BULLETIN / DIV OF ENTOMOLOGY B

This is the first monograph on the Australian genera of Elateridae - click beetles. The book deals with 74 genera, among which 14 are newly recognised. The volume documents the entire Australian fauna and provides lavish illustrations of representative species, and typical examples of the male and female genitalia for each genus. The phylogeny of the genera is analysed and there is a checklist of all described species and appropriate bibliographic and type locality details are given.

SEE CONTEXT AND MAKE CONNECTIONS... ACROSS THE HUMANITIES The Humanities: Culture, Continuity & Change , 2e helps students see context and make connections across the humanities by tying together the entire cultural experience through a narrative storytelling approach. Written around Henry Sayre's belief that students learn best by remembering stories rather than memorizing facts, it captures the voices that have shaped and influenced human thinking and creativity throughout our history. With a stronger focus on engaging students in the critical thinking process, this new edition encourages students to deepen their understanding of how cultures influence one another, how ideas are exchanged and evolve over time, and how this collective process has led us to where we stand today. With several new features, this second edition helps students to understand context and make connections across time, place, and culture. This Books á la Carte Edition is an unbound, three-hole punched, loose-leaf version of the textbook and provides students the opportunity to personalize their book by incorporating their own notes and taking online the portion of the book they need to class -- all at a fraction of the bound book price.

For courses in Introduction to the Humanities See context and make connections across the humanities Throughout Discovering the Humanities, Third Edition, author Henry Sayre employs a storytelling approach that helps students see context and make connections across the humanities. Believing that people learn best by remembering stories rather than memorizing facts, Sayre weaves a compelling narrative of multifaceted cultural experiences that will resonate with students — throughout the course and beyond. By showing how cultures influence one another, and how ideas are exchanged and evolve over time, Discovering the Humanities helps students understand the cultural interplay that has shaped human thinking and creativity throughout our history. Also available with MyArtsLab® MyArtsLab for the Introduction to Humanities course extends learning online, engaging students and improving results. Media resources with assignments bring concepts to life, and offer students opportunities to practice applying what they've learned. And the Writing Space helps educators develop and assess concept mastery and critical thinking through writing, quickly and easily. Please note: this version of MyArtsLab does not include an eText. Discovering the Humanities, Third Edition is also available via REVEL™, an immersive learning experience designed for the way today's students read, think, and learn.

The Rural Carolinian [serial]; Volume 1

This fascinating serial provides a window into rural life in the Carolinas in the early 20th century. With articles on everything from farming and homemaking to politics and religion, it covers a wide range of topics. Each issue is packed with stories, photographs, and advertisements, making it a valuable resource for historians, sociologists, and anyone interested in the history of the American South. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. The Rural Carolinian [serial]; Volume 2

A collection of stories that present a vivid picture of life in rural South Carolina during the late 19th and early 20th centuries. The characters are complex and compelling, and the stories are woven with themes of love, family, and community. This is a must-read for anyone interested in Southern literature and culture. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Rural Life in the Lowcountry of South Carolina

South Carolina's Lowcountry is awash in history, mystery, and breathtaking beauty and is comprised of roughly 27 counties south and east of the Fall Line, a low, east-facing cliff paralleling the Atlantic coast. Over the past 300 years, farmers and their families, planters, and African Americans—both enslaved and freed—have shaped this area's culture. Through war, peace, poverty, and prosperity, the unique characteristics and customs of the Lowcountry have been woven together and form a rich, enigmatic tapestry distinct from any other. *Rural Life in the Lowcountry of South Carolina* contains over 200 previously unpublished images depicting life at the grassroots level during the first half of the 20th century. This volume presents a realistic and at times sobering view of everyday people and their struggles to make a living. Exploring such topics as growing crops, making syrup, and raising livestock, this volume also portrays the area's distinct architecture, evident in barns, farmhouses, and church buildings. As the state becomes more industrialized, residents are beginning to forget their agricultural heritage, and many know only the stories of elderly family members. These photographs, coupled with informative text, will bridge the present generations with the past.

Rural Life

Celebrates the rural life, its pleasures and hardships, and the beauty of the American landscape, in a series of reflections corresponding to the months of the year.

