The Tortoise and the Hare

"One of the best books on the American presidency to appear in recent years." —Thomas Mallon, *The Wall Street Journal* "Fun and fascinating...It's witty, charming, and fantastically learned. I loved it." —Rick Perlstein Based on a decade of research and reporting, *Author in Chief* tells the story of America's presidents as authors—and offers a delightful new window into the public and private lives of our highest leaders. Most Americans are familiar with Abraham Lincoln's famous words in the Gettysburg Address and the Emancipation Proclamation. Yet few can name the work that helped him win the presidency: his published collection of speeches entitled *Political Debates between Hon. Abraham Lincoln and Hon. Stephen A. Douglas*. Lincoln labored in secret to get his book ready for the 1860 election, tracking down newspaper transcripts, editing them carefully for fairness, and hunting for a printer who would meet his specifications. *Political Debates* sold fifty thousand copies—the rough equivalent of half a million books in today's market—and it reveals something about Lincoln's presidential ambitions. But it also reveals something about his heart and mind. When voters asked about his beliefs, Lincoln liked to point them to his book. In Craig Fehrman's groundbreaking work of history, *Author in Chief*, the story of America's presidents and their books opens a rich new window into presidential biography. From volumes lost to history—Calvin Coolidge's *Autobiography*, which was one of the most widely discussed titles of 1929—to ones we know and love—Barack Obama's *Dreams from My Father*, which was very nearly never published—Fehrman unearths countless insights about the presidents through their literary works. Presidential books have made an enormous impact on American history, catapulting their authors to the national stage and even turning key elections. Beginning with Thomas Jefferson's *Notes on the State of Virginia*, the first presidential book to influence a campaign, and John Adams's *Autobiography*, the first score-settling presidential memoir, *Author in Chief* draws on newly uncovered information—including never-before-published letters from Andrew Jackson, John F. Kennedy, and Ronald Reagan—to cast fresh light on the private drives and self-doubts that fueled our nation's leaders. We see Teddy Roosevelt as a vulnerable first-time author, struggling to write the book that would become a classic of American history. We see Reagan painstakingly revising *Where's the Rest of Me?*, a forgotten memoir in which he sharpened his sunny political image. We see Donald Trump negotiating the deal for *The Art of the Deal*, the volume that made him synonymous with business savvy. Alongside each of these authors, we also glimpse the everyday Americans who read them. Combining the narrative felicity of a journalist with the rigorous scholarship of a historian, Fehrman delivers a feast for history lovers, book lovers, and everybody curious about a behind-the-scenes look at our president.

Author in Chief

The Judgment of Humanity is a timely book about Judgment Day-and getting people ready for the next world on this planet.

The Fear Zone 2

A young teenager stays a step ahead of her parents' sexuality-based restrictions by running away and learns a very different set of rules. A woman grieves the loss of a sister, a "gay divorce," and the pain of unacknowledged abuse with the help of a lone wallaby on a farm in Washington State. A professor of women's and gender studies revels in academic and sexual power but risks losing custody of the family dog. In Corinne Manning's stunning debut story collection, a cast of queer characters explore the choice of assimilation over rebellion. In this historical moment that's hyperaware of and desperate to define even the slowest of continental shifts, when commitment succumbs to the logic of capitalism and nobody knows what to call each other or themselves—Gay? Lesbian? Queer? Partners? Dad?—who are we? And if we don't know who we are, what exactly can we offer each other? Spanning the years 1992 to 2019, and moving from New York to North Carolina to Seattle, the eleven first-person stories in *We Had No Rules* feature characters who feel the promise of a radically reimagined world but face complicity instead.

Stormsong

"Elegant and gritty, angry and funny. Staples's work is emotional without being sentimental. Dennis unmakes something in us, then remakes it, a quilt of characters that embody this town, this place, which sleeps but doesn't dream, or it is all a dream we want to wake up from with its characters." —Tommy Orange, author of *There, There* On an Ojibwe reservation called Languille Lake, within the small town of Geshig at the hub of the rez, two men enter into a secret romance. Marion Lafournier, a midtwenties gay Ojibwe man, begins a relationship with his former classmate Shannon, a heavily closeted white man. While Marion is far more open about his sexuality, neither is immune to the realities of the lives of gay men in small towns and closed societies. Then one night, while roaming the dark streets of Geshig, Marion unknowingly brings to life the spirit of a dog from beneath the elementary school playground. The mysterious revenant leads him to the grave of Kayden Kelliher, an Ojibwe basketball star who was murdered at the age of seventeen and whose presence still lingers in the memories of the townsfolk. While investigating the fallen hero's death, Marion discovers family connections and an old Ojibwe legend that may be the secret to unraveling the mystery he has found himself in. Set on a reservation in far northern Minnesota, *This Town Sleeps* explores the many ways history, culture, landscape, and lineage shape our lives, our understanding of the world we inhabit, and the stories we tell ourselves to make sense of it all.

