Realms of Time

"Definitely the best of the series!" "Felt like I was part of the team--so much flippen fun." "Devoured it. Ready for the next book, like right NOW."-----Welcome to the fourth installment of the Scrapyard Ship series, Realms of Time. Captain Jason Reynolds and his team are up against a new, and unexpected foe--an adversarial force that has every intention of aligning with the powerful and dreaded Craing Empire. The enemy strikes from Earth's high orbit, deploying five time-shifting spheres. The spheres are strategically positioned to link-up and set Earth's clock back 100 years, erasing present time. But when that course of action is interrupted by The Lilly's crew, the results become far worse. Fluctuating time realms rapidly spread across the globe and threaten to rip the planet apart. Join Jason, Billy, Traveler, Ricket and Dira on their mission as they literally travel to the ends of time to bring Earth back to the twenty-first century.

Hab 12

"Buckle up--this is another crazy ride!" The Scrapyard Ship sci-fi "cliff-hanger" adventures continue with HAB 12, the second book in the series: Captain Jason Reynolds faces new challenges, not only on Earth but from the far side of the universe as well. The only way to stop the Craing this time will be to square off with them on their home turf. Jason's been informed that three powerful Craing warships, having similar technology as The Lilly, will soon be en route to Earth. The Alliance must destroy the Craing's wormhole means of distant space travel to avert Earth's total annihilation. Unfortunately, there's no way to reach the Craing worlds in time, at least not through conventional means. It's up to Jason and his hand-picked assault team to traverse, by advanced phase-shifting means, through the hazardous environment of HAB 12. This is an adventure fraught with carnivores of a Jurassic Age magnitude, and a terrain so deadly that turning back may be their only hope of survival. Note from the author: Don't be surprised by cliff-hanger endings. I'll do my best to keep Scrapyard Ship as well as the Tapped In series books coming so you won't have long to wait for the next book. Enjoy!

Scrapyard Legacy

Better buckle up ... the Scrapyard Ship gang is back for a new interstellar romp!... Over the past year, things have been relatively peaceful within the Planetary Alliance. Captain Jason Reynolds is looking forward to a fishing trip in the deep wilderness on Alantia Dastile with Michael, his six-year-old son. His

wife, Dira, and his father, the Fleet Omni, are away on a diplomatic mission to the Sommis of Adriark. It's the perfect time for an interstellar getaway. Or is it? Jason just needs to check on one thing first--a flurry of mechanical issues recently plaguing the Parcical, the Omni's Rogue Class spacecraft--something about a Zoo habitat using increasing amounts of the vessel's memory, that and a flurry of malfunctions with onboard Caldurian technologies. Caught off guard, it's soon discovered; a different kind of war is coming. The Alliance is not prepared. The U.S. Fleet is not prepared. A new enemy rears its ugly head and quickly becomes the dominant force within the sector. For those who survive the coming rampage -- the coming war -- everything will change. The Scrapyard Ship gang unites one more time for this action-packed adventure. Together, they will endeavor to give the Planetary Alliance a fighting chance against almost certain devastation that's heading toward the Sol system.

Space Vengeance

"I LOVED this book!" "Great Book!" "Get Another Fix!" "Fun and Great Series!" "The crazy ride continues... and never lets up!" Captain Jason Reynolds is back! In the third installment of the Scrapyard Ship sci-fi adventure series, Space Vengeance, Jason, his family, and The Lilly's crew face the impending destruction of their internal nano-devices. What's worse, what remains of the Craing fleet, some 1500 warships, is back and headed straight toward the already decimated planets within Allied space. In what looks to be a one-way suicide mission, Jason must leave Nan and Mollie behind on Earth and out of harm's way. While war rages on sixty light years from Earth, maniacal space raider Captain Stalls and hundreds of his pirated warships close in on Earth. Stalls knows exactly what he wants: to find and kill Captain Reynolds and take the beautiful Nan Reynolds for his own. Note from the author: If you've made it to this third installment, you already realize this is an ongoing series. With that said, more often than not these books have cliff-hanger endings!

Plague Ship

Chairman Juan Cabrillo and the rest of the Corporation's mercenaries fight to stop a corrupt activist group from unleashing a viral attack in this #1 New York Times-bestselling adventure from the Oregon Files. Captained by the rakish, one-legged Juan Cabrillo and manned by a crew of former military and spy personnel, the Oregon is a private enterprise, available for any government agency that can afford it. They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate -- and as perilous -- as any he has ever known and pitted against a cult with monstrously lethal plans for the human race. . . plans he may already be too late to stop

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Starship Alexander

A washed-up captain. A worn-out ship. A crew of green cadets. And they're Earth's only hope. The Alexander is the last true warship, a relic from the days of interstellar war. She's destined for the scrapyard, and her captain, Richard Hammett, is about to retire. Their last mission is a training run

with a ship full of cadets. It's supposed to be a routine hop through a wormhole Gate. But Gates have been going offline, one after another, and Hammett knows in his bones it means trouble. The kind of trouble only a real warship can handle. Defying orders, he takes the Alexander through another Gate, and puts the ship smack dab in the path of an alien invasion. Now a captain at the end of his career will have to take dozens of terrified cadets and forge them into a crew of warriors, because the Alexander is all that stands between the Earth and the swarming ships of the Hive.

Gun Ship

Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. *Earth 2020: An Insider's Guide to a Rapidly Changing Planet* responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. *Earth 2020* is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

Earth 2020: An Insider's Guide to a Rapidly Changing Planet

Examines differences in taste between modern French classes, discusses the relationship between culture and politics, and outlines the strategies of pretension.

Distinction

An ancient starship discovered...An eternal enemy revealed...An impossible mission to save humankind...The Goliath has been discovered, the first of its secrets revealed. Now the race is on for Captain Mitchell Williams and his crew to return to Liberty and recover Origin's lost memories before the enemy can complete its violent conquest. It's a mission with a near-zero chance of success. A mission that only the Riggers would be crazy enough to accept, and skilled enough to survive. A mission that will test the limits of Mitchell's mind, body, and soul, and force him to make an impossible choice that could cost the lives of millions. This is war, and if he can't win a battle for a single planet, how can he possibly change the outcome of a conflict that has raged beyond eternity?

The End of Liberty (War Eternal, Book Two)

1. The Weightless World -- 2. Where Have All The Jobs Gone? -- 3. Weightless Work -- 4. Nourishing the Grass Roots -- 5. Fear of Flexibility -- 6. The End of Welfare -- 7. The Ageing of Nations -- 8. Globalism and Globaloney -- 9. Visible and Invisible Cities -- 10. Weightless Government.

The Weightless World

A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers. Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. *Pretty Much Everything* is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like *Field Notes* and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, *Pretty Much Everything* is the complete package.

Draplin Design Co.

