

Osiris Volume 33 Science And Capitalism Entangled Histories

[#science and capitalism](#) [#history of science](#) [#economic history](#) [#academic journal Osiris](#) [#science economics relationship](#)

Osiris Volume 33 delves into the intricate and often surprising entangled histories of science and capitalism, presenting a critical examination of their reciprocal development. This essential volume explores how scientific progress has shaped economic systems, and conversely, how economic history and capitalist structures have influenced the direction and funding of scientific inquiry, offering crucial insights into their enduring science and capitalism relationship.
