Benjamin Lax - Interviews on a Life in Physics at MIT

This book covers the life and 60-year career of Prof. Benjamin Lax (1915-2015), a preeminent physicist at the Massachusetts Institute of Technology (MIT), who played major roles in the development and applications of solid state and plasma physics. In an extensive series of autobiographical interviews, Lax describes the challenges he overcame, the opportunities he embraced, and the many outstanding research physicists he recruited, mentored, and interacted with. He includes both personal and professional reminiscences. Lax begins with his earliest memories of his childhood in Hungary. He recalls the immigration of his family to America and his education in New York City. He describes his Army service as a Radar Officer at the MIT Radiation Laboratory during World War II. He covers his graduate education in physics at MIT, and his building up the semiconductor and ferrite research groups at MIT Lincoln Laboratory in the 1950s. He describes the origins and accomplishments of the MIT Francis Bitter National Magnet Laboratory, of which he was the founding Director, and recalls his tenure as professor in the MIT physics department. Features: Provides a valuable insight into a 60-year career in physics at one of the world's major research universities, the Massachusetts Institute of Technology Explores the organization, funding, and conduct of solid state physics research in the second half of the twentieth century Includes a complete bibliography of Lax's publications in an online supplement

This is a book of amazing stories from the childhood and early youth of a Greek boy during WW II, the Nazi occupation and the civil war. It is the odyssey of a boy who played games and performed with excellence, eventually coming to America on an MIT scholarship. Again he had to struggle to make

ends meet. His stories as a steel worker and foreign student at MIT are unique and memorable. He describes the goodness of some Americans and the prejudice and profligacy of others with poetic vibrancy. The author says that freedom to be and do whatever he was able to become and achieve was a key reason for becoming a citizen and starting a family here. The book ends with a love story and a retrospective of more than 50 years of family life as a productive American citizen, with three happily married sons, all with doctorates, and seven grandchildren. One can learn a lot about a family that takes good performance seriously.

Yojana July 2021 (Hindi)

Drawing on decades of research, Karabel shines a light on the ever-changing definition of "merit" in college admissions, showing how it shaped--and was shaped by--the country at large.

Yojana August 2021 (Hindi)

Taking a brief from Bill Shakespeare, the Author traces his life from Rochester, NY to Cornell to New York City and to the world, beginning as an infant and progressing to a schoolboy, a lover and womanizer, an attorney, a business C.E.O. and entrepreneur and the author of a dozen books. With stops along the way as a folk-song promoter, a popular song lyricist, a matchmaker, a political activist, etc. Not all in a straight line; successes and flops included. However, all with an upbeat philosophy, eternal optimism and an ever available sense of humor, which shows in his lively writing style.

Home Schooling... A Pathway to Success

All immigrants to America have a story with the American Dream, a story sometimes intimately intertwined with personal dreams. My story might be a surprising, if not maybe an unexpected one diverging from the usual account of pitiful existence in Haiti's slums or that of struggle for adaptation to America's way of life by one of Haiti's "boat people" who landed on South Florida's coast. It is a story that starts from the lower plains of the Artibonite Valley in Haiti with a dream from my great grandfather, Joizil Estimé, and continues in the United States, ultimately in Powell, Ohio. It is the story of a Haitian immigrant born in the small coastal town of Saint-Marc, Haiti. It evolves with my experiences growing up in my native country where my formative years were influenced by a connection to a diverse sociocultural environment. It progresses with my interaction with other societal enclaves in foreign lands like Germany and ultimately in the United States. It is an account of dreams fulfilled or unfulfilled, due not only to factors such as the convergence of different motivational agents (dreambuilders), the winds blowing on corporate America, whether in Haiti or the United States, but also to different conditions such as country of origin, globalization, social class, and Afro-ethnicity in America (dreamkillers). It is the story of coping with life changes, of integration into the American mainstream, of successes and disappointments of an immigrant from Haiti. But it is more than the story of an immigrant; it also reflects in a way the struggle of all immigrants coping with the pursuit of the American Dream and the quest for adaptation and continuous learning. It relates to all those who have wrestled with their dreams, those who have learned to make the best out of life's circumstances and keep a positive outlook in the era we live in. Dreambuilders, dreamkillers are in all walks of life.

In his new book, Don't Coast, Kishore Borra takes us on a growth journey. He highlights that personal and professional growth doesn't happen on its own, and no one improves by simply living or coasting. He explains how he made growth as the number one priority in his life and how his willingness to grow has continuously opened up a lot of doors in his life. He says that growth happens daily but not in a day and all changes appear hard in the beginning; messy in the middle and gorgeous at the end. According to Kishore "You don't go into an opportunity; you grow into an opportunity," and "You don't get lucky; you make yourself lucky." This book is a blueprint for your growth. Along the way, Kishore discusses 4P's, which are essential for your personal and professional growth. All the concepts explained in this book are like cookies in the lower shelf, very easy for anyone to reach and collect. So go for it!! Don't Coast is a must-read for anyone who doesn't want to accept life rather want to create and lead life intentionally. Read Don't Coast and get ready to spread your wings and soar absolutely and emphatically in the months and years to come.

