Explore comprehensive study material for ISC Biology Class 11 with the trusted Nageen Prakashan textbook. Designed specifically for the Class 11 ISC Biology syllabus, this book offers clear explanations and prepares students effectively for their exams.

The free access we provide encourages global learning and equal opportunity in education.

Thank you for visiting our website.

We are pleased to inform you that the document Nageen Prakashan Isc Class 11 Biology you are looking for is available here.

Please feel free to download it for free and enjoy easy access.

This document is authentic and verified from the original source.

We always strive to provide reliable references for our valued visitors.

That way, you can use it without any concern about its authenticity.

We hope this document is useful for your needs.

Keep visiting our website for more helpful resources.

Thank you for your trust in our service.

This document is one of the most sought-after resources in digital libraries across the internet.

You are fortunate to have found it here.

We provide you with the full version of Nageen Prakashan Isc Class 11 Biology completely free of charge.

ISC Biology Book I for Class XI

Well-labelled illustrations, diagrams, tables, figures and experiments have been given to support the text, wherever necessary.

ISC Biology XI

S. Chand's ICSE Biology, by Sarita Aggarwal, is strictly in accordance with the latest syllabus prescribed by the Council for the Indian School Certificate Examinations (CISCE), New Delhi. The book aims at simplifying the content matter and give clarity of concepts, so that the students feel confident about the subject as well as the competitive exams

ISC Biology Book-II For Class-XII

A Textbook of ISC Biology for Class XI

A Textbook of ISC Biology XI

One of eighteen timeless classics for independent student reading and preparation for mainstream classrooms. Also thematically linked to core series such as Visions.

A Complete Course in ISC Biology

Perform well in Semester 1 Exam for ISC 12th Class with newly introduced Oswal - Gurukul Chapter-wise MCQs Commerce Stream for 2021 Exam. This practice book includes Science Stream subject papers such as English, Maths, Economics, Accounts, Commerce, Computer science. How can you benefit from Oswal - Gurukul ISC Chapterwise MCQs for 12th Class Commerce? We have designed the book based on the Modified Assessment Plan issued by the Board on August 6, 2021. Students can attempt the questions even in changing scenarios and exam patterns. Our Comprehensive Handbook Includes questions segregated chapter wise which enable Class 12 ISC students' to concentrate properly on one chapter at a time. 1. Strictly followed the Specimen Question Pattern released by CISCE in August 2021 2. Content is purely based on the Latest Reduced Syllabus issued by the Board on July 19, 2021 3. 2500+ Chapter Wise Multiple Choice Questions for intensive practice 4. Includes all types of MCQs such as Diagram based Questions, Case based questions, Fill in the blanks, Numerical questions, Comprehension Questions 5. Word of Advice by Experts to avoid common mistakes 6. Last minute revision with Chapter at a Glance 7. Fully Solved New Specimen Question Papers

The Tempest: Workbook

S Chand's ISC Mathematics is structured according to the latest syllabus as per the new CISCE(Council for the Indian School Certificate Examinations), New Delhi, for ISC students taking classes XI & XII examinations.

ISC Mathematics book 1 for Class- 11

Understanding ISC Mathematics, for class 11 - sections A, B & C, has been written by Mr. M.L. Aggarwal (Former Head of P.G. Department of Mathematics, D.A.V. College, Jalandhar) strictly according to the new syllabus prescribed by the Council for the Indian School Certificate Examinations, New Delhi in the year 2015 and onwards for students of class 11. A new feature - Typical Illustrative Examples and Typical Problems, has been added in some chapters for those students who want to attempt some more challenging problems. The entire matter in the book is given in a logical sequence so as to develop and strengthen the concepts of the students.

A TEXTBOOK OF ISC BIOLOGY for Class -XII

The Present book S.Chand's Principle of Physics is written primarily for the students preparing for CBSE Examination as per new Syllabus. Simple language and systematic development of the subject matter. Emphasis on concepts and clear mathematical derivations

Goyal's ISC Biology Question Bank with Model Test Papers for Class 12 Semester 2 Examination 2022

The Tempest is a popular text for study by secondary students the world over. This edition includes illustrations, preliminary notes, reading lists (including websites) and classroom notes.

