Modern French Course

The second edition (1997) of this text was a completely rewritten version of the original text Basic Coastal Engineering published in 1978. This third edition makes several corrections, improvements and additions to the second edition. Basic Coastal Engineering is an introductory text on wave mechanics and coastal processes along with fundamentals that underline the practice of coastal engineering. This book was written for a senior or first postgraduate course in coastal engineering. It is also suitable for self study by anyone having a basic engineering or physical science background. The level of coverage does not require a math or fluid mechanics background beyond that presented in a typical undergraduate civil or mechanical engineering curriculum. The material presented in this text is based on the author's lecture notes from a one-semester course at Virginia Polytechnic Institute, Texas A&M University, and George Washington University, and a senior elective course at Lehigh University. The text contains examples to demonstrate the various analysis techniques that are presented and each chapter (except the first and last) has a collection of problems for the reader to solve that further demonstrate and expand upon the text material. Chapter 1 briefly describes the coastal environment and introduces the relatively new field of coastal engineering. Chapter 2 describes the two-dimensional characteristics of surface waves and presents the small-amplitude wave theory to support this description.

The analysis of UNESCO's audio-visual archives for their digitization has brought to light a forgotten album of thirty eight contact sheets and accompanying texts by Magnum photographer David "Chim" Seymour - a reportage commissioned by UNESCO in 1950 on the fight against illiteracy in southern Italy's Calabria region. A number of Seymour's photographs appeared in the March 1952 issue of the UNESCO Courier, accompanied by an article written by Carlo Levi, who gained worldwide fame with his 1945 memoir, *Christ Stopped at Eboli*.