Mass Collaboration and Education

April 12, 2011 is the 50th anniversary of Yuri Gagarin's pioneering journey into space. To commemorate this momentous achievement, Springer-Praxis is producing a mini series of books that reveals how humanity's knowledge of flying, working, and living in space has grown in the last half century. "Tragedy and Triumph" focuses on the 1980s and early 1990s, a time when relations between the United States and the Soviet Union swung like a pendulum between harmony and outright hostility. The glorious achievements of the shuttle were violently arrested by the devastating loss of Challenger in 1986, while the Soviet program appeared to prosper with the last Salyut and the next-generation Mir orbital station. This book explores the continued rivalry between the two superpowers during this period, with each attempting to outdo the other – the Americans keen to build a space station, the Soviets keen to build a space shuttle – and places their efforts in the context of a bitterly divisive decade, which ultimately led them into partnership.

The paper reviews important empirical evidence that has inspired alternative modeling approaches, as well as theoretical and policy considerations behind developments in the field. The paper presents an empirical study of fiscal policy in countries with extreme monetary regimes. It also examines members of multilateral currency unions, dollarized countries that officially use the money of another country, and countries using currency boards.

Hailed as the Thomas Edison and Henry Ford of Silicon Valley, Robert Noyce was a brilliant inventor, a leading entrepreneur, and a daring risk taker who piloted his own jets and skied mountains accessible only by helicopter. Now, in *The Man Behind the Microchip*, Leslie Berlin captures not only this colorful individual but also the vibrant interplay of technology, business, money, politics, and culture that defines Silicon Valley. Here is the life of a high-tech industry giant. The co-founder of Fairchild Semiconductor and Intel, Noyce co-invented the integrated circuit, the electronic heart of every modern computer, automobile, cellular telephone, advanced weapon, and video game. With access to never-before-seen documents, Berlin paints a fascinating portrait of Noyce: an ambitious and intensely competitive multimillionaire who exuded a "just folks" sort of charm, a Midwestern preacher's son who rejected organized religion but would counsel his employees to "go off and do something wonderful," a man who never looked back and sometimes paid a price for it. In addition, this vivid narrative sheds light on Noyce's friends and associates, including some of the best-known managers, venture capitalists, and creative minds in Silicon Valley. Berlin draws upon interviews with dozens of key players in modern American business—including Andy Grove, Steve Jobs, Gordon Moore, and Warren Buffett; their recollections of Noyce give readers a privileged, first-hand look inside the dynamic world of high-tech entrepreneurship. A modern American success story, *The Man Behind the Microchip* illuminates the triumphs and setbacks of one of the most important inventors and entrepreneurs of our time.

Offers librarians an authoritative overview of the full spectrum of significant issues and controversies related to open scholarship in a candid and fair-minded manner. There has long been a debate about openness in scholarship, and even the term itself continues to be debated. Openness is a complex and multidimensional concept, and its nature in scholarship continually evolves. One of the hindrances to the transition to greater openness in academia is this lack of clear understanding about how it fits into the practice of scholarly communication. To ensure that librarians as knowledge managers can

better educate scholars about the benefits and challenges of open scholarship, Victoria Martin's *The Complete Guide to Open Scholarship* brings clarity to the concept of openness, tests assumptions concerning it, and strikes the right balance between breaking down complex ideas into simpler ones and honoring the reader's intelligence and previous knowledge of the subject. Readers will learn the history of openness in scholarship as well as several ways in which openness can be perceived. Drawing on specific examples, Martin discusses the most prominent scholarly models based on openness, barriers to openness, concerns about openness in scholarship, and the future of open scholarship.

The Rise of the Setting Sun

This book is nothing but the candid story of an ordinary engineering student. The central character of the book is named Animesh who is frustrated due to imposition of wrong vocation of Civil Engineering on him by the family members and the main person behind this imposition is his cousin brother who was a diploma engineer. The book talks of struggle, tears, labour, emotion, stress and lastly joy of Animesh. Animesh got married at an early with his girl friend Ashmita who was in her teen till then. After completion of graduation in engineering Animesh opted for post graduation in Hydraulics, though he wanted to pursue it in Environmental Engineering. The whole text talks of the love and obsession for chemistry by Animesh. He was a scholar who was wrongly placed in a wrong vocation. The book

talks of the childhood, boyhood, student hood and manhood of Animesh. It is shown that in all the critical junctures of his life Animesh didn't compromise with his choice and ethics. His fight with morbid melancholy and depression is written in a very simple language. It is highlighted in the book that a person can be truly successful if he gets his true vocation. In student hood Animesh committed mistake due to his immaturity but as a post graduate engineer he didn't compromise with his inner voice and he had only choice which is none else than teaching profession. There is a misconception that money makes one happy, but that wrong thought is replaced by the thought and logic which says a person can be only happy if he gets his preferred profession. The key to happiness depends upon two things, one is the profession and second is the relation of one with his/her spouse. Asmita the wife of Animesh had to struggle enormously for the stubborn nature of Animesh. The whole text is divided into one hundred and eleven chapters and various incidents are portrayed in very lucid English so that readers from all walks of life can enjoy the text. This book has the potential to transform a person who is confused or misguided about his line of study or choice of profession. The mission of the author is to show the correct path to the generations to come and awaken the dormant talent within a person which is in deep slumber due to wrong guidance and lack of counselling.