APC Understanding ISC Mathematics - Class 11 - Avichal Publishing Company

A. Surface Chemistry 1.To prepare colloidal solution (sol) of starch, 2. To prepare a colloidal solution of egg albumin 3.To prepare colloidal solution of gum, 4. To prepare colloidal solution of aluminium hydroxide $[\text{Al}(\text{OH})_3]$, 5.To prepare colloidal solution of ferric hydroxide $[\text{Fe}(\text{OH})_3]$, 6.To prepare colloidal

solution of arsenious sulphide $[\text{As}_2\text{S}_3]$, 7. To purify a freshly prepared sol by dialysis, 8. To compare the effectiveness of different common oils (Castor oil, cotton seed oil, coconut oil, kerosene oil, mustard oil) in forming emulsions.

Viva-Voce B. Chemical Kinetics

1. To study the effect of concentration on the rate of reaction between sodium thiosulphate and hydrochloric acid,
2. To study the effect of temperature on the rate of reaction between sodium thiosulphate and hydrochloric acid,
3. To study the rate of reaction of iodide ions with hydrogen peroxide at different concentrations of iodide ions,
4. To study the rate of reaction between potassium iodate (KIO_3) and sodium sulphite (Na_2SO_3) using starch solution as indicator.

Viva-Voce C. Thermochemistry

1. Determine the enthalpy of dissolution of copper sulphate ($\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$) in water at Room temperature,
2. To determine the enthalpy of neutralization of the reaction between HCl and NaOH ,
3. To determine enthalpy change during the interaction between acetone and chloroform.

Viva-Voce D. Electrochemistry

1. To study the variation of cell potential in $\text{Zn}|\text{Zn}^{2+}||\text{Cu}^{2+}|\text{Cu}$, with change in concentration of electrolytes (CuSO_4 or ZnSO_4) at room temperature.

Viva-Voce E. Chromatography

1. To separate the coloured components (pigment) present in the given extract of leaves and flowers by ascending paper chromatography and find their R_f values,
2. To separate the coloured components present in the mixture of red and blue inks by ascending paper chromatography and find their R_f values,
3. To separate Co^{2+} and Ni^{2+} ions present in the given mixture by using ascending paper chromatography and determine their R_f values.

Viva-Voce F. Preparation of Inorganic Compounds

1. Preparation of double salt of ferrous ammonium sulphate (Mohr's salt) from ferrous sulphate and ammonium sulphate,
2. To prepare a pure sample of potash alum (fitkari),
3. Preparation of crystals of potassium ferric oxalate or potassium trioxalato ferrate (III).

Viva-Voce G. Preparation of Organic Compounds

1. Preparation of iodoform from ethyl alcohol or acetone,
2. Preparation of acetanilide in laboratory,
3. Preparation of *p*-Naphthol aniline dye,
4. To prepare a pure sample of dibenzalacetone,
5. To prepare a pure sample of *p*-nitro acetanilide.

Viva-Voce H. Tests for the Functional Groups Present in Organic Compounds

Viva-Voce I. Study of Carbohydrates, Fats and Proteins

1. To study simple reactions of carbohydrate,
2. To study simple reactions of fats,
3. To study simple reactions of proteins,
4. To investigate presence of carbohydrates, fats and proteins in food stuffs.

Viva-Voce J. Volumetric Analysis

1. To prepare 250 ml of M/10 solution of oxalic acid,
2. To prepare 250 ml of M/10 solution of ferrous ammonium sulphate,
3. Prepare M/20 solution of oxalic acid, with its help find out the molarity and strength of the given solution of potassium permanganate,
4. Prepare M/20 solution of Mohr's salt, using this solution determine the molarity and strength of potassium permanganate solution.

Viva-Voce K. Qualitative Analysis

Viva-Voce INVESTIGATORY PROJECTS

1. To study the presence of oxalate ions in guava fruit at different stages of ripening.
2. To study the quantity of caseine present in different samples of milk.
3. Preparation of soyabean milk and its comparison with natural milk with respect to curd formation, effect of temperature etc.
4. To study the effect of potassium bisulphite as food preservative at various concentrations.
5. To study the digestion of starch by salivary amylase and the effect of pH and temperature on it.
6. To study and compare the rate of fermentation of the following materials—wheat flour, gram flour, potato juice and carrot juice.
7. To extract essential oils present in saunf (aniseed), ajwain (corum), illaichi (cardomom).
8. To detect the presence of adulteration in fat, oil and butter,
9. To investigate the presence of NO_2^- in brinjal.

