Today as a Way of Thinking about the Urban Which Is Somewhere Negotiating between the Physical if You Like and the Theoretical or between the Physical and the Cultural and I Think this Dimension of How We Should Be Unfolding Deconstructing if You Like the Word Form Is Going To Be Very Important for the School in Many Ways in Terms of Discussions and Negotiations between Architecture and Urban Design in Terms of Discussions between Planning and Urban Design but Also Really in Terms of Helping Us To Rethink the Kind of Roles and Possibilities and and New Kinds of Speculations for What Urban

I Would Like To Think Together with You Today on the Following Question Considering Our Current Political Crisis around Climate Change What Can Architecture Contribute toward a New Planetary Imaginary of Our Contemporary Environment beyond Environmentalism and Technological Determinism Instead of Limiting the Role of Climate Change for Design Mainly to a Problem To Solve Can We Speculate on Architecture as a Measure against Which the Environment Might Be Read My Presentation Today Will Elaborate on these Questions and a Disciplinary Cultural Potentials of Such Provocations Main Argument of My Talk Will Be that Architecture Needs an Alternative Kind of Environmental Imagination That Is Able To See the Categories of the Quotidian

I Would Like To Argue Today that Such Shifts Are Equally Imperative within the Architecture Field Today in Parallel to the Recent Debates on Climate Change the Contemporary Architectural Imaginary of Our Environment Is Mostly Limited to the Following Pervasive Positions Which Are Poised To Lose Their Critical Relevance First Is the Attempt To See the Environment as Nature as Something To Be Saved and Protected Mixed with Feelings of Guilt As Well as Good Intentions of Ethical Responsibility To Go Back to a More Innocent State Imagining Environment as Purely Nature Lacks Necessary Humility and Embrace of Our Contemporary Condition the Problem with this View Is that if We as Humans Are Intervening on Everything on Earth from the Upper Atmosphere to the Deep Seas First Is the Attempt To See the Environment as Nature as Something To Be Saved and Protected Mixed with Feelings of Guilt As Well as Good Intentions of Ethical Responsibility To Go Back to a More Innocent State Imagining Environment as Purely Nature Lacks Necessary Humility and Embrace of Our Contemporary Condition the Problem with this View Is that if We as Humans Are Intervening on Everything on Earth from the Upper Atmosphere to the Deep Seas and the Nature as

The Onset of World War (Routledge Revivals)

First published in 1988, this historical and quantitative analysis of war defines systemic world wars as conflicts of wide scope and intensity, which leave profound historical legacies in their wake. Manus Midlarsky examines various possible explanations for the onset of such past wars as the Peloponnesian War, the Thirty Years' War, and World Wars I and II. Midlarsky develops his basic theory of systemic war, outlining the reasons for the absence of wars of this magnitude and describing the violations of certain structural conditions that are associated with the onset of world war. A timely and relevant reissue, this insightful analysis will be of particular value to those with an interest in International Relations, War and Peace Studies, Military History, and Security Studies.

The Onset of World War

Codenames were a vital feature of World War II, serving as mental shorthand for those in the know, and obscuring the issues for those who were not. Codenames were used from the highest level, in the planning of grand strategic moves affecting the conduct of the whole war, to the lowest command divisions, in the conduct of small-scale tactical operations. This encyclopedia, first published in 1986, removes the mystery surrounding many of the important code names from the era. With around 3,000 entries drawn from all sides – the U.K., U.S.A., Germany, the U.S.S.R. and Japan – Christopher Chant's work provides a uniquely comprehensive and full overview of major operations, names and code words. Thorough and exciting, this key reference reissue is an exceptionally valuable resource for military historians, enthusiasts and general readers with an interest in World War II.

The Encyclopedia of Codenames of World War II (Routledge Revivals)

The course of economic events from the start of the Second World War satisfied no-one. The housewife was exasperated by the rise in food prices, thousands of workers faced unemployment, and businessmen were bewildered by the flood of regulations and decrees. In this book, first published in 1940, R. W. B. Clarke explores the economic challenges that the UK faced in coping with the war, and possible ways in which these challenges could be resolved or improved. The book is vital reading for students of modern history and economics.

The Economic Effort of War (Routledge Revivals)

First published in 1992, this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen, thus increasing the likelihood of external actors being drawn into the on-going violence. Here, leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena. They also look at the conditions under which these processes do not occur and are mediated successfully. The authors combine theoretical perspectives with case studies, covering examples from the origins of the First World War, to state building in Iraq, and whether it was a precursor of the Iran-Iraq War and the Gulf Crisis. They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process. A comprehensive and relevant reissue, this volume will appeal to students and scholars of International Relations, Comparative Politics and Strategic Studies.

