This document is one of the most sought-after resources in digital libraries across the internet.

You are fortunate to have found it here.

We provide you with the full version of Ludolf Historical Documents completely free of charge.

The Ludolf Papers

Caduceus Unveiled is a spiritual journey to historic settings pointing to the origins of an industry of deception. Modern pharmaceuticals have a sinister history. Drug marketing strategies tie to ancient spirits revealed to Emma when her grandfathers diary and artifacts are found after his death. Gunther Ludolf conducted psychological experiments at Dachau. After the war, he continues his Nazi research working for pharmaceutical giant, LabUrnum. Her grandfathers legacy and a desire for truth lead to danger from medical and religious authorities and threaten the global health community. Emma and her husband Dake are thrust into a historic, ancient conspiracy of Sumerian origins, concerning marketing strategies of the modern medical and pharmaceutical industry and in turn reveal the faith dilemma facing Christianity. This evidence leads them to battle evil spiritual authorities who fear revelation of their ongoing plot to deceive mankind into dependence and worship of medicine and pharmaceuticals.

The Dutch Trading Companies As Knowledge Networks

For more than a century, from about 1600 until the early eighteenth century, the Dutch dominated world trade. Via the Netherlands the far reaches of the world, both in the Atlantic and in the East, were connected. Dutch ships carried goods, but they also opened up opportunities for the exchange of knowledge. The commercial networks of the Dutch trading companies provided an infrastructure which was accessible to people with a scholarly interest in the exotic world. The present collection of essays brings together a number of studies about knowledge construction that depended on the Dutch trading networks. Contributors include: Paul Arblaster, Hans den Besten, Frans Blom, Britt Dams, Adrien Delmas, Alette Fleischer, Antje Flüchter, Michiel van Groesen, Henk de Groot, Julie Berger Hochstrasser, Grégoire Holtz, Siegfried Huigen, Elspeth Jajdelska, Maria-Theresia Leuker, Edwin van Meerkerk, Bruno Naarden, and Christina Skott.

A Commerce of Knowledge

A Commerce of Knowledge tells the story of three generations of Church of England chaplains who served the English Levant Company in Syria during the seventeenth and eighteenth centuries. Reconstructing the careers of its protagonists in the cosmopolitan city of Ottoman Aleppo, Simon Mills investigates the links between English commercial and diplomatic expansion, and English scholarly and missionary interests: the study of Middle-Eastern languages; the exploration of biblical and Greco-Roman antiquities; and the early dissemination of Protestant literature in Arabic. Early modern Orientalism is usually conceived as an episode in the history of scholarship. By shifting the focus to Aleppo, A Commerce of Knowledge brings to light the connections between the seemingly separate worlds, tracing the emergence of new kinds of philological and archaeological enquiry in England back to a series of real-world encounters between the chaplains and the scribes, booksellers, priests, rabbis, and sheikhs they encountered in the Ottoman Empire. Setting the careers of its protagonists against a background of broader developments across Protestant and Catholic Europe, Mills shows how the institutionalization of English scholarship, and the later English attempt to influence the Eastern Christian churches, were bound up with the international struggle to establish a commercial foothold in the Levant. He argues that these connections would endure until the shift of British commercial and imperial interests to the Indian subcontinent in the second half of the eighteenth century fostered new currents of intellectual life at home.

Roots of Afrikaans

Hans den Besten (1948-2010) made numerous contributions to Afrikaans linguistics over a period of nearly three decades. This title presents a selection of Den Besten's most important papers concerning the structure and history of Afrikaans.

British and Foreign State Papers

English novelist E.M. Forster wrote his last and best-loved work, A Passage to India, both as a paean to his love for India and as a tribute to the relationships he formed with Indians. Forster became entranced by the India of the Raj at a young age, and his love affair with the sub-continent, its princes, and peoples, was to last all his life. At his most socially transgressive, it was with Indians that Forster chose to connect and with whom he put into effect his belief in man's duty to value friendship over state or ideology. His time in India was undoubtedly when he was at his most human and most vulnerable. At once a contemporary reflection on India's rich history and a biographical retelling of Forster's travels through the country in the early 1900s, Developing the Heart delves into the past to better understand the profound impact certain events and people had on his writing. In doing so, it allows readers to look on as Forster matures and softens over time in his behaviour with others as well as with himself. Often using Forster's own words to evoke a vivid landscape, this is the story of the most dramatic and exotic part of the life of one of England's greatest novelists.