Move Over, Buffy! Tinker Not Only Kicks Supernatural Butt Shes a Techie Genius, Too! Inventor, girl genius Tinker lives in a near-future Pittsburgh which now exists mostly in the land of the elves. She runs her salvage business, pays her taxes, and tries to keep the local ambient level of magic down with gadgets of her own design. When a pack of wargs chase an Elven noble into her scrap yard, life as she knows it takes a serious detour. Tinker finds herself taking on the Elven court, the NSA, the Elven Interdimensional Agency, technology smugglers and a college-minded Xenobiologist as she tries to stay focused on what's really important her first date. Armed with an intelligence the size of a planet, steel toed boots, and a junk yard dog attitude, Tinker is ready to kick butt to get her first kiss. At the publisher's request, this title is sold without DRM (Digital Rights Management). "Each and every character is fascinating, extraordinarily well-developed, and gets right under your skin. . . . A terrific, memorable story." ¾Julie E. Czerneda, author of *In the Company of Others* "Spencer takes her readers on a fast-paced journey into disbelief. [Her] timing is impeccable and the denouement stunning." ¾Romantic Times (four-star review) "This novel [Alien Taste] is keeper-shelf material." ¾BookBrowser "Wonderfully inventive . . . a fun protagonist." ¾Locus

Tinker

The Great Space They knew the day would come--the day when Earth itself would come under direct attack by the Craing. After destroying much of Jhardon and the Mau planet of Carz-Mau, an elite Vanguard fleet of seven Craing dreadnaughts, planet killers, enters Earth's orbit. Captain Jason Reynolds and the crew aboard his Caldurian ship, The Lilly, are once again pulled into action to fend off what just might be their most ruthless and powerful adversary yet. In an unanticipated turn of events, thousands of molt weevils are unleashed on Earth, swarming insectoid aliens with one intent ... kill every man, woman, and child on the surface of the planet. Nan and Mollie must utilize their own cunning and resourcefulness to stay alive long enough to be rescued.

The Great Space

"TRANSMISSION is riveting, unexpected, and firmly rooted in strong psychological profiles backed with thriller and sci-fi elements: what more could readers wish for? (Just the quick publication of Book Two, *Arrival*.)" --Midwest Book Review From #1 worldwide bestselling fantasy author Morgan Rice comes book #3 in a long-anticipated science fiction series. With planet Earth destroyed, what will become of 13 year old Kevin and Chloe in the mother ship? Will the aliens enslave them? What do they want? Is there any hope of escape? And will Kevin and Chloe ever return to Earth again? "Action-packed Rice's writing is solid and the premise intriguing." --Publishers Weekly, re *A Quest of Heroes* "A superior fantasy... A recommended winner for any who enjoy epic fantasy writing fueled by powerful, believable young adult protagonists." --Midwest Book Review, re *Rise of the Dragons* "An action packed fantasy sure to please fans of Morgan Rice's previous novels, along with fans of works such as *THE INHERITANCE CYCLE* by Christopher Paolini.... Fans of Young Adult Fiction will devour this latest work by Rice and beg for more." --The Wanderer, A Literary Journal (regarding *Rise of the Dragons*) Book #4 in the series is also now available! Also available are Morgan Rice's many series in the fantasy genre, including *A QUEST OF HEROES (BOOK #1 IN THE SORCERER'S RING)*, a free download with over 1,300 five star reviews!

Ascent (The Invasion Chronicles—Book Three): A Science Fiction Thriller

The Hidden Ship - Blurb I am Brian Polk, a captain in the U.S. Air Force. Was already back stateside for close to a year when all hell broke loose--otherwise I'd be dead right now--like the tens of millions of other poor souls lost. Military installations worldwide were the first targets hit. It was a reign of terror--an interstellar invasion--the beginning of the end of civilization as we knew it. The largest cities were turned to rubble. Government centers were laid to waste, then law enforcement resources were targeted. Finally, the aliens eliminated humanity's means to electronically communicate. The Earupitan's technology, their weaponry, was so remarkable and advanced that we never had a chance. But now, two years later, we're long past self-incrimination--playing the blame game. Today they walk brazenly among us--their reptilian eyes always watchful, always scrutinizing. At their discretion they drag any of us into their headquarters. Most seized never see the light of day after that. Many of us live in fear, wondering what's next for humanity. Then again, there are some amongst us who have befriended the enemy. But not me. I'm far more interested in killing them, maybe a lot of them. Luckily, I possess something of theirs. Something dangerous. So in my own small way I just might make a difference--that, or die trying.

The Hidden Ship

For the first time ever, Bill Willingham's acclaimed, Eisner Award-winning series FABLES is presented in a deluxe hardcover edition collecting issues #1-10. When a savage creature known only as the Adversary conquered the fabled lands of legends and fairy tales, all of the infamous inhabitants of folklore were forced into exile. Disguised among the normal citizens of modern-day New York, these magical characters have created their own peaceful and secret society within an exclusive luxury apartment building called Fabletown. When Snow White's party-girl sister, Rose Red, is apparently murdered, it's up to Fabletown's sheriff, the reformed and pardoned Big Bad Wolf, to find the killer. Meanwhile, trouble of a different sort brews at the Fables' upstate farm where non-human inhabitants are preaching revolution – and threatening Fabletown's carefully nurtured secrecy.

Fables: The Deluxe Edition Book One

First Contact: Assess human with the flawed, rudimentary, mind ... It's a moonless summer night when a severely damaged intergalactic spacecraft enters Earth's upper orbit. The alien pilot is desperate. Needs to hold up long enough to make repairs--do so before his pursuers find him. Cuddy Perkins lives a simple life with his mother, his dog Rufus, and a scattering of farm animals that still inhabit their old, dilapidated, Woodbury Tennessee ranch. He was used to the insults; retard ... simpleton ... village idiot. Momma says to just ignore them ... people can be heartless. But Cuddy already knew he was different. Ever since the accident back when he was seven. He didn't know how long ago that was, exactly, but he did know he was pretty big now--he was taller than his older brother, Kyle ... who was in prison, as well as the Woodbury Sherriff--the man who put him there. Unbeknownst to Cuddy Perkin's, his simple, uneventful, life was about to be turned completely upside down.

The Simpleton

This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. Digital Rubbish: A Natural History of Electronics describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys draws together the far-reaching material and cultural processes that enable the making and breaking of these technologies.

Digital Rubbish

Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

USS Hamilton

****Winner of the Financial Times and Goldman Sachs Business Book of the Year Award**** 'Brad Stone's definitive book on Amazon and Bezos' The Guardian 'A masterclass in deeply researched investigative financial journalism . . . riveting' The Times The definitive story of the largest and most influential company in the world and the man whose drive and determination changed business forever. Though Amazon.com started off delivering books through the mail, its visionary founder, Jeff Bezos, was never content with being just a bookseller. He wanted Amazon to become 'the everything store', offering limitless selection and seductive convenience at disruptively low prices. To achieve that end, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now... Jeff Bezos stands out for his relentless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way that Henry Ford revolutionised manufacturing. Amazon placed one of the first and largest bets on the Internet. Nothing would ever be the same again.