Are You Listening?

The thrilling conclusion to the epic middle grade fantasy trilogy from Katherine Applegate, the New York Times bestselling and Newbery Award-winning author of *The One and Only Ivan* (now a major motion picture!), *The One and Only Bob*, *Wishtree*, and *Crenshaw*! In the beginning, Byx's original quest was to discover if there were more of her kind, or if she was destined to become an ending--the last dairne alive. She did indeed find more dairnes, and along the way she also created allies among other creatures in her world, including humans, felivets, raptidons, and wobbyks. But Byx and her new friends soon learned that it wasn't just dairnes in jeopardy of extinction, but that everyone was at risk. With the world in unprecedented danger, Byx must rally creatures of all kinds to lead a revolution. Katherine Applegate's *Ending* series has so far earned a collective five starred reviews, and each of the prior books has debuted on the New York Times bestseller list. She once again delivers an action-packed middle grade fantasy with a unique setting, enthralling characters, and gripping adventure that is perfect for fans of Rick Riordan, Brian Jacques, and Tui T. Sutherland.

She takes Y  n back to her home, a vast, vertiginous palace-prison where every door can lead to death. With dragons.” —Fran Wilde, Hugo and Nebula nominated author of *The Bone Universe* and *The Gemworld* series

We Had No Rules

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

Ending #3: The Only

A killer stalks the city streets, and one FBI agent is determined to bring him down in Janie Crouch's *Primal Instinct*. On the crowded streets of San Francisco, a serial killer watches and waits. Known only

as "Simon Says," he lures his next victim while the FBI grasps for answers. Desperate, they turn to Adrienne Jeffries. Adrienne has an uncanny talent for getting inside the city's most dangerous minds. But first she'll have to get past FBI agent Conner Perigo. Skeptical of Adrienne's abilities, Conner begrudgingly enlists her help...unprepared for the powerful attraction that could jeopardize their focus. With little time, and everything to lose, they must work to find Simon's next victim--before he does.

"Science Fiction and the Hidden Global Agenda - Omnibus Edition" is the complete Volumes One and Two (2016 Editions) brought together for the first time in one complete work. In the book, alternative knowledge researcher Carl James studies the science fiction genre and its myriad connections to the global power elite. The research exposes all manner of social engineering paradigms, predictive programming, embedded occult and arcane symbolism and themes, secret military and intelligence experiments, cover-ups and conspiracies of silence, and a larger global elite agenda mechanism. Was Aldous Huxley helping to implement a mass social engineering agenda? Was the 1938 War of the Worlds radio broadcast a psychological operation orchestrated by The Rockefeller family and The Tavistock Institute? Did Stanley Kubrick help to fake NASA's Apollo missions? Why was Star Trek creator Gene Roddenberry working for a group heavily supported by SRI, the U.S. military, NASA and the CIA? Why did Hollywood director Ridley Scott produce P.R. films for the social engineering organisation "Common Purpose"? Did George Lucas embed subliminal psychic messages in the raw film of Star Wars: A New Hope? Did the Back to the Future film trilogy foreshadow the events of 9/11? Is contemporary science fiction a mass conduit for the principles of "Saturn Worship"? These questions, and many more, are examined in "Science Fiction and the Hidden Global Agenda."

