### The Health Services Executive (HSE)

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. The Health Services Executive (HSETM): Tools for Leading Long-Term Care and Senior Living Organizations serves as a contemporary and comprehensive resource that addresses each of the core professional domains of practice and leadership essentials for long-term care administration students and professionals. With sections dedicated to postacute care settings, operations, leadership and management, this textbook covers information pertinent to the spectrum of senior living service lines – from inpatient rehab facilities, long-term acute care hospitals, nursing homes, assisted living, and residential care communities to home- and community-based services. It is a practical reference for both undergraduate and graduate students preparing to enter the field of long-term care administration and leadership, as well as for professionals transitioning to another line of postacute service. The textbook begins with a thorough history of the field, including the development of senior services in the United States. Section I then describes the components of customer care, supports, and services before transitioning into Section II, which addresses operations, including the core practice domains of effectively managing human resources, finances, and the environment. Section III offers a framework for leadership, covering strategic thinking and innovation, marketing and public relations, critical thinking and operation practice, customer service, and personal development. Case problems, discussion questions, leadership roles, high-impact practices, key points, and National Association of Long Term Care Administrator Boards (NAB) domain competencies conclude each chapter. Written by two highly experienced long-term care administrators, this textbook is intended for those preparing for the examinations administered by the NAB for the HSETM qualification or licensure for individual lines of service, such as for Nursing Home Administration (NHA), Residential Care and Assisted Living (RC/AL) and Home- and Community-Based Services (HCBS). Key Features: Provides best practices for leadership and management across the continuum of long-term care and senior living services Covers all five NAB professional practice domains: Customer Care, Supports and Services; Human Resources; Finance; Environment; and Leadership and Management Includes case problems, discussion questions, and more to foster critical thinking and decision-making skills Offers coverage of the most unique differences among service lines that are part of the HSETM initiative Weaves insightful quotes from industry leaders throughout chapters for practical tips and words of wisdom

#### The OECD Health Project Long-term Care for Older People

Americans are living longer, and the elder population is growing larger. To meet the ongoing need for quality information on elder health, the Encyclopedia of Aging and Public Health combines multiple perspectives to offer readers a more accurate and complete picture of the aging process. The book takes a biopsychosocial approach to the complexities of its subject. In-depth introductory chapters include coverage on a historical and demographic overview of aging in America, a guide to biological changes accompanying aging, an analysis of the diversity of the U.S. elder population, legal issues commonly affecting older adults, and the ethics of using cognitively impaired elders in research. From there, over 425 entries cover the gamut of topics, trends, diseases, and phenomena: -Specific populations, including ethnic minorities, custodial grandparents, and centenarians -Core medical conditions associated with aging, from cardiac and pulmonary diseases to Parkinson's and Alzheimer's -Mental and emotional disorders -Drugs/vitamins/alternative medicine -Disorders of the eyes, feet, and skin -Insomnia and sleep disorders; malnutrition and eating disorders -Sexual and gender-related concerns -And a broad array of social and political issues, including access to care, abuse/neglect, veterans' affairs, and assisted suicide Entries on not-quite-elders' concerns (e.g., midlife crisis, menopause) are featured as well. And all chapters and entries include references and resource lists. The Encyclopedia has been developed for maximum utility to clinicians, social workers, researchers, and public health professionals working with older adults. Its multidisciplinary coverage and scope of topics make this volume an invaluable reference for academic and public libraries.

#### The Continuum of Long-Term Care

This vital text offers a conceptual framework for creating an ideal integrated continuum of care., as well as concrete information about the components of the continuum as they exist today.

#### Encyclopedia of Aging and Public Health

Praise for earlier editions: "Beaulieu's book... clearly articulates what on-the-ground nursing home social work practice involves... These resources are useful as it is rare to be exposed to this type of information or detail during one's educational training... Beaulieu reveals layer upon layer of social worker roles, responsibilities, and important tools. This is a comprehensive guide for social workers."

