The Rise of Global Powers

Does a system of great powers necessarily imply a struggle for world primacy? Do great states merely hold onto what is theirs, or do they reach for more? Anthony D'Agostino offers a fascinating new answer to these questions through a fundamental reassessment of the international history of the first half of the twentieth century. From the spatial limits of a purely European great power politics the book looks out to the new horizon of world politics. From the time limits of 1914 to 1945 it considers the interface with nineteenth-century imperialism at one end and the impact of the world wars on the Cold War at the other. This is a global retelling of the expansion of Europe coming up against its limits in the most violent conflicts and explosive social movements yet known to history, the two world wars, the Great Depression, and the Russian and Chinese revolutions.

The Rise And Fall of British Naval Mastery

Paul Kennedy's classic naval history, now updated with a new introduction by the author This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day. Challenging

the traditional view that the British are natural 'sons of the waves', he suggests instead that the country's fortunes as a significant maritime force have always been bound up with its economic growth. In doing so, he contributes significantly to the centuries-long debate between 'continental' and 'maritime' schools of strategy over Britain's policy in times of war. Setting British naval history within a framework of national, international, economic, political and strategic considerations, he offers a fresh approach to one of the central questions in British history. A new introduction extends his analysis into the twenty-first century and reflects on current American and Chinese ambitions for naval mastery. 'Excellent and stimulating' Correlli Barnett 'The first scholar to have set the sweep of British Naval history against the background of economic history' Michael Howard, Sunday Times 'By far the best study that has ever been done on the subject ... a sparkling and apt quotation on practically every page' Daniel A. Baugh, International History Review 'The best single-volume study of Britain and her naval past now available to us' Jon Sumida, Journal of Modern History

Accommodating Rising Powers

As the world enters the third decade of the twenty-first century, far-reaching changes are likely to occur. China, Russia, India, and Brazil, and perhaps others, are likely to emerge as contenders for global leadership roles. War as a system-changing mechanism is unimaginable, given that it would escalate into nuclear conflict and the destruction of the planet. It is therefore essential that policymakers in established as well as rising states devise strategies to allow transitions without resorting to war, but dominant theories of International Relations contend that major changes in the system are generally possible only through violent conflict. This volume asks whether peaceful accommodation of rising powers is possible in the changed international context, especially against the backdrop of intensified globalization. With the aid of historic cases, it argues that peaceful change is possible through effective long-term strategies on the part of both status quo and rising powers.

Tomorrow, the World

A new history explains how and why, as it prepared to enter World War II, the United States decided to lead the postwar world. For most of its history, the United States avoided making political and military commitments that would entangle it in European-style power politics. Then, suddenly, it conceived a new role for itself as the world's armed superpower—and never looked back. In *Tomorrow, the World*, Stephen Wertheim traces America's transformation to the crucible of World War II, especially in the months prior to the attack on Pearl Harbor. As the Nazis conquered France, the architects of the nation's new foreign policy came to believe that the United States ought to achieve primacy in international affairs forevermore. Scholars have struggled to explain the decision to pursue global supremacy. Some deny that American elites made a willing choice, casting the United States as a reluctant power that sloughed off "isolationism" only after all potential competitors lay in ruins. Others contend that the United States had always coveted global dominance and realized its ambition at the first opportunity. Both views are wrong. As late as 1940, the small coterie of officials and experts who composed the U.S. foreign policy class either wanted British preeminence in global affairs to continue or hoped that no power would dominate. The war, however, swept away their assumptions, leading them to conclude that the United States should extend its form of law and order across the globe and back it at gunpoint. Wertheim argues that no one favored "isolationism"—a term introduced by advocates of armed supremacy in order to turn their own cause into the definition of a new "internationalism." We now live, Wertheim warns, in the world that these men created. A sophisticated and impassioned narrative that questions the wisdom of U.S. supremacy, *Tomorrow, the World* reveals the intellectual path that brought us to today's global entanglements and endless wars.

Global Governance and the Emergence of Global Institutions for the 21st Century

Identifies the major weaknesses in the current United Nations system and proposes fundamental reforms to address each. This title is also available as Open Access.