The Rural Life

Think you know what rural America is like? Discover a plurality of perspectives in this enlightening anthology of stories that turns preconceptions on their head. Gracie sees a chance of fitting in at her South Carolina private school, until a “white trash”—themed Halloween party has her steering clear of the rich kids. Samuel's Tejano family has both stood up to oppression and been a source of it, but now he's ready to own his true sexual identity. A Puerto Rican teen in Utah discovers that being a rodeo queen means embracing her heritage, not shedding it. . . . For most of America's history, rural people and culture have been casually mocked, stereotyped, and, in general, deeply misunderstood. Now an array of short stories, poetry, graphic short stories, and personal essays, along with anecdotes from the authors' real lives, dives deep into the complexity and diversity of rural America and the people who call it home. Fifteen extraordinary authors—diverse in ethnic background, sexual orientation, geographic location, and socioeconomic status—explore the challenges, beauty, and nuances of growing up in rural America. From a mountain town in New Mexico to the gorges of New York to the arctic tundra of Alaska, you'll find yourself visiting parts of this country you might not know existed—and meet characters whose lives might be surprisingly similar to your own. Featuring contributors: David Bowles Joseph Bruchac Veeda Bybee Nora Shalaway Carpenter Shae Carys S. A. Cosby Rob Costello Randy DuBurke David Macinnis Gill Nasugraq Rainey Hopson Estelle Laure Yamile Saied Méndez Ashley Hope Pérez Tirzah Price Monica Roe

The Sociology of Rural Life

Convicted serial murderer Gaskins offers his version of his life and crimes, describing the murders and tortures he committed without remorse.

Rural Voices

New York Times Bestseller The beloved actress and star of *One Tree Hill*, *White Collar*, and *Lethal Weapon*, Hilarie Burton Morgan, tells the story of leaving Hollywood for a radically different kind of life in upstate New York with her husband Jeffrey Dean Morgan—a celebration of community, family, and the value of hard work in small town America. While Hilarie Burton Morgan's hectic lifestyle as an actress in New York and Los Angeles gave her a comfortable life, it did not fulfill her spiritually or emotionally. After the birth of their first son, she and her husband Jeffrey Dean Morgan, the star of *The Walking Dead*, decided to make a major change: they bought a working farm in Rhinebeck, New York, and began a new chapter in their lives. *The Rural Diaries* chronicles her inspiring story of farm life: chopping wood, making dandelion wine, building chicken coops. Burton looks back at her transition from urban to country living—discovering how to manage a farm while raising her son and making friends with her new neighbors. She mixes charming stories of learning to raise alpacas and buying and revitalizing the town's beloved candy store, Samuel's Sweet Shop, with raw observations on the ups and downs of marriage and her struggles with secondary infertility. Burton also includes delicious recipes that can be made with fresh ingredients at home, as well as home renovation and gardening tips. Burton's charisma, wide eyed attitude, and fortitude—both internal and physical—propels this moving story of transformation and self-discovery. *The Rural Diaries* honors the values and lifestyle of small-town America and offers inspiration for anyone longing to embark on their own unconventional journey.

Final Truth

This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

The Rural Diaries

'All the charm, wonder, eccentricity and vigour of country life is here in these pages, and told with such engaging directness, detail and colour . . . Bliss' STEPHEN FRY 'A capacious work that contains multitudes . . . a work to amble through, seasonally, relishing the vivid dashes of colour and the precision and delicacy of the descriptions' THE SPECTATOR 'My favourite read of the year . . . warm, funny and moving' SUNDAY TIMES 'A writer whose pages you turn and then turn back immediately to re-read, relish and get by heart' SUSAN HILL, SUNDAY TELEGRAPH Ronald Blythe lived at the end of an overgrown farm track deep in the rolling countryside of the Stour Valley, on the border between Suffolk and Essex. His home was Bottengoms Farm, a sturdy yeoman's house once owned by the artist John Nash. From here, Blythe spent almost half a century observing the slow turn of the agricultural year, the church year and village life in a series of rich, lyrical rural diaries. Beginning with the arrival of snow on New Year's Day and ending with Christmas carols sung in the village church, *Next to Nature* invites us to witness a simple life richly lived. With gentle wit and keen observation Blythe meditates on his life and faith, on literature, art and history, and on our place in the landscape. It is a celebration of one of our greatest nature writers, and an unforgettable ode to the English countryside.