-The Gerontologist This is an essential compendium of information and insight for the nursing home social worker on how to successfully navigate the day-to-day responsibilities and complexities of this role. Written for both new and seasoned social workers, it clearly addresses everything there is to know in one handy resource. The substantially updated third edition reflects the latest political, economic, and cultural trends and requirements for nursing home facilities and how they impact social workers. It includes a new chapter on how knowledge of Adverse Childhood Experiences (ACE) can aid in resident care plus major updates on disaster planning including workforce safety tips for pandemics and an expanded chapter on abuse, neglect, and mistreatment. Along with another new chapter to reflect current practice focusing on pandemics and disasters, including COVID-19. The book delineates specific resources and supplemental materials to assist the social worker in their daily role. The third edition is particularly relevant in its coverage of how ethnicity and culture impact nursing home admission and stays as well as undertreated pain in older adults. Purchase includes digital access for use on most mobile devices or computers. New to the Third Edition: Completely revised to consider the latest political, economic, and cultural trends and requirements for nursing homes and how they affect social workers New chapter on Adverse Childhood Experiences addressing how knowledge of childhood trauma can contribute to a caregiver's understanding and techniques Updated chapter on disaster to include pandemics, natural disasters, and violence in the workplace New workforce safety tips for pandemics Expanded chapter on abuse, neglect, and mistreatment Vignettes included to clarify and illuminate information Updated list of online resources Revised appendix of standardized forms

**Key Features:** Describes the full range of skills and knowledge needed to succeed in this varied and multidisciplinary role Includes multiple vignettes to illustrate information Provides weblinks to additional resources Designed to be practical and reader friendly Presented in a question-and-answer format to clarify content Offers review questions at the end of each section

### The Continuum of Long-term Care

This book broadens the visioning on new care environments that are designed to be inclusive, progressive, and convergent with the needs of an aging population. The contents cover a range of long-term care (LTC) settings in a single collection to address the needs of a wide audience. Due to the recent COVID-19 pandemic, rethinking the spatial design of care facilities in order to prepare for future respiratory and contagious pathogens is one of the prime concerns across the globe, along with social connectedness and autonomy in care settings. This book contributes to the next generation of knowledge and understanding of the growing field of the design of technology, programs, and environments for LTC that are more effective in infection prevention and control as well as social connectedness. To address these issues, the chapters are organized in four sections: Part I: Home- and community-based care; Part II: Facility-based care; Part III: Memory care and end-of-life care; and Part IV: Evidence-based applied projects and next steps. (Re)designing the Continuum of Care for Older Adults: The Future of Long-Term Care Settings is an essential resource for researchers, practitioners, educators, policymakers, and students associated with LTC home and healthcare settings. With diverse topics in theory, substantive issues, and methods, the contributions from notable researchers and scholars cover a range of innovative programming, environments, and technologies which can impact the changing needs and support for older adults and their families across the continuum of care.

### A Guide for Nursing Home Social Workers, Third Edition

Focused primarily on the older population, this clearly written book presents long term care from a management perspective. Dr. Abramovice, a leading authority in the field, examines the interrelationship between nursing homes, home health agencies, hospitals, hospices, and other institutions along the health care continuum, and emphasizes the value of all service delivery professionals from the head of maintenance, to the facility administrator, nurse, and dietitian. Long Term Care Administration explores the concepts that will provide future administrators with the flexibility to meet new challenges in a field that continues to undergo extensive change and revision.

### (Re)designing the Continuum of Care for Older Adults

Most people fear the idea of living in a long-term care facility. Yet, there is potential for joy and meaning in these settings. This book highlights expanded roles and services that mental health professionals can provide in long-term care for older adults, offering the potential to improve the quality of care for residents. Beyond assessments and individual therapy, the authors make a case for mental health providers to help improve the long-term care environment for both residents and staff, thus having a greater impact on systems, culture, and ultimately, patient well-being. Readers who wish to add or expand their services for older adults will find helpful guidance, including detailed instruction on Medicare policies and reimbursement practices. The authors also present an innovative model of wrap-around care that involves the array of staff and family members who are present to the individual all day, every day. This comprehensive approach, called the Eldercare Method, positions the mental health professional to serve in the roles of teacher, consultant, role model, advocate, and clinician. With numerous case examples to illustrate common scenarios and ethical dilemmas, this practical resource will help readers envision new ways to apply their skills in the rapidly growing field of long-term care for older adults.