Disorder

"Explains why we in the West, live in the political times we do; a moment of historical time arising from systemic dynamics that have wrought predicaments to confront and not problems to be solved. A retrospective and predictive account of the political shocks of 2016 and onwards, and how the specific consequences of the structural historical forces at work are ongoing and in good part inexorable. Argues

that these political times arise and disruption will continue from the intersection of fault lines generated by a geopolitical cycle that has been disrupted, but is not over"--Publisher's description.

Twilight of the Titans

In *Twilight of the Titans*, Paul K. MacDonald and Joseph M. Parent examine great power transitions since 1870 to determine how declining powers choose to behave, identifying the strong incentives to moderate their behavior when the hierarchy of great powers is shifting. Challenging the conventional wisdom that such transitions push declining great powers to extreme measures, this book argues that intimidation, provocation, and preventive war are not the only alternatives to the loss of relative power and prestige. Using numerous case studies, MacDonald and Parent show how declining states tend to behave, the policy options they have, how rising states respond to those in decline, and what conditions reward particular strategic choices.

International Relations Since 1945

International Relations since 1945 offers undergraduate students a comprehensive and accessible introduction to global political history since World War II. Clearly structured, and with a balance of description and analysis, the text is also supported by a range of helpful learning features and an accompanying website.

The Oxford Handbook of European History, 1914-1945

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis. Indeed in the early 1940s both Charles de Gaulle and Winston Churchill referred to a 'thirty years war'. Why did so many crises rage across the continent from 1914 until the end of the Second World War? Why did the winds of destruction affect some regions more than others? *The Oxford Handbook of European History, 1914-1945* reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations, and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

The New Atlantic Order

Sheds new light on a transformation process: the struggle to create a modern Atlantic order in the long twentieth century.

The Cambridge History of the Cold War

This volume examines the origins and early years of the Cold War in the first comprehensive historical reexamination of the period. A team of leading scholars shows how the conflict evolved from the geopolitical, ideological, economic and sociopolitical environments of the two world wars and interwar period.

Status in World Politics

A systematic study of why rising powers seek greater status in world politics and when dominant powers recognize their claims.

The Global Transformation

This book shows how the political, economic, military and cultural revolutions of the nineteenth century shaped modern international relations.

The Making of Global International Relations

Presents a challenge to international relations scholars to think globally, understanding the field's development in the Global South alongside the traditionally dominant Western approach.

Stalin's Gamble

Shedding light on the origins of the Second World War in Europe, *Stalin's Gamble* aims to create a historical narrative of the relations of the USSR with Britain, France, the United States, Poland, Germany, Italy, Czechoslovakia, and Romania during the 1930s. The book explores the Soviet Union's efforts to organize a defensive alliance against Nazi Germany, in effect rebuilding the anti-German Entente of the First World War. Drawing on extensive research in Soviet as well as Western archives, Michael Jabara Carley offers an in-depth account of the diplomatic manoeuvrings which surrounded the rise of Hitler and Soviet efforts to construct an alliance against future German aggression. Paying close attention to the beliefs and interactions of senior politicians and diplomats, the book seeks to replace one-sided Western histories with records from both sides. The book also offers an inside look at Soviet foreign policy making, with a focus on Stalin as a foreign policy maker as well as his interactions with his colleagues. Told in a fascinating narrative style, *Stalin's Gamble* attempts to see the European crisis of the 1930s through Soviet eyes.

Does America Need a Foreign Policy?

The former Secretary of State under Richard Nixon argues that a coherent foreign policy is essential and lays out his own plan for getting the nation's international affairs in order.

The Economics of World War I

This unique volume offers a definitive new history of European economies at war from 1914 to 1918. It studies how European economies mobilised for war, how existing economic institutions stood up under the strain, how economic development influenced outcomes and how wartime experience influenced post-war economic growth. Leading international experts provide the first systematic comparison of economies at war between 1914 and 1918 based on the best available data for Britain, Germany, France, Russia, the USA, Italy, Turkey, Austria-Hungary and the Netherlands. The editors' overview draws some stark lessons about the role of economic development, the importance of markets and the damage done by nationalism and protectionism. A companion volume to the acclaimed *The Economics of World War II*, this is a major contribution to our understanding of total war.