The Arcades Project

Craing Dominion, Book 5 of the best-selling Scrapyard Ship series. Truly dark times have come to the Allied forces, the crew of The Lilly, and Earth -- we knew they were coming but nothing will have prepared you for this ...With the introduction of Craing commander Ot-Mul, there's a new standard for evil that will not only shape the rest of this series, but Science Fiction literature as a whole. Join Captain Jason Reynolds as he ventures into the proverbial lion's den in a last ditch effort to even the playing field with the Craing -- an empire that has embarked on a pursuit that will guarantee their de facto dominance for millennia to come.

The Everything Store: Jeff Bezos and the Age of Amazon

Winner of the Wellcome Book Prize 2017. Longlisted for the Man Booker International Prize 2016. Now a major French film, REPAREZ LES VIVANTS/HEAL THE LIVING, directed by Katell Quillevere and starring Emmanuelle Seigner. A twenty-four-hour whirlwind of death and life. In the depths of a winter's night, the heart of Simon Limbeau is resting, readying itself for the day to come. In a few hours' time, just before six, his alarm will go off and he will venture into the freezing dawn, drive down to the beach, and go surfing with his friends. A trip he has made a hundred times and yet, today, the heart of Simon Limbeau will encounter a very different course. But for now, the black-box of his body is free to leap, swell, melt and sink, just as it has throughout the years of Simon's young life. 5.50 a.m. This is his heart. And here is its story. Translated from the French by Jessica Moore

Craing Dominion

Based on first-hand experience with companies such as Volvo, BP, Procter and Gamble, ICI and Fuji Xerox, Elkington defines the triple bottom line of 21st century business as profit, environmental sustainability and social responsibility.

Mend the Living

Bristol's Green Roots has drawn on the thoughts and memories of more than a hundred people who have worked in Bristol's environmental movement over the last 40 years to make our city, and the world, more sustainable, people-friendly and equal. Tracing the beginnings of organisations like Sustrans, Centre for Sustainable Energy and Bristol Friends of the Earth as well as the work of some of the extraordinarily dedicated sustainable businesses, community groups, initiatives and individuals, this publication celebrates the achievements of those who strive to make Bristol a better place to live. Bristol's Green Roots is a Schumacher Institute project supported by the Heritage Lottery Fund. It documents the history of Bristol's modern environmental movement to ensure that the achievements, successes and lessons learned over the past four decades are recorded for future generations.

Cannibals with Forks

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Beyond Observation is structured by the argument that the 'ethnographicness' of a film should not be determined by the fact that it is about an exotic culture – the popular view – nor because it has apparently not been authored – a long-standing academic view – but rather because it adheres to the norms of ethnographic practice more generally. On these grounds, the book covers a large number of films made in a broad range of styles across a 120-year period, from the Arctic to Africa, from the cities of China to rural Vermont. Paul Henley discusses films made within reportage, exotic melodrama and travelogue genres in the period before the Second World War, as well as more conventionally ethnographic films made for academic or state-funded educational purposes. The book explores the work of film-makers such as John Marshall, Asen Balikci, Ian Dunlop and Timothy Asch in the post-war period, considering ideas about authorship developed by Jean Rouch, Robert Gardner and Colin Young. It also discusses films authored by indigenous subjects themselves using the new video technology of the 1970s and the ethnographic films that flourished on British television until the 1990s. In the final part of the book, Henley examines the recent work of David and Judith MacDougall and the Harvard Sensory Ethnography Lab, before concluding with an assessment of a range of films authored in a participatory manner as possible future models.

USS Hamilton

Carmer and Grit investigate a mysteriously magical flying circus in the follow-up to "a fun and frolicking middle grade adventure full of enough fantasy, humor and heart to make giddy even the most finicky

reader.” (BookPage) Shortly after saving the faeries of Skemantis, magician’s apprentice Felix Carmer III and his faerie companion, Grit, head out to see the world. They soon come across a mysteriously magical flying circus. As they get to know the outlandish world of Rinka Tinka’s Roving Wonder Show, it becomes clear there’s something not quite normal about this circus or its inventor—and that recent airship disasters plaguing nearby Driftside City may have a sinister explanation. Fans of the Wildwood trilogy and Lockwood & Co. series will love the thrills and chills of Carmer and Grit, Book 2: The Crooked Castle as it takes readers up in the air with a flying circus, under the sea to the evil Unseelie kingdom, through a terrifying magical snowstorm, and on a chase with the menacing Wild Hunt.

Boy Gone

The author explores dozens of scriptural passages from the psalms, offering personal ideas and insights and sharing his testimony that "no matter what the trouble and trial of the day may be, we start and finish with the eternal truth that God is for us."--

Bristol's Green Roots

When a cluster of blazingly fast meteorites strikes Earth's upper stratosphere in the year 2129, they release three destabilizing elements into the atmosphere-Strongzine, Stradamine, and Starlox-which encircle the Earth's surface in a thick, partially solidified layer of cloud and begin to spew a constant stream of acid rain onto the surface below. Organic life forms are all but obliterated, and the human race is reduced to a tiny fraction of its population. This event is known as the Ruin. But five centuries later, humanity still survives. Cloudwalkers tells the story of Conn Brataich, a young man who lives a privileged life above the cloudbank, relying on his noble heritage-and the abilities it provides-to guide him through his beautiful but treacherous realm in the New York skylands, and Misty Casper, a Grounder who lives an arduous and somber life hundreds of feet below in the former subway tunnels of crumbling midtown Manhattan. Their two cultures live in uneasy, segregated codependence, rarely interacting until late one fall evening when, mysteriously, an experienced Cloudwalker of noble blood falls five hundred feet to his death. Conn is sent to recover the body in secret, but he doesn't expect to encounter Misty on the dangerous streets of the dying city. Their chance encounter triggers a domino effect that throws them both headlong into a struggle for their very survival. Conn and Misty soon discover that only by working together can they succeed, but first they'll have to put aside their preconceived notions about one another. Dark forces, long thought to have been expunged, have returned and are threatening to destroy both their ways of life. Through love, loss, and the looming threat of war, Misty and Conn will be forced to face their greatest fears for the sake of their very world and each other.

Beyond observation

300+ pages of diagrams, descriptions of techniques and a comprehensive overview of the role direct action plays in resistance--from planning an action, doing a soft blockade, putting up a treesit or executing a lockdown; to legal and prisoner support, direct action trainings, fun political pranks, and more. The DAM has been compiled and updated by frontline activists from around the US to help spread the knowledge and get these skills farther out in the world.

Carmer and Grit, Book Two: The Crooked Castle

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. Shipping and Logistics Management also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants.

