It's time for the History Bomb of Stonehenge

12,000 years ago

This was a game changer for early man

And pioneer something called 'Agriculture

And so began the association of Salisbury Plain with death

A giant oval track in the chalk!

The Cursus' as it's now known, is a huge 3km oval

It's an area of flat land surrounded by a bank and a ditch

They initially built a ditch and a bank

Now known as the 'Aubrey Holes

It wasn't until 2,550 BC

The first stones to get here were the smaller bluestones

These particular bluestones got here from South Wales

50 years later the bluestones

Ah, conveniently located neolithic man

Can you tell me how these 50 tonne sarsen stones got here?

The Coordinated Relocation And Neolithic Earthworks Organisation

All You've Got To Do Is Exploit the Existing Fissures To Split those Pillars Away from the Face so if this Is the Kind of Technology That You Really Only Need To Make Primitive Wedge Holes Putted Wooden Wedges Wet Them and Let Nature Do the Rest What We Discovered Was that We Had an Entire Prehistoric Querying Complex the the Scale of What Was Going On Here Is Positively Industrial It Makes the Extraction of Us that Craig Reserved Ellen Look Very Very Feeble Indeed Now We We Were Partly Having To Deal with More Recent Querying from the 18th Century and that's Form this Skirt of Debris That You Can See on the Left Side of the Photograph

What We Discovered with that Not Only Were There Large Recesses Where Multiple Pillars Have Been Removed but in this Case There's Actually Four of those Pillars Still Waiting To Be Split and Taken Out at the Foot of the of the Outcrop There Is Also a Platform of Laid Slabs some of Them

Huge 3 Meters Long-Up to 2 Metres Wide Forming a Platform 5 by 8 Metres in Many Cases They'Ve Been Split and Then the Split Side Has Been Laid Up a Most beyond Them We Have a Zone Where the Orange Soil Is Relatively Stern Free and Then beyond that a Curving Line of Pact Stonework Stone That's Actually Packed into a Prehistoric Ditch

There Is Also a Platform of Laid Slabs some of Them Huge 3 Meters Long-Up to 2 Metres Wide Forming a Platform 5 by 8 Metres in Many Cases They'Ve Been Split and Then the Split Side Has Been Laid Up a Most beyond Them We Have a Zone Where the Orange Soil Is Relatively Stern Free and Then beyond that a Curving Line of Pact Stonework Stone That's Actually Packed into a Prehistoric Ditch and You'LI See the Two Main Stone Stuck into the Top of that Ditch Are Stones That Are Set on Edge and Have Long Sides What I Think We'Re Looking at Here Is some Kind of a Trestle Arrangement

And Then the Split Side Has Been Laid Up a Most beyond Them We Have a Zone Where the Orange Soil Is Relatively Stern Free and Then beyond that a Curving Line of Pact Stonework Stone That's Actually Packed into a Prehistoric Ditch and You'LI See the Two Main Stone Stuck into the Top of that Ditch Are Stones That Are Set on Edge and Have Long Sides What I Think We'Re Looking at Here Is some Kind of a Trestle Arrangement Which Is the Point at Which You Move the the Monolith onto a Wooden Sledge

And You'LI See the Two Main Stone Stuck into the Top of that Ditch Are Stones That Are Set on Edge and Have Long Sides What I Think We'Re Looking at Here Is some Kind of a Trestle Arrangement Which Is the Point at Which You Move the the Monolith onto a Wooden Sledge and Where the Scale Is that Is the Beginning of an Earth and Ramp About Six Inches Deep That Then Leads out of the Quarry and It's Sides Are Marked by Pits One of Which Contains a Small Fallen Author Statin Fred I Haven't Brought the Picture of that Now the Radiocarbon Dates We Have for that Platform in the Sediment That Is that Is between the Platform Blocks and underneath Them We Have Three Radiocarbon Dates Broadly between 3 , 300

And It Was There That We Realized that There Were a Whole Series of Potentially Prehistoric Monuments That Had Just Been Sitting There and Recognized by Anyone Now Afraid I'M Not Going To Be Able To Tell You Much about to Them and I Don't Think We Want To Get into the Trap of Telling You about Geophysics Results without Actually Ground True Thing for First Sorry that's a Bit Unkind but of Course the Question People Always Ask Is Right if It if They Acquired Them There How on Earth Did They Move Them and It's Been the Sea Journey That Has Captured Most People's Imaginations What the Geologists Have Demonstrated for Us and that We'Ve Followed Up with Excavation Is that You Can't Go Southwards from the Quarries because You Have To Go over the Top of the Mountain What the Geologists Have Demonstrated for Us and that We'Ve Followed Up with Excavation Is that You Can't Go Southwards from the Quarries because You Have To Go over the Top of the Mountain It's Always Been Thought that Kanmani Was the Source of the Spotted Dollar Rights but Actually Richard and Rob's Analysis Shows that We Have Not a Single Match between that Outcrop and the Blue Stones Analyzed at Stonehenge I'Ve Also I Took the Opportunity this Summer To Walk Over Come My Knee with Mike Pitt's Knowing What We Now Know about the Congo Quarries and I Have To Say I CanNot See a Single Instance Anywhere That Looks to Me like Neolithic Whirring a Car on My Knee I Don't Think It's Relevant At All
