The Vanishing

A history lesson they'll never forget ... and neither will you. Mattie Engel is one of the rising stars at Private Berlin, and believes she's seen the worst of people in her previous life with the Berlin police force. That is until Chris, her colleague - and until recently, her fiancé - is found dead, brutally murdered in an old slaughterhouse outside the city. The slaughterhouse is filled with bodies. But just as Private begin their investigations, the building explodes, wiping out all evidence of the crimes, and nearly killing Mattie and her team. Mattie soon realises that a masked killer is picking off Chris's childhood friends, one by one, and destroying the trail. But who wants the past buried so badly? What is the truth about that slaughterhouse? And will Mattie become the killer's next victim?

Private Berlin

* Winner of Honorable Mention Award for the Otto Klineberg Intercultural and International Relations Prize competition from SSPSI * This edited volume captures an exciting new trend in research on intergroup attitudes and relations, which concerns how individuals make judgments, and interact with individuals from different group categories, broadly defined in terms of gender, race, age, culture, religion, sexual orientation, and body type. This new approach is an integrative perspective, one which

draws on theory and research in the areas of developmental and social psychology. Throughout human history, intergroup conflict has often served as the basis for societal conflict, strife, and tension. Over the past several decades, individual and group mobility has enabled individuals to interact with a wider range of people from different backgrounds than ever before. On the one hand, this level of societal heterogeneity contributes to intergroup conflict. On the other hand, the experience of such heterogeneity has also reduced stereotypes, and increased an understanding of others' perspectives and experiences. Where does it begin? When do children acquire stereotypes about the other? What are the sources of influence, and how does change come about? To provide a deeper understanding of the origins, stability, and reduction of intergroup conflict, scholars in this volume report on current, cutting edge theory and new research findings. Progress in the area of intergroup attitudes relies on continued advances in both the understanding of the origins and the trajectory of intergroup conflict and harmony (as historically studied by developmental psychologists) and the understanding of contexts and conditions that contribute to positive and negative intergroup attitudes and relations (as historically studied by social psychologists). Recent social and developmental psychology research clarifies the multifaceted nature of prejudice and the need for an interdisciplinary approach to addressing prejudice. The recent blossoming of research on the integration of developmental and social psychology represented in this volume will appeal to scholars and students in the areas of developmental psychology, social psychology, cognitive psychology, education, social neuroscience, law, business, and political science.

Ed Sarafino and Timothy Smith draw from the research and theory of multiple disciplines in order to effectively demonstrate how psychology and health impact each other. The newly updated 9th Edition of *Health Psychology: Biopsychosocial Interactions* includes a broader picture of health psychology by presenting cross-cultural data. Furthermore, international examples are also included to further explore the psychologist's perspective of health issues around the world and highlight what works in the field. The psychological research cited in the text supports a variety of behavioral, physiological, cognitive, and social/personality viewpoints. An emphasis on lifespan development in health and illness is integrated throughout the text.

The Rise and Fall of Human Rights provides a groundbreaking ethnographic investigation of the Palestinian human rights world—its NGOs, activists, and "victims," as well as their politics, training, and discourse—since 1979. Though human rights activity began as a means of struggle against the Israeli occupation, in failing to end the Israeli occupation, protect basic human rights, or establish an accountable Palestinian government, the human rights industry has become the object of cynicism for many Palestinians. But far from indicating apathy, such cynicism generates a productive critique of domestic politics and Western interventionism. This book illuminates the successes and failures of Palestinians' varied engagements with human rights in their quest for independence.

Memoirs of the Bastille

Remembering the Second World War brings together an international and interdisciplinary cast of leading scholars to explore the remembrance of this conflict on a global scale. Conceptually, it is premised on the need to challenge nation-centric approaches in memory studies, drawing strength from recent transcultural, affective and multidirectional turns. Divided into four thematic parts, this book largely focuses on the post-Cold War period, which has seen a notable upsurge in commemorative activity relating to the Second World War and significant qualitative changes in its character. The first part explores the enduring utility and the limitations of the national frame in France, Germany and China. The second explores transnational transactions in remembrance, looking at memories of the British Empire at war, contested memories in East-Central Europe and the transnational campaign on behalf of Japan's former 'comfort women'. A third section considers local and sectional memories of the war and the fourth analyses innovative practices of memory, including re-enactment, video gaming and Holocaust tourism. Offering insightful contributions on intriguing topics and illuminating the current state of the art in this growing field, this book will be essential reading for all students and scholars of the history and memory of the Second World War.

