Radiant Reflections : Value Education - Book 4

S Chand's Value Education Series. This is another small steps, after the introductory volume. It aims at developing the right values among children.

Living With Values Book 4

One of the fundamental goals of education is to impart culture and values across the generations. Value education, is generally understood to cut across the curriculum and is appropriately integrated into all courses as well as into the extracurricular activities and ethos of schools. Today, the true challenge of value education remains the development of a universal conscience that puts human rights, pluralist democracy and the equality of all human beings as the most important values that we may share. The book describes the need and importance of value education and education for human rights in the existing social scenario. It will be of interest to teacher, teacher educators and parents and will be appreciated by all who are concerned with the cause of value education.

Value Education And Education For Human Rights

Study conducted in selected senior secondary level schools in Delhi, India.

Value Education

Life With Values Class 4

The Essence of Life is a life skills and value education series for classes 1 to 10. The aim of this series is to enable the children to develop good habits and mindset as they become a part of society. It is essential to plant the values of love, kindness, compassion gratitude, etc. in the learners at a young age so that they evolve to become responsible citizens. Further, values like hard work, self-management, perseverance, teamwork and punctuality help the learners achieve their goals in life. This series includes the latest features emphasised by the National Education Policy 2020 and encompasses the values incorporated in it. This book will prove to be a practical guide for children that will enhance their decision-making abilities. They will be able to distinguish between the good and the bad, the right and the wrong. The chapters include inspirational stories of people that have excelled in their respective fields. Students look up to such people and will be able to relate with their life experiences. Consequentially, they will be able to learn and adapt the values and life skills from their journeys. Books from classes 6 to 10 include posters at the end. These posters can be pasted, framed and displayed by the students in places like their study table, or bedroom where they can see them and imbibe positive thoughts. Suggestions for parents can be accessed by scanning the QR code at the back of the book. These suggestions include activities which the parents can take up by themselves to introduce these values to the children. This will allow parents to play an active part in cultivating the values covered in the book. These suggestions are not exhaustive and offer the parents flexibility to devise their own ways to cultivate the right values. The primary aim of this series is to impart the values and life skills that are crucial in the contemporary world. We are sure that this series will play a significant role in shaping the learners' conscience and making them better human beings Publishers

Human Values in Education

Throughout human life, there is a continuity of running behind different needs which may or may not be satisfied. At the same time, due to rapid and unexpected changes in the society and environment, human personality and the behavior are being affected. Living in a society, to lead a healthy and successful life, there is a need to compromise and build a harmonious relationship with the society and environment. And this compromise between the needs of the individual and the demands of the community in which one lives is termed as "Adjustment" by many psychologists. The concept of "Adjustment" was first given by Darwin, who used it as an adaptation to survive in the physical world. Adjustment is an essential factor in the life of human, which is a continuous process and ends with life.

Value Education

A relevant book that breaks many new grounds in the area of Value Education and deals with the problem of distortion of values in-depth from the perspective of the people at large.

Life With Values 8

"Value-Based-Education is highly needed in our modern society because our lives have become more miserable. The quantity of education has considerably increased, but the quality has decreased. Why? The number of educated people has reached at a high level, but murder, hatred, and selfishness have spread out like wildfire everywhere. Why? Many institutions are opened, but only few civilized people are produced. Why? Degrees are available for all, but the dignity has gone down. Why? Trained people are produced from many institutions, but sincere people are very few. Why? Many books are written; much research is done; many professional achievements are attained, but humanity is threatened. Why? Therefore, we need Value-Based-Education." Life is a matter of choices. In human life there are certain things looked upon as admirable, honorable, to be approved of and there are other things which entertain and please us but we may view them as not admirable, not honorable and not to be approved of. Indian heritage, culture & values need to be thoroughly studied, analyzed & incorporated comprehensively in the education system. In achieving the above goal we librarians can definitely help the educators. We can re-establish the self-confidence of the youth, show them the way of regaining their faith in themselves. Swami Chinmayananda in his "We Must" booklet states "All our success entirely depends upon ourselves. Let us never look outside ourselves for help. Let us not fall into the delusion that the influence of others would enable us to do better or accomplish more." He firmly says: "Spiritual education and religious practices make us realize that we are a part of a whole scheme, and the essential creativeness behind the whole universe is the essential Essence ruling in the heart of each one of us: ShivohamShivoham ." Incorporating Value-Based-Education in society will result in growth of character, growth in virtues like self-control, tolerance, selfless service, practice of prayer, harmony, to love all people, to help them in need & respect them etc... Man being the 'cast in the mold of God' cannot easily deny Him. Even the great scientists like Newton and Einstein have believed in the existence of God as an intelligent power regulating and guiding the destinies of the universe.