For Times of Trouble

Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

Cloudwalkers

This updated edition of *The Secret State* revises Hennessy's picture of the Soviet threat that was presented to ministers from the last days of the Second World War to the 1960s. He maps the size and shape of the Cold War state built in response to that perceived threat, and traces the arguments successive generations of ministers, the military and civil servants have used to justify the British nuclear capability. He also adds new material exploring the threats presented by the IRA and radical Islamic terrorists post 9/11. In what circumstances would the Prime Minister authorize the use of nuclear force and how would his orders be carried out? What would the Queen be told and when? In this captivating new account, Peter Hennessy provides the best answers we have yet had to these questions.

Earth First! Direct Action Manual

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. *Out of the Ordinary* captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was serving aboard *The City of Bath*. *Out of the Ordinary* is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. *Out of the Ordinary* is a landmark publication that sets free a distinct voice from the history of the transgender movement.

Shipping and Logistics Management

Out Of Control

All about Scabs

For all those curious children (and their parents) in the Crash! Scrape! Bam! stage of exploration - All About Scabs is exactly what the title says, and this non-fiction classic may even help with the healing process!

The Science of Scabs and Pus

This gruesome guide to blood uses fact-packed, easy-to-read text and humorous illustrations to explore the structure, uses, and lifecycle of blood, covering everything from why we grow scabs over cuts to why people donate blood at hospitals. Each spread has multiple entry points, including an introductory paragraph, illustrations and side panels such as Fascinating Facts, Helpful Hint, Can You Believe It?, and Disgusting Data, which provide additional information and handy advice.

My Body Science Series Super Set

Boxed set of 4 books explores the science of the body in a humorous, yet factual way.

Clot & Scab

Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! Have you ever crashed your bike and torn up your knee? Or have you been hit in the face by a ball and gotten a big shiny bruise around your eye? Have any of your scabs ever oozed with gross-looking pus? Blood, bruises, and scabs are all part of your body's healing process. But sometimes you need a little extra help - from stitches, staples, or maybe even maggots and leeches! Hey, people do crazy things. Learn how your body repairs itself and what happens when something goes wrong, like getting gangrene (eew!). With close-up pictures and lots of disgusting facts, this book tells all about the gross science behind your body's functions.

Scab

Yesterday, I had a bloody scrape from falling off my bike. But today there's a scab! Why does my body do that? Explore the silly body science of scabs. Learn why scabs happen, why they are healthy, and more. Lively text and bright layouts make this a perfect fit for budding scientists asking big body questions.

Contemplating Your Bellybutton

A delightful, straightforward book to help answer children's questions about birth, babies, and their own anatomy. Definitely worth contemplating!

Breasts

Breasts tells it like it is - and like it should be! Exploring the inner workings of breasts and their important role in feeding the babies of the world, it gives, in a funny and direct way, information children want and need about their anatomy.

The Holes in Your Nose

This second book in the My Body Science series confronts the curiosity children have about the holes in their noses. For an entertaining, informative and hopefully helpful few minutes, read this book to a child. You'll both have fun! Full color.

A Drop of Blood

You've seen your own blood, when you have a cut or a scrape. You can see the veins in your wrist, and you've seen the scab that forms as a cut heals. But do you know what blood does for you? Without blood, you couldn't play, or grow, or learn. That's because just about every part of your body needs blood, from your muscles to your bones to your brain. How does your body use blood? Read and find out!

The Soles of Your Feet

Describes the bottoms of feet, human and animal: how they look and how they function.

Paediatric Dermatology

Full of practical advice, full-colour clinical photographs, and useful algorithms and management plans, Paediatric Dermatology is an indispensable and highly-accessible guide for all healthcare professionals faced with the assessment, diagnosis and treatment of children with skin diseases.

The Beautiful Cure

"Visceral."—Wall Street Journal "Illuminating."—Publishers Weekly "Heroic."—Science The immune system holds the key to human health. In *The Beautiful Cure*, leading immunologist Daniel M. Davis describes how the scientific quest to understand how the immune system works—and how it is affected by stress, sleep, age, and our state of mind—is now unlocking a revolutionary new approach to medicine and well-being. The body's ability to fight disease and heal itself is one of the great mysteries and marvels of nature. But in recent years, painstaking research has resulted in major advances in our grasp of this breathtakingly beautiful inner world: a vast and intricate network of specialist cells, regulatory proteins, and dedicated genes that are continually protecting our bodies. Far more powerful than any medicine ever invented, the immune system plays a crucial role in our daily lives. We have found ways to

harness these natural defenses to create breakthrough drugs and so-called immunotherapies that help us fight cancer, diabetes, arthritis, and many age-related diseases, and we are starting to understand whether activities such as mindfulness might play a role in enhancing our physical resilience. Written by a researcher at the forefront of this adventure, *The Beautiful Cure* tells a dramatic story of scientific detective work and discovery, of puzzles solved and mysteries that linger, of lives sacrificed and saved. With expertise and eloquence, Davis introduces us to this revelatory new understanding of the human body and what it takes to be healthy.

Gross Science Experiments

Fun Experiments Full of Blood, Bugs, Poop and More From squirming insects to smelly human bodies, there's so much to explore with these excitingly icky experiments. Learn about everything from food, bugs, germs and poop to all the weird and wonderful things you're made of. Taste and tear through a variety of edible models of skin, blood and scabs. Rip open fake stomachs, create blood baths and test your own body to see just how gross human beings can get. Don't stop there, though! Get your friends and family involved, and give them bath bombs full of bugs or see how long it takes them to detect different smells from across the room. There are so many ways to disgust and amuse those around you, from smelly cow burps and slimy frogspawn to homemade poo launchers and experiments that explode with fizzy juices. No matter which experiment you choose, you'll have fun being gross.

The Secret Life of Boo-Boos

Discover the delightfully disgusting science of boo-boos in this colorful biology picture book for kids! Why do bruises change color? Why do we get scabs? What does blood do? Find out the surprising scientific answers to these questions and many more in *The Secret Life of Boo-Boos*! This bright and informative picture book includes: practical info and gross details about boo-boos and injuries scientific fun facts about how your body heals basic first aid tips for future boo-boos and more! The perfect book to empower kids with knowledge so they can face boo-boos with courage and curiosity!

