Pictures from Italy

In 1844, Charles Dickens took a break from novels to travel in Italy for almost a year. This thrilling travelogue is the result of his encounters with Italy's colorful street life, the visible signs of its richly textured past, and its urban desolation. Dickens was particularly drawn to the costumes, cross-dressing, and sheer exuberant energy of the Roman carnival. Avoiding the traditional tourist sites, Pictures from Italy reveals the anxieties and concerns of its author as he presents, according to Kate Flint, the country "like a chaotic magic-lantern show, fascinated both by the spectacle it offers, and by himself as spectator".

Italy, Thru My Lens

Michael Belardo paints a beautiful picture of scenic Italy in his new book Italy, Thru My Lens: A Photographer's Guide to Italy. The author has traveled throughout Italy for the last 28 years, and as a photographer, each trip posed another challenge to capture this magical country and its picturesque regions. He says, "I put together a travel book that is photo based. The concept is from the south to the north, each photo represents a place that I hope you will want to visit. The photography for me is very important, and I wanted to give you a little more than a regular travel book. My photos are all places you can visit. Use the images as an inspiration to explore Italy. It's a magical country and you can never go there too often." "Michael is not just a great photographer. In his photos, the images, people, places, and scenes come to life, through his vivid depiction and careful attention to detail. You always feel a 'sense of place,' and want and need to be in that place. Through 'his lens,' Michael shares with you his experiences and emotions as a photographer and story teller." – Bob Lipinski, founder, Bob Lipinski Consulting "His albums of Italy describe familiar places, with fresh stories to tell. Even the Leaning Tower of Pisa, the Duomo of Florence, and il Colosseo in Rome look different from the postcards. Having an Italian background obviously makes a difference!" – Frank E. Johnson, author and importer

Italy from the Air

Travel has often been taken as a metaphor for human life, and the concept of travel and the traveller has varied across centuries, cultural traditions, and social groups. Following a diachronic overview of travel writing, this study considers some of the most important Italian writers of the late nineteenth and twentieth-centuries, such as D'Annunzio, Pirandello, Svevo, with particular focus on their note-books, letters, travel diaries, and reportage. An analysis of this material indicates that these authors collect their miscellaneous notes, in some cases, as private and personal documents, and in other instances to possibly develop future articles, essays or novels. It goes on to focus on the journey par excellence, the trip to America, regarded as an Eden. In many of their works, writers such as Ojetti, Giacosa, Cecchi, Piovene express their ambivalence towards a place often idealized as a land of freedom and opportunity, yet also acknowledged as a land where oppression and violence are all too real. The study attempts to demonstrate how all the traveller-writers discussed "translate" their sense of discovery in their books, and the extent to which that sense affects the conception of each of the texts.

Travelling In and Out of Italy

The essays collected in this volume offer fresh readings of Dickens's travelogues and novels, often pointing to the many-sidedness of his personality. The 'uncommercial traveller' emerges as an ecumenical John Bull, chary of the alien but greedy of novelty, a man whose incursions on well-trodden or unfamiliar ground are always journeys into the uncanny. Besides dealing with the geography of the novelist's imagination, the book explores numerous 'new worlds' such as the inspiring world of Victorian science and Dickens's responses to it or the world of modern literary theory that shapes our own responses to his work.

Travels in Liguria

Italy is enchanting, bewitching. It casts a spell. It is easy for visitors to fall in love with Italy because every minute of every day they spend there has something to offer them, to appeal to all of their senses, whether they are visiting its museums or flying over its rooftops, bell towers, domes, endless plains, rolling hills and majestic mountains. A wealth of beauty unfolds, the work of Man and Nature that belongs to all: visible, accessible and famous. Beauty that lies in the historical and architectural heritage to be found in churches and abbeys, in historic town centers and museums, in castles and archaeological sites, a heritage steeped in ancient history. It is also the beauty of the natural heritage that lies in mountain roads, national parks and idyllic beaches. But that is not all. In Italy are remote landscapes and secrets that must be discovered, sniffed out and at times tracked down. There are monasteries, hermitages, watchtowers, treasure collections, regional traditions, arts and traditional trades. A heritage to protect and hand down to future generations, and to all those future travelers who will always come to Italy. Even if it is just a flying visit ...

Historical, Literary, and Artistic Travels in Italy, a Complete and Methodical Guide for Travellers and Artists

In this collection of essays, M. Dane ('Duke') Picard takes the reader on journeys across deserts, mountains, canyons, and rivers from the American Southwest to Italy and France. His blend of vivid

description and humor evokes the rugged days of field petroleum geology in the Great Plains and pastel Badlands of Utah and Wyoming in the 1950s and later days unlocking the geological secrets of sandstone in the Rockies. Along the way, he pokes gentle fun at the academic life in stories that will make anyone smile who's ever sat on a faculty committee or chaired a professional meeting. The final essays on his travels through Provence and Italy are rich with details of the beauty and the history - both human and geological - of the regions. M.D. Picard is the author of numerous professional articles and books, and has served as president of the National Association of Geology Teachers, the Society of Sedimentary Geology, and the Rocky Mountain section of the American Association of Petroleum Geologists. He is well known to the geological community for the essays and book reviews he has published over the last ten years in geoscience journals and magazines.

Italy from the Air

Witty and “enchanting” reflections on the experience of travel, with a focus on art, music, and literature, by the author of *Brave New World* (The Spectator). One of the most renowned and prolific writers of the twentieth century, Aldous Huxley produced not only dystopian fiction like *Brave New World* and philosophical memoirs like *The Doors of Perception*, but also insightful travel writing. Here, he discusses his visits to Italy, France, and other European destinations; reflects on cultural landmarks; and ruminates on the benefits and challenges of travel itself, offering a fascinating glimpse into the Europe of a century ago—and the mind of a remarkable author. “As opposed to those who believe that the best picture is the most famous or expensive one, or the one that wins a prize, Huxley speaks for those prepared to spend contemplative time with works of art.” —The Sydney Morning Herald

Travels Through Germany, Bohemia, Hungary, Switzerland, Italy, and Lorrain

The urban legacy of the Global South since the colonial era and how sustainable development and environmental and social justice can be achieved. Remarkably little of the expansive literature on development and globalization considers actual urban form and the physical design of cities as outcomes of these phenomena. The development that has shaped historic transformations in urban form and urbanism—and the consequent human experiences—remains largely unexplored. In this book, Tridib Banerjee fills this void by linking the idea of development with those of urbanism, urban form, and urban design, focusing primarily on the contemporary cities in the developing world—the Global South—and their intrinsic prospects in city design. Further, he examines the endogenous possibilities for the future design of these cities that may address growing inequality and the environmental crisis. Banerjee deftly traces the urban legacy of the Global South from the beginning of the colonial era, closely examining the economic, political, and ideological forces that influenced colonial and postcolonial development, drawing from relevant experiences of different cities in the developing world and discussing the arguments for the historic parity of these cities with their Western counterparts. Finally, Banerjee considers essential notions of future city design that are grounded in the critical challenges of sustainable development, equity, environmental and social justice, and diversity, and how such outcomes can be achieved. This book serves as the opening of a long overdue conversation among design, development, and planning scholars and practitioners, and those interested in the urban development of the Global South.