### Long Term Care Administration

This book introduces human resources to practitioners and students in all disciplines related to health care and health service. It covers important topics such as recruitment, training, termination, legal issues, labor unions, and more. Each chapter is introduced by a case study related to the material that follows and is resolved at the conclusion of each chapter along with expert commentary and practical suggestions that can be used in the real world. Many examples and a number of sample forms and documents are included. This edition has been re-organized to reflect a better chapter flow and organization, and offers: all data updated throughout; a new section on health care legislation; a new section in each chapter, "Customer Service Box\

### Evidence: Helping people help themselves

As the largest generation in U.S. history - the population born in the two decades immediately following World War II - enters the age of risk for cognitive impairment, growing numbers of people will experience dementia (including Alzheimer's disease and related dementias). By one estimate, nearly 14 million people in the United States will be living with dementia by 2060. Like other hardships, the experience of living with dementia can bring unexpected moments of intimacy, growth, and compassion, but these diseases also affect people's capacity to work and carry out other activities and alter their relationships with loved ones, friends, and coworkers. Those who live with and care for individuals experiencing these diseases face challenges that include physical and emotional stress, difficult changes and losses in their relationships with life partners, loss of income, and interrupted connections to other activities and friends. From a societal perspective, these diseases place substantial demands on communities and on the institutions and government entities that support people living with dementia and their families, including the health care system, the providers of direct care, and others. Nevertheless, research in the social and behavioral sciences points to possibilities for preventing or slowing the development of dementia and for substantially reducing its social and economic impacts. At the request of the National Institute on Aging of the U.S. Department of Health and Human Services, *Reducing the Impact of Dementia in America* assesses the contributions of research in the social and behavioral sciences and identifies a research agenda for the coming decade. This report offers a blueprint for the next decade of behavioral and social science research to reduce the negative impact of dementia for America's diverse population. *Reducing the Impact of Dementia in America* calls for research that addresses the causes and solutions for disparities in both developing dementia and receiving adequate treatment and support. It calls for research that sets goals meaningful not just for scientists but for people living with dementia and those who support them as well. By 2030, an estimated 8.5 million Americans will have Alzheimer's disease and many more will have other forms of dementia. Through identifying priorities social and behavioral science research and recommending ways in which they can be pursued in a coordinated fashion, *Reducing the Impact of Dementia in America* will help produce research that improves the lives of all those affected by dementia.

### Transforming Long-term Care

This open access textbook represents a vital contribution to global health education, offering insights into health promotion as part of patient care for bachelor's and master's students in health care (nurses, occupational therapists, physiotherapists, radiotherapists, social care workers etc.) as well

as health care professionals, and providing an overview of the field of health science and health promotion for PhD students and researchers. Written by leading experts from seven countries in Europe, America, Africa and Asia, it first discusses the theory of health promotion and vital concepts. It then presents updated evidence-based health promotion approaches in different populations (people with chronic diseases, cancer, heart failure, dementia, mental disorders, long-term ICU patients, elderly individuals, families with newborn babies, palliative care patients) and examines different health promotion approaches integrated into primary care services. This edited scientific anthology provides much-needed knowledge, translating research into guidelines for practice. Today's medical approaches are highly developed; however, patients are human beings with a wholeness of body-mind-spirit. As such, providing high-quality and effective health care requires a holistic physical-psychological-social-spiritual model of health care is required. A great number of patients, both in hospitals and in primary health care, suffer from the lack of a holistic oriented health approach: Their condition is treated, but they feel scared, helpless and lonely. Health promotion focuses on improving people's health in spite of illnesses. Accordingly, health care that supports/promotes patients' health by identifying their health resources will result in better patient outcomes: shorter hospital stays, less re-hospitalization, being better able to cope at home and improved well-being, which in turn lead to lower health-care costs. This scientific anthology is the first of its kind, in that it connects health promotion with the salutogenic theory of health throughout the chapters. The authors here expand the understanding of health promotion beyond health protection and disease prevention. The book focuses on describing and explaining salutogenesis as an umbrella concept, not only as the key concept of sense of coherence.

#### Legal Essentials of Health Care Administration

Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.
