Please cut off a 4x4 post to the right length
You can use a deep socket
You also use two jack stand to support the tractor
and roll the transaxle out
Small brush
Prime the pump & motor
Hold back the reverse/forward handle and turn
Much easier to have the tractor on jack stands
and roll the transaxle under the tractor

remove the foot plate which is covering up the fuel tank
drop the gearbox out of the tractor
drain the oil from the gearbox
clean off any residual oil
cleaning all the gunk out of the tight nooks and crannies
loosening up every single bolt at the impact wrench
inspect the inside of the gearbox
proceed to remove the original sealant from the case
apply the brand new sealant i'm using permatex ultra gray gasket
begin applying it at the bead of sealant
get around every single bolt
reapplying the sump
putting every single bolt back in obviously in the correct order
refilling it with oil
refit it to the machine using the trolley jack
bleed the gearbox