Biology of higher level has too many concept and remembering all them on tips all the time is not an easy task. Handbook of Biology is an important, useful and compact reference book suitable for everyday study, problem solving or exam revision for class XI – XII, Medical entrances and other medical Competitive. This book is a multi-purpose quick revision resource that contains almost all key notes, Diagrams, Flow Charts, Terms and Definitions that all students & professionals in biology will want to have this essential reference book within easy reach. Its unique format displays flow charts & diagrams clearly and places them in the context and crisply identifies describes all the variables involved, summary about every equation and formula that one might want while learning biology. A stimulating and crisp extract of fundamental biology is to be enjoyed by the beginners and experts equally. The book is best- selling from its first edition and one of the most useful books of its type. Table of contents The Living World, Biology Classification, Plant Kingdom, Animal Kingdom, Morphology of Flowering Plants, Anatomy of Flowering Plants, Structural Organisation in Animals, Cell: The Unit of Life, Biomolecules, Cell Cycle and Cell Division, Transport in Plants, Photosynthesis in Higher Plants, Respiration in Plants, Plant Growth and Development, Digestion and Absorption, Breathing and Exchange of Gases, Excretory Products and Their Elimination, Locomotion and Movement, Neural Control and Coordination, Chemical Coordination and Integration, Reproduction in Organisms, Sexual Reproduction in Flowering Plants, Human Reproduction, Reproductive Health, Principles of Inheritance and Variation, Molecular Basis of Inheritance, Evolution, Human Health and Diseases, Strategies for Enhancement in Food Production, Microbes in Human Welfare, Biotechnology: Principles and Processes, Biotechnology and Its Applications, Organisms and Population, Ecosystem, Biodiversity and Conservation, Environmental Issues, Appendix.

Handbook of Biology

Learning Elementary Chemistry for Class 6

Applied Sociology for Nurses

This book has been written keeping in view the specific requirements of undergraduate nursing students and it fully covers the new syllabus prescribed by the Indian Nursing Council. Although it primarily aims at catering to the curricular needs of B.Sc. Nursing students, it will also be immensely useful for degree students of various other streams studying sociology. The basic concepts have been explained in unambiguous terms from the students' point of view. Sociological aspects relevant to nursing have been dealt with in detail wherever necessary so that students not only learn the subject but also are able to make practical use of the acquired knowledge in profession. Applied aspects of Sociology as per the new syllabus has been covered in the book. Written with a view to fulfilling the curricular needs of student nurses as per the revised INC Curriculum. A new section on Clinical Sociology (Unit VIII, comprising 3 chapters), as per the new syllabus, added. Includes substantially new approaches/aspects on various aspects. Covers latest events like social fallout of COVID-19 pandemic and the law banning triple talaq. Contains short answer and long answer exam-oriented questions at the end of chapters. Additional multiple-choice questions to help students have a firm grasp on the subject.

Sociology for Nurses

Sociology for Nurses has become a leading textbook and an invaluable companion for students wishing to get to grips with how sociology can positively transform professional nursing practice. This thoroughly revised new edition maintains its commitment to providing jargon-free explanations of sociological theories and evidence to show how studying sociology can be useful in all branches of nursing. Readers will develop a clear understanding of what sociology is and why it is essential to practice, gain deeper awareness of social issues such as gender, ethnicity, class and the life course, and become more familiar with the social contexts of health policy and nursing as a profession. With updates in every chapter, the third edition includes a new chapter on research methods, a reorganized collection of chapters on health policy, extended coverage of long-term illness and disability, as well as contemporary case studies on topical healthcare issues such as dementia, the 'obesity epidemic' and recent attempts to integrate health and social care. In addition, the book provides clearly defined learning aims, a useful glossary of sociological concepts, structured activities and questions for discussion, and annotated suggestions for further reading. The editors and contributing authors to the book have a wealth of experience teaching sociology to nurses at diploma and degree pre-registration and post-registration levels. Their book will continue to spark interest and debate among all student nurses, particularly those approaching sociology for the first time. Please visit the accompanying website at: <http://www.politybooks.com/sociologyfornurses>.