The Design of Science, Evolution, the Environment, and Redemption

Don't send your kids off to college without this book, especially if they will be engaged in the sciences or philosophy. *The Design of Science, Evolution, the Environment, and Redemption* will clarify the differences, scientific basis, and logical foundation for the two most dominating and competing worldviews we have adopted in western society nowadays—namely science and religion. After reading this book, you will be able to better understand, articulate, and defend what you believe and why. As a society in general, we need to understand the basis of our morality and culture, and how science and religion each have a role to play. Just a few of the types of questions answered are: Is there really competition and conflict between science and religion? What is the technological and philosophical scope of science? How does our worldview affect the development of morality and virtue, both individually and collectively? Do we really need to be concerned about global environmental changes? Which type of worldview does the best job of providing answers to the tough questions on origin, purpose, environmental issues, morality, government, and eternity? Is a belief in God and the Bible part of the evolutionary process? Written by a mechanical engineer with more than thirty years of design and R&D experience, *The Design of Science, Evolution, the Environment, and Redemption* lays out in a clear, concise, easy-to-read, and entertaining manner much of the science, logic, and data used by academia and the media to answer life's toughest questions as compared to the biblical Judeo-Christian tradition. This book explores how we can measure the truthfulness, accuracy, and scope of these worldviews and how they can affect us personally, spiritually, and culturally. The answers are logically, spiritually, and technically robust, as well as just plain surprising in many ways.

What the Dog Knows

Published in hardcover as *What the dog knows: the science and wonder of working dogs* by Simon & Schuster, New York, c2013.

Cuts, Scrapes, Scabs, and Scars

Describes how the body responds to wounds and heals itself when the skin is broken and discusses how to care for minor abrasions.

The Book of Strange New Things

'I am with you always, even unto the end of the world . . .' Peter Leigh is a missionary called to go on the journey of a lifetime. Leaving behind his beloved wife, Bea, he boards a flight for a remote and unfamiliar land, a place where the locals are hungry for the teachings of the Bible - his 'book of strange new things'. It is a quest that will challenge Peter's beliefs, his understanding of the limits of the human body and, most of all, his love for Bea. The Book of Strange New Things is a wildly original tale of adventure, faith and the ties that might hold two people together when they are worlds apart. This momentous novel, Faber's first since *The Crimson Petal and the White*, sees him at his expectation-defying best. WINNER OF THE SALTIRE BOOK OF THE YEAR AWARD SHORTLISTED FOR THE ARTHUR C. CLARKE AWARD AS HEARD ON BBC RADIO 4

Science of Acne & Warts

This gruesome guide to skin, the largest organ in the human body, uses factpacked, easy-to-read text and humorous illustrations to explore everything from how skin protects us to how it can itch and irritate us, and delves into why skin is such an integral part of our identity. Each spread has multiple entry points, including an introductory paragraph, illustrations and side panels such as Fascinating Facts, Helpful Hint, Can You Believe It?, and Disgusting Data, which provide additional information and handy advice.

On Immunity

A New York Times Best Seller A National Book Critics Circle Award Finalist A New York Times Book Review Top 10 Book of the Year A Facebook "Year of Books" Selection One of the Best Books of the Year * National Book Critics Circle Award finalist * The New York Times Book Review (Top 10) * Entertainment Weekly (Top 10) * New York Magazine (Top 10)* Chicago Tribune (Top 10) * Publishers Weekly (Top 10) * Time Out New York (Top 10) * Los Angeles Times * Kirkus * Booklist * NPR's Science Friday * Newsday * Slate * Refinery 29 * And many more... Why do we fear vaccines? A provocative examination by Eula Biss, the author of *Notes from No Man's Land*, winner of the National Book Critics Circle Award Upon becoming a new mother, Eula Biss addresses a chronic condition of fear-fear of the government, the medical establishment, and what is in your child's air, food, mattress, medicine, and vaccines. She finds that you cannot immunize your child, or yourself, from the world. In this bold, fascinating book, Biss investigates the metaphors and myths surrounding our conception of immunity and its implications for the individual and the social body. As she hears more and more fears about vaccines, Biss researches what they mean for her own child, her immediate community, America, and the world, both historically and in the present moment. She extends a conversation with other mothers to meditations on Voltaire's *Candide*, Bram Stoker's *Dracula*, Rachel Carson's *Silent Spring*, Susan Sontag's *AIDS and Its Metaphors*, and beyond. *On Immunity* is a moving account of how we are all interconnected-our bodies and our fates.

Bodies: The Whole Blood-Pumping Story

What happens in your head during a headache? What are toes for? Why are some farts eggier than others? Glenn Murphy, author of *Why is Snot Green?*, answers these and a lot of other brilliant questions in this funny and informative book. *Bodies: The Whole Blood-Pumping Story* is packed with doodles and information about all sorts of incredible things, from scabs, cells and broken bones to brainpower, bacteria and deadly diseases, this book contains absolutely no boring bits! Discover more funny science with *Disgusting Science: A Revolting Look at What Makes Things Gross*.

The Publishers Weekly

Grossology is a term invented by American author/illustrator team Sylvia Branzei and Jack Keely to describe the science of really gross things. This book explains the hows and whys of life's more disgusting facts - such as why our feet smell, why breaking wind is necessary and what useful function snot performs. Whether it is slimy, mushy, crusty, scaly or stinky, a grossologist finds out lots of disgusting things about people's bodies.

Grossology

Caro, gallant and adventurous, is one of two Australian sisters who have come to post-war England to seek their fortunes. Courted long and hopelessly by young scientist, Ted Tice, she is to find that love brings passion, sorrow, betrayal and finally hope. The milder Grace seeks fulfilment in an apparently

happy marriage. But as the decades pass and the characters weave in and out of each other's lives, love, death and two slow-burning secrets wait in ambush for them.

English Mechanic and Mirror of Science

In this surprising and remarkably practical book, Dr. Skotnicki reveals the harmful effects of modern skincare habits and provides a step-by-step guide to preserve the microbiome, fight aging and develop beautiful, problem-free skin. Women, men and children are having more skin problems today than ever before. Sensitive skin prevalence has skyrocketed, and the number of people reacting to cosmetics is climbing. Why? Dermatologist Sandy Skotnicki argues that the cause is a key element of our contemporary lifestyle: the grooming and beauty habits that the advertising and personal-care product industries have encouraged us to pursue. Those miraculous cleansers, creams and balms we're buying to protect our outer layer may actually end up harming the body's largest organ. In *Beyond Soap*, Dr. Skotnicki argues that the best state for normal skin is the natural state—the one that avoids disturbing the skin's protective barrier and the bacteria that accompanied the body throughout its evolution. A combination of diagnosis and prescription, Dr. Skotnicki explains the problem with society's current cleansing and beauty habits, then provides a practical guide on how to fix things with a 3-step product-elimination diet that will help you remove unnecessary and potentially harmful ingredients from your beauty and skincare regime, returning the skin to the condition nature intended. *Beyond Soap* also includes indispensable advice on how to wash and care for the skin of adults, babies and children, followed by a common-sense beauty regimen intended to stave off aging, reduce skin problems and return the face and body to its natural glow.

The Transit Of Venus

Sy Montgomery, New York Times best-selling author and recipient of numerous awards, edits this year's volume of the finest science and nature writing. New York Times best-selling author of *How to Be a Good Creature*, *The Soul of an Octopus*, *The Good Good Pig*, and more, Sy Montgomery, selects the year's top science and nature writing from writers who balance research with humanity, and, in the process, uncover riveting stories of discovery across the disciplines.

