Renowned fitness and health researcher Ellington Darden teaches you how to burn fat and keep it off using the science of thermodynamics. Exercise researcher and author Ellington Darden has studied exercise and fat loss for more than 40 years. His most recent program combines his previous findings on fat loss and muscle gain with new research on the principles of thermodynamics and heat transfer for a 6- or 12-week plan that will eliminate belly bloat, destroy flab, and stoke metabolism. Integrating his many years of research, the program has had more than 1,137 participants who shed an average of 29.5 pounds of fat and lost 6 inches off their waist or belly. The program consists of four main components—a descending-calorie eating plan; strength-training workouts; superhydration of the body; and rest, inactivity, and rejuvenating sleep. Men's Health Killing Fat takes you, step-by-step, through Darden's super-effective strategy. Interspersed with success stories and before-and-after photos of previous participants, Killing Fat will teach you a revolutionary new way to lose weight and keep it off.

Their response: Learn to cook all your favorite restaurant food at home—and watch the pounds disappear! Make no mistake—this is no rice-and-tofu cookbook. The genius of Cook This, Not That! is that it teaches you how to save hundreds—sometimes thousands—of calories by recreating America's most popular restaurant dishes, including Outback Steakhouse's Roasted Filet with Port Wine Sauce, Uno Chicago Grill's Individual Deep Dish Pizza, and Chili's Fire Grilled Chicken Fajita. Fully updated throughout and with a new foreword for this edition. Why do most diets fail? Why does one person eat a certain meal and gain weight, while another eating the same meal loses pounds? Why, despite all the advice about what to eat, are we all still getting fatter? The answers are much more surprising - and fascinating - than we've been led to believe. The key to health and weight loss lies not in the latest fad diet, nor even in the simple mantra of 'eat less, exercise more', but in the microbes already inside us. Drawing on the latest science and his own pioneering research, Professor Tim Spector demystifies the common misconceptions about fat, calories, vitamins and nutrients. Only by understanding what makes our own personal microbes tick can we overcome the confusion of modern nutrition, and achieve a healthy gut and a healthy body.

Named one of the top health and wellness books for 2016 by Well + Good and MindBodyGreen From leading psychiatrist and author of Fifty Shades of Kale comes a collection of 100 simple, delicious, and affordable recipes to help you get the core nutrients your brain and body need to stay happy and healthy. What does food have to do with brain health? Everything. Your brain burns more of the food you eat than any other organ. It determines if you gain or lose weight, if you're feeling energetic or fatigued, if you're upbeat or depressed. In this essential guide and cookbook, Drew Ramsey, MD, explores the role the human brain plays in every part of your life, including mood, health, focus, memory, and appetite, and reveals what foods you need to eat to keep your brain—and by extension your body—properly fueled. Drawing upon cutting-edge scientific research, Dr. Ramsey identifies the twenty-one nutrients most important to brain health and overall well-being—the very nutrients that are often lacking in most people's diets. Without these nutrients, he emphasizes, our brains and bodies don't run the way they should. Eat Complete includes 100 appetizing, easy, gluten-free recipes engineered for optimal nourishment. It also teaches readers how to use food to correct the nutrient deficiencies causing brain drain and poor health for millions. For example: • Start the day with an Orange Pecan Waffle or a Turmeric Raspberry Almond Smoothie, and the Vitamin E found in the nuts will work to protect vulnerable brain fat (plus the fiber keeps you satisfied until lunch). • Enjoy Garlic Butter Shrimp over Zucchini Noodles and Mussels with Garlicky Kale Ribbons and Artichokes, and the zinc and magnesium from the seafood will help stimulate the growth of new brain cells. • Want to slow down your brain's aging process? Indulge with a cup of Turmeric Cinnamon Hot Chocolate, and the flavanols found in chocolate both increase blood flow to the brain and help fight age-related memory decline. Featuring fifty stunning, full-color photographs, Eat Complete helps you pinpoint the nutrients missing from your diet and gives you tasty recipes to transform your health—and ultimately your life.