Sociology for Nurses

Brief yet containing the whole of the INC-prescribed syllabus, this book primarily aims at catering to the curricular needs of B.Sc. nursing students. It will, however, be of immense use for the GNM students and the degree students of various streams studying sociology. Written with a view to fulfil the requirement of student nurses. Includes substantially new approaches/aspects on the various topics. Contains the latest data in chapters relating to demography, population, social problems and national health-related programmes. Contains exam-oriented questions at the end of chapters. Has multiple-choice questions, which help students have a firm grasp on the subject

EBOOK: Sociology and Health Care

"The author's agenda in writing the book was to provoke critical thinking and awareness and to move beyond the simplistic rhetoric that so often characterizes much of public debate on health care matters. I have no doubt that he has achieved these aims...and more." Sociology Volume 43, Number 3, June 2009 "Sociology & Health Care is easy to read and offers an introduction into selected, but key areas, of the sociology of health and illness. It is a useful book for health care students as well as health care workers who are interested in the social aspects of their work, their job and how it all fits into the wider society." Sociological Research Online Are patients 'customers'? What does this mean for the patient-practitioner relationship? What should the relationship be between expert knowledge and our own experiences when dealing with health and illness? Do people who are better off get better access to health care? Debates about the future of health care bring questions about patient choice, paternalism and inequalities to the fore. This book addresses some of the sociological issues surrounding these questions including: The social distribution of knowledge The basis of professional power Sources of social inequalities in health The ability of health care services to address these issues The book provides suggestions and examples of how sociological concepts and insights can be used to help think about important contemporary issues in health care. For that reason, it has a practical as well as academic purpose, contributing to improvement of the quality of interaction between patients and practitioners. The core themes running throughout the book are inequalities in health and the rise of chronic disease, with particular attention being given to psycho-social models of illness which locate individual experiences within wider social relationships. Sociology and Health Care is key reading for student nurses and those on allied health courses, and also appeals to a wide range of professionals who are interested in current debates in health and social care.

Sociology as Applied to Nursing and Health Care

This text is designed specifically to discuss sociological ideas and theories in terms of their relationship to nursing and the health care context in which they take place. Provides an accessible introduction to major sociological themes and ideas with topics that include an introduction to the sociology of health care, inequalities in health, the social context of nursing, and more. Each chapter contains case studies and examples which link to a variety of settings and client groups. Reflection and discussion questions encourage critical thinking. Also contains a helpful glossary of sociological terminology.

Sociology for Midwives

The study of sociology is now an essential part of all midwifery training, but it can often seem removed from the reality of midwifery practice. Midwives often ask: what is sociology? Why do I need sociology to be a midwife? How can sociology help improve my clinical practice? This major new textbook answers these important questions and shows how sociology can inform the practice of midwifery in the twenty-first century. It provides a comprehensive, jargon-free introduction to sociology for midwifery students with no prior knowledge of the subject, as well as practising midwives with experience of dealing with sociological issues in their daily work. Although the book assumes little or no previous knowledge of sociology it provides enough depth to meet the needs of those with some background in the field. At every stage the links between sociology and everyday practice are emphasised and explained, using a wealth of case studies and examples. The book provides: Clearly defined learning aims and objectives Structured activities and questions for discussion A glossary of key sociological concepts Annotated suggestions for further reading The editors and contributors have considerable experience teaching sociology at diploma, undergraduate and postgraduate levels to students from many different disciplines. This book will be an indispensable teaching aid within midwifery education, and other relevant health and social care disciplines.

Psychology and Sociology in Nursing

This book explores sociology and psychology relevant to nursing and explains why it is so important to understand these disciplines in order to be a good nurse. It is written specifically for nursing students, and clearly explains the key concepts using nursing case studies and examples. Chapters move from individual and personal issues onto society as a whole and explore the psychological and sociological basis that underpins all aspects of nursing practice. Key features: All content linked to the sociological and psychological requirements in the NMC standards of proficiency for registered nurses Activities to help build critical thinking, independent learning and decision-making skills Case studies and scenarios that link sociological and psychological theory to nursing practice A key text for nursing students in all fields of practice

Sociology for Nursing and Health Care

This volume provides a very much needed introduction to sociology for all those working or studying in nursing and health care related professions. It has been specially designed to be of use to those whose primary responsibilities concern the prevention, cure and management of illness. Sociology for Nursing and Health Care is a straightforward accessible text, which introduces a wide range of central topics. The following themes are explored: the professions in medicine; the hospital as an organization; relationships in the health service; inequalities of health; what makes us ill; the national health service; women's health and nursing; methods of research in sociology for nurses. Each chapter includes an account of the key issues and viewpoints as well as helpful and constructive questions and exercises.