Beyond Soap

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

The Best American Science and Nature Writing 2019

Deep in limestone country, at the corner of Wiltshire, Oxfordshire and Gloucestershire, lies the village of Coleshill. This haunting new collection from Fiona Sampson is a portrait of place, both real and imaginary; a dreamscape with its roots deep in the local soil. The poems hum with an evocative music of their own: there are hymns of the orchards, verses for walkers, songs for bees. These are slices of life and states of mind; poems of grief, fears and maledictions, but also of renewal, resurrections and the promise of spring. Coleshill emerges as a "parish of sun / and shade"; its darkness and light perfectly balanced. From the T.S. Eliot and Forward Prize shortlisted poet comes a deep, interrogative collection of astonishing clarity and power.

The Brain That Changes Itself

Children's Literature: An Invitation to the World is written and organized in a manner that engages the readers and that will instill confidence in teachers when selecting and using literature in their teaching. Readers are asked to take a world view of literature—what it is; how to recognize one's own; how to recognize an author's—and encouraged to see children's literature through a lens that includes people not like themselves. The book tackles tough issues such as gender and racial bias and how they can be insidiously promoted in literature. No other book on the market engages readers more than this one. Rather than just presenting topics, the book asks "What can we learn from them?" In addition, the first-person narrative involves readers in the discussion, rather than simply presenting content to them. Elementary and middle school teachers, curriculum developers and anyone interested in children's literature.

Coleshill

Burned-out private dick Michael McGill needs to jump-start his career. What he gets instead is a cattle prod to the crotch. The president's heroin-addicted chief of staff wants McGill to find the Constitution—the real one the Founding Fathers secretly devised for the time of gravest crisis. And with God, civility, and Mom's homemade apple pie already dead or dying, that time is now. But McGill has a talent for stumbling into every imaginable depravity—and this case is driving him even deeper into America's darkest, dankest underbelly, toward obscenities that boggle even his mind.

The Dublin Journal of Medical Science

Originally published in hardcover in 2015 by Simon & Schuster.

Children's Literature

A fresh, thought-provoking and wide-ranging study of how mankind uses its hands Why do zombies walk with their arms outstretched? How can newborn babies grip an adult finger tightly enough to dangle unsupported from it? And why is everyone constantly texting, tapping and scrolling? For anyone curious about how human beings work, the answers are hidden in plain sight: in our hands. From early tools to machinery -- from fists to knives to guns -- from papyrus to QWERTY to a swipeable screen -- the history of civilization is a history of what humans do with their hands. We have always kept our hands occupied, and if mankind's story is marked out by profound changes in how we use our hands, it is also marked by underlying patterns that never change. And as much as the things we do with our hands reflect our psychological state, they can also change that state profoundly... Drawing examples from popular culture, art history, psychoanalysis, modern technology and clinical research, Darian Leader presents a unique and fascinating odyssey through the history of what human beings do with their hands - and why.

Crooked Little Vein

FROM THE WINNER OF THE MAN BOOKER PRIZE 2014 Once upon a time that was called 1828, before all fishes in the sea and all living things on the land were destroyed, there was a man named William Buelow Gould, a white convict who fell in love with a black woman and discovered too late that to love is not safe. Silly Billy Gould, invader of Australia, liar, murderer and forger, condemned to the most feared penal colony in the British Empire and there ordered to paint a book of fish.

Rust

The first installment of Hugo-winning author Hines' new series, ideal for fans of Douglas Adams and Terry Pratchett. Marion "Mops" Adamopoulos, head of a spaceship's Health and Sanitation crew, guides her team through a zombie infestation and their discovery that the human history they took for granted isn't quite the whole story.

Hands

If you can't wait for the premiere of Fox TV's hot new series, *Scream Queens*, you will race through the pages of this pulse-pounding thriller. It's *Pretty Little Liars* meets *Final Destination* as this group of high school elites uncover whose plotting to off each and every one of them. Every year, the lives of ten girls at Vienna High are transformed. All because of the list. Kenzie Summerall can't imagine how she's been voted onto a list of the hottest girls in school, but when she lands at number five, her average life becomes dazzling. Doors open to the best parties, new friends surround her, the cutest jock in school is after her. This is the power of the list. If you're on it, your life changes. If you're on it this year? Your life ends. Praise for *They All Fall Down* "A suspenseful mash-up of *Indiana Jones* and *Pretty Little Liars*."--*The Bulletin* "Part high school drama, part mystery, this fast-paced novel will appeal to a broad range of readers who will have a difficult time putting it down."--*School Library Journal* "St. Claire keeps the tension high as she slowly uncovers the mystery and builds to a thriller-level climax."--*Kirkus* "St. Claire ropes in readers from the opening pages, creating a taut thriller that keeps the audience turning pages and guessing until the end."--*VOYA* "Best-selling author St. Claire makes her YA debut with a thriller in the tradition of *Lois Duncan* and *R. L. Stine*."--*Booklist*

Gould's Book of Fish

Originally published in German in 1935, this monograph anticipated solutions to problems of scientific progress, the truth of scientific fact and the role of error in science now associated with the work of Thomas Kuhn and others. Arguing that every scientific concept and theory—including his own—is culturally conditioned, Fleck was appreciably ahead of his time. And as Kuhn observes in his foreword, "Though much has occurred since its publication, it remains a brilliant and largely unexploited resource." "To many scientists just as to many historians and philosophers of science facts are things that simply are the case: they are discovered through properly passive observation of natural reality. To such views Fleck replies that facts are invented, not discovered. Moreover, the appearance of scientific facts as discovered things is itself a social construction, a made thing. A work of transparent brilliance, one of the most significant contributions toward a thoroughly sociological account of scientific knowledge."—Steven Shapin, *Science*

Terminal Alliance

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

They All Fall Down

While conducting research for a school paper on smallpox, Mitty finds an envelope containing 100-year-old smallpox scabs and fears that he has infected himself and all of New York city.

This is the sixth World Glaucoma Association Consensus. The relationship between ocular blood flow and glaucoma has been discussed for more than a century, and still it uniformly fuels debates at glaucoma meetings throughout the world. Clearly, the results of this report will have broad and significant impact on glaucoma research and clinical practice. The global faculty, consisting of leading authorities on the scientific and clinical aspects of ocular blood flow, have met in Fort Lauderdale on May 2, 2009 to discuss the reports and refine the consensus statements.

Ocular Blood Flow in Glaucoma

Environmental Nutrition: Connecting Health and Nutrition with Environmentally Sustainable Diets explores the connection between diet, environmental sustainability and human health. Current food systems are a major contributor to our most pressing health and environmental issues, including climate change, water scarcity, food insecurity and chronic diseases. This book not only seeks to increase our understanding of the interrelatedness of these major global issues, but also aids in the creation of new solutions. Sections discuss the diet, the health and environment trilemma, food systems and their trends, environmental nutrition as an all-encompassing discipline, and the environmental nutrition model. Demonstrates how the food system, the environment and human health are inter-related Explores how dietary patterns impact food production and agriculture choices Identifies the imbalance between current food production relative to demand Addresses how the current food system negatively impacts the environment Provides practical solutions to how diets can be both healthy and sustainable

Antennas

Each entry gives short to lengthy biographical information. Subject and name index.