Corcoran Gallery of Art

It is 741. After conquering a continent for the Merovingian kings, only one thing stands between Charles Martel and the throne - he's dying. Charles cobbles together a plan to divide the kingdom among his three sons, betroth his daughter to a Lombard prince, and keep the Church unified behind them through his friend Bishop Boniface. Despite his best efforts, the only thing to reign after Charles's death is chaos. His daughter has no intention of marrying anyone, let alone a Lombard prince. His two eldest sons question the rights of their younger pagan stepbrother, and the Church demands a steep price for their support. Son battles son, Christianity battles paganism, and Charles's daughter flees his court for an enemy's love. Based on a true story, *Anvil of God* is a whirlwind of love, honor, sacrifice, and betrayal that follows a bereaved family's relentless quest for power and destiny.

Next to Nature

The "forgotten" second volume of *Capital*, Marx's world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx's theories.

Anvil of God

Ranging from the age of slavery to contemporary injustices, this groundbreaking history of race, gender and class inequality by the radical political activist Angela Davis offers an alternative view of female struggles for liberation. Tracing the intertwined histories of the abolitionist and women's suffrage movements, Davis examines the racism and class prejudice inherent in so much of white feminism, and in doing so brings to light new pioneering heroines, from field slaves to mill workers, who fought back and refused to accept the lives into which they were born. 'The power of her historical insights and the sweetness of her dream cannot be denied' The New York Times

Capital

First published in Britain in 1966, French Rural History is a study initially given as lectures in Oslo in 1929. It focuses on the fundamental problems of French agrarian history and places them in true perspective. Throughout the work, Marc Bloch analyses the issues in all their complexity and treats them practically, as would a man who was both a historian and a farmer. The work has been celebrated as a work of historical sociology, full of personality and unmistakable insight.

Nightmare

The "forgotten" second volume of Capital, Marx's world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx's theories.

Women, Race & Class

The first "narrative history" traces the thread that binds the dreams and aspirations of most Americans together, exploring shared history and sacred texts--the Constitution and the Declaration of Independence--in search of the origins of these ideas.

The Christian Union

This book tells the story of Ebenezer, a frontier community in colonial Georgia founded by a mountain community fleeing religious persecution in its native Salzburg. This study traces the lives of the settlers from the alpine world they left behind to their struggle for survival on the southern frontier of British America. Exploring their encounters with African and indigenous peoples with whom they had had no previous contact, this book examines their initial opposition to slavery and why they ultimately embraced it. Transatlantic in scope, this study will interest readers of European and American history alike.

French Rural History (Routledge Revivals)

"The basis for On Contested Shores has been under construction since before the Commandant released the planning guidance. As career Marine officers, who spent very little time at sea, the editors have long been concerned that the Marine Corps was becoming too land-centric, heavily reflecting the characteristics of a second land army. This has been true since 1991, when the Marine Corps participated in a land campaign in Iraq, and especially since 2001, when it participated in three land campaigns: Afghanistan, Iraq, and Syria. To fight these battles, the Marine Corps became heavier, upgraded equipment, and generally focused on counterinsurgency tactics vice amphibious warfare. While the Marine Corps always steps up to fight alongside the U.S. Army, its purpose is naval campaigns fought alongside the U.S. Navy. This book is in part a way to help figure out how to regain and maintain the skills necessary for maritime operations"--

Capital

During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

Southern Literature from 1579-1895

"The Swedish scientist Carl Linnaeus (1707-1778) is known as the father of modern biological taxonomy. One of the greatest scientists in history, he formalized and popularized the system of binomial nomenclature and classified thousands of species of plants and animals. In his field, he is so well known that he is often referred to simply as "L." In this comprehensive biography, Linnaeus scholar Gunnar Broberg, draws on a wide range of new research to paint a vivid and intimate portrait of the man. Delving deep into Linnaeus's correspondence and other contemporary sources, Broberg introduces reader's to Linnaeus's family and takes them along on his famous expedition to Lapland. He also investigates the scientist's private thoughts on subjects such as evolution and religion, which often yielded eccentric results. Despite, or perhaps because, of his great achievement, Linnaeus could be moody and egotistical, and this nuanced biography does not shy away from presenting both his scientific achievements and human failings"--

The American Dream

We are pleased to announce a new series of environmental history readers, suitable for students. Comprising essays selected from our journals, Environment and History and Environmental Values, each inexpensive paperback volume will address an important theme in environmental history, combining underlying theory and specific case-studies. The first volume, Bio-invaders, investigates the rhetoric and realities of exotic, introduced and 'alien' species. The book comprises a number of general essays, exploring and challenging common perceptions about such species, and a series of case studies of specific species in specific contexts. Its geographical coverage ranges from the United Kingdom to New Zealand by way of South Africa, India and Palestine; and the essays cover both historical and recent introductions.