Towards a Sociology of Nursing

Towards a Sociology of Nursing offers fresh insights from recent research into the nursing profession. Nurses represent an important part of the professionally trained female workforce and, being a middle-class profession, changes in nursing reflect changes of many working women worldwide. Scholarship addressing these changes, however, often consists of narratives of nurses talking about themselves, which can be enriched by a sociological background that foregrounds hypotheses. In this book, Ricardo A. Ayala problematises the realities which inform, affect and shape nursing, offering new perspectives on the consequences of those social realities for the nursing profession and society more broadly. He draws on extensive field research with nurses in the workplace, spending time with them, interviewing key actors and reading and analysing documents critically through a distinctive sociological lens.

Sociology and Health Care

Is it relevant to think of patients as customers or consumers? Do people who are better off get better access to health care, irrespective of the severity of their condition? Why is technical knowledge often given higher status than knowledge based on our own experiences? These questions and more are addressed by this book.

Sociology, an Introduction for Nurses, Midwives, and Health Visitors

Despite noteworthy exceptions, nursing's literature largely disregards the ways in which social and sociological theory permeates, guides and shapes research, education, and practice. Likewise, social theory's ability to position nursing within wider structures of healthcare and educational provision is similarly and puzzlingly downplayed. The questions nurses ask and the problems they face cannot however, adequately be addressed without engaging with social and sociological theory and, to progress this engagement, contributors to this book explore how social theories are used by and might apply to nursing and nursing practice. The book draws on a wide range of perspectives – philosophical, theoretical, empirical and political – to offer a robust and wide-ranging critique and analysis. Social Theory and Nursing is essential reading for nursing researchers, academics and educators, as well as scholars and researchers in medical sociology, medicine and allied health.

Social Theory and Nursing

There is an entrance exam in all fields to take government job. There is also entrance exam for Nurses to take job in state and central government. The nursing students face difficulty to find comprehensive book of multiple choice questions. So I write this book for all nursing personal that appeared for entrance exam. I have prepared MCQ from all Nursing subjects according to the Indian Nursing council syllabus. The question of Nutrition, sociology and Nursing education are merged in Community health

Nursing. The question of pediatric Nursing is included in OBG. The subject Medical Surgical Nursing covers the question of Anatomy. This book is useful for all state and central government exam such as AIIMS Hospital, Railway Hospital, Army Hospital, Nursing Tutor exam, M Sc Nursing Entrance, IGNOU entrance, NCLEX RN, CNRE, HAAD, DHA, Qatar Prometric etc. This book is also useful for paper setter and examiner. This book is useful for GNM and B Sc Nursing students also because the students can give answer the objective question of University and Nursing council paper. I hope this book will be useful for all Nursing personal to achieve their goal and also useful for update theoretical knowledge. I have tried to make this book error free. Your feedbacks are welcome. Thanking you.... Mr. Shakil M. Panwala (RNRM, Post B Sc Nursing)

A COMPREHENSIVE BOOK FOR STAFF NURSES

Understanding the Sociology of Health continues to offer an easy to read introduction to sociological theories essential to understanding the current health climate. Up-to-date with key policy and research, and including case studies and exercises to critically engage the reader, this book shows how sociology can answer complex questions about health and illness, such as why health inequalities exist. To better help with your studies this book contains: · a global perspective with international examples; · a new chapter on health technologies; · online access to videos of the author discussing key topics as well as recommended further readings; · a glossary, chapter summaries and reflective questions to help you engage with the subject. Though aimed primarily at students on health and social care courses and professions allied to medicine, this textbook provides valuable insights for anyone interested in the social aspects of health.

