Goes over removal, preparation, and installation of an injector.

remove your intake tubing

remove the electric connector

remove these bolts for the jake housings

remove the bolts

remove your injector

pull all the injectors

clean the injector

clean up any carbon residue

changing the compression ratio by adding fluids of that cylinder

feed that little tube down the injector bore through the tip

clean the cylinder in the injector bore

write down that four digit code

install your injector

install your injector connector

install our rocker arms

injectors installed you are going to run these bolts down

set it to a lower torque setting

hook up your jake solenoid