Hollywood Highbrow

History is written by the winners; including the histories of science and scholarship. Unorthodoxies that flourish at the grassroots are often beneath the contempt of historians. Zetetic astronomy (flat-Earth science) was a household term in Victorian England, but not a single reference to it is found in conventional histories. We ignore such histories at our peril; the modern intelligent design movement is almost a carbon copy of the 19th century flat-Earth movement in its argumentative techniques. When orthodox science finds itself stumped, or a certain segment finds it unpalatable, the unorthodox may rush in to fill the void. The past two decades have brought a surge of interest in the history and philosophy of science. But how do we discern between pseudo and actual science? To fully understand what science is, we must understand what science is not. Written with penetrating insight into the minds of alternative thinkers, this book throws light on the differences between pseudo and actual science. The droll humor that permeates Worlds of Their Own makes it as enjoyable a read as it is enlightening. Despite its focus on unorthodox ideas, Worlds of Their Own is about human nature. Whether they drew their ideas from the Bible or nature, all the pseudoscientists discussed in this book were driven to communicate their truth to the misinformed world. None was afflicted with self-doubt. All defended their truth with similar standards of evidence, modes of reasoning, and methods of scholarship. Their counterparts are legion the blue-collar philosopher who refutes Einstein from his barstool, the preacher who refutes (but cannot define) evolution from his pulpit, the narcissist who promotes quackery courtesy of modern talk shows and infomercials. Each topic discussed in Worlds of Their Own covers a once-popular concept that persists to this day. Numerous works examine or debunk pseudoscientific ideas. Worlds of Their Own is unique in letting unorthodox thinkers speak for themselves. Readers will want to buy the book to learn how such people argued their cases against conventional views. Worlds of Their Own is a timeless book offering humor, substance, and analysis for a mainstream audience. Moreover, it is a unique source book on unorthodox ideas that nearly everyone has heard about but few fully understand. And the source material is rare. For example, the National Union Catalog lists only four U.S. libraries the Library of Congress, New York Public, Yale, and Duke that hold Carpenters One Hundred Proofs That the Earth Is Not a Globe (1885). Bob's own extensive collection of flat-Earth literature as well as his collection of literature advocating various other unorthodoxies was donated to the University of Wisconsin after his death. It is housed there as the Robert Schadewald Collection on Pseudo-Science. This collection consists of 885 books and pamphlets (many from the 19th century) as well as 70 boxes of personal files and collected news clippings. Praise for Bob Schadewald: Perhaps the most important thing that Bob taught me has to do with the striking insights one can gain by first studying the history of one particular kind of crackpot science for example, the flat-Earth movement in past centuries and then realizing how reliable that knowledge can be for gaining insight into a seemingly unrelated pseudoscience of more contemporary

times for example, the creation science movement that flourished in Iowa and across the country in recent decades, and is now returning as intelligent design today. Nobody, but nobody could make the case for this more convincingly than Bob Schadewald, and Lois has included some of Bobs best material doing so between the covers of Worlds of Their Own. John W. Patterson.emeritus Materials Science & Engineering, Iowa State University Bob Schadewald was an insightful thinker w

The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

One Night Stand with Billionaire

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Finding Forever

The New York Times bestseller that gives "readers with an entrepreneurial turn of mind . . . road maps on how millionaires found their niches" (USA Today). The author of the blockbuster bestseller *The Millionaire Next Door: The Surprising Secrets of America's Wealthy* shows how self-made millionaires have surmounted shortcomings such as average intelligence by carefully choosing their careers, taking calculated risks, and living balanced lifestyles while maintaining their integrity. Dr. Thomas J. Stanley also builds on his research from *The Millionaire Next Door* and takes us further into the psyche of the

American millionaire. Stanley focuses in on the top one percent of households in America and tells us the motor behind the engine; what makes them tick. His findings on how these families reached such financial success are based on in-depth surveys and interviews with more than thirteen hundred millionaires. "A very good book that deserves to be well read." —The Wall Street Journal "Worth every cent . . . It's an inspiration for anyone who has ever been told that he wasn't smart enough or good enough." —Associated Press "A high IQ isn't necessarily an indicator of financial success . . . Stanley tells us that the typical millionaire had an average GPA and frugal spending habits—but good interpersonal skills." —Entertainment Weekly "Ideas bigger than the next buck." —Orlando Sentinel

