Encyclopedia of an Ordinary Life

A memoir in bite-size chunks from the author of the viral Modern Love column "You May Want to Marry My Husband." "[Rosenthal] shines her generous light of humanity on the seemingly humdrum moments

of life and shows how delightfully precious they actually are.” —The Chicago Sun-Times How do you conjure a life? Give the truest account of what you saw, felt, learned, loved, strived for? For Amy Krouse Rosenthal, the surprising answer came in the form of an encyclopedia. In *Encyclopedia of an Ordinary Life* she has ingeniously adapted this centuries-old format for conveying knowledge into a poignant, wise, often funny, fully realized memoir. Using mostly short entries organized from A to Z, many of which are cross-referenced, Rosenthal captures in wonderful and episodic detail the moments, observations, and emotions that comprise a contemporary life. Start anywhere—preferably at the beginning—and see how one young woman’s alphabetized existence can open up and define the world in new and unexpected ways. An ordinary life, perhaps, but an extraordinary book.

The Body on the Beam

Suicide - or murder? The tiniest clue holds the answer. Classic crime from one of the greats of the *Detection Club* When Florence Penny’s body is found hanging from a beam in the bedsit she has been renting, it looks to Inspector Field like a case of suicide. Soon, though, he realises murder is the motive, and the discovery of a single pink bead among the disordered bedclothes leads him to prime suspect Charles Hobart. It’s now up to Scott Egerton, Hobart’s prospective brother-in-law, and an astute private inquiry agent named Gordon to establish Hobart’s innocence . . .

Handbook of Loss Prevention Engineering

Loss prevention engineering describes all activities intended to help organizations in any industry to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

When blacksmith Pierre Michaux affixed pedals to the front axle of a two-wheeled scooter with a seat, he helped kick off a craze known as velocipedomania, which swept France in the late 1860s. The immediate forerunner of the bicycle, the velocipede similarly reflected changing cultural attitudes and challenged gender norms. Velocipedomania is the first in-depth study of the velocipede fad and the popular culture it inspired. It explores how the device was hailed as a symbol of France's cutting-edge technological advancements, yet also marketed as an invention with a noble pedigree, born from the nation's cultural and literary heritage. Giving readers a window into the material culture and enthusiasms of Second Empire France, it provides the first English translations of 1869's Manual of the Velocipede, 1868's Note on Monsieur Michaux's Velocipede, and the 1869 operetta Dagobert and his Velocipede. It also reprints scores of rare images from newspapers and advertisements, analyzing how these magnificent machines captured the era's visual imagination. By looking at how it influenced French attitudes towards politics, national identity, technology, fashion, fitness, and gender roles, this book shows how the short-lived craze of velocipedomania had a big impact.

Body Piercing Saved My Life is the first in-depth journalistic investigation into a subculture so large that it's erroneous to even call it a subculture: Christian rock. Christian rock culture is booming, not only with bands but with extreme teen Bibles, skateboarding ministries, Christian tattoo parlors, paintball parks, coffeehouses, and nightclubs, encouraging kids to form their own communities apart from the mainstream. Profiling such successful Christian rock bands as P.O.D., Switchfoot, Creed, Evanescence, and Sixpence None the Richer, as well as the phenomenally successful Seattle Christian record label Tooth & Nail, enormous Christian rock festivals, and more, Spin journalist Andrew Beaujon lifts the veil on a thriving scene that operates beneath the secular world's radar. Revealing, sympathetic, and groundbreaking, Body Piercing Saved My Life (named for a popular Christian rock T-shirt depicting Christ's wounds) is a fascinating look into the hearts and minds of an enormous, and growing, youth culture.

Body Piercing Saved My Life

For the first thirteen years of her life, Flor Edwards grew up in the Children of God. The group's nomadic existence was based on the belief that, as God's chosen people, they would be saved in the impending apocalypse that would envelop the rest of the world in 1993. Flor would be thirteen years old. The group's charismatic leader, Father David, kept the family on the move, from Los Angeles to Bangkok to Chicago, where they would eventually disband, leaving Flor to make sense of the foreign world of mainstream society around her. *Apocalypse Child* is a cathartic journey through Flor's memories of growing up within a group with unconventional views on education, religion, and sex. Whimsically referring to herself as a real life Kimmy Schmidt, Edwards's clear-eyed memoir is a story of survival in a childhood lived on the fringes.

