Explorations in Social Theory

George Ritzer is one of the leading social and cultural commentators of the present day. In this essential new book he considers some of the main tendencies in contemporary social theory. Included here are Ritzer's latest reflections on the uses and misuses of metatheory. According to Ritzer, sociology is a multiparadigm science. The differences and intensities of rivalries between paradigms are often very confusing for students and even for professional sociologists. This book seeks to find a way out of the confusion by sketching out the lineaments of a new integrated sociological paradigm and demonstrates how this paradigm can be applied. It shows the various ways in which Ritzer has developed rationalization theory to shed light on professional integration, the shape of consumer culture, hyperrationality and the state of sociology today.

The McDonaldization of Society 5

In this book, one of the leading social theorists and cultural commentators of modern times, turns his gaze on consumption. George Ritzer, author of the famous McDonaldization Thesis, demonstrates the irrational consequences of the rational desire to consume and commodify. He examines how McDonaldization might be resisted, and situates the reader in the new cultural spaces that are emerging in society: shopping malls, casino hotels, Disneyfied theme parks and Las Vegas -- the new 'cathedrals of consumption' as he calls them. The book shows how new processes of consumption relate to globalization theory. In illuminating discussions of the work of Thorstein Veblen and the French situationists, Ritzer unearths the roots of problems of consumption in older sociological traditions. He indicates how transgression is bound up with consumption, through an investigation of the obscene in popular and postmodern culture.

The Wiley-Blackwell Companion to Sociology

The only book to connect the everyday world of the 20-something undergraduate consumer with sound sociological analysis of the world of consumption Enchanting a Disenchanted World, Third Edition examines Disney, malls, cruise lines, Las Vegas, the world wide web, Planet Hollywood, credit cards, and all the other ways we now consume. Thoroughly updated to reflect the recent economic recession and the impact of the internet, bestselling author George Ritzer continues to explore this book's central thesis: that our society has undergone fundamental change because of the way and the level at which we consume. This Third Edition demonstrates how we have created new "cathedrals" of consumption (places that enchant us so as to entice us to stay longer and consume more) while continuing to take capitalism to a new level. These places of consumption, whether in our homes, the mall, or cyberspace, are in a constant state of "enchaining the disenchanted," luring us through new spectacles because their rational qualities are both necessary and deadening at the same time. New and Hallmark Features Offers a unique analysis of the world of consumption, especially the settings in which consumption takes place Discusses the recent global economic recession throughout Offers rich details on consuming in such places as Las Vegas, Disney World, on cruise ships, in Wal-Mart, at McDonald's, and, new to this edition, on the Web Includes a wide range of theoretical perspectives—Marxian, Weberian, critical theory, postmodern theory—as well as a number of concepts such as hyperconsumption, implosion, simulation, and time and space to show students how sociological theory can be applied to everyday phenomena

Essentials of Sociology

George Ritzer theorizes in his provocative new book, The Globalization of Nothing, that the "grand narrative" or social story of this period is a movement from "something" to "nothing." Building on but going beyond his renowned McDonaldization thesis, Ritzer contends that societies around the globe continue to move away from "something," defined as a social form that is generally indigenously conceived, locally controlled, and rich in distinctive content. He argues that we are moving toward "nothing" – that which is centrally controlled and conceived and relatively devoid of distinctive substance. It is in the movement toward the globalization of "nothing" that "something" is lost. More than likely, that

"something" is an indigenous custom, a local store, a familiar gathering place, or simply personalized interaction. Thus, the central problem in the world today is defined as "loss amidst monumental abundance (of nothing)." The Globalization of Nothing takes the subject of globalization in new directions, introducing terms such as "globalization" (the growing influence of, for example, American corporations throughout the world). This book is structured around four sets of concepts addressing this issue: "places/non-places," "things/non-things," "people/non-people," and "services/non-services." By drawing upon salient examples from everyday life, George Ritzer invites the reader to examine the nuances of these concepts in conjunction with the paradoxes within the process of the globalization of nothing. The Globalization of Nothing is ideal as a primary or supplemental text for courses in sociology, anthropology, communication, business, and related disciplines. This book is also recommended for anyone interested in the critical study of contemporary social phenomena.