The Tragedy of Great Power Politics (Updated Edition)

"A superb book....Mearsheimer has made a significant contribution to our understanding of the behavior of great powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

Power, Order, and Change in World Politics

This volume brings together leading scholars to analyse the central issues of power, order, and change in world politics.

International History of the Twentieth Century

Using their thematic and regional expertise, four prominent authors have produced an authoritative yet accessible account of the history of international relations in the last century, covering events in Europe, Asia, the Middle East, Africa and the Americas.

The Ashgate Research Companion to War

This Companion brings together 29 essays from leading theorists and historians on the origins of wars, their immediate causes and consequences and the mechanisms leading to the breakdown of peaceful relations. The essays are arranged thematically in four parts and include analysis of significant

conflicts and consideration of long term, systemic conflicts and highlight the need for interdisciplinary approaches to the study of war as a global phenomenon.

Theory of International Politics

Forfatterens mål med denne bog er: 1) Analyse af de gældende teorier for international politik og hvad der heri er lagt størst vægt på. 2) Konstruktion af en teori for international politik som kan kan råde bod på de mangler, der er i de nu gældende. 3) Afprøvning af den rekonstruerede teori på faktiske hændelsesforløb.

Global Trends 2040

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come."
-Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Regions and Powers

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.

No One's World

Argues that as China, India, Brazil and other emerging powers rise, the founding ideals of the West will not continue to spread, and that in the near future, Europe and the United States will need to fashion a new consensus with these powers on issues of legitimacy, sovereignty and governance.

Emerging Powers in a Comparative Perspective

The book examines the rising influence of emerging powers in global politics, with a special focus on the BRIC countries (Brazil, Russia, India, China). Chapters contributed by international scholars first look at the changing status of the US in the 21st century and at the EU as both an emerging and innovative power. China's rising power status, India's regional and global influence, Russia's re-emergence, and Brazil's growing regional and international role are then analyzed comparatively to explain how the BRIC states are poised to become vital players not only in politics and economy, but also in key international concerns such as terrorism, globalization, and climate change. The book provides a detailed analysis of political, economic, security, and foreign policy trends in the BRIC countries to address such questions as to whether they will seek to revise the international order or work within it and how they will deal with transnational global problems. Using a unique comparative approach, the text will appeal to undergraduate students in world politics, international relations, and foreign policy.

Empires in World History

Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries.

Decolonization, Self-Determination, and the Rise of Global Human Rights Politics

Leading scholars demonstrate how colonial subjects, national liberation movements, and empires mobilized human rights language to contest self-determination during decolonization.

The Globalization of World Politics

The Globalization of World Politics, the bestselling introduction to international relations, offers the most comprehensive coverage of the key theories and global issues in world politics. The eighth edition engages with contemporary global challenges, featuring a brand new chapter on Refugees and Forced Migration and updated coverage of decolonization to ensure the book continues to cover those topics that will define the key issues in IR into the future. Tailored pedagogical features help readers to evaluate key IR debates and apply theory and concepts to real world events. A fully updated Opposing Opinions feature facilitates critical and reflective debate on contemporary policy challenges, from decolonising universities to debates over migration and the state. Leading scholars in the field introduce readers to the history, theory, structures and key issues in IR, providing students with an ideal introduction and a constant guide throughout their studies. Students and lecturers are further supported by extensive online resources to encourage deeper engagement with content: Student resources: International relations simulations encourage students to develop negotiation and problem solving skills by engaging with topical events and processes IR theory in practice case studies encourage students to apply theories to current and evolving global events Video podcasts from contributors help students to engage with key issues and cases in IR Guidance on how to evaluate the Opposing Opinions feature, supporting students to engage in nuanced debate over key policy challenges Interactive library of links to journal articles, blogs and video content to deepen students' understanding of key topics and explore their research interests Flashcard glossary to reinforce understanding of key terms Multiple choice questions for self-study help students to reinforce their understanding of the key points of each chapter Revision guide to consolidate understanding and revise key terms and themes Instructor Resources: Case studies help to contextualise and deepen theoretical understanding Test bank - fully customisable assessment questions to test and reinforce students' understanding of key concepts Question bank - a bank of short answer and essay questions to promote students' critical reflection on core issues and themes within each chapter Customisable PowerPoint slides help to support effective teaching preparation Figures and tables from the book allow clear presentation of key data and support students' data analysis

The Rise and Fall of the Great Powers

WINNER OF THE WOLFSON HISTORY PRIZE Paul Kennedy's international bestseller is a sweeping account of five hundred years of fluctuating economic muscle and military might.