The Internationalization of Communal Strife (Routledge Revivals)

This comprehensive reader provides an overview of research in the study of the Second World War and includes chapters by some of the best known and most innovative scholars working today. It gives attention to the fighting of the war throughout the world.

The World War Two Reader

In the search for the causes of the First World War and the origins of Hitler's 'Third Reich', the attention of historians has turned increasingly towards the development of German society under Kaiser Wilhelm II. These ten essays, first published in 1978, introduced interpretations of Wilhelmine Germany to an English-speaking audience and contributed towards the discussion of these interpretations that were taking place amongst German historians. This book is ideal for student of history, particularly German history.

Society and Politics in Wilhelmine Germany (Routledge Revivals)

Lord Hankey (1877-1963) was a British civil servant and the first Cabinet Secretary, a top aide to Prime Minister David Lloyd George and the War Cabinet that directed Britain in World War One. Mostly derived from the author's diaries, which began in March 1915, this study describes how Lord Hankey contributed to the development of the British system of Cabinet Government during the war years. First published in 1961, the two-volume collection is a history of the Supreme Command of the War; the conduct of the war, the development of the Supreme Command from Balfour to Lloyd George, and the emergence of the Cabinet Secretariat from the Secretariat of the War Cabinet. It contains intimate glimpses of the statesmen, sailors and soldiers who guided affairs towards 1918. This is a fascinating first-hand examination of the people who influenced the conduct of the war, and will be of particular value to students interested in its diplomatic history.

The Supreme Command, 1914-1918 (Routledge Revivals)

This book, first published in 1963, discusses the events of the Paris Peace Conference- the meeting of Allied victors following the end of World War I to set peace terms. Lord Hankey discusses the political and military terms and issues, as well as those of individual countries. This book is ideal for students of modern history.

The Supreme Control at the Paris Peace Conference 1919 (Routledge Revivals)

First published in 1921, *Problems of a New World* deals with the economic and political issues that arose from the First World War. The first three parts of the study consider the world before the war, and the interests, purposes and ideals which influenced the national psyche during the years which followed. In the final two parts, Hobson assesses the political and economic conditions confronted by the post-war world, with a particular focus on the impact of war on industry, labour and the ideals of nationhood. This is an important work, of great interest to modern European and economic historians and students.

Problems of a New World (Routledge Revivals)

Since the Second World War, we have witnessed exciting, often confusing developments in the British theatre. This book, first published in 1976, presents an enlightening, objective history of the many facets of post-war British theatre and a fresh interpretation of theatre itself. The remarkable and profound changes which have taken place during this period range from the style and content of plays, through methods of acting, to shapes of theatres and the organisational habits of managers. Two national theatres have been brought almost simultaneously into existence; while at the other end of the financial scale, the fringe and pub theatres have kicked their way into vigorous life. The theatre in Britain has been one of the post-war success stories, to judge by its international renown and its mixture of experimental vitality and polished experience. In this book Elsom presents an approach to the problems of criticism and appreciation which range beyond those of literary analysis.

Post-War British Theatre (Routledge Revivals)

Lord Hankey (1877-1963) was a British civil servant and the first Cabinet Secretary, a top aide to Prime Minister David Lloyd George and the War Cabinet that directed Britain in World War One. Mostly derived from the author's diaries, which begin in March 1915, this study describes how Lord Hankey contributed to the development of the British system of Cabinet Government during the war years. first-hand examination of the people who influenced the conduct of the war, and will be of particular value to students interested in its diplomatic history.

The Supreme Command, 1914-1918 (Routledge Revivals)

This book, together with *A Book of Broadsheets* makes up an anthology of the 1915 broadsheets distributed by The Times to members of H.M. Forces serving in the trenches of World War I. The volume contains a wide variety of rich literature from before the war and was designed to give soldiers entertainment. It includes extracts from the works of Francis Bacon, Rudyard Kipling, Sir Walter Raleigh, William Wordsworth and Charles Dickens.

A Second Book of Broadsheets (Routledge Revivals)

First published in 1993, this book presents a biography of a central figure in the development of both the labour movement and British politics in the first half of the twentieth century. This highly accessible account of Bevin's life and career was the first to make use of documents pertaining to his activities during the Second World War and bring together numerous secondary studies to posit an alternative interpretation. The book is split into chronological sections dealing with his early years, his time as a trade union leader from 1911 to 1929, the beginnings of his involvement in the labour party during 1929-1939, and his time in office as Minister of Labour and then Foreign Secretary.