Sociology and Health Care

This title is directed primarily towards health care professionals outside of the United States. Nursing practice needs to be informed by an understanding of people and the societies in which they live. This introductory text has been designed specifically to discuss those aspects of sociology which are most relevant to nursing and the health care context in which it takes place.

Understanding the Sociology of Health

This text provides students with a comprehensive introduction to the sociology of professions. It covers social work, probation, nursing, midwifery and health visiting and looks at key topics such as control and legal relationships, the relationship of gender and care, and the 'new managerialism'.

Sociology in Nursing and Healthcare E-Book

Understanding the Sociology of Health, Third Edition is an accessible introduction to a subject which is often shrouded in jargon. Providing case studies and exercises to really get students thinking, this book shows how sociology provides the means to answer complex questions about health and illness, such as why health inequalities exist. The new edition includes new chapters on the history of health and healing; sexuality; sport, fitness and exercise; and death and dying.

The Sociology of the Caring Professions

Mapped to the 2018 NMC Standards, this book introduces core aspects of the social sciences and their application to nursing practice. Alongside essential contributions from sociology and psychology, the book goes beyond this to provide readers with a solid grounding in politics and political awareness, health promotion, advocacy and more.

Understanding the Sociology of Health

A comprehensive collection of classic and contemporary readings in the sociology of health. The Sociology of Healthcare will stimulate debate, reflexive practice and critical thinking in applied sociology and is aimed at the teaching and learning needs of both lecturers and students.

Applied Social Science for Nursing Students

The Applied Sociology book by Thakur Publication is a valuable resource for B.Sc Nursing students in their first semester, aligned with the guidelines set by the Indian Nursing Council (INC). Written in English, this comprehensive textbook delves into the field of sociology and its application in the context

of nursing practice. AS PER INC SYLLABUS – PRACTICAL & STUDENT-FRIENDLY CONTENT With its clear and concise explanations, this book equips nursing students with a deeper understanding of sociological concepts and their relevance to their profession.

The Sociology of Healthcare

The Sociology of Healthcare, Second Edition explores the impact of current social changes on health, illness and healthcare, and provides an overview of the fundamental concerns in these areas. This new edition features a brand new chapter entitled 'End of Life' which will help health and social care workers to respond with confidence to one of the most difficult and challenging areas of care. The 'End of Life' chapter includes information on changing attitudes to death, theories of death and dying, and palliative care. All chapters have been thoroughly updated to address diversity issues such as gender, ethnicity and disability. In addition, expanded and updated chapters include 'Childhood and Adolescence' and 'Health Inequalities'. The text is further enhanced through the use of case studies that relate theory to professional practice, and discussion questions to aid understanding. Links to websites direct the reader to further information on health, social wellbeing and government policies. This book is essential reading for all students of healthcare including nursing, medicine, midwifery and health studies and for those studying healthcare as part of sociology, social care and social policy degrees. "In an age when health policy follows an individualist model of "personal responsibility" this book by Alan Clarke demonstrates with a vast array of evidence, just how much there is such a thing as society. An excellent overall book." Dr. Stephen Cowden, Senior Lecturer in Social Work, Coventry University

Applied Sociology

This book uncovers some of the hidden agendas which have inhibited nursing and nurses from making their full potential contribution to health care, and stimulates new and positive initiatives. It explores nurses' behaviour patterns; employing, psychological, educational and political perspectives.

The Sociology of Healthcare

First published in 1997, The nursing and health care fields are developing rapidly. This new series of monographs offers reports of projects completed in 1997 in the fields of nursing and health care. The aim of the series is to report studies that have relevance to contemporary nursing and health care practice. It will include reports of research into aspects of clinical nursing care, management and education. The series will be of interest to all nurses and health care workers, researchers, managers and educators in the field.