Empires, Systems and States

This volume brings together a collection of leading scholars to consider various dimensions of the 'turn' to history in International Relations. The scope of this volume is broad. It includes conventional accounts of the development of the European states system, but is not limited by it. Other essays consider the non-European experience; a number of path-breaking essays on how other cultures and continents have ordered their political communities, in particular, the question how and why a states system triumphed over other forms of political organisation. The theme of the subtitle - great transformations - is pursued by each author. The essays consider one of the biggest questions of our time, namely, how did we arrive at this historical and institutional expression of political community? And what alternative future world orders exist? The volume will be of interest to scholars of International Relations and History interested in great transformations in world politics.

Shifting Global Powers and International Law

This book explores the impacts of global economic, political and cultural shifts on various international legal frameworks and legal norms. The economic growth of states throughout Asia, South and Central America and Africa is having a profound effect on the dynamics of international relations, with a resulting impact on the operation and development of international law. This book examines the

influence of emerging economies on international legal rules, institutions and processes. It describes recent and predicted changes in economic, political and cultural powers, flowing from the growth of emerging economies such as China, India, Brazil, South Africa and Russia, and analyses the influence of these changes on various legal frameworks and norms. Expert contributors drawn from a variety of fields, including international law, politics, environmental law, human rights, economics and finance, provide a broad analysis of the nature of the shifting global dynamic in its historical and contemporary contexts, and a range of perspectives on the impact of these changes as they relate to specific regimes and issues, including climate change regulation, collective security, indigenous rights, the rights of women and girls, environmental protection and foreign aid and development. The book provides a fresh and comprehensive analysis of an issue with extensive implications for international law and politics. *Shifting Global Powers and International Law* will be of interest to students and scholars of international relations; international law; international political economy, human rights; and development.

The Inter-War Crisis

The Inter-War Crisis is a concise yet analytical overview of the rapidly-changing world between 1918 and 1939, covering the political, economic and social instability that resulted from the First World War and the eventual descent towards the fresh upheaval of the Second World War. Revised throughout and containing a new range of illustrations, this third edition covers topics such as the Russian Revolution, the Wall Street Crash of 1929, the concepts of the 'end of civilization' and the decline of the West, cultural and scientific responses to an age of anxiety and fear, and the ways in which dictatorship came to replace democracy across so much of Europe. Global in focus, it offers thematic discussions, close analysis of a range of case studies and a clear over-arching narrative structure that guides the reader from the close of one war to the beginning of the next. Also including a selection of over thirty primary source documents, maps, a chronology of events, a glossary of key terms, a Who's Who of important figures and an extensive and updated guide to further reading, this book is an essential introduction for students of the inter-war period.

Soft Power

This book explores the phenomenon of soft power in international relations. In the context of current discourses on power and global power shifts, it puts forward a comprehensive taxonomy of soft power and outlines a methodological roadmap for its empirical study. To that end, the book classifies soft power into distinct components - resources, instruments, reception, and outcomes - and identifies relevant indicators for each of these categories. Moreover, the book integrates previously neglected aspects into the concept of soft power, including the significance of (political) personalities. A broad range of historical examples is drawn upon to illustrate the effects of soft power in international relations in an innovative and analytically differentiated way. A central methodological contribution of this book consists in highlighting the value of comparative-historical analysis (CHA) as a promising approach for empirical analyses of the soft power of different actors on the international stage. By introducing a comprehensive taxonomy of soft power, the book offers an innovative and substantiated perspective on a pivotal phenomenon in today's international relations. As the forces of attraction in world politics continue to gain in importance, it provides a valuable asset for a broad readership. This book was the winner of the 2021 ifa (German Institute for Foreign Cultural Relations) Research Award on Foreign Cultural Policy. "In this important and thoughtful book, Hendrik Ohnesorge explains and advances our knowledge of the ways that soft power, public diplomacy, and charismatic personal diplomacy are shaping the international relations of our global information age." Joseph S. Nye, Jr., Harvard University and author of *The Future of Power*