Ernest Bevin (Routledge Revivals)

First published in 1990, *National Security and International Relations* provides a concise analysis of the problem of national security in the twentieth century. It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world, and why some states tend to underinsure, while obsessively insecure states overinsure, frequently making others more insecure in the process. In the wake of two world wars and the threat of nuclear destruction, Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states. It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma. These range from international regimes, to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict, and U.S. and Soviet attempts to render nuclear competition safer through arms control and confidence building measures. Of special value to students of International Relations and Strategic Studies, this book will also interest those keen to understand the challenges embodied in Gorbachev's 'new thinking' in foreign policy.

National Security and International Relations (Routledge Revivals)

Originally published in 1988, this book examines the experiences of neutral states in Europe during the Second World War and in the postwar period. It examines both the practical and the theoretical considerations and the interface between the two, and discusses the implications of the experience of these countries for small states generally.

Neutrality and Small States

First published in 1915, *Towards International Government* considers the consequences of war for global diplomacy and the alliance system. Hobson argues that, to reduce armaments and the possibility of another world war, an organisational structure of international government must be put into place. An extension of the League of Nations, Hobson proposes that this council would need to hold legislative powers enabling it to impose economic sanctions and, if necessary, the ability to deploy an international force. This is a fascinating and exceptionally forward-thinking work, of great importance to economic and political historians of the twentieth century.

Towards International Government (Routledge Revivals)

First published in 1920, Paul Miliukov's book concerns the international nature of Bolshevism, both in terms of its ideologically internationalist doctrine of World Revolution and in terms of the attempts to spread Bolshevism in the period immediately preceding and following the First World War and the Russian revolution of October 1917. This reissue is a must for anyone interested in the rise of Bolshevism as an international force.

Bolshevism (Routledge Revivals)

The International Society for First World War Studies' ninth conference, 'War Time', drew together emerging and leading scholars to discuss, reflect upon, and consider the ways that time has been conceptualised both during the war itself and in subsequent scholarship. *War Time: First World War Perspectives on Temporality*, stemming from this 2016 conference, offers its readers a collection of the conference's most inspiring and thought-provoking papers from the next generation of First World War scholars. In its varied yet thematically-related chapters, the book aims to examine new chronologies of the Great War and bring together its military and social history. Its cohesive theme creates opportunities to find common ground and connections between these sub-disciplines of history, and prompts students and academics alike to seriously consider time as alternately a unifying, divisive, and ultimately shaping force in the conflict and its historiography. With content spanning land and air, the home and fighting fronts, multiple nations, and stretching to both pre-1914 and post-1918, these ten chapters by emerging researchers (plus an introductory chapter by the conference organisers, and a foreword by John Horne) offer an irreplaceable and invaluable snapshot of how the next generation of First World War scholars from eight countries were innovatively conceptualising the conflict and its legacy at the midpoint of its centenary.

War Time

First published in 1988, this annotated selection of Wilfred Owen's poetry and prose provides a comprehensive one-volume text of his best work. As well as the war poems, it includes illuminating early pieces such as 'Impressionist' and 'Little Claus and Big Claus', which illustrate Owen's early command of satire and narrative. The prose includes Owen's well-known draft Preface and a wide range of his letters, showing the devotion he felt for his mother, his poetic development after meeting Siegfried Sassoon, and, above all, his war experiences. With a detailed introduction and helpful commentary, this timely reissue will be of particular value to A-Level and undergraduate students with an interest in the work of Wilfred Owen, his contemporaries, and the context of the First World War.

Wilfred Owen (Routledge Revivals)

First published 1935, this title presents a series of recollections, some intimately personal, others bearing on the great social, cultural and political issues that faced the Jews and the European population more generally during the first part of the twentieth century. The author specifically focuses on differing attitudes towards the rise of Socialism in Europe, and the fate of nineteenth-century politics in the face of the tumultuous revolutions and counter-revolutions that arose in the aftermath of the First World War.

Fifty Years of International Socialism (Routledge Revivals)

First published in 1940, this book suggested the basic principles upon which a new international economic order should be built at the end of the Second World War. Particular attention is paid to the possibility of constructing such an international order on the basis of divergent national economic systems – whether liberal or planned, capitalist or socialist. In undertaking this task the author combines theoretical analysis with a description of the immediate pre-war economic situation and writes in a language which is equally accessible to the economist and the layman.