Pulp, Paper, and Board; Quarterly Industry Report

Julie has looked after her twin brothers since their mother died during childbirth. Now, fifteen years later, as World War II breaks out, she finds she can no longer do that as her brothers have volunteered to fight for the British military and head off to Norway to fight the Nazis. When they are declared missing, Julie risks everything and flies over there in the dead of night to find them.

Accounts and Papers of the House of Commons

The reforms initiated by Peter the Great transformed Russia not only into a European power, but into a European culture--a shift, argues James Cracraft, that was nothing less than revolutionary. The author of seminal works on visual culture in the Petrine era, Cracraft now turns his attention to the changes that occurred in Russian verbal culture. The forceful institutionalization of the tsar's reforms--the establishment of a navy, modernization of the army, restructuring of the government, introduction of new arts and sciences--had an enormous impact on language. Cracraft details the transmission to Russia of contemporary European naval, military, bureaucratic, legal, scientific, and literary norms and their corresponding lexical and other linguistic effects. This crucial first stage in the development of a "modern" verbal culture in Russia saw the translation and publication of a wholly unprecedented number of textbooks and treatises; the establishment of new printing presses and the introduction of a new alphabet; the compilation, for the first time, of grammars and dictionaries

of Russian; and the initial standardization, in consequence, of the modern Russian literary language. Peter's creation of the St. Petersburg Academy of Sciences, the chief agency advancing these reforms, is also highlighted. In the conclusion to his masterwork, Cracraft deftly pulls together the Petrine reforms in verbal and visual culture to portray a revolution that would have dramatic consequences for Russia, and for the world. Table of Contents: Figures Preface Note on Dates and Transliteration 1. Introduction Historiography Language, Culture, Modernity Russian before Peter 2. The Nautical Turn Russia in Maritime Europe The Naval Statute of 1720 Other Nautical Texts Institutionalization 3. Military Modernization Military Revolutions: Europe to Russia The Military Statute of 1716 Textbooks and Schools 4. Bureaucratic Revolution Advent of the Modern European State The Petrine State The General Regulation of 1720 Regulations and Justifications 5. Science and Literature Geometry, Geography, History Eloquence, Theology, Philosophy The Academy 6. The Language Question The Print Revolution in Russia Lexical Proliferation Dictionaries and Grammars Russian after Peter 7. Conclusion The Petrine Revolution in Russia The Persistence of Muscovy Abbreviations Appendix I: Texts Appendix II: Words Notes Bibliography Index No previous author has attempted to document the changes in the Russian language during Peter the Great's reign by setting such a wide range of texts in historical context -- with full reference to the European background -- in a discussion accessible to non-specialists. James Cracraft extends the definition of literature beyond belles lettres and private writings, in which the Petrine era is relatively poor, to 'verbal culture,' in which it is rich, thereby offering a much wider range of material from a crucial age of reform and allowing exploration of such phenomena as the vocabulary of political power. In no other work in print in English can one find such detailed expositions of the publishing history and contents of such key texts as the Naval Statute and Military Statutes. Cracraft's judicious interpretation will be invaluable to serious students of Russian history. This is a work of immense erudition and a major contribution to scholarship. --Lindsey Hughes, University College London

Parliamentary Papers

The Paper-making Machine: Its Invention, Evolution and Development covers the history of the paper-making machine and its origin and how it developed. This book is organized into 15 chapters, and starts with the discussion of the origin of the first paper-machine way back from A.D. 105 in China. The subsequent chapter deals with the development of the paper-machine where the British improved the machine and were then widely used by people. This topic is followed by discussions on the progress of paper making in 1830-1835 where an advanced type of Fourdrinier machine was introduced by Matthew Towgood and Leapidge South. Other chapters describe further improvements on the Fourdrinier machines and the paper-makings on the late 1800's. The last chapter considers the standardization of the paper-making machine during 1870-1890. This book will be of value to machine inventors and those who work in printing presses.

