Succeed in Your Medical School Interview

After completing the medical school application comes the last, and often most challenging aspect of the school selection process; the interview. Notoriously hard to prepare for, it's difficult to know what to read, what questions might be asked and how to answer them. How to Succeed In Your Medical School Interview de-mystifies the interview process. It provides clear guidelines and a unique framework; giving you the relevant points to consider while crucially leaving conclusions open to express your own opinions and personality. It provides a systematic and methodical process which enables you to mine information from examiners, whilst demonstrating your academic ability. With a huge bank of questions covering all aspects of the interview spectrum, including a specific section of Oxbridge questions, you will learn how to prepare, how to present yourself and most importantly, what to say.

The Medical School Interview

Fully revised, "The Medical School Interview" shows how to address bad grades, including GPA or MCAT, what to wear, how to deal with and address ethical questions, and other aspects of meeting with admission committees.

The Symposium on Diversity in the Health Professions in Honor of Herbert W. Nickens, M.D., was convened in March 2001 to provide a forum for health policymakers, health professions educators, education policymakers, researchers, and others to address three significant and contradictory challenges: the continued under-representation of African Americans, Hispanics, and Native Americans in health professions; the growth of these populations in the United States and subsequent pressure to address their health care needs; and the recent policy, legislative, and legal challenges to affirmative action that may limit access for underrepresented minority students to health professions training. What do we want for the next generation? What does our future hold? What can we do as adults to foster a positive future for our kids? Most parents, grandparents, teachers, and ministers I talk to want to equip the next generation with the necessary tools to be difference makers in their world, but they don't know how to. It feels as if we are fighting against a cultural wave that is making it harder and harder to lead our kids to love God and make a difference. So what do we do? This book takes a deep look into the culture of Generation Z and Generation Alpha. The intent is to create an understanding of how to raise a generation of contributors to the kingdom and how to remove the barriers that stand in our way. We all know that these emerging generations are welcoming us into a new digital frontier full of consumption, technology, and entertainment that is more focused on happiness than contribution. Our kids are also living in a world of skepticism about truth and faith. We will unpack these faith questions and explore the tensions that exist between older and younger generations. Our kids are the future of our churches, cities, states, and country. It is critical that we begin to acknowledge that as adults, we must be intentional in understanding the culture our kids live in and be humble in our approaches to developing them as faithful servants and successful adults. So how do we raise contributors? Let's begin to discuss practical ways to raise kids who are image bearers and difference makers. I call these kids contributors.