Fifty Years of International Socialism (Routledge Revivals)

First published in French in 1939, and later in English in 1940, this work by biologist, sociologist and social activist, Serge Chakotin, analyses and strongly critiques the effect of Nazi propaganda on the psychology of the masses. By bringing together the political and the psychological, Chakotin refers to the use of propaganda in order to serve the ends of a handful of men as 'psychical rape' and warns that this phenomenon cannot be attributed solely to the Nazi regime. The English translation was updated

to account for the outbreak of the Second World War in 1939. It will be of great interest to anyone studying the Second World War, Nazism, Fascism and the psychology of propaganda.

Routledge Revivals: The Rape of the Masses (1940)

First published in 1955 to wide acclaim, James Joll's introduction to the history and development of International Socialism before the First World War is of crucial importance for understanding the development of Left-wing movements in the 20th century. Incorporating insightful research into the international links and the ideological structure of socialism, as well as on the structure of individual parties and the actual nature of their working-class support, *The Second International* is a valuable resource for political historians and students of socialist thought alike.

The Second International (Routledge Revivals)

This book, first published in 1981, sets out the critical reaction to some fifty key post-war productions of the British theatre, as gauged primarily through the contemporary reviews of theatre critics. The plays chosen are each, in their different ways, important in their contribution to the development of the British theatre, covering the period from immediately after the Second World War, when British theatre fell into decline, through the revival of the late 1950s, to the time in which this book was first published, in which British theatre enjoyed a high international reputation for its diversity and quality. This book is ideal for theatre studies students, as well as for the general theatre-goer.

This book, together with *A Second Book of Broadsheets* makes up an anthology of the 1915 broadsheets distributed by *The Times* to members of H.M. Forces serving in the trenches of World War I. The volume contains a wide variety of rich literature from before the war and was designed to give soldiers entertainment. It includes extracts from the works of Thomas Hardy, Rudyard Kipling, William Shakespeare, William Wordsworth and Charles Dickens.

A Book of Broadsheets (Routledge Revivals)

This set reissues two volumes entitled *A Book of Broadsheets* and *A Second Book of Broadsheets*, both with introductions by Geoffrey Dawson, a former editor of *The Times*. Together, the books make up an anthology of the 1915 broadsheets distributed by *The Times* to members of H.M. Forces serving in the trenches of World War I. The volumes contain a wide variety of rich literature from before the war.

A Book of Broadsheets, 2 Volumes (Routledge Revivals)

In this challenging book, first published in 1987, Michelene Wandor looks at the best-known plays in the thirty years prior to publication, from *Look Back in Anger* onwards. Wandor investigates the representation of the family and different forms of sexuality in these plays and re-reviews them from a perspective that throws into sharp relief the function of gender as an important determinant of plot, setting and the portrayal of character. Juxtaposing the period before 1968, when statutory censorship was still in force, with the years following its abolition, Wandor scrutinises the key plays of, among others, Osborne, Pinter, Wesker, Arden, and Delaney. Each one is analysed in terms of its social context: the influence of World War II, the testing of gender roles, the development of the Welfare State and changes in family patterns, and the impact of feminist, Left-wing and gay politics. Throughout the period, two generations of playwrights and theatre-goers transformed the theatre into a forum in which they could articulate and explore the interaction of their interpersonal relationships with the wider political sphere. These changes are explored in this title, which will allow readers to re-evaluate their view of post-war British drama.

Look Back in Gender (Routledge Revivals)

First published in 1919, this book traces the growth of War Debt during the First World War, examines the real meaning of the Debt and discusses the proposals for clearing it. As the chief contemporary proposal put forward for meeting the interest and repaying the principal of the Debt was the "Conscription of Wealth"

Routledge Revivals: The War Debt and How to Meet It (1919)

The great inter-war depression has long been seen as an unprecedented economic disaster for the peoples of the non-European world. This book, with its detailed assessment of the impact of the depression on the economies of Africa and Asia, challenges the orthodox view, and is essential reading for those with a teaching or research interest in the modern economic history of those continents. Established specialists in the modern economic history of parts of Africa or Asia put forward a number of revisionist arguments. They show that some economies were left essentially unscathed by the depression, and that for many export-dependent peasant communities which did face a severe drop in cash income as world commodity prices collapsed from the late 1920s, there was a range of important responses and reactions by which they could defend their economic welfare. For many peasant communities the depression was not a disaster but an opportunity.