After the Great War

At the Paris Peace Conference of 1919, the international community came together to find a way forward in the aftermath of the First World War. The conference is often judged a failure, as the resulting Treaty of Versailles did not bring long-term peace with Germany. By following the activities of British delegate and wartime Minister of Blockade Lord Robert Cecil, this book examines the struggles and successes of the conference, as delegates from around the world grappled with the economic, political and humanitarian catastrophes overwhelming Europe in 1919. *After the Great War* describes, for the first time, the significant role of economic warfare at the Peace Conference and in the post-war settlement. Lord Cecil's sometimes difficult partnership with US President Woodrow Wilson forged a new, permanent, international diplomatic organization – the League of Nations – and supplied it with

the power to create collective blockades against aggressive states. Leaders of the Allied economic war before the Armistice became, in Paris, leaders of humanitarian-minded international outreach to their former enemies in Germany and Austria. After the Great War promotes a new understanding of these underappreciated internationalists in Paris, many of whom transitioned into leading the League of Nations even before the Peace Conference ended. Often derided as an idealistic fantasy, international peace enforced by economic sanctions appeared a realistic possibility when the Treaty was signed at the end of June 1919.

The Arab Winter

The Arab Spring promised to end dictatorship and bring self-government to people across the Middle East. Yet everywhere except Tunisia it led to either renewed dictatorship, civil war, extremist terror, or all three. In *The Arab Winter*, Noah Feldman argues that the Arab Spring was nevertheless not an unmitigated failure, much less an inevitable one. Rather, it was a noble, tragic series of events in which, for the first time in recent Middle Eastern history, Arabic-speaking peoples took free, collective political action as they sought to achieve self-determination.

Cold War

The decades-long Cold War was more than a bipolar conflict between two Superpowers—it had implications for the entire world. In this accessible, comprehensive retelling, Carole K. Fink provides new insights and perspectives on key events with an emphasis on people, power, and ideas. *Cold War* goes beyond US-USSR relations to explore the Cold War from an international perspective, including developments in Africa, Asia, and Latin America. Fink also offers a broader time line of the Cold War than any other text, charting the lead-up to the conflict from the Russian Revolution to World War II and discussing the aftermath of the Cold War up to the present day. The second edition reflects the latest research and scholarship and offers additional information about the post-Cold War period, including the "new Cold War" with Russia. For today's students and history buffs, *Cold War* is the consummate book on this complex conflict.

International Order

Where does international order come from? How is it established and maintained? Why does it break down? With every sovereign state its own master, how can order prevail? Answering these questions in a briskly paced, systematic survey, Stephen Kocs explores the rise and fall of successive international systems across the centuries - from the dynastic institutions of Renaissance Europe, to the power-politics systems of eighteenth- and nineteenth-century Europe, to the liberal international systems of the contemporary world.

Introduction to World War II

World War II began on September 1, 1939, with Germany invading Poland. This marked the beginning of a global conflict that lasted six long years, and involved the majority of the world's nations. The war ended on September 2, 1945, when Japan formally surrendered after atomic bombs were dropped on their cities of Hiroshima and Nagasaki. However, the war had already taken a huge toll on the world, with more than 60 million people having lost their lives, making it the deadliest conflict in human history. The root causes of World War II can be traced back to the Treaty of Versailles, which ended World War I. The treaty had placed severe sanctions on Germany, such as huge war reparations and loss of territory, which led to an economic depression in the country. In addition, the rise of dictatorial regimes in countries such as Japan and Italy, as well as the militarization and aggression of Nazi Germany, created tensions that eventually erupted into war. The war had far-reaching consequences on the world, including the establishment of the United Nations and the emergence of the United States and the Soviet Union as superpowers.