Principles of Stem Cell Biology and Cancer: Future Applications and Therapeutics Tarik Regad, The John van Geest Cancer Research Centre, Nottingham Trent University, UK, Thomas J. Sayers, Centre for Cancer Research, National Cancer Institute, Frederick, USA and Robert Rees The John van Geest Cancer Research Centre, Nottingham Trent University, UK The field of cancer stem cells is expanding rapidly, with many groups focusing on isolating and identifying cancer stem cell populations. Although some progress has been made developing efficient cancer therapies, targeting cancer stem cells remains one of the important challenges facing the growing stem cell research community. Principles of Stem Cell Biology and Cancer brings together original contributions from international experts in the field to present the very latest information linking stem cell biology and cancer. Divided into two parts, the book begins with a detailed introduction to stem cell biology with a focus on the characterization of these cells, progress that has been made in their identification, as well as future therapeutic applications of stem cells. The second part focuses on cancer stem cells and their role in cancer development, progression and chemo-resistance. This section of the book includes an overview of recent progress concerning therapies targeting cancer stem cells. Features: An authoritative introduction to the link between stem cell biology and cancer. Includes contributions from leading international experts in the field. Well-illustrated with full colour figures throughout. This book will prove an invaluable resource for basic and applied researchers and clinicians working on the development of new cancer treatments and therapies, providing a timely publication of high quality reviews outlining the current progress and exciting future possibilities for stem cell research.

Asimov's Biographical Encyclopedia of Science and Technology

Bringing a timely synthesis to the field, The Handbook of Law and Society presents a comprehensive overview of key research findings, theoretical developments, and methodological controversies in the field of law and society. Provides illuminating insights into societal issues that pose ongoing real-world legal problems Offers accessible, succinct overviews with in-depth coverage of each topic, including its evolution, current state, and directions for future research Addresses a wide range of emergent topics in law and society and revisits perennial questions about law in a global world including the widening

gap between codified laws and “law in action”, problems in the implementation of legal decisions, law’s constitutive role in shaping society, the importance of law in everyday life, ways legal institutions both embrace and resist change, the impact of new media and technologies on law, intersections of law and identity, law’s relationship to social consensus and conflict, and many more. Features contributions from 38 international expert scholars working in diverse fields at the intersections of legal studies and social sciences. Unique in its contributions to this rapidly expanding and important new multi-disciplinary field of study.

Principles of Stem Cell Biology and Cancer

Divided into sections by classes and arranged alphabetically by common name, this volume presents information on endangered and threatened amphibians, corals, fish, plants, and reptiles.

The Handbook of Law and Society

What is life like underground? Where can you find the world’s ugliest fish? Why are fungi so fantastic? Take an amazing look at the natural world to find out. Discover plants and animals and where they live - from deserts to oceans, rainforests to mountains. And find out how living things evolve, reproduce, feed and defend themselves - watch a chameleon catch its prey and come face-to-face with a jellyfish propelling through water. Packed with curiosity quizzes, ‘turn and learn’ boxes and bite-sized facts to get your teeth into, there’s lots to see and explore. Perfect for homework or just for fun. Go ahead, take a leap into the natural world!

U-X-L Endangered Species

Explores the fascinating world of the life sciences, explaining the theories, concepts, discoveries, and developments frequently studied by today’s students.

Encyclopedia of Nature

How people dressed throughout history often reflects how they lived at the time, and *Clothing in World History* gives the reader a chance to explore clothing in a given place and time while also providing a general history to help put the costumes in context. This set takes the reader on a journey from the beginning of time to present day to look at what people wore in Europe, North America, South America, and Asia. Men’s, Women’s, and Children’s clothing from various social classes, as well as accessories, are included. This set is a critical guide for secondary and undergraduate students interested in history, social history, art history, fashion, and costume. It covers the history of clothing throughout the world from pre-historic times to 2006. Many cultures are included in this study of clothing within the context of social, political, economic and religious history as they pertain to each time period and place. Researchers can turn to this set first for the most essential information about a time, place, and style of dress. The three volumes are divided into comprehensive parts with the goal of making them easy to use and accessible to readers. There are other books and surveys of the history of costume that mainly concentrate on Western Europe, but few that cover different cultures and how they influence fashion in the western world. This book looks at costume throughout the world and throughout history.

All about Medicare, 2010

Presents approximately 150 primary source documents, such as speeches, legislation, memoirs, newspaper articles, and interviews, related to government, politics, and protest between the nineteenth and twenty-first centuries.

U.X.L Complete Life Science Resource: A-E

U.X.L Civics supports middle school civics, economics, history, and U.S. government curricula in its three full-color, thematically arranged volumes. Volume 1: *American Government* covers the foundations and structures of local and state government as well as the three federal branches, the role of political parties and other entities that influence the government, and the intersection of government and the economy. Volume 2: *Rights, Liberties, and Obligations* addresses the meaning of citizenship and basic democratic values as well as the U.S. Constitution, citizens’ civil rights and responsibilities, and the civil rights movement. Volume 3: *U.S. Foreign Policy and Global Affairs* provides an overview of its evolution over time, notes key players and institutions, describes military aid and intervention, intergovernmental agencies, and the role of the United States in the global economy and international humanitarian

efforts. Each chapter begins with guided reading questions to encourage critical thinking and includes suggestions for individual and group activities. Primary sources, full-color photos and graphics, and concise glossaries accompany the narrative and a comprehensive subject index and resource guide in each volume enhance access. The fourth volume is a Teachers Guide with additional curriculum support. UXL Civics: Teachers Guide offers additional curriculum support in the form of bul

The Greenwood Encyclopedia of Clothing through World History

The first historical heroic epic authored by a woman, Scanderbeide recounts the exploits of fifteenth-century Albanian warrior-prince George Scanderbeg and his war of resistance against the Ottoman sultanate. Filled with scenes of intense and suspenseful battles contrasted with romantic episodes, Scanderbeide combines the action and fantasy characteristic of the genre with analysis of its characters' motivations. In selecting a military campaign as her material and epic poetry as her medium, Margherita Sarrocchi (1560?–1617) not only engages in the masculine subjects of political conflict and warfare but also tackles a genre that was, until that point, the sole purview of men. First published posthumously in 1623, Scanderbeide reemerges here in an adroit English prose translation that maintains the suspense of the original text and gives ample context to its rich cultural implications.