Nursing

Quick Review Series (QRS) for BSc Nursing Semester I and II, 2nd edition is an extremely exam-oriented book. The content has been developed and arranged in a manner so the entire INC syllabus has been covered. The subject content has been divided unit wise and according to the weightage of marks in each unit. It is well-illustrated with simple reproducible diagrams and flow charts. To aid in quick learning before examinations, memory aides and mnemonics have also been added. The book will serve the requirements of BSc Nursing Semester I and II students to prepare for their examinations. Content presented in well-classified sections Compliant to the revised INC Curriculum All question types asked in the University exams are addressed: Long essays, Short essays and Short notes Clearly describes how to attempt a question in the exam Suitable number of tables and flow charts according to the need of the questions Reproducible diagrams in Anatomy and Physiology sections

Caring for Patients, Caring for Student Nurses

Specifically for nurses, this book fulfils the need for a rigorous course text on sociology and its direct relevance to health work. It guides readers through a number of classic and contemporary sociological debates which have a specific influence on nurses' understanding of nursing, health and health care.

Quick Review Series For B.Sc. Nursing: Semester I and II - E-Book

Gender and the Professional Predicament in Nursing examines the ways in which our understanding of nursing is gendered, and how our notion of nursing is connected to our idea of what it is to be a woman. It explores the implications this connection has for the status of nursing as a profession, and re-examines some of the fundamental questions that the nursing profession has tried to address, such

as: * what is nursing care? * who should do it? * why is it so difficult to manage the provision of nursing care? Gender and the Professional Predicament in Nursing demonstrates that once nurses try to define and shape the nature of their work they are marginalized or silenced. Frequent descriptions of them as 'sentimental', 'divided' or 'incompetent' highlight the need to understand nurses' exclusion from policy debates, and why their voices are so seldom heard. Celia Davies contends that in a society divided by gender, defining nursing as women's work is deeply contradictory. We value nurses but devalue nursing. She suggests that alongside the debates about managerial efficiency in the NHS we need another kind of debate about how we organize health and social care, about what we mean by professionalism and about the worth of caring work. This book is important reading for students of women's studies, nursing, allied professions in health and medicine, policy makers and human resource managers.

Sociology, Nursing, and Health

The works of Pierre Bourdieu occupy a central place in the current development of world sociology. This volume offers an accessible but challenging introduction to Bourdieu's ideas. In a series of discussions, lectures and interviews, the range of Bourdieu's ideas is laid out and its relation to other disciplines and other sociological schools is explored. The issues developed include the sociology of culture, leisure and taste; the intrinsic reflexivity of social science; and the role of language in society and social sciences.

Gender And The Professional Predicament In Nursing

Introduces all the core topics and essential information that nursing students, in all specialisms, will need to master during the first years of a nursing degree.

Mid-American Review of Sociology

What is dementia? How should we organize dementia care? This comprehensive book critically examines the main approaches to understanding dementia (bio-medical, social-psychological and socio-gerontological) and the main principles and ideologies of care. The book: • provides clarity on the gap between the utopian aspirations of care and the reality of care • opens up a series of questions about knowledge and treatment of dementia • argues for a transition from positions that place emphasis upon the individual or particular care services to the social, cultural and economic context Lively, informative and challenging, the book will be of interest to students of nursing, sociology of health & illness, social work and social gerontology. Anthea Innes teaches at the Dementia Services Development Centre, University of Stirling

Sociology in Question

An examination of the relationship between the social sciences and nursing, including discussion of social change impacts on both clients and health organizations. It incorporates a psychology section, case studies, suggested activities and questions.

Essentials of Nursing Practice

This introductory text encourages the application of sociological insights in health care. Health processes and outcomes are analysed in terms of social difference, inequality, opportunities and life chances. Key sociological concepts and theories are introduced by using practical exercises and an active learning approach. The book is written in an accessible style so that it can be used as a course text but will also appeal to individual readers at all levels in their career.

Dementia Studies

The series from which this book is taken is designed for the new direction in health care education resulting from the implementation of Project 2000. It brings together relevant material from the various subject areas and provides practical textbooks for health care students. Each title in the series includes a variety of study activities to encourage the user and facilitate learning, and there are regular summaries and bibliographies for further study and self-testing exercises. The arrangement of each chapter is as follows - introduction, presentation of subject material, case studies, assignments, self-testing exercises, summary and bibliography.