Integrating the results of scholarly work from the past decade, the authors of *An Introduction to the Ancient World*, Lukas de Blois and R.J. van der Spek, have fully-updated and revised all sixteen chapters of this best-selling introductory textbook. Covering the history and culture of the ancient Near East, Greece and Rome within the framework of a short narrative history of events, this book offers an easily readable, integrated overview for students of history, classics, archaeology and philosophy, whether at college, at undergraduate level or among the wider reading public. This revised second edition offers a new section on early Christianity and more specific information on the religions, economies, and societies of the ancient Near East. There is extended coverage of Greek, Macedonian and Near Eastern history of the fourth to second centuries BC and the history of the Late Roman Republic. The consequences of Julius Caesar's violent death are covered in more detail, as are the history and society of Imperial Rome. This new edition is: comprehensive: covers 3,000 years of ancient history and provides the basis for a typical one-semester course lavishly illustrated: contains maps, line drawings and plates to support and supplement the text, with updated captions clearly and concisely written: two established and respected university teachers with thirty years' experience in the subject areas well-organized: traces the broad outline of political history but also concentrates on particular topics user-friendly: includes chapter menus, an extensive and expanded bibliography organized by subject area and three appendices, an improved introduction and the addition of an epilogue.

The Rise and Fall of Human Rights

This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 1 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units.

Remembering the Second World War

As elected coroners came to be replaced by medical examiners with scientific training, the American public became fascinated with their work. From the grisly investigations showcased on highly rated television shows like *C.S.I.* to the bestselling mysteries that revolve around forensic science, medical examiners have never been so visible—or compelling. They, and they alone, solve the riddle of suspicious death and the existential questions that come with it. Why did someone die? Could it have been prevented? Should someone be held accountable? What are the implications of ruling a death a suicide, a homicide, or an accident? Can medical examiners unmask the perfect crime? *Postmortem* goes deep inside the world of medical examiners to uncover the intricate web of pathological, social, legal, and moral issues in which they operate. Stefan Timmermans spent years in a medical examiner's office, following cases, interviewing examiners, and watching autopsies. While he relates fascinating cases here, he is also more broadly interested in the cultural authority and responsibilities that come with being a medical examiner. Although these professionals attempt to remain objective, medical examiners are nonetheless responsible for evaluating subtle human intentions. Consequently, they may end—or start—criminal investigations, issue public health alerts, and even cause financial gain or harm to survivors. How medical examiners speak to the living on behalf of the dead, is Timmermans's subject, revealed here in the day-to-day lives of the examiners themselves.

An Introduction to the Ancient World

Miguel de Cervantes's experimentation with theatricality is frequently tied to the notion of revelation and disclosure of hidden truths. *Drawing the Curtain* showcases the elements of theatricality that characterize Cervantes's prose and analyses the ways in which he uses theatricality in his own literary production. Bringing together the works of well-known scholars, who draw from a variety of disciplines and theoretical approaches, this collection demonstrates how Cervantes exploits revelation and disclosure to create dynamic dramatic moments that surprise and engage observers and readers. Hewing closely to Peter Brook's notion of the bare or empty stage, Esther Fernández and Adrienne L. Martín argue that Cervantes's omnipresent concern with theatricality manifests not only in his drama but also in the myriad metatheatrical instances dispersed throughout his prose works. In doing so, *Drawing the Curtain* sheds light on the ways in which Cervantes forces his readers to engage with themes that are central to his life and works, including love, freedom, truth, confinement, and otherness.