Government, Politics, and Protest

Ezell critically examines these successful women's literary histories and applies to them the same self-conscious feminism that critics have applied to more traditional methods. Drawing both on French feminisms and on recent historicist scholarship, Ezell points us to new possibilities for the recovery of early modern women's literary history. By championing the recovery of "lost" women writers and insisting on reevaluating the past, women's studies and feminist theory have effected dramatic changes in the ways English literary history is written and taught. In *Writing Women's Literary History*, Margaret Ezell critically examines these successful women's literary histories and applies to them the same self-conscious feminism that critics have applied to more traditional methods. According to Ezell, by relying not only on past male scholarship but also on inherited notions of "tradition," some feminist historicists replicate the evolutionary, narrative model of history that originally marginalized women who wrote before 1700. Drawing both on French feminisms and on recent historicist scholarship, Ezell points us to new possibilities for the recovery of early modern women's literary history.

Nuclei and particles

Explores cultural manifestations of female vocality in the light of theories of subjectivity, the body, and sexual difference.

UXL Civics

Provides information on the physical characteristics, geographic range, habitat, diet, behavior, reproduction, and conservation status of a variety of insects and spiders.

Scanderbeide

"Consumer Health focuses on the U.S. healthcare system and the individual's experience with it. Entries cover topics related to the current state of health insurance, the various kinds (including government programs like Medicare and Medicaid) and methods of its delivery, as well as the history of insurance and the evolution of our current for-profit system. Healthcare legislation and reform is also discussed. The Patient Protection and Affordable Care Act is discussed in detail"--

Writing Women's Literary History

This refreshing work shows how prayer is the foundation for caring relationships.

Embodied Voices

Veronica Franco (whose life is featured in the motion picture *Dangerous Beauty*) was a sixteenth-century Venetian beauty, poet, and protofeminist. This collection captures the frank eroticism and impressive eloquence that set her apart from the chaste, silent woman prescribed by Renaissance gender ideology. As an "honored courtesan\

The Beatles Records on Vee-Jay

This first-person narrative by Therese is the charming tale of an innocent's initiation into sexual happiness. Self-discovery in a convent leads her to her confessor, Father Dirrag, and she is soon launched upon the path of reason that convinces her that passion and love of the Deity are equal gifts of God. With additional mentors, Therese learns that sensations are but a part of temperament, as natural as hunger and thirst, and all may be satisfied as long as it does not harm others.

Student Animal Life Resource

A humorous backstage pass to opera: comical stories collected by the author immortalize real-life blunders, pranks, idiocies and sabotage. Illustrated with witty black and white cartoons.

Consumer Health Care

This book shares the latest research and practice-oriented findings in medical sciences with a wide audience. It addresses a range of contemporary issues, often unresolved or contentious, across various medical fields, including advances in the management of hemorrhagic brain stroke. It also discusses metastatic renal cell carcinoma – a global scourge with an extremely poor long-term survival prognosis, the course and sequelae of renal cell carcinoma, as well as advances in targeted molecular therapy with sunitinib, a receptor tyrosine kinase inhibitor. Further, it examines the molecular targeting of proliferative signaling of the epidermal growth factor receptor in the first-line treatment of patients with metastatic non-small-cell lung cancer. Other articles cover clearance of toxins in hemodialyzed patients; the search for diagnostic and therapeutic markers in the connective tissue disease scleroderma; obesity linked to inappropriate dietary habit; clinical problems related to the diagnosis of sensitization to fungi and its role in asthma; and reasons for the perilous trend of avoiding basic vaccinations in children. Lastly, the book explores the rapid developments in e-health technologies that increase access to health services, particularly for the elderly. The book is intended for clinical specialists, researchers, and all allied health professionals from various fields.

Praying for You

Neural stem cells offer a valuable model system for delineating the cellular and developmental processes in normal and diseased states of the central nervous system. In particular, neural stem cells have huge potential in regenerative medicine, owing to their expansion capability in culture and the ability to differentiate into multiple sub-neural lineages. Neural Stem Cell Assays provides a detailed and comprehensive review of the basic methods for neural stem cell cultures. Including an overview of progress in the field over the past decade, Neural Stem Cell Assays is a one-stop reference for consistent methods and reliable tools that span the entire assay work flow, from isolation or generation of neural stem cells to characterization, manipulation and final application of neural stem cells in disease paradigms such as Parkinson's disease, multiple sclerosis and amyotrophic lateral sclerosis. An excellent source of information for academic, pharmaceutical and biotechnology researchers who are new to the neural stem cell field, Neural Stem Cell Assays is an invaluable to experienced users who wish to integrate newly developed tools and technologies into their workflow. The book also covers important course material for students at the undergraduate and graduate level who are learning the basics of neural stem cell cultures, and differentiation to sub-neural lineages.

Poems and Selected Letters

New Testament theology, maintains Donald Guthrie, centers on Jesus Christ--his person, work and mission--and is unified by repeated emphasis on the fulfillment of Old Testament promise, community, the Spirit and the future hope. Now in paperback, this comprehensive New Testament theology is a standard reference and text, reflecting mature conservative scholarship at its best.

Gospel-worship, Or, The Right Manner of Sanctifying the Name of God in Generall

From a March 2000 conference at the University of Pennsylvania, 16 essays explore such aspects as women's dialogue writing in 16th-century France, Maria Domitilla Galluzzi and the Rule of St. Clare of Assisi, courtly origins of new literary canons, the earliest anthology of English women's texts, and the reinvention of Anne Askew. One of the contri

Encyclopedia of Crime and Justice: Abortion to Cruel & unusual punishment

Perceptions about gender and sexuality have shaped the lives of men and women in every known culture and in every period of history. To study these perceptions one must delve into the underlying religious, social, philosophical and scientific influences. Understanding gender and sexuality during the Middle Ages requires an examination of the ideas, laws and institutions of the time--for example, the regulations of the Christian church, the anatomical studies of the medieval medical community, the chronicles of the time and the social criticism found in medieval literature. This reader brings such documents from throughout the medieval world into one collection. Representing a diverse range of ethnic, geographic and religious backgrounds, documents of the late Roman, Germanic, Anglo-Norman, Mediterranean, Byzantine, Slavic, Jewish and Islamic identities are all included. The book's chapters are organized according to nine areas--the Bible; Christian thought; chronicles; law; biology, medicine and science; literature; witchcraft and heresy; Judaism; and Islam--allowing for comparative examination of different societies and periods of the Middle Ages.

The Gale Encyclopedia of Science

This edition profiles living persons in the physical and biological fields, as well as public health scientists, engineers, mathematicians, statisticians, and computer scientists.

Therese the Philosopher

This volume offers a comprehensive account of writing by women in Italy.

Opera Antics and Anecdotes

Essays by scholars from around the world explore the means by which music's long-acknowledged potential to persuade, seduce, indoctrinate, rouse, incite, or even silence listeners has been used to advance agendas of power and protest.

Medical Science and Research

Memoirs of Henrietta Caracciolo