Discover and cultivate the secret traits of self-made billionaires with **THE SELF-MADE BILLIONAIRE EFFECT** by John Sviokla and Mitch Cohen Imagine what Atari might have achieved if Steve Jobs had stayed there. Or what Steve Case could have done for Pepsi if he hadn't left for a start-up that eventually became AOL. Scores of billionaires worked for established corporations before they struck out on their own. People like Michael Bloomberg and Mark Cuban went on to build iconic household brands. Why didn't their former employers hang onto to these people? And why are most big companies unable to create as much value as the world's 800 self-made billionaires? Billionaires aren't necessarily luckier, smarter or harder working than the rest of us - and they rarely build something brand-new. The key difference is their mindset. They redefine what's possible - and they are critical to any company looking to create massive value. The Self-Made Billionaire Effect breaks down the five critical habits of massive value-creators, so you can learn how to identify, encourage, and retain them - and even become one yourself. It will forever change the way you think about talent and business value. John J. Sviokla is the head of Global Thought Leadership with PricewaterhouseCoopers. He is a frequent speaker on innovation, growth, and customer behavior. In addition to working with clients, John serves on PwC's Advisory Leadership Group and Global Thought Leadership Council. He was on the faculty of the Harvard Business School for ten years and has written for Harvard Business Review, The Wall Street Journal, Financial Times, and Sloan Management Review. Mitch Cohen is PwC's Vice Chairman. During his 33 years at the firm and 20 years as a partner, Cohen has held a variety of leadership roles and served numerous Fortune 500 clients.

Compromising Positions

A lively and personal book that returns the city to political thought Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. The Spirit of Cities revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at nine modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. The Spirit of Cities is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy

and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of "civicism," the pride city dwellers feel for their city and its ethos over that of others.

Bossing the Billionaire

"MISHA I can't help but smile at the lyrics in her letter. She misses me. In fifth grade, my teacher set us up with pen pals from a different school. Thinking I was a girl, with a name like Misha, the other teacher paired me up with her student, Ryen. My teacher, believing Ryen was a boy like me, agreed. It didn't take long for us to figure out the mistake. And in no time at all, we were arguing about everything. The best take-out pizza. Android vs. iPhone. Whether or not Eminem is the greatest rapper ever... And that was the start. For the next seven years, it was us. Her letters are always on black paper with silver writing. Sometimes there's one a week or three in a day, but I need them. She's the only one who keeps me on track, talks me down, and accepts everything I am. We only had three rules. No social media, no phone numbers, no pictures. We had a good thing going. Why ruin it? Until I run across a photo of a girl online. Name's Ryen, loves Gallo's pizza, and worships her iPhone. What are the chances? F*ck it. I need to meet her. I just don't expect to hate what I find. RYEN He hasn't written in three months. Something's wrong. Did he die? Get arrested? Knowing Misha, neither would be a stretch. Without him around, I'm going crazy. I need to know someone is listening. It's my own fault. I should've gotten his phone number or picture or something. He could be gone forever. Or right under my nose, and I wouldn't even know it. *Punk 57 is a stand alone New Adult romance. It is suitable for ages 18+."--Amazon.com

The ultimate behind-the-curtain look at the hedge fund industry, unlocking the most valuable stories, secrets, and lessons directly from those who have played the game best. Written by Maneet Ahuja, the hedge fund industry insider, *The Alpha Masters* brings the secretive world of hedge funds into the light of day for the first time. As the authority that the biggest names in the business, including John Paulson, David Tepper, and Bill Ackman, go to before breaking major news, Ahuja has access to the innermost workings of the hedge fund industry. For the first time, in *Alpha Masters*, Ahuja provides both institutional and savvy private investors with tangible, analytical insight into the psychology of the trade, the strategies and investment criteria serious money managers use to determine and evaluate their positions, and special guidance on how the reader can replicate this success themselves. There are few people with access to the inner chambers of the hedge fund industry, and as a result it remains practically uncharted financial territory. *Alpha Masters* changes all that, shedding light on star fund managers and how exactly they consistently outperform the market. The book: Contains easy-to-follow chapters that are broken down by strategy--Long/Short, Event Arbitrage, Value, Macro, Distressed, Quantitative, Commodities, Activist, pure Short, Fund of Funds. Includes insights from the biggest names in the trading game, including Ray Dalio, Marc Lasry, Jim Chanos, Sonia Gardner, Pierre Lagrange, and Tim Wong. Features contributions from industry icon Mohamed El-Erian. Many of the subjects profiled in this groundbreaking new book have never spoken so candidly about their field, providing extremely provocative, newsworthy analysis of today's investing landscape.