Religion, Community, and Slavery on the Colonial Southern Frontier

When August Frugé joined the University of California Press in 1944, it was part of the University's printing department, publishing a modest number of books a year, mainly monographs by UC faculty members. When he retired as director 32 years later, the Press had been transformed into one of the largest, most distinguished university presses in the country, publishing more than 150 books annually in fields ranging from ancient history to contemporary film criticism, by notable authors from all over the world. August Frugé's memoir provides an exciting intellectual and topical story of the building of this great press. Along the way, it recalls battles for independence from the University administration, the Press's distinctive early style of book design, and many of the authors and staff who helped shape the Press in its formative years.

Language Behavior

The New York Times Bestseller A ground-breaking history of the class system in America, which challenges popular myths about equality in the land of opportunity. In this landmark book, Nancy Isenberg argues that the voters who boosted Trump all the way to the White House have been a permanent part of the American fabric, and reveals how the wretched and landless poor have existed from the time of the earliest British colonial settlements to today's hillbillies. Poor whites were central to the rise of the Republican Party in the early nineteenth century and the Civil War itself was fought over class issues nearly as much as it was fought over slavery. Reconstruction pitted white trash against newly freed slaves, which factored in the rise of eugenics - a widely popular movement embraced by

Theodore Roosevelt that targeted poor whites for sterilization. These poor were at the heart of New Deal reforms and Lyndon B. Johnson's Great Society; they are now offered up as entertainment in reality TV shows, and the label is applied to celebrities ranging from Dolly Parton to Bill Clinton. Marginalized as a class, white trash have always been at or near the centre of major political debates over the character of the American identity. Surveying political rhetoric and policy, popular literature and scientific theories over four hundred years, Isenberg upends assumptions about America's supposedly class-free society - where liberty and hard work were meant to ensure real social mobility - and forces a nation to face the truth about the enduring, malevolent nature of class.

On Contested Shores

The Civil War changed the United States in many ways—economic, political, and social. Of these changes, none was more important than Emancipation. Besides freeing nearly four million slaves, it brought agricultural wage labor to a reluctant South and gave a vote to black adult males in the former slave states. It also offered former slaves new opportunities in education, property ownership—and military service. From late 1862 to the spring of 1865, as the Civil War raged on, the federal government accepted more than 180,000 black men as soldiers, something it had never done before on such a scale. Known collectively as the United States Colored Troops and organized in segregated regiments led by white officers, some of these soldiers guarded army posts along major rivers; others fought Confederate raiders to protect Union supply trains, and still others took part in major operations like the Siege of Petersburg and the Battle of Nashville. After the war, many of the black regiments took up posts in the former Confederacy to enforce federal Reconstruction policy. *Freedom by the Sword* tells the story of these soldiers' recruitment, organization, and service. Thanks to its broad focus on every theater of the war and its concentration on what black soldiers actually contributed to Union victory, this volume stands alone among histories of the U.S. Colored Troops.

Media Spectacle

This account of the failed Compromise of 1850 a decade before the Civil War “has all the suspense of a novel . . . incisive and provocative” (*The Journal of American History*). In 1850, America was expanding rapidly westward as countless citizens went in search of land, opportunity—and, thanks to the gold rush in California, fortune. With settlements growing into towns and towns growing into cities, there was an urgent need for state and local government. But the simmering tension over slavery that existed between North and South would boil over as the effort to draw boundaries and establish civil administration proceeded. The slave states were concerned about the delicate balance of power tipping in the North's favor, while the free states were wary about an expansion of slavery. The debate in the United States Senate lasted for months, and the nation waited anxiously for a resolution. This book tells the story of these events and analyzes their political complexities—and how they served as a dramatic prologue to the civil war that would erupt a decade later.

The Man Who Organized Nature

First published in 1944, this is a detailed survey of twenty-four distinguished periodicals published in antebellum Georgia. Flanders shows that literary activity was generally confined to middle Georgia and often concentrated on themes of religion and morality, early American life, and European adventures. An extensive bibliography and three appendices give a comprehensive list of magazines published during the time, including dates, places of publication, and names of editors and publishers. More than nine hundred footnotes further elaborate on the analysis of backgrounds, local historical events, and information on contributors.

Bioinvaders

This list of settlers in Georgia up to 1741 is taken from a manuscript volume of the Earl of Egmont, purchased with twenty other volumes of manuscripts on early Georgia history by the University of Georgia in 1947. The 2,979 settlers are listed in alphabetical order, followed by their age, occupation, date of embarkation, date of arrival, lot in Savannah or in Frederica, and (where applicable) “Dead, Quitted, or Run Away.” Footnotes give additional information concerning many of the people listed. This volume was published in 1949 to help scholarly research in the history of colonial Georgia.