An Account of the Slave Trade on the Coast of Africa

The tenth century dawned in violence and disorder. Charlemagne's empire was in ruins, most of Spain had been claimed by Moorish invaders, and even the papacy in Rome was embroiled in petty, provincial conflicts. To many historians, it was a prime example of the ignorance and uncertainty of the Dark Ages. Yet according to historian Paul Collins, the story of the tenth century is the story of our culture's birth, of the emergence of our civilization into the light of day. *The Birth of the West* tells the story of a transformation from chaos to order, exploring the alien landscape of Europe in transition. It is a fascinating narrative that thoroughly renovates older conceptions of feudalism and what medieval life was actually like. The result is a wholly new vision of how civilization sprang from the unlikeliest of origins, and proof that our tenth-century ancestors are not as remote as we might think.

This book aims to give any aspiring young chef the tools he or she needs to hone essential cooking skills, with 100 recipes inspired by dishes that the contestants served in the first five seasons, as well as timeless techniques, tips, and advice. With this book, anyone can become an excellent cook.

Teaching 20th-century European History

Do you want to achieve startup speed at enterprise scale? Growth. It's what every company strives for. But it's become more and more elusive as companies struggle to hit their projected growth rates in an increasingly competitive market. While zero-based budgeting (ZBB) has been wielded for decades to cut costs, it falls short when it comes to spurring growth. But a zero-based mindset (ZBx) does that and more. ZBx facilitates forensic oversight into resource allocation that funnels savings back into growth initiatives and encourages new sources of innovation. The Big Zero shows how a ZBx approach focuses on agility over austerity, visibility over guesswork and the future over the past to fuel growth and competitiveness.

Drawing the Curtain

An account of the American Expeditionary Force's attack and "an excellent guide to trace the locations of one of the last great battles of the Great War" (On the Old Barbed Wire). The St. Mihiel Offensive, which took place between the 12th and 16th September 1918, was the first full-scale attack that was under the direct command of the Americans, in the person of General J. Pershing. He combined his command of the First (at the time the only) American Army with that of Commander in Chief of the AEF, a tremendous burden. The American attack (with the assistance of a French Corps) was an outstanding success and the Germans were forced into a rapid withdrawal to the Michel Line, a strongly defended position that formed the Hindenburg Line in this area. On the other hand, the success was in part assisted by the fact that the Germans intended to withdraw from the exposed position of the Salient back to this line, the only question being the timing of such a move. Historians argue about whether the move had actually begun or not; but the reality is that senior German officers knew that it was imminent and certainly some heavier artillery had already been pulled back. It is probable that relatively easy success here led to overconfidence among some that the next offensive, the Meuse-Argonne—to the north and scheduled to begin on the 26th, would have a similar outcome. If so they were in for a rude awakening. This book is profusely illustrated with contemporary photographs and numerous maps, the narrative supplemented by a number of firsthand accounts; the whole is supported by several walking and car tours.

The Birth of the West

'Beyond the Canon' deals with recent politicized processes of canonization and its implications for historical culture in a globalizing and postcolonial world. The volume discusses the framing and transmission of historical knowledge and its consequences for the construction of narratives and the teaching of history in multicultural environments.

IB Sports, Exercise & Health Science Course Book

A blisteringly powerful classic war story from one of the Netherlands' greatest writers WITH AN AFTERWORD BY CEES NOOTEBOOM 'The Dutch have hailed him as their greatest novelist, and now, slowly, Europe is getting to know him' Milan Kundera, *Le Monde* 'Bleak, hilarious, angry, ruthless... Hermans is as alarming as a snake in the breadbin... hugely entertaining' Scotsman Towards the end of the Second World War, a weary partisan fighting with the Red Army in Germany comes across a grand, abandoned house, seemingly untouched by the devastation sweeping the country. Exhausted, he falls asleep in the living room, but wakes to find a German patrol marching up the garden path. His only hope is to pose as the house's owner, but how will he keep up the pretence when the real owner returns? Dazzling, dark and scorchingly violent, with the breakneck pace of a thriller, this timeless classic is a vivid depiction of what happens when the mask of decency is cast aside in the savagery of war. 'A literary tour de force' *Frankfurter Allgemeine Zeitung* 'A violent climax without equal in modern literature' Cees Nooteboom Willem Frederik Hermans (1921–1995) was one of the most prolific and versatile Dutch authors of the twentieth century. In 1977 he received the Dutch Literature Prize – the most prestigious literary prize in the Netherlands. He is considered one of the three most important authors in the Netherlands in the postwar period, along with Harry Mulisch and Gerard Reve.