New York Times Saturday Review of Books and Art

A stunning new book about the role of animals in our lives, by a popular and acclaimed writer. From the time she is nine years old, biking to the farmland outside her suburban home, where she discovers a disquieting world of sleeping cows and a "Private Way" full of the wondrous and creepy creatures of the wild—spiders, deer, moles, chipmunks, and foxes—Lauren Slater finds in animals a refuge from her troubled life. As she matures, her attraction to animals strengthens and grows more complex and compelling even as her family is falling to pieces around her. Slater spends a summer at horse camp, where she witnesses the alternating horrific and loving behavior of her instructor toward the animals in her charge and comes to question the bond that so often develops between females and their equines. Slater's questions follow her to a foster family, her own parents no longer able to care for her. A pet raccoon, rescued from a hole in the wall, teaches her how to feel at home away from home. The two Shiba Inu puppies Slater adopts years later, against her husband's will, grow increasingly important to her as she ages and her family begins to grow. Slater's husband is a born skeptic and possesses a sternly scientific view of animals as unconscious, primitive creatures, one who insists "that an animal's worth is roughly equivalent to its edibility." As one of her dogs, Lila, goes blind and the medical bills and monthly expenses begin to pour in, he calculates the financial burden of their canine family member and finds that Lila has cost them about \$60,000, not to mention the approximately 400 pounds of feces she has deposited in their yard. But when Benjamin begins to suffer from chronic pain, Lauren is convinced it is Lila's resilience and the dog's quick adaptation to her blindness that draws her husband out of his own misery and motivates him to try to adjust to his situation. Ben never becomes a true believer or a die-hard animal lover, but his story and the stories Lauren tells of her own bond with animals convince her that our connections with the furry, the four-legged, the exoskeleton-ed, or the winged may be just as priceless as our human relationships. *The \$60,000 Dog* is Lauren Slater's intimate manifesto on the unique, invaluable, and often essential contributions animals make to our lives. As a psychologist, a reporter, an amateur naturalist, and above all an enormously gifted writer, she draws us into the stories of her passion for animals that are so much more than pets. She describes her intense love for the animals in her life without apology and argues, finally, that the works of Darwin and other evolutionary biologists prove that, when it comes to worth, animals are equal, and in some senses even superior, to human beings.

Steven Patrick Morrissey is one of the most original and controversial voices in the history of popular music. With The Smiths, he led the most influential British guitar group of the 1980s, his enigmatic wit and style defining a generation. As a solo artist, he has continued to broach subjects no other singer would dare. Worshipped by some, vilified by others, Morrissey is a unique rock and roll creation. The 300,000 words of *Mozipedia* make this the most intimate and in-depth biographical portrait of the man and his music yet. Bringing together every song, album, collaborator, key location, every hero, book, film and record to have influenced his art, it is the summation of years of meticulous research. Morrissey authority Simon Goddard has interviewed almost everybody of any importance, making *Mozipedia* the last word on Morrissey and The Smiths.

In chronicling the physical and spiritual steps she took to reclaim her life and peel away the layers of damage done by incest, Jenson has written a powerful narrative of one person's healing journey. And though the subject matter is deeply serious, Jenson writes with her sense of humor firmly intact, reminding us that joy is possible in the face of great pain. Poignant, brave, and helpful, *Healing My Life* offers a much-needed testimony for anyone affected by or concerned about childhood sexual abuse. "Healing My Life is a story that is unique and personal in its detail, yet also universal and human in its impact. If we could raise even one generation without violence or shaming, we have no idea what might be possible." —Gloria Steinem "What an accomplishment! Taking the raw pain of incest, Donna Jenson has offered the world a generous dose of hope and delivered a clear message to survivors: healing is possible. Everyone who has survived childhood sexual abuse is stronger knowing each other's journey. By eloquently sharing hers, Donna reminds us of a simple truth: we can heal." —Marilyn Vanderbur, Miss America 1958 who survived incest

The \$60,000 Dog

Wyatt Earp, Billy the Kid, Doc Holliday—such are the legendary names that spring to mind when we think of the western gunfighter. But in the American West of the late nineteenth and early twentieth centuries, thousands of grassroots gunfighters straddled both sides of the law without hesitation. *Deadly Dozen* tells the story of twelve infamous gunfighters, feared in their own times but almost forgotten today. Now, noted historian Robert K. DeArment has compiled the stories of these obscure men. DeArment, a life-long student of law and lawlessness in the West, has combed court records, frontier newspapers, and other references to craft twelve complete biographical portraits. The combined stories of *Deadly Dozen* offer an intensive look into the lives of imposing figures who in their own ways shaped the legendary Old West. More than a collective biography of dangerous gunfighters, *Deadly Dozen* also functions as a social history of the gunfighter culture of the post-Civil War frontier West. As Walter Noble Burns did for Billy the Kid in 1926 and Stuart N. Lake for Wyatt Earp in 1931, DeArment—himself a talented writer—brings these figures from the Old West to life. John Bull, Pat Desmond, Mart Duggan, Milt Yarberry, Dan Tucker, George Goodell, Bill Standifer, Charley Perry, Barney Riggs, Dan Bogan, Dave Kemp, and Jeff Kidder are the twelve dangerous men that Robert K. DeArment studies in *Deadly Dozen: Twelve Forgotten Gunfighters of the Old West*.

This "visually arresting" photography book collects and organizes images from the natural and built world according to the spectrum of colors in a rainbow (Country Living).