The Economies of Africa and Asia in the Inter-war Depression (Routledge Revivals)

First published in 1929, this book was written to express the belief that nations' commercial policy and doctrines could best be explained by reference to their history. The author argues that this applies equally to legislation and theory, for example both the McKinley Act of 1890 and contemporaneous protectionism are examined as the culmination of a century's worth of legislative and theoretical progress. This edition is also updated from the original 1891 publication to take account of the effect of the First World War on the European and American tariff systems, and also how the preferential system of trade within the British Empire recast relations between Britain and its dominions.

Routledge Revivals: The Commerce of Nations (1923)

Originally published in 1978, Richard Gombin's book traces the recurrent attitudes in the history of the European revolutionary movement which have criticized socialist and communist parties for their authoritarian and bureaucratic tendencies, and which have stressed spontaneity and decentralization as the correct basis from which to change society. From a critique of Marx, through to an examination of Soviet practice under Lenin, Trotsky and Stalin as a factor in the disillusionment of the left with the methods of the Russian Revolution, Gombin's study examines the concepts of 'workers' councils' as they emerged in several countries after the First World War. This comparative study develops the idea of a 'council communism' as opposed to a 'party communism' which, he suggests, is the fundamental concept in the criticism of orthodox Communism from the left.

The Radical Tradition

In *Rereading German History*, first published in 1997, Richard J. Evans draws together his seminal review essays on the political, economic, cultural and social history of Germany through war and reunification. This book provides a study of how and why historians – mainly German, American, British and French – have provided a series of differing and often conflicting readings of the German past. It also presents a reconsideration of German history in the light of the recent decline of the German Democratic Republic, collapse of the Berlin Wall and the reunification of Germany. *Rereading German History* re-examines major controversies in modern German history, such as the debate over Germany's 'special path' to modernity in the nineteenth and twentieth centuries, and the discussions in the 1980s on the uniqueness or otherwise of Auschwitz. Evans also analyses the arguments over the nature of German national identity. The book offers trenchant and important analytical insights into the history of Germany in the last two centuries, and is ideal reading material for students of modern history and German studies.

The American Experience in World War II: The atomic bomb in history and memory

First published in 1976, this book traces the development of the Yugoslav economy from the end of the Second World War to the beginning of 1975, which the author argues was a highly productive era of social innovation. Drawing on personal experience of the Revolution, the Partisan Liberation War and his time as a member of the Federal Planning Board as well as a comprehensive array of written sources, the author attempts to understand the development process, compare policy proclamations with achieved results, study the theories and ideas that led to certain policy, distinguish the economic and political ingredients in decision making and analyses the causes of success and failure.

The Yugoslav Economic System (Routledge Revivals)

The significant and sustained popular interest in the Second World War is matched by the scale and scope of scholarly engagement in the subject. The articles selected for this volume cover a wide range of topics reflecting the fact that the largest recorded war in history and the most intense period of global instability in the twentieth century, was fought by many different states, large and small, over differing periods of time and for many different reasons. In an area where there is no shortage of material to choose from, the articles presented here are distinguished for their depth of scholarship, stylistic elegance and inter-disciplinary confidence.

The Second World War

The Middle East is, and has always been, of major global economic and political importance. First published in 1981, this edited collection analyses many of the crucial issues that have had international repercussions during the second half of the twentieth century, with each paper considering the particular regional problems within the widest possible political framework. Internationally renowned authors consider such areas as the relationship between Israel and the Middle East, the influence of oil on global decision-making, Afghanistan and its neighbours, and the economic issues that the region has faced. A timely and relevant reissue, dealing with problems of continued importance, this volume will be of particular interest to students researching the history of the Middle Eastern conflict and the region's variety of relationships with the West.

The Defence of Terrorism, originally written in 1920 on a military train during the Russian Civil War, represents one of Trotsky's most wide-ranging and original contributions to the debates that dominated the 1920s and '30s. Trotsky's intention is "far away from any thought of defending terrorism in general". Rather, he seeks to promote an historical justification for the Revolution, by demonstrating that history has set up the 'revolutionary violence of the progressive class' against the 'conservative violence of the outworn classes'. The argument is developed in response to the influential Marxist intellectual Karl Kautsky, who refuted Trotsky's 'militarisation of labour' and Lenin's wholesale rejection of a 'bloodless revolution'. The introduction, written for the second edition of 1935, presents Trotsky's reflections on the similarities between Kautsky and the burgeoning British Labour Party: specifically, it recapitulates Trotsky's belief that revolution conducted according to the norms of Parliamentarianism is no revolution at all.
