Intro

You have a patient that only likes to shower once weekly. It is important for you to realize what? You have a patient that does not drink adequate fluids. The patient is at risk for all of the following except

You have an 85 year old patient that you suspect is in pain. You know that indications of pain can include which of the following except?

The focus of providing ADLs in your patients include the following except

What is the proper measurement for measuring bodily fluids?

You have been busy during your 12 hour shift and haven't been able to empty your patient's Foley bag. You go in right before your shift is over to document output. What output amount would bring caution?

You have a patient on strict dysphasia precautions. The cafeteria sent her up a lunch tray. What item would you question if it arrived on the patient's tray?

You have a patient who is sweating, has a low heart rate, fruity smelling breath, and can barely speak to you. What is the next step you would take?

Which of these are important for the care of a diabetic patient?

The patient that is bed bound is at risk for which of the following?

Which of the following happens when a patient has a stroke?

12 Which of the following is the BEST way to prevent the spreading of germs?

The patient is lying in the supine position. In what position is the patient's bed?

Which of the following is an example of subjective information?

You are using a pulse oximeter on a patient. You know a pulse oximeter is used to measure what?

You have a patient that has incontinence who wears briefs. What is necessary for patients with stress incontinence?

17 You have a 70 year old patient that is usually pleasant and easy going. Today she has cognitive delays, is hitting and kicking, and does not know who the staff are. Which condition is the patient likely experiencing?

Which one of the following would require contact precautions?

You have a patient in restraints. You know the proper place to always tie restraints to is where?

How many fingers should you be able to slide under wrist restraints?

You have a patient with generalized weakness to transfer from the bed to the chair. Which transfer device would you use?

You have a patient that has pneumonia and is weak. What teaching would you provide to the patient?

You are putting linens on a patient's bed. You know that not having wrinkles in the sheets is important because

You see your diabetic patient is sweating, disoriented, and unable to speak. What is the first thing you would assess?

You have a patient who is incontinent of bowel and bladder. You know this patient is at increased risk for what?

20 Your patient is on strict I/O status. What is important to measure for this patient?

20 The CNA is assisting a female with toileting. Which of the following describes correct technique

2 An immobile client requires transfer from a chair to their bed. Which of the following should the CNA utilize to transfer this client?

The CNA is assisting to turn a client who has a foley catheter. Where should the foley catheter be anchored to prevent pulling on the catheter?

You have a patient that only seems to become confused and agitated after dark. What is the patient most likely experiencing?

In relation to the recent outbreaks of COVID that have affected long-term care facilities, the Certified Nursing Assistant (CNA) is aware that what problem has acutely risen with the residents?

nursing home residents in the United States. The Certified Nursing Assistant (CNA) is aware the

resident with delirium might suffer from what symptom?

The Certified Nursing Assistant (CNA) is aware that attention-seeking behaviors in the nursing home resident may include all of the following EXCEPT

The Certified Nursing Assistant (CNA) is aware that the long-term care resident may resort to manipulation of the staff. The CNA recognizes manipulation as what behavior?

30 The CNA is aware of common mental health issues that are experienced by elderly adults. These may be brought on by all the following situations EXCEPT when performing post-mortem care?

30 What is one physical change you may notice when death is approaching?

You come into work and you are assigned to a different hall than usual. You have a resident that you have never met before. What is the proper way to introduce yourself at the beginning of your shift and what do you call the resident?

You notice your resident is grimacing when you walk into his room. He is reluctant to say that he is in pain.

You have a resident that is blind. What is the BEST way to communicate with this resident?

You are in a rush to get your morning round of patient care done but your patient is in the middle of a story that he wants to tell you. How should you address this with the patient?

You are taking care of a resident who began hospice care last week. Today she is unable to speak and you are unsure if she can hear. The patient's daughter is at the bedside. How would you enter her room for private care?

A resident that usually loves going to Bingo game nights is sitting in her room crying. She states that she does not want to go to Bingo tonight. What is your response to her?

Upon finding some unlabeled pills in a nightstand, the CNA should

40 A resident's room is sloppy and the resident won't tidy

A resident states they wish their life would end. The CNA knows

A sometimes confused resident reports that something was taken from the room. The CNA should

If a CNA sees something a resident owns in the

So If a resident is found crying in a common area, the CNA should

If a resident reports that a family member is stealing money, the CNA should

If a resident reports that a family member hurt them during a visit and insist it be kept a secret, the CNA should

If another staff member hides the call bell from a resident who frequently uses it even though nothing is needed, the CNA should

You have a patient in soft wrist restraints. You must check the wrist restraints per the doctor's orders to ensure the patient's safety. Failure to do this can result in charges for

You have a confused patient who is always hitting her call light but never needs anything. You know that she is lonely and just wants someone to talk to. You are busy and decide to not answer her call light because she probably only wants to talk anyway. You know this can be seen as what?

So You have a patient that had a fall. You must write an incident report. What is the reason for an incident report?

50 The CNA is caring for a patient with an infection of *Clostridium difficile*. Which of the following would the CNA anticipate utilizing in caring for this client?

A client has a confirmed case of influenza. The CNA would anticipate using which infection control precautions when caring for this client?

Which of the following demonstrates a CNA intervention to foster client independence?
