He calls it the Accountaneur(r). This book contains a great deal of new thought about what accountants should be doing. It is a required read for all professionals, partners, and non-partners. Leaders at accounting firms have a huge responsibility to create a business environment conducive to growth and achievement, not just at their firms, but especially for their clients. Hitendra brings a perspective that helps accounting firm leaders find answers to key questions that will lead to entrepreneurial achievement."- August J. Aquila, CEO, AQUILA Global Advisors LLC, consultant to professional service firms, author, and speaker. "What impressed me the first time I met Hitendra is his drive to help others reach their potential. This book does just that. You will learn and appreciate what an important role the accountant plays in our business and personal lives. Hitendra makes the profession come alive. If you are in the accounting profession, or thinking about it, you must read this book!"- Chester Elton, New York Times best-selling author of "The Carrot Principle," "All In," and "What Motivates Me" "Entrepreneurs create wealth and opportunities for others. Entrepreneurial accountants make it possible for entrepreneurs. Accountaneur(r) is a probing question bank for accountants who want to be entrepreneurial."- Allan D. Koltin, CPA, CEO, Koltin Consulting Group Inc. Are you an Accountaneur(r)? Think different. Taking a cue from several research studies across different professions and industries that identify traits, strengths, talents, skills, values, and beliefs, we identify the most common attitudes and beliefs of successful accountants who can be deservedly called as entrepreneurs in the true sense of the word. An Accountaneur is an entrepreneur whom, with considerable initiative and risk, organizes and manages a business that provides tax, accounting, and advisory services to solve problems for people, for profit, or, for pay, by employing productive labor and technologies. So, the difference between an

Accountaneur(r) and an accountant lies in his or her traits, strengths, talents, skills, values and beliefs. There are three types of people in the professional world. Those who work for others, i.e. in a job. Those who work for themselves, i.e. who create a job for themselves. And those who create jobs for others. An Accountaneur(r) either works for him or herself or is the one who creates jobs for others in the tax and accounting profession. Are you an Accountaneur(r)? If you work for yourself or if you have created jobs for others in the tax and accounting profession, you are an entrepreneur, rather an Accountaneur. You are an Accountaneur if you chose not take up a job, but chose instead to create a business. More at <http://cpatrendlines.com/author/patil>

#### ACCA P5 Advanced Performance Management

Key Account Management Excellence in Pharma & Medtech is designed to help life sciences practitioners develop and execute innovative and effective key account management (KAM) strategies and capabilities. Pharmaceutical and medtech companies are increasingly pursuing KAM in response to the rapid rise of large, sophisticated and complex healthcare provider and payer systems and groups. Those that invest the time to get KAM right will protect their business and grow with these rising customers. This book is groundbreaking in both its scope and its tailoring of leading KAM practices specifically for life sciences. The central theme is that "key account management is an organization-wide business strategy, not just a role or a sales-specific initiative." KAM is a strategy focused on providing unique offerings and value through an orchestrated, cross-functional, go-to-market model designed specifically to address the needs and engagement preferences of a unique segment of customers. The insights and practices shared in this book are designed to be a valuable reference at every stage of the KAM journey. The book has been designed to facilitate a common language and deep understanding of KAM issues and leading practices organization-wide—particularly for life sciences leaders, account managers and cross-functional team members responsible for building, transforming and supporting their organization's KAM strategies and capabilities.

#### Advanced Financial Reporting

This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook. This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach

(vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student.

### Modern Advanced Accounting