A Skeptic Among Scholars

Dramatizing the misery of the dust bowl migrants hoping to find work in California agriculture, this text starts with the scandals of the Spanish land grant purchases, and goes on to examine the experience of ethnic groups that have provided labour for California's agricultural industry.

White Trash

Most Americans know Appalachia through stereotyped images: moonshine and handicrafts, poverty and illiteracy, rugged terrain and isolated mountaineers. Historian David Hsiung maintains that in order to understand the origins of such stereotypes, we must look critically at their underlying concepts, especially those of isolation and community. Hsiung focuses on the mountainous area of upper East Tennessee, tracing this area's development from the first settlement in the eighteenth century to the eve of the Civil War. Through his examination, he identifies the different ways in which the region's inhabitants were connected to or separated from other peoples and places. Using an interdisciplinary framework, he analyzes geographical and sociocultural isolation from a number of perspectives, including transportation networks, changing economy, population movement, and topography. This provocative work will stimulate future studies of early Appalachia and serve as a model for the analysis of regional cultures.

Freedom by the Sword

The Gullah people are one of our most distinctive cultural groups. Isolated off the South Carolina-Georgia coast for nearly three centuries, the native black population of the Sea Islands has developed a vibrant way of life that remains, in many ways, as African as it is American. This landmark volume tells a multifaceted story of this venerable society, emphasizing its roots in Africa, its unique imprint on America, and current threats to its survival. With a keen sense of the limits to establishing origins and tracing adaptations, William S. Pollitzer discusses such aspects of Gullah history and culture as language, religion, family and social relationships, music, folklore, trades and skills, and arts and crafts. Readers will learn of the indigo- and rice-growing skills that slaves taught to their masters, the echoes of an African past that are woven into baskets and stitched into quilts, the forms and phrasings that identify Gullah speech, and much more. Pollitzer also presents a wealth of data on blood composition, bone structure, disease, and other biological factors. This research not only underscores ongoing health challenges to the Gullah people but also helps to highlight their complex ties to various African peoples. Drawing on fields from archaeology and anthropology to linguistics and medicine, *The Gullah People and Their African Heritage* celebrates a remarkable people and calls on us to help protect their irreplaceable culture.

Prologue to Conflict

'...a beautiful wrought study that belongs in every good library'. Publishers' Weekly '...remains a major contribution to Hardy studies' - Charles Osborne, Sunday Telegraph Originally published in 1971 and now for the first time reprinted, *Thomas Hardy: His Career as a Novelist* has long been recognized as a major - and exceptionally well-written - work of Hardy criticism that also set new standards for Hardy scholarship. A recent survey refers to it as 'one of the most permanently useful' of Hardy studies, characterized by an 'admirably clear, unpretentious style'. Although the central chapters are predominantly critical, offering independent readings of each of the novels (including those customarily considered 'minor'), those readings are developed within the context of available knowledge of Hardy's personal and intellectual backgrounds, his friendships and family relationships, and his evolution as a professional writer. Extensive use is made of Hardy's own manuscripts, notebooks, and letters and of the correspondence and reminiscences of those who knew him, and in a new preface Michael Millgate speaks of having sought to resolve 'the standard work/life dichotomy' by pursuing 'the unitary conception of a career'.

Early Georgia Magazines

"Duncan Phyfe (1770-1854), known during his lifetime as the "United States Rager," to this day remains America's best-known cabinetmaker. Establishing his reputation as a purveyor of luxury by designing high-quality furniture for New York's moneyed elite, Phyfe would come to count among his clients some of the nation's wealthiest and most storied families. This richly illustrated volume covers the full chronological sweep of the craftsman's distinguished career, from his earliest furniture-- which bears the influence of his 18th-century British predecessors Thomas Sheraton and Thomas Hope--to his late simplified designs in the Grecian Plain. More than sixty works by Phyfe and his workshop

are highlighted, including rarely seen pieces from private collections and several newly discovered documented works. Additionally, essays by leading scholars bring to light new information on Phyfe's life, his workshop production, and his roster of illustrious patrons. What unfolds is the story of Phyfe's remarkable transformation from a young immigrant craftsman to an accomplished master cabinetmaker and an American icon."--Publisher's website.