A Latin Grammar for Schools and Colleges

This is a collection of eleven plays, written and devised by second and third year pupils using the Cambridge Latin Course. The language and background draw on Unit 1 of the Cambridge Latin Course, although students of other texts will be able to read and enjoy the collection. Unusual vocabulary

is explained and there is also a consolidated vocabulary that includes macrons for pronunciation guidance. The casts of the eleven plays call for four to twenty-three characters with speaking parts of various lengths. The book also presents a vivid picture of Pompeii's fiery end, referring not only to Pliny's ancient reports, but also to newspaper and artistic reports from more recent eruptions. This collection of playlets makes a stimulating supplement to beginners' courses, including, but certainly not limited to the Cambridge Latin Course. Pupils' amusement and involvement will help the teacher who finds the use of oral Latin increasingly helpful.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

The Big Zero

This book explains the dynamics behind the economic transformation from the colonial era to the post-independence period in Indonesia and Vietnam. It analyses the different Vietnamese and Indonesian government approaches to the economic legacies of colonialism remaining in these countries after independence. It also demonstrates that despite critical differences between the two nation-states, the Vietnamese and Indonesian leaderships were pursuing similar long-term goals: to create a truly independent national economy. The book discusses the way in which the Indonesian government established complete economic control, resembling the socialist transformation of North Vietnam in the 1950s, and the various means by which the government of South Vietnam concentrated economic power in its own hands during the late 1950s and early 1960s. It also explores how the Indonesian government was determined to remove the economic legacy of Dutch colonialism by placing the entire economy under strong state control and ownership in accordance with the spirit of Guided Democracy and Guided Economy in the late 1950s and the early 1960s. This book is a point of reference for students, researchers and academics interested in a comparative analysis of the economic systems implemented by the colonial and fascist powers in Indonesia and Vietnam.

Essential Cell Biology provides a readily accessible introduction to the central concepts of cell biology, and its lively, clear writing and exceptional illustrations make it the ideal textbook for a first course in both cell and molecular biology. The text and figures are easy-to-follow, accurate, clear, and engaging for the introductory student. Molecular detail has been kept to a minimum in order to provide the reader with a cohesive conceptual framework for the basic science that underlies our current understanding of all of biology, including the biomedical sciences. The Fourth Edition has been thoroughly revised, and covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. Essential Cell Biology, Fourth Edition is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery

of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. The St. Mihiel Offensive

Iran, 1969. In the house of the mosque, the family of Aqa Jaan has lived for eight centuries. The house teems with life, played out under the watchful eyes of the storks that nest on the minarets above. But this family will experience upheaval unknown to previous generations. For in Iran, political unrest is brewing. The shah is losing his hold on power; the ayatollah incites rebellion from his exile in France; and one day the ayatollah returns. The consequences will be felt in every corner of Aqa Jaan's family.

An Untouched House

This book gives an excellent overview of Flemish art from the Hermitage in St Petersburg. A large proportion was acquired in the eighteenth century by Catherine the Great, from superb collections such as those of Crozat and Brühl, which she bought up in their entirety. Many of these paintings originally hung in churches and monasteries in Antwerp and other European cities. Most attention focuses on the 'big three': Peter Paul Rubens, Anthony van Dyck and Jacob Jordaens. Rubens was the most important, the most talented, and the most influential seventeenth-century Flemish painter. He was also a phenomenon in his day, a true homo universalis. The portraits produced by Van Dyck for the court of King Charles I of England also share the limelight, along with impressive history paintings by Jordaens, exuding the vibrant atmosphere in which he excelled. Exhibition: De Nieuwe Kerk - Hermitage, Amsterdam, 17.9.2011 to 16.3.2012.
