Intro

Welcome to this interview training tutorial.

As a Radiographer, you have a huge amount of responsibility to not only assist in the diagnosis of patients to assess what is wrong with them, but you also have a strict duty to ensure the highest standards of safety in your work are adhered to.

As a Radiographer who takes great pride in my work, I want to work for not only the best organisation possible, but also one that is constantly looking to improve and develop

There are numerous skills and qualities needed to be a competent and effective Radiographer. First and foremost, you need an understanding of and a total commitment to the NHS Trust values as these are core to everything you do within the role.

Radiographers form an integral part of the great work carried out by the NHS. I would expect to be performing general x-ray duties in order to see inside a patient's body to diagnose what is wrong with them.

Dealing with upset, frustrated and even angry patients is all part of working in the NHS. For me, the most important thing to remember is that most of the time, patients are in a confusing and disorientating environment.