Developing the Heart: E.M. Forster and India

Reprint of the original, first published in 1857.

Leibniz and Ludolf on Things Linguistic

By the end of 1697—the year his network finally began to work—Leibniz laughed to one of his patrons, "I'm putting a sign on my door reading, 'Bureau of Address for China'!" Depicting Leibniz not as a philosophical authority but as a scholar with human limitations and frustrations, *Leibniz Discovers Asia* is a thrilling and engaging narrative.

Blood Under The Midnight Sun

This biography of Johann Ernst Gerhard (1621-1668) studies of the richly documented life and work of a lesser-known seventeenth-century orientalist, setting them within the broader intellectual, confessional, and institutional contexts of his day.

Paper

Although Robert Morris (1734-1806), "the Financier of the American Revolution," was a signer of the Declaration of Independence, the Articles of Confederation, and the Constitution, a powerful committee chairman in the Continental Congress, an important figure in Pennsylvania politics, and perhaps the most prominent businessman of his day, he is today least known of the great national leaders of the

Revolutionary era. This oversight is being rectified by this definitive publication project that transcribes and carefully annotates the Office of Finance diary, correspondence, and other official papers written by Morris during his administration as superintendent of finance from 1781 to 1784.

The Sulphur War (1840)

Although Robert Morris (1734-1806), "the Financier of the American Revolution," was a signer of the Declaration of Independence, the Articles of Confederation, and the Constitution, a powerful committee chairman in the Continental Congress, an important figure in Pennsylvania politics, and perhaps the most prominent businessman of his day, he is today least known of the great national leaders of the Revolutionary era. This oversight is being rectified by this definitive publication project that transcribes and carefully annotates the Office of Finance diary, correspondence, and other official papers written by Morris during his administration as superintendent of finance from 1781 to 1784.

Documents and statements respecting the Sulphur Monopoly, constituting grounds for Parliamentary inquiry into the conduct of the Foreign Secretary [Viscount Palmerston. By D. Urquhart].

"The show...has been selected from the major collection of Gilbert and Lila Silverman, Detroit, Michigan.... This collection, started in the 1970's and presently containing many hundreds of works, focuses solely on what Mr. Silverman has defined as 'Instruction Drawings' -- works...having the common identifier as being done for the initial process of a work to be made...rather than drawings made for the sake of being drawings."--P. 6.

Universal Catalogue of Books on Art: L to Z

Profiles more than thirty German writers of the nineteenth century up to 1840, presenting primary and secondary bibliographies and illustrated biographical essays that chronicle each writer's career in detail.

The Petrine Revolution in Russian Culture

Yesterday's Words: Contemporary, Current and Future Lexicography reflects the main issues of scholarly discussion in the fields of historical lexicography and lexicology including the historiography of lexicography. The state-of-the-art volume offers a wide range of contributions in five chapters. After the editors' introduction to Yesterday's Words, the chapter Dictionaries and Dictionary-Makers of Former Ages concentrates on historical lexicography, including both the main lexicographical works in English and German and dictionaries of minority languages such as Frisian, Welsh, Irish and Scots. The Vocabulary of the Past discusses historical lexicological and etymological issues such as the results of early language contact in the West-Germanic area and in Jamaica in more recent times. Researchers involved in ongoing lexicographical projects, such as the first dictionary of Old Dutch, report on their practice and methodological approach in Current and Future Lexicography and Lexicology. Many dictionaries or dictionary research projects discussed in the volume have been or are being carried out in a digital environment. In the final chapter, Technology of Today for Yesterday's Words, special attention is paid to projects in which computer techniques and the development of new applications have been essential. The volume is an essential text for lexicographers, historiographers and historical linguists.

The Paper-making Machine

The present case studies on early modern travelers, dispersed often by unintended consequences of war, curiosity, economic or political reasons in the Mediterranean, the Americas and Japan, ask for what power(s) and agency they still had, perhaps counterintuitively, abroad.