Social and Behavioural Sciences for Nurses

Provides students with insights into key contemporary debates and events to demonstrate the relevance of sociology and its practical application to modern nursing. This textbook helps student nurses make the leap from a narrow focus on the physical problems of their patients to a broader understanding of the whole person and the contexts of care which will help them succeed as compassionate nurses. Written directly for nurses, it focuses on the individuals and families in their care, the organisations they work in, and the factors which affect their practice. Key features include: Case studies and scenarios to help students relate sociology to real-life examples Reflection points to help students critically engage with the discussion Learning outcomes and chapter summaries for revision Definitions of key terms in each chapter

Sociology in Practice for Health Care Professionals

ABOUT THIS BOOK For the last 40 years nursing research has been struggling to establish its theoretical roots and legitimate place within the wider arena of research in the health sciences. Overshadowed by the medical endeavour, both resources and support have been meagre. Initially this medical hegemony also restricted the range of research designs by favouring the quantitative approaches that have formed the backbone of much clinical research. However, despite these restrictions, nursing research has developed a particular diversity which matches the eclecticism of the discipline itself. Nursing and nurses have rapidly recognized that health-related research problems often require a multi-faceted approach that can be realized most effectively through multi-disciplinary activities. Not unexpectedly, however, individual researchers have frequently remained entrenched in the particular methodologies with which they are familiar and have only reluctantly (and perhaps wisely) ventured beyond these. In contrast, the aim of this book has been to gather together material that reflects the diversity and richness of research in nursing. To juxtapose different designs springing from different epistemologies, with the aim of stimulating a more holistic approach. It hopes to provide readers with an understanding of nursing research through a consideration of the issues involved.

Social and Behavioural Sciences for Nurses

Basic Steps in Planning Nursing Research: From Question to Proposal is the perfect introduction to the research process. It details the development of an effective research plan, and guides readers through all stages of the process from finding a research topic, to the final written proposal. It takes an in-depth focus on the planning process which makes it an excellent tool for beginners while still being relevant to people at all levels of study who need to develop a research plan. The Seventh Edition continues to teach readers how to prepare an appropriate question and topic and the steps it takes formulate a conclusion. All of the chapters have been updated with new references and current information including a renewed focus on evidence-based practice and an expansion of research ethics. Proposals are included at the end of the text to help students learn.

Understanding Sociology in Nursing

One of the fundamental aims of nursing is to safeguard or promote patients' 'quality of life'. In *Nursing Perspectives on Quality of Life*, Peter Draper examines existing ways of defining the concept and argues that nurses need to adopt a fresh approach, which more accurately reflects patients' concerns and helps them to develop practical ways of promoting the well-being of people in their care. The text provides an analysis of statistical approaches to quality of life, including social indicators, the Quality Adjusted Life Year (QALY), and the medical outcomes literature. The author proposes an alternative, qualitative approach to organising care, which respects the patients' choice and individuality and presents the findings of new research into the quality of life of older people in hospital wards. Combining original research and a critical analysis of existing models, *Nursing Perspectives on Quality of Life* is suitable for students at undergraduate and postgraduate levels.

Nursing Research

Ignorance is mostly framed as a void, a gap to be filled with appropriate knowledge. In nursing and health care, concerns about ignorance fuel searches for knowledge expected to bring certainty to care provision, preventing risk, accidents, or mistakes. This unique volume turns the focus on ignorance as something productive in itself and works to understand how ignorance and its operations shape what we do and do not know. Focusing explicitly on nursing practice and its organization within contemporary health settings, Perron and Rudge draw on contemporary interdisciplinary debates to discuss social

processes informed by ignorance, ignorance's temporal and spatial boundaries, and how ignorance defines what can be known by specific groups with differential access to power and social status. Using feminist, postcolonial and historical analyses, this book challenges dominant conceptualizations and discusses a range of "nonknowledges" in nursing and health work, including uncertainty, abjection, denial, deceit and taboo. It also explores the way dominant research and managerial practices perpetuate ignorance in healthcare organisations. In health contexts, productive forms of ignorance can help to future-proof understandings about the management of healthy/sick bodies and those caring for them. Linking these considerations to nurses' approaches to challenges in practice, this book helps to unpack the power situated in the use of ignorance and pays special attention to what is safe or unsafe to know, from both individual and organisational perspectives. On the Politics of Ignorance in Nursing and Health Care is an innovative read for all students and researchers in nursing and the health sciences interested in understanding more about transactions between epistemologies, knowledge building practices and research in the health domain. It will also be of interest to scholars involved in the interdisciplinary study of ignorance.
