Leisure Activities in the Outdoors

The benefits of being outdoors in a leisure context are widely acknowledged across a range of disciplinary perspectives (including tourism, therapeutics, education and recreation). These benefits include the development of: health and wellbeing; social skills; leadership and facilitation skills; personal, emotional and reflective abilities; confidence and identity creation. Drawing on a variety of perspectives, geographies and approaches, this book explores the opportunities that leisure in the outdoors provides for learning, developing and challenging. The authors in this collection challenge dominant discourses of outdoor leisure through their selection of outdoor activities, theoretical approaches and modes of representation. All offer fresh insights and thinking into how leisure in the outdoors can be understood. The book covers a range of outdoor conceptualisations that challenge the reader to think deeply and broadly about the common threads which bind the broad field of outdoor leisure together. The experiences explored in this book range from suburban outdoors to wild places, surfing to mindful reflection, and trail walking to Nordic skiing, and encompass a broad spectrum of people.

The Palgrave International Handbook of Women and Outdoor Learning

This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments (OLEs). Women choose to participate actively in outdoors careers, many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities. They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive, rewarding excellence regardless of age, gender, socioeconomic status, disability, or ethnicity. However, both research and

collective experiences in OLEs suggest that many women feel invisible, relegated, marginalized, and undervalued. In response to this marginalization, this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs. Women scholars and practitioners from numerous fields, such as experiential outdoor education, adventure education, adventure therapy, and gender studies, explore the implications of their research and practice using poignant examples within their own disciplines. These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present. Social inequalities still abound in OLEs, and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive. Global in perspective and capacious in content, this one-stop volume is an indispensable reference resource for a diverse range of academics, including students and researchers in the fields of education, psychology, sociology, gender studies, geography, and environment studies, as well as the many outdoors fields.