Proceedings

This book examines the lives and tenures of all the consorts of the Tudor and Stuart monarchs of England between 1485 and 1714, as well as the wives of the two Lords Protector during the Commonwealth. The figures in Tudor and Stuart Consorts are both incredibly familiar—especially the six wives of Henry VIII—and exceedingly unfamiliar, such as George of Denmark, the husband of Queen Anne. These innovative and authoritative biographies recognise the important role consorts played in a period before constitutional monarchy: in addition to correcting popular assumptions that are based on limited historical evidence, the chapters provide a fuller picture of the role of consort that

goes beyond discussions of exceptionalism and subversion. This volume and its companions reveal the changing nature of English consortship from the Norman Conquest to today.

Studies on Secret Records, Personal and Historic with Other Papers

Walter Liedtke, curator of European paintings at the Metropolitan Museum of Art in New York, has assembled a splendid catalog of Vermeer and his artistic milieu. Seven lengthy, well-illustrated chapters (Liedtke wrote five, Dutch art historians Michiel Plomp and Marten Jan Bok wrote the others) describe life in the city of Delft; the painters Carel Fabritius, Leonart Bramer, and others who preceded Vermeer; the careers of Vermeer and De Hooch; the making of drawings and prints in 17th-century Delft; and the collecting of art in the same period. The catalog follows: each painting, print, and drawing accompanied by a lengthy catalog essay. Oversize: 12.25x9.75". c. Book News Inc.

Leibniz Discovers Asia

This book is the first history in English of the Lutheran Church in Germany and Scandinavia in the eighteenth and nineteenth centuries. A period of fundamental and lasting change in the political landscape with the separation of the old twin monarchies of Sweden-Finland and Denmark-Norway in Scandinavia (1808, 1814), and the unification of Germany (1866-71), this was also a time of particular unease and upheaval for the church. Attempts to emulate the spiritual community of the early church, reform of the church establishment, and steps taken to enlighten parishioners were almost always held back by the anomalous structural legacy of the Reformation, tradition, and parish habit, sacred and profane. However, the birth of the modern nation-state and its market economy posed a fundamental challenge to the structure and ethos of the Reformation churches, as it did to the Catholic Church. The First World War deepened the crisis further: German Protestants (and the Scandinavians were not immune either, although they remained neutral), who bracketed modernity with crisis and religion with national renewal, and who saw national loyalty as a higher value than the faith, fellowship, and moral order of the church, were swept up into the maw of a modern national war machine which threatened to wipe out Protestantism altogether.

Johann Ernst Gerhard (1621-1668)

Women Thinkers in Antiquity and the Middle Ages: Lecture 4: Ancient India - Women Thinkers in Antiquity and the Middle Ages: Lecture 4: Ancient India by PhiloCast 856 views 5 years ago 1 hour, 2 minutes - Talk by Prof. Dr. Peter Adamson, LMU Munich, King's College London.

Atman is not a universal self in the sense that everyone has an atman, but rather atman is a particular construction of the self which is both explicitly male and gained through particular kinds of practices which are primarily the domain of men.

We have a significant number of characters in Upanisadic stories who, based on earlier textual material, would normally be excluded from such knowledge. Taken together their inclusion appears to be more of an internal critique and development of the Brahmin worldview and less of a reflection of an historical reality. If women in this Upanishad are viewed in this light, the issue appears to be a larger one of a changing ideology behind the possession of knowledge and what that knowledge is. Sulabh represents a model for enlightenment that is beyond the dualities of gender distinction, and therefore is as available for women as it is for men.

Both Hindu and Buddhist tantrism visualize a supreme non-duality which can be expressed only in terms of a diametrical polarity... They have chosen the one paradigm that is no doubt singularly fitting, from both a psychological and a mythical angle, to illustrate this polarity, i.e. man and woman, or rather man and woman in their cosmic version, god and goddess.

The Battle of **the Somme**, was one of the bloodiest of ...

Fighting began on 1 July 1916, shortly after mines were detonated, leaving this crater.

There were 58,000 British casualties on the first day alone.

The Allied troops attacked along a 14 mile front.

At the Thiepval Memorial, more than 72,000 soldiers without graves are remembered.

After four months of heavy fighting, the battle ended as winter closed in.
