and economic forces far outside their control and how they sustain themselves and their communities in response. Bringing together the two fundamental concepts of

community--where the relationships and practices of daily life occur--and work, in which an elementary exchange occurs, Communities of Work bridges several fields of study. Presented here is the contextual and embedded nature of social relations and the complexity involved in understanding them. Through the use of multiple case studies, the authors apply diverse theories and methods in seeking an integrated outcome, one captured by "communities of work." Beginning with a description of the broad changes in work and economic activities across the United States, ranging from the Ohio River Valley to a western boomtown, the book shifts its focus to the interplay of work, family, and local networks in time and place. Activities range from fishing in the Mississippi Delta to farming and family life in the Midwest. The authors then highlight how rural people and places respond to extra-local, increasingly global forces in settings as diverse as rural South Carolina and Wisconsin. A certain communitarian theme runs through Communities of Work. It is about people and communities not merely reacting, but instead responding in ways that reflect their local culture, while being cognizant of the larger world within which they live.
